THE SALVATION ARMY

The work of the Salvation Army in India and Ceylon was commenced in 1882 by the late Commissioner Booth-Tucker, and was for many years under his control, with Headquarters in India For some time now, the areas occupied have been divided for administrative pur posses into 6 Partitorial coch under a Territorial poses into 6 Territories, each under a Territorial Commander, and one smaller Command

Northern Territory, with Headquarters at

Lahore

Western Territory, with Headquarters at Bombay Madras and Telugu Territory, with Head

quarters at Madras Headquarters at with Southern Territory,

Trivandrum, in Travaneore State Territory, with Hendquarters at Ceylon

Colombo Territory, with Headquarters at Eastern Calcutta

Burmah Command, with Headquarters at Rangoon

The Commanders are directly responsible to the International Headquarters in London

Northern Territory -The area in this Ter ritory is the Salvation Army work in the Punjab, Delhi and United Provinces The Territory is controlled from Lahore

Evangelistic work, especially among the "de pressed classes," is extensively carried on, both

in the Punjab and the U P

A number of Settlements for the reformation of "Criminal Tribes" are under the control of the Salvation Army in the United Provinces (where this important reformative work was commenced) A special Settlement has also been opened in the Andamans during the last few years spee in the Multan District where a population of 1 800 has been cettled. The 1 nd will ultimately become the property of the holders

Medical work is carried on in two Hospitals one of which is in the Punjah and the other in the Utiled Provi ces and also in one dispensary The Hospital in the U.P. has been "med to the Military for the duration of th

therinstitutions include Day and Boarding cols Agricultural Colonies Soliiers and Forces only

with offences, and it left their position as exceptional as hefore The general disquality in the following parties, to the following parties, to but if a native of India be appointed to the post Federation, any of the Province but if a native of India be appointed to the post Federated States, if and in so fa reasons judge, his Federated States, if and in so fa of district magistrate or sessions judge, his Federated States, if and in so to powers in regard to jurisdiction over European involves any question (of law British subjects are the same as tiose of an which the existence or extent Englishman holding the same office This depends Certain restrictions a provision however is subject to the condition the Court's jurisdiction over dis that every European British subject brought state is a party for trial before the district magistrate or sessions jurisdiction the Court can pre judge has the right, however trivial be the declaratory judgment. The Ce charge, to common to be tried by a jury of which with appellate jurisdiction over not less than half the number shall be Euro-deeree or final order of a Highpeans or Americans Whilst this charge India, if the High Court certific was made in the powers of district magistrates, involves a substantial question the law in regard to other magistrates remained interpretation of the Government unaltered "

After a discussion on this subject in the in Council citier with or without spislative Assembly in September 1921, Fire Federal Legislature is empore Legislative Assembly in September 1921, Fire Tederal Legislature is emport the following motion was adopted — That in the appellate jurisdiction of the order to remove all racial distinctions between so as to extend to certain civil Indians and Europeans in the matter of their inregistance. An appeal also lies trial and punishment for offences, a committee
to appointed to consider winat amendments
on the ground that a question c
should be made in the provisions of the Code
of Criminal Procedure, 1898, which differentiate
between Indians and European British subjects
and American and Europeans who are not
iegislative authority vested in the British subjects in criminal trials and proceed ings and to report on the best methods of giving or arising under Agreement made effect to their proposals. As a result of the of the Act in relation to the adreeommendations of the Reelai Distinctions the State of a law of the Federa Committee the law on the subject was further. An appeal may be brought to. modified, and by the Criminal Law Amendment Council from a decision of the Fe Act XII of 1923 in place of the old Chapter its original jurisdiction in any XXXIII (sections 443-463) the new Chapter concerns the interpretation of the XXXIII (sections 443-440) with certain supplied to the council made thereunder the council made t mentary provisions were substituted This of the executive or legislative average has in some measure reduced the differences in the Federation by virtue of an between the trials of Europeans and of Indians Accession, or under an agreement Since 1836 no distinction of Part VI of the Act under the Code race has been recognised in the civil courts brought to the Privy Council when throughout Indla.

The Federal Court

A Federal Court is, according to the Joint Pariamentary Committee's Report, a necessary element of any Federal Constitution It is at once the guardian and interpreter of the Consti tution, and arbiter of the disputes between the Federal Units The Government of India Act 1935 accordingly provides (sections 200-218) that there shail be a Federal Court consisting of a Chief Justice of India and such number of other judges as His Majesty may deem necessary but the number of puisne judges small not exceed six, unless and until an address is submitted by the Federal Legislature for an increase Every judge of the Federal Court is to be appointed by His Majesty by warrant under the Royal Sign Manual He shall hold office until he attains the age of 65 years, but is liable to be removed from office on the ground of musbeha-tiour or of bodily or mental infirmity, provided that the Judiciai Committee of the Privy Council on a reference reports that the judge ought on any such ground to be removed The Federal Court shall be a Court of Record, and shall sit at Delhi or such other place or places as the Chief Justice may with the approval of Governor-General from time to time appoint

The Federal Court has ex This depends Certain restrictions : In the exercior any Order in Council made t direct appeal in such a case lies large stakes An appeal also lies Court from a High Court in a I virtue of the Instrument of Access An appeai is granted either by the Federal Privy Council All authorities, eiv throughout the Federation are en in aid of the Federai Court Aii the Federai Court shaii be in language, and judgment must be open court in accordance with t the majority of the judges

The Federal Court was establish menced to function from 1st Octol Court in the first Instance Chief Justice and two puisne judg Justice receives a salary of Rs 7, of the puisne judges Rs 5,500 p

Sir Maurice Gwyer, K.C., was be the first Chief Justice of I Shah Mahomed Suiaman and Mr to be judges of the Federal Court

Sir Maurice Gwyer KC, retired Sir Srinivasa Vardaeliarian acted as from 25 4-43 to 7 6 43 when Sir I the present Chief Justice was ap other two colleagues are Justices and Zafrulla Khan

The functions of the Federal Co be affected in any way by the a emergency powers by the Gov under section 45 of the Act in easi the Constitutional machinery

Bigh Courts

High Courts of Judiceture were consti tated by the Indian High Courts Act of 1861 for iteng I Bombay and Madras and it riortie | United Provinces and the Punjab sup need the old supreme and Sudder Courts. More if on not blad the judg by their opinions or recently High Courts have been considered as a constant of the majority provides are appointed by the Cruwn they hold odice lader liberation of the majority provides are appointed by the Cruwn they hold odice lader liberation of the court Beng I Bombay and Madras and f t riortie the indian civil ervice the rem ining places being avail ble for per on who have held eer tain Jadicial Offices in fulls or lawyers quilded in Indi Civilian judges has now been abolished by Gov rument of india Act 193 T ful by ju is the rule in original criminal cases befo High conrts but ju les ar ne er employed in civil suits in Indi

Lower Conrts

The Code of Crimi | Procedure provides for the co stitution of inferior eriminal courts the continuion of inferior estimatal courts styled courts of stevion and courts of many styled courts of stevion and courts of many styled courts of stevion and courts of many styled courts. First of the first states from the court of the first states from the court of the first states from the court of the first states from the court of the first states from the court of the first states from the court of the first states from the court of the first states from the first states

ideal with ma laterial cases and beuches of In tees of the Peace or honorary magistretes dispose of the fess important cases

before courts of sessi n are either has repeatedly diselaimed all Jarisdiction as a Court f Otimin I Appe i there is no adequate machinery for appeal or r visio available to persons convicted of serious and even eapital offences and acute ced by the High Courts or their orional or appellate Orimin i Jurisdict ons The pr rogati e of mercy is exercised by the Governor General in Council and the Local Go erum at concerned without prejudice to the auperior power of the Crown

THE INDIAN POLICE

jurisdiction and to appoint stipendiary Thana dars (Police Station Officers) and subordinates

In Madras in 1816 Sir Thomas Munro took 8 perintendence of police ont of the hands of the edentary judges and placed it in the hands of the peripatetic Collector who had the indigenous viil ge police system aiready under his control! In this way the Revenue Department controlled the police of the districts and still to some extent does so especially in Bombay Prevince

In Khandesh from 18 6 36 Outram of Muthy fame howed how a whele time military commandant could turn incert lible marsu ders into excellent police, a dSr George Cierk Go ernor of Bombay in 1848 applied the son by appointing full time European Superin tendents of Poll #1 many Districts

Madras had a torture scandai in 1853 which showed that 7 Collectors had no time for re i polire superinte dence in 1859 the prin iple of dill time European superintendence was intro-dneedin a hindras Act of the tye rand the control of the Collector was removed

The Mutiny led to general police overly in a mainty followed in Indi A t V of 1861. An Act for the Regul ti n of Police which till governs poli working serywh re in I dia scopy Madras and Bomb y whi h have its own Police Act (IV of 1890)

Working —St ictly speaking there is no india Police With the expition of the dvisory staff of the Intelligenc Bureau attached India dvisory staff of th Intelligence Bureasattached to the Home Department in Government of I dish a not a 1 gis police office reflect edy a detail of the Act is portioned and the police distribution of the Department of the Court of the Government oncerned and I n thow subject t the gene I court I of the Governor Gen at The Lotte In minor pro inces Toronto Sen and Coorg Delhi Ajm R manya Andaman and Nicobar I lands and Pauth Piplod and in other e ntr lly admisistered areas is dmini tered by the Chi t Commissio or the head of the dministration oncerned subject to the general control and direction of the Central Government

Within the Local Government area the police are enrolled nd org nised in District forre at the head of each of which is a District Supermetadent of Police with powers of enlist-ment and dismiss 1 of constabulary

Origins—Corawallis was the first Indian and Mcdency of the force is govern d by a country of the kexisidars and to piace in our few principal filterarchy of Deputs Inspector Government. He ordered the District Judges of Bengal in 193 to open a Thana (Full to course) of Michael by Dirt I Michael Station) for every 400 square miles of tieir justification and to appoint withendiary Thus and the station of the s force

Thu C I B—The Curzon Police Commission of 190 3 moderolsed police working by providing for the direct milstment and training of I lucated Indians as Police Station officers and by creating specialised police ag n i a urder each Local Government for the inv stigation of specialist nd profes ional erim These agencies are known as Criminal Investigation Departments and work under a Deputy Inspe for Ge ral They collate information about rrime self the Crime Ga ette tak over from the District Poll e crimes it ramification is into averal jurisdictions a d they control the workin of uch sel nities of companies of the Versile of the Companies of the Versile of the Companies of the Versile of the Companies of the Versile of the Companies of the Versile of the Companies of the Versile of the Companies of the Versile of the Companies of the Versile of the Companies of the Versile of the Companies of the Versile of the Companies of the Versile of the Companies of the Versile of the Companies of the Versile of the Companies of the Versile of the Companies of the Versile of the Companies of the Versile of the Companies of the Versile of the Companies of the Versile of the Companies of the C

Headquarters and Armed Police— At the clet town of each District its D S P has his often and at o its Headquarter Police Lines and parade ground This is the main centre for cumulation and distribut in to the Police Stations and Outposts of the District of Arbeiters—area summunities and accountry is clothing arms ammuniti and accoutrem ts He e are the Stores and the Armoury Here also constabul ryrecruits call ted by the DS P are taught drill deporting t and dutie and are tured out to fill vacancis. The H ad are tured out to fill vacancis. The H ad an ter Lines also entain the two lundred of so arm d police who mount guard of the second police who mount guard of the second police with the second police with the second police with musical city is loading and bayo et a with musical city is loading and bayo et a with musical city is loading and bayo et a bayone with musical city is course and are arm d with allo hore mu kets at mo the ead arter but by no me us all there is all o a reserve of mountain at dward police.

Thunns and Thunndars -Almost through ont India the popul r terms for Police Station a d P lice Stati n Officer are Thana and Thanadar It is at the Police Station that th public ar m at in touch with the police and the police with the public. Whether it b in a ment and dismiss I of constabilisty

The P S P is subject to du I control

The force he c meands is blect to the general

outcoif the D it it is Mariestate for the capture and the police with the public with the results

The force he c meands is blect to the general

outcoif the D it it is Mariestate for the capture and the grievances against their neighbours

ment of law and the maint nance of order or against a person r persons unknown In

the District But the departmental working idealing with u healters the Innustar who like police of all ranks, is supposed to be always on duty, is chiefly guided by the Fourteenth Chapter of the Code of Criminal Procedure, and the Second Schedule at the end of that Code This schedule shows nearly all penal offences and states whether or not they are "cognisable by the police" The fourteenth Chapter lays down that a cognisable complaint must then and there be recorded, visited, and investigated A non cognisable complaint is musely noted in a separate book and the complainant is told to go to court

Police Prosecutors—The compainant in a cognisable case not only has his complaint recorded but investigated without payment of fee. If the Thanadar succeeds in establishing a prima facie case against the accused, the prosecution in court is conducted free of charge by a police prosecutor, who is a police officer Personal inspection and supervision are the common means for the District Superintendent of Police to know whether his subordinates are doing their work properly

Out-Posts —When the Police Commission of 1860 devised the plan of police that still holds the field, they laid down two enteria of the numbers required One was one policeman persquare mile, the other was one per thousand of population. In towns it is well enough to have the available police concentrated at the police station. But in the moffussil the Thana is very often fifty miles distant from portions of its jurisdiction. It is in such eases profitable to detach a portion of the police station strength under a head constable to man an outpost where complaints can be received and investigation begun without the injured party having to undertake a long journey to the distant Thana. The secret of good mofussil police working in normal times is dispersion. A single policeman, however junior, represents the rule of law and is an agent of Government.

The Chain of Promotion—A constable may asplie to become a Police Station Officer or higher officer. The directly recruited candidate who comes in through the Police Training School as a Thanadar is, it is understood, a graduate and may quite often rise to be an Inspector or a Deputy Superintendent, or exceptionally a Superintendent. The direct Deputy, an office reserved for Indians, has a good chance of becoming Superintendent, and perhaps Deputy Inspector General. The direct Assistant Superintendent, whether from England, or from India, is sure of a Superintendentship, and has chances of D I G after 25 years' service. The period of service for all ranks for full pension is thirty years, and if an officer dies in the process of earning full pension his pension dies with him. Members of the Police Force are eligible for the award of the King's Police Medal and the Indian Police Medal for long and meritorlous services and for conspicuous acts of gallantry

Presidency Police—In the Presidency Towns there is unified police control for the Police Commissioner is responsible for both law and order and for departmental training and efficiency

The Commissioner of Police of a Presidency Town is not the subordinate of the Provincial-Inspector General of Police and he deals direct with Government, just as the Presidency Magistrates deal directly with the High Court The Criminal Procedure Code of India is modified in the Presidency Towns by special police. Acts which prescribe police procedure Justice in criminal cases in Presidency Towns is some what rough and ready, not only from this cause, but also because Presidency Magistrates caugive upto six months or Rs 200 fine summarily, i.e., without formal record of proceedings, and if only whipping or fine up to Rs 200 is inflicted there need be not even any statement of reasons for the conviction

STATISTICS OF POLICE WORK

The undestrability of a tech ing trains in a lots are used the differences in the conditions portance to statistical results as a rest of the metric of points work was a point upon added which the point work and it may be metric of points work was a point upon added they can at the best littled by which considerable attents was laid by the indian Poince formed stom who te cert is the present of a received the condition of the c which considerable atrees was laid by the limp street; the cere of saveres with the hinds foliate Country into my two seems at the street of t

JAHES

Since the introduction with effect from the 1st April 1937 of the Government of India Act the administration of J lis 1 a provincial matter and the power of legislation in respect of prison administration years in the Provincial Govern

The origin of all jall improvements in India awe origin or all jail improvements in India in recent years was the Jail Commission of 1859. The report of the Commission which consisted of only two members both officials servi g und; the Go rament of I dia is attemely long and reviews the whole question of tall owners. of jail organisation and administration in the minutest d tail. In most matte a the Commission recommendations have been accept. ad and adopted by Pro 1 cial Governments but

tions of the Commission the o e that might in fact he described as the corner stone of their raport is that ther should be in each Presi door three class a of J ils In the first dooy three class a of 1 is in the step level person update large central Islis for convicts sentenced to more than 0 e veras' imprisonment is composed to more than 0 e veras' imprisonment is composed to more than 0 e veras' imprisonment is composed to more than 0 e veras' imprisonment of districts and thirdly subsidiary raises of more than the large convicts of the control of an inspector of convicts of the control of an inspector decersit, in under the control of an inspector decersit, is under the control of an inspector decersit, is under the control of an inspector decersit, is under the control of an inspector decersit, is under the control of an inspector decersit, is under the control of an inspector decersit, is under the control of an inspector decersit, is under the control of an inspector decersit, is under the control of an inspector decersit, is under the control of an inspector decersit, is under the more common office of services with juil experience and the Superior large majority of cases the punishment of the control of th Incl des in large central jalls a Deputy Superin tendeot to supervise the jall manufactures and in all central and district jalls one or more subordinate medical officers. The executive subordinate medical officers. The executive staff const to of i liors and warders and co vi to petry officers are employed in all entral and district jail the prospect of promotion to one of the post being a strong inducem nt to good behaviour

bility of proceeding along certain general lines as convict officers

Jail administration in Indie is regulated of neiform application led to the appoint generally by the Prisons Act of 1894 and by ment at a Jails Committee with content of the competition of the prison of the content of the competition of the ruississued under it by the Government of India the first comprehensivant of Indian prison and the Iroticotal Governments The Code for possible administration witch had been made for thirty ments suthoraged by the Indian Code for possible administration witch had been made for thirty contents of the Code for possible and the control of the Code for possible and the control of the Code for possible and the control of the Code for possible and the control of the Code for possible and the control of the Code for the Code for possible and the Code for possible and the Code for possible and the Code for prisoners and of destroying ruison modation has also to be provided in that possible and the Code for prisoners and of destroying ruison for the Code for ration of dail from criminal offenders adoption of the E glish system of release on Il ense to the en o of agolescents ore tion of children's courts. The Committee found that the reformative side of the Iodian Bauminestern of the control Government exercising our system never the segregation of nantument concerns kell lative powers with held rovin incommended the segregation of nantument concerns kell lative powers with the transfer from order by pri oners the provision of a particular system and training the segregation of the commendation for prisoners under training the commendation for prisoners under training the commendation for prisoners under training training to the commendation for prisoners under training training to the commendation for prisoners under training train system needed particular attention recommended the segregation of habituals tic institution of the star-class system the abolition of certain practices which are flable to harden or degrade the prison population

Employment of Prisoners—The work on which convicts are employed is mostly eartied on within the fail walls but erra ourse employment on a large scale is some time llowed as for arampia when a large number of convicts were employed in excavating the Jhelum Canal in the Punjeb Wifbin th adand adopted by 170 i cit flowerments but the belum Canal in the Yunjeb Within 161 various matter mainly of am ior character while princepts are employed on jull services and ter their proposal have eith r bee rejected the walks princepts are employed on the proposal conditions as manually as the proposal continues and the proposal continues are made to the proposal continues are made to the proposal continues are continued to the proposal c adapted to the requirements of the consuming public departments and printing tent-making and the manuf cture of clothing are among the

The fatter which wa apparently much practised in Bombay was described by th Commis sion as inflicting sion as inflicting Equisite tortore Punish menta are now sen dul dand graded into major ments are now sen our dang grades into major major and minor. The most diment of it jail problems is the faternal msiotenanc of orde among the prison rs for which porpose paid warders and convict warders ar employed. With this is boond up the question of a special The Jalls Commiltee - The obvious adviss lelass of well behaved prisoners for employment

ful offenders"—; e, those below the age of 15 operation -the law provides alternatives to imprisonment, and it is strictly enjoined that boys shall not be sent to jail when they can be dealt with other wise The alternatives are detention in a reformatory school for a period of from three to seven years, but not beyond the age of 18, discharge after admonition, delivery to the license and to raise the minimum term of parent or guardian on the latter excenting a detention in the Borstai School from 2 to 3 years bond to be responsible for the good behaviour of the culprit, and whipping by way of school discipline These are but general principles which have been variously given effect to by various Provincial Governments

The question of the treatment of 'young adult' prisoners has in recent years received

much attention

Children's Acts and Borstal Schools Acts for the special treatment of juvenile offenders have been passed by several Provincial Legislatures The Madras Children Act, passed in 1920, is tho

earliest and has been largely followed in the other provinces. It classifies as "children" boys and girls under the age of 14 and as " young persons" those between the ages of 14 and 16 It enacts that a child or young person convicted of any offence, may as an alternative to the usual punishments of fine, willpplng or imprisonment be discharged after due admonition, committed to the care of a parent, guardian or relative, or of a person named by the court, or sent to an Industrial School set up or certified under the Act It further cnacts that no offender under the age of 16 may be sentenced to transportation, nor under 14 to imprisonment Offenders between the ages of 14 and 16 may be sentenced to im-prisonment in very special circumstances Provision is made for the committal to an Industrial School or to the care of a suitable person of neglected, ili treated or uncontrollable children under the age of 14 The Act empowers the Government of the Province to establish juvenile courts consisting of a stipendiary magistrate and one or two Honorary Magistrates who shall, where possible, be women and directs that, where such courts have not been established, young offenders shall be tried in a different room or at a different time from those at which the ordinary sittings are held

The Bengal Act provides for the committal to an Industrial School of children under 14 found begging or destitute and of children living in immoral surroundings It further provides for the punishment of erueity to children, of eausing and abetting the seduction or prostitution of gurls under 16, and of accepting articles in pawn

from a chlid

The Bombay and Central Provinces Acts, which are practically identical, go further and provide for the punishment of persons found drunk in a public place when in charge of a child under 7, or giving intoxicating liquor or drugs to a child under 14, or inciting a child to gamble They also empower police officers to confiscate tobacco in possession of citalren

The Bombay Act has been extended through-

out the province with satisfactory results and it will not now be necessary to send any children to

prison except in very exceptional cases

There are several certified schools estab

Juvenile Prisoners -As regards "youth-| Society is in existence which offers active co-The Bombay Children Act has been amended mainly to prohibit the publication of names, addresses or other details of children or young persons involved in offences, to provide for a system of true probation as distinct from supervision, to empower the Chief Inspector of Certified Schools to release youthful offenders on

These provisions of the Bombay Act which relate to youthful offenders, the maintenance and treatment of persons sent to certified schools or committed to the care of relatives or other fit persons and the establishment of industriai schools and juvenile courts were applied to the province of Sind in March, 1936

The Factories Act in Bombry was amended in 1940 so as to abolish the employment of child labour in Factories

The Bombry Children Act with some modifications has been extended to the Delhi Province The operation of the Bengal Act which was passed in 1922 is at present confined to the town, port and suburbs of Calcutta, Howiah and to certain portions of the District of the 24-A Central Children Court has been established in Calcutta, which has jurisdiction over the whole area to which the Act has been eztended

The Governments of Madras, Bombay, UP, Punjab and the Central Provinces have also enactedProbation of Offenders Act which allow of the release of young offenders on parole under Probation Officers Similar legislation is under

contemplation in Assam

The provisions of the Borstal Schools Act are practically the same in the provinces where such

Acts have been enacted

In provinces where there is no Borstal Schools Act juvenile offenders are sent to the reformatory schools established under the Reformatory Schools Act, or confined in juvenile or ordinary jails, but are not allowed to mix with adult In the Punjab a Reclamation Depart prisoners ment has been established the main function of which is the working of the Punjab Good Conduct Prisoners Probational Release Act, 1926
Officers of the Department visit jails for the scleetion of prisoners on probation release

probationers are usually sent to special farms

Reformatory Schools—These schools have been administered since 1899 by the Education department, and the authorities are directed to improve the industrial education of the inmates, to help the boys to obtain employment on leaving school and as for an possible ment on leaving school, and as far as possible

to keep a watch on their careers
The N-W F P (Adoieseent) Prisoners Release
on Probation Act, 1940 (Governor's Act II of
1940) was introduced in 1940 in the North West Frontier Province whereby adolescent prisoners after completion of 1rd of their sentence are released and handed over to their guardians who are required to look after their conduct and welfare and generally to act in loco parentis

Commission of Enquiry, 1919—A committee was appointed to investigate the whole system of prison administration in India with special reference to recent legislation and experience in Western and the special reference to recent legislation and experience in Western and the special reference to recent legislation and experience in Western and the special reference in the Its report perlence in Western countries lished under the Bombay Act and there are published in 1921, was summarised in the anumber of other institutions which co-operate Indian Year Book, 1922 (pages 670 671) A with different juvenile courts A Children's Aid number of reforms were advocated but, owing to fine cial stringen y tt has not yet been was reached possible to introduce some of the more im | furth note to

nortant of them

Fines and Short Sentences—Those sections of the Indian Penal Code onder which imprisonment must be awarded when a convic imprisonment must be awarded when a convic-tion occurs, should be amended so as to gle-discretion to the court Sentences of impri-comment for iss than twenty-elight days should be problided

The Indsterminate Sentences -The sen-The indisterminate Sentences —the sen-tence of every long term prisoner should be brought ander rev sion as soon as the prisoner, has ever half the sentence in the case of the non habitust and two-thirds of the sentence in the case I the baltitual remis lon earned bring command in each case. The revision chould

be carried ont by n Revising Board composed if the In-pector Generat of Irisons the Ses sions Judge and a non official In all cases the release of a prisoner on parole should be mad subject to conditions breach of which would subject to conditions breach of which would be der him liable to be remanded to undergo the full original centence. The duty of seeing that a prisoner fulfile the conditions on which he was released should not be imposed upon the police ar apon the village headman but special officers to npon tue visiage headman but special officers to be termed purole officers should be appointed for the purpose. Thes parole officers should possess a good standard of education though not necessarily a university degree and should both protect and advise the released prisoner and

It was then decided that hence furth unty those convicts should normally be sent to the Andamans who voluntered a come that the old restrictions on life in the settlement should be sensibly relaxed that convices should be encouraged to cettle on the lant that in certain conditions they should be entild do rete e to obtain occupancy rights o er the rese e to obtain occupancy rights o er the tand which they had cultivated and that the importation of wives and ismilles should be encouraged. The nbject of the g chang so as to promote the development of a free colons of persons who would after the terms of their persons who would after the terms of their a ntences had explied make the Andama s the ir p rm nent home. The Isl nds have ine been occupied by the Japanese

Criminal Tribes —The first essenti 1 of auc cese in dealing with the criminal tribes is the provision of a reasonable degree of economic provision if it reasonable degree of economic comfort for the pe ple. It is therefore of para mount importance to focate settlements where sufficient work at remunerative rates is avail sumeent work at remunerator races is nominable. Large numbers of fresh settler, should ne er be sent to a e tilem ut without first as certaining whether there is work for them. Commitment to settlements should as far a possible be by gangs not by individuals It private areney for the control of settlements

Politicat Offendors—Mich controvery rag a round the elastification and special results of the political offendors of the results of the resul both protect and advise the released prisoner and one is round with a re-populity report breaches of the conditions of release it results of which is a respective for and the Andamuna — The publical offenders Government of water of the penal settlement of the first prison of the property of the release of the penal settlement of the property of the release of the penal settlement of the

LAWS OF 1944

1-Th. Centric C. and S it Act. 1944. goods or where such amount of exclabic goods are exempt on the ground that they are earned for consumption by the crew or passengers or anunals on board any vessel

I or contravention of s 24, power is given for stoppage of the vessel, search and arrest and for confiscation of the vessel and cargo

S 30 gives to the Central Government power to exempt the carriage of any excessible goods from the operation of 9 24

Sections 31 and 32 cnact special provisions relating to salt S 31 recognises the special and perminent rights of manufacturing salt and provides that the proprietor of a private salt factory to whom a sanad has been granted for a permanent and special right to manufacture or exervate sait, shall on application, be entitled to a licence and the renewal thereof from year to year for carrying on the manufacture of salt

S 32 entities every proprietor of an existing private sait work other than a private sait factory to a license and the renewal thereof every year for the purpose of ins salt work

S 33 gives to a Collector of Central Excise powers of confiscation of any thing and love of penalties on persons without any limit subject to an appeal to the Central Board of Revenue A limited power of confiscation of goods not exceeding Rs 500 in value and imposition of penalty not execeding Rs 250 is also given to an Assistant Collector of Central Excise

S 34 empowers the Excise officer to give an option of fine instead of confiscation of goods

S 36 gives power to the Central Government to reverse or modify any decision or order passed under the Act or the rules made by any Central Excise officer or by the Central Board of Revenue

S 37 empowers the Central Government to make rules to carry into effect the purposes of this Act and in particular for the assessment and collection of duties of excise, for the prohi bltion of the production or manufacture of excisable goods, the bringing of exclarbic goods into British India and for regulating the removal of excisable goods

S 40 enacts that no suit shall lie against the central Government or against any officer of the Crown in respect of any order passed in good faith or any act in good faith done or ordered to be done under this Act and that in any event no such suit shall he after the expiration of six months from the date of the act or order complained of

Under the First Schedule the excise duty on Kerosene is fixed at the same rate at which Customs duty is ieviable under the Indian Tariff Act 1934, on matches in boxes of varying sizes at the rates ranging from ten annas per gross of boxes to rupees four per gross of boxes, on mechanical lighters at rupecs three per lighter, on motor spirit at fifteen annas per imperial gallon, on sait at the rate fixed by the Indian Pinancial Act 1943 and at the rate fixed annually by Act of the Central Legislature, on sliver in the execution of the work and provides for at the rate of three annas and seven and one fifth plies per ounce Troy, on steel ingots at four vision

1

S 24 prohibits transport by sea of excisable rupces per ton, on sugar other than Khandsari goods except in a vessel of the burden of three or Palmyra at three rupees per ewt, on hundred tons and upwards, unless a permit or pass has been granted in respect of any excisable no excise duty on Palmyra sugar, on tobject the part of the contract of the c of different kinds and for different uses at the rates ranging from one inna to one rupes and twelve annas per pound, on tyres at ten per cent ad valorem and on vegetable product at five rupees per cut

This Act repeals the whole of the following Acts The Transport of Salt Act 1879, the Indian Salt Act 1882, The Madras Salt Act 1889, the Bombay Salt Act 1890, The Indian Salt duties Act, 1908, The Motor Spirit (Duties Act) 1917, The Indian Finance Act 1922, The Silver (Exclese Duty) Act 1930, The Indian Finance (Supplementary and Extending) Act. Finance (Supplementary and Extending) Act 1931, The Sugar (Exelse Duty) Act 1934, the Matches (Exelse Duty) Act 1934, The Mechanical Lighters (Exelse Duty) Act 1934, The Mechanical Lighters (Exelse Duty) Act 1934, The Sind Salt Law Amendment Act 1938 The Tyres (Exelse Duty) Act 1943, The Vegetable Product (Exelse Duty) Act 1943

2-The Coffee Market Expansion (Amendment) Act, 1944 —Under sub section (1) of s 16 of the Coffee Market Expansion Act, 1942, the Central Government has the power to fix the wholesale and retail prices at which coffee shall be sold in the Indian market and sub section (2) provides that no registered owner or heensed curer or dealer shall sell coffee at a price or prices higher than the price or prices fixed by the Central Government A registered owner or heensed owner or a licensed curer who sells coffee at a higher price or prices in contravention of the above provision can be punished under s 36 (1) but this section does not include the dealer This Act therefore defines a dealer as meaning a person carrying on the business of selling coffee, whether wholesale or by retail and the word "dealer" is added in s 36 (1) after the words "any licensed curer" so that a dealer can also be punished

-The Coal Mines Safety (Stowing) Amendment Act, 1944 -This Act is intended to remedy certain defects disclosed in the working of the Coal Mines Safety (Stowing) Act, 1939

The Coal Mines Stowing Board is called upon in an emergency to take protective measures in the working of mines, eg, when a mine is abandoned or its owner is not in a position to take protective measures. Specific provision had Hence a new been lacking in the Act section 10A is inscrted in the Act of 1939 which empowers the Board where it is necessary or desirable to execute or cause to be executed such protective measures including stowing as may be required in furtherance of the objects of the Act. For this purpose the Board is given the right for itself and all persons employed in the execution of any work under this section to enter upon any property in which the work is to be done and to do therein all things necessary It further for the execution of the work prohibits any person from obstructing or inter fering with the execution of the work or from removing or tampering with any plant or machinery or any stowing or other material used

Unders 10 of the Act of 1939 a colliery own r | abroad In the developm at fa! tion in India is required to carry out p ote tive meas it s as ord red by the Chief Inspector or any o her I spector ir spective of the fact that he has appealed from such order under the ri ht of ppeal give to him This Act ins ts a provi o to a 10 gi 1 g power to a spend the operation f an order pending the appe 1

4 -Th I dian Companies (Amendm t) A t 1944.—Certain unde irable fe tures in the the structure a d management of banking con p ni s have recently come to notice such as the appoint m t of managing directors or man gers on long term contracts on payment of remuneration by ommision or shae in the profits the fixat on of the authorised capital at a very high figure as c mp red with the ubs rihed and pa d

ngure as c mp reu with the mos ributa and particular policy p capital a d the policy in the to an individual or a small group of a dividuals u lly patty pid ordin ry or deferred sh r holders. This vet is intended to remo these objectio able fe ture by suit ble amendm ats in it e Indian Companies Act 1913

A new section 77H is added after a to the Act of 1913 wherehy it is provid d that to the act of 1913 whereny it is proven a times o banking comp y wh ther incorpe sted in or outside British I di which c rries on business in British I dis shall after tylry of two ye re from the comme cement of this Act emply y or he managed by a man ging agent or any person whose remun ration t k s th form of ommis sion or a shar of p ofits rany person its ing a co tract with the c mpany for its m n gement period exceeding five years t my one time

ew section 77I is substituted in place of th old seetl n 771 of the Act of 1913 whereby it! pro ided

(i) that no b kin comp ny incorporated afte the 15th January 1937 shall comme b in sunless shares h ve been all it d to n amount sufficient to yield a sum of at I ast thousandr pees sworking capital and unle a deci ati n to that effect h s been filed with the re i tra

6-Th Tr n f r f Pr perty (Am ndm t) A t. 1944.-Thi Act i Intend d to m k spe l l p ovi lons for the simme tof noic of m in insurance Th n tur of mari insurence control is not as to requil the n insurance polici she id be ass gnable insuran th t m ri e insuranco polici after ioss In the United Kingdom assignability of m rine i sura ce policie afte loss is pia b youd do bt by a 50 or the M rine In ar At In the basence of a simil pro islon in India it is doubtful whith the Courts i

B itish Indi we ld h id that they are so as ign able Henc th amendment of the Tr n fer of Prop rty Act become neces ry

By this at a new section 1304 i add d to the Tra fr of Property Act 188 poiding that a policy of main insurance m y b transfered by a 12 m at unles it contains te me serp i py probliting | man at adm y be as I ned eitle before or ft I los be ssiened by endors m at the eon or i oth r netomary ma er Where how ver the in the subject matter insur d and has not b f or t the time of ac doing expressly or impliedly agre d to assion the policy any subsequent assignment of the policy is inoper ti e but without aff ting the assignment of a policy fter ioss

Further this 4et alt rs s 1 5 of the Act of 188 by omitting from it all r 7 rene to marine in ura ce policy so as to make it cle r that the in ura ce pontry so as on man it is that of the result of the relation of the governing a marin insurance policy a quit differ ut fom those governing a fie in ura e policy in the matter of sasion ment. A new 135A is inserted for a 1 um at recondly be not rouse with had ment A new 125A is inserted for a 1 mm at America to introl deby the Unit d States of of instrumed a policy of ms inc insurance in transport many comments of the state make against the assignor of the policy. It also to such extent or subject to such modifications provides that where the insurer pays for a total or that any authority constituted under any joss, he becomes entitled to take over the interest such enactment shall, exercise authority only of the insured person and is subrogated to all the rights and remedies of the insured person, but where the insurer pays for a partial loss, he acquires no title to the subject matter insured of the Act of 1924 or such part of it as may remain but he is there upon subrogated to all rights and remedles of the insured person as from the time of the ensualty causing the loss

This Act further enacts that the provision that a mere right to sue cannot be transferred. In clause (e) of s 6 of the Transfer of Property Act, 1892, civil not in any way affect the provisions in the new sections 130A and 135A

The Insurance (Amendment) Act, 1944—Section 46 of the Insurance Act, 1938, provides that the holder of a policy of insurance issued in respect of insurance business transacted in British India shall be entitled to receive payment in British India of any sum secured thereby and to sue for any relief in respect of the polley in any court in British India according to the iau ln force in British India

It was found that the application of this section to polleles of marine insurance seriously interfered with the normal business of marine insurers in as much as marine insurance contracts are international in scope and are effected mostly for the benefit of the consignees abroad who have the option of stipulating the place where the contracts are intended to be earried out

This Act therefore adds a provise to s 46 that "nothing in this section shall apply to a policy of marino insurance"

Under s 48 (2) of the Insurance Act, 1938, employees and agents of insurance companies are eligible for appointment as polley-holders directors. This is destructive of the object of s 48 because a policy-holder who is an employee or agent enunct be expected to safeguard the interests of policy-holders where those interests conflict with those of the shareholders

This Act therefore amends s 48 by disqualifying such persons from becoming policy holders directors. After sub sec (2) of s 48 a new sub see (2A) is added whereby it is provided that a person shall be ineligible for election as a director under sub see (1) of any company if he is a director, officer, employee or legal or technical adviser of that company or of any other insurer or is an insurance agent or employer of insurance agents and shall cease to be a director under sub-sec (1) if after election he acquires any disqualification specified above or no longer bolds the qualifications required by this sub

The Cantonments (Amendment) Act, 1944.— This Act amends s 3 of the Cantonments Act, 1924, by adding a new sub section (4) to it

The Indian Merchant Shipping (Amendment) et, 1944—The first proviso to a 209A of the Indian Merchant Shipping Act, 1923, relieves shipping companies of the limbility to in the pryments for the return journes of pllgrims as provided in a 2001 in the event of war disturbance and at present this liability is practically suspended

This Act amends a 200A, subsec (1), by inserting therein that the sum of rupce one is to be paid by a shipping company for each day for the return journey of a deek pilerim and a sum of rupees three for each day is to be pald in respect of a cabin class pligrim

As however the liability is at present suspended owing to war, this Act will come into force when normal conditions are re established on such date as the Central Government may appoint

The Indian Cocoanut Committee Act, 1944.— Even before the outbreak of the present war the supply of cocoanuts and eccoanut products from indigenous sources was in sufficient to nicet India's growing requirements and a large balance had to be imported Owing to enemy occupation of some of the world's eoconnut growing countries, an increase in the production of prinelpai immediate eocoanuts in India became necessary for the purpose of meeting India's increased demand for ececanut products

I or this purpose and with a view to speed up the productions this Act has been enacted to establish an Indian Central Coconnut Committee, an all-India organisation on lines of the Indian Central Cotton Committee and similar bodies eoneerned with eofice and ine, with an independent source of income for the improvement and development of the growing marketing and manufacture of the eccoanut in India and for promoting and safeguarding the interests of all branches of its production and manufacture from the producer to the consumer

An exception has been made in respect of coir and coir manufactured goods which are excluded from the purview of the Committee in deference to the wishes of the Government of Travancore the largest producer of these commoditles

The Act provides for meeting any temporary levied and collected as a cess, on all copra embarrassment caused by the changes introduced consumed in any mill in British India, a dry in the Act of 1938 This Act also amends the of consumed in any mill in British India, a dry in the Act of 1938 This Act also amends the of excise at such rate not exceeding four annas Third Schedule by making Form 'F" per cwt as the Central Government applicable to marine insurance business as being after consulting the Cocoanut Committee, may more sultable than Form "E'

S 4 provides for the constitution of a Committee which is to receive and expend the proceeds of the duty collected under this Act The Committee shall consist of the Vice Chairman, notification, direct that in any place declared a cantonment under sub-sec (1) the provisions of any enactment relating to local self-govern ment other than this Act shall have effect only old industry, three persons representing the Provincial Government of Ma lra the Gov ra meet of the State of Travancore and the Government of the State of Mysor, one person nominated by the Tra ancore Chamber of Commerce one person appointed by the Centr 1 Government and six other persons of whom two shall be from the elected members of the m mores of the Council of State and three nominated by the Government of the States of Travancore Mysore and Cochin This Committee will be a body corporate with a perpetual succession. The Act makes provisions for filling in vacancies appointment of ch irman secretary and officers to carry out duties und r the Committee

- S 9 provides for the functions of the Committee to p omote the improvement and development of the cultivation and marketing of cocoanus
- S 10 provides for calling upon the owner of every coccanut mill to furnish to the Collector every mooth a return stating the amount of copra consomed in the mill.

S 11 provides for the collection of duty by the Collector from every mill

- S 12 makes an as essment order mad by the Collector as final and provides that it shall not be questioned in any court but it gives a right to an owner who is aggreered by the order to pply to the Central Government to cancel o modify the assessment.
- S 19 empowers the Collector or any officer prointed in that behalf to in pect any mill and to h ve free access at all reasonable times to any mill
- S 15 provides that the proceeds of the dity collected by the Collector shall aft r deduction collected by the Collector shall get a use the condition of the neess by expenses be hunded over to the Committee. The Committee is empowered to apply the moneys so received in meeting the expenses of the Committee end the cost of such measures as it may decide to take in the exercise of the Committee and the exercise. of its function.
- S 16 provides for the keeping and auditin of account.
- S 17 provides that the Central Government may dissolve the Committee and declars all the property vested in the Committee to vest in III disjesty for the purposes of the Central Government.
- S 18 empowers the Central Government to make r lea fo the purpose of carrying into effect the provisions of the Act
- S 19 gives pow r to the Committee to make regulations with the previous san tion of the Central Government for certain specified purpose mentioned therein
- The I dian Income tax (Am denent) Act 1944.—The main object of this Act is to provide fo advace a payments of tax on I come whi b section 18 of the Iodian locome tax Act 19 The incom mainly affected is focome from property at form bu iness profession or vocation. The other povision of the Act are designed. designed to corr ct certain defects in the main Act or to give relief to the tax payer
- certain words from Explanation 2 to sob sec (1) new section 18A above

of sec 7 so as to preven payments from un recognised Provident Tnody fr m escaping tax tl ereon

- 5 3 amends s 14 (1) of the Act of 19 providing that an a sessee who receiv a a st or of mo ey as a member of a joint Hinda family but which sum does not form part of the i c me of the joiot family is not exempt from h yment of tax th reon The exemption given under 8 14(1) is in respect of money receive t as forming part of the income of the family
- S 4 introduces a new sub sec (A) to s 1 of the Act of 19 with a vi w to put a stop to a tax e asion device which mainly takes ti of a one year policy. This am adment follows the Unit d kin dom law
- inserts a new section 184 in Act of 19 pro iding for advance payment of tax
- This section enacts that the incon tax officer any on or after the lat typil in ny final all year by order in writin regular n ass ne to pay quarterly i on 15th June 15 Sep ember 1 th December and 15th Varch one quarter amount of the Joseph T x and s iper tax payable in respect of his total income of the latest pr vious year if au h total l come exceeded six ti us nd rupces An option is given t the a sessee to pay tax quarterly either on his list a sessed income or on his own estimate. The a ction The a ction Income or on his own estimate. The action provides for paym at of interest at per annual by Government on ad ance payment while penal interest at 0 per annual will be payable by the assess where the advice payment on his own estimate falls alort of 80 per cent of it tax payable on result assessment It is all provided that it an assessment It is all or provided that it an assessment as the state of the sta of a 46 will then apply
- by addin 8 famends a 4 of he Act of 19 a proviso Under a 16 () profits which accru and arise in Indian State are exempt from tax while corresponding losses can be et off against British Indi n income or earried forwa d under e 24 The new provise provides that such losses can only be set off or carried forward against correspond! g exempt profits
- 8 7 amends sub-sec (1) of a 5 of the Act of 19 by bringing sub-sec (1) lote il ie with sub-sec (3) in connection with an assessment In the yer of discontinuance on husbrane assessed under the 1918 Act

S & amends a 29 by including in the notice of demand the penal I terest under the povisions of the new a 18A above

8s 9 and 10 introduc am ndmeots in sectious 30 and 31 of the Act of 10 for giving a right of appeal against a refu | or a c o listin of registration under a 23 (4) a d also in the case of a person denying his liability to d duct tax under the provisions of c 18 (34) (8B) and (3C)

9 11 amends a S3 by giving to the Appellat Tribunal the power given to the Appellate Assistant Commissioner by s 31 (4) to a the l the in ome tax officer to amend any as e ment mad on any partner of a firm or member of a association

B 12 ameods a 47 with a view to provide for

S 13 amends s 56 with a view to prevent the proviso to sub sections (3) & (4) of s 25 from providing for washing facilities in all factories being nuilified by the provision in a 56 that the total lineome for the purposes of super tax shall be the total income as assessed for the purposes of income tax

S 14 amonds the Schedule to the Act of 1922 The first amendment gives an increase in the amounts allowable to Life Insurance Companies for management expenses under the proviso to rulc 2

The second amendment is ln rule 3 providing that only income tax and not super tax shall not be paid on the interest on tax free securities It also secures the inclusion of the interest in the surplus

The fined amendment is in rule 5 which provides that profits on the realisation of securities are excluded by the provisions of rule 5 (11) from 'gross external incomings' This amendment extends this provision so as to exclude also profits on the realisation of other assets

The Delhi Muslim Wakfs (Amendment) Act, 1944—This Act is intended to clear difficulties arising from the ambiguity in the true interpretation of the Deihi Musimi Wakis Act, 1943

Section ? (1) of the Act of 1943 defines "wakf" as meaning the permanent dedication of any property moveable or immovable, etc. This property moveable or immovable, etc. This Act amends sec 2(7) by adding that such property includes mosque, idgah, imambara, dargah, khokkah dargah, khankah, maqbara, ranza, grave, graveyard, orphanage, madrassa or any other religious or charitable institution

This Act also amends sub sec 2 of s 25 of the Act of 1943 by the addition therein of the words 'all the assets and movable or immovable property or properties, buildings, houses, promises, articles, instruments, machinery, furniture, books, accounts, deeds, exhibits, relies, and other public properties under the supervision control and management of all the above said committees and the said Anjuman Molyyed ul Islam shall vest in the Majlis after its establishment"

The Protective Duties Continuation Act, 1944 -The protective duties on sugar, n ood pulp, paper, cotton and silk manufacturers, gold and silver thread and wire and iron and steel manufactures which were extended for a period of two years with effect from 1st April 1942 by the Protective Duties Continuation Act, 1942 by the Protective Duties Continuation Act, 1942, expired on 31st March 1944 Owing to the present unsettled conditions this Act extends the existing protective duties for a period of two years more, 10, upto 31st March 1946 The Act also extends the existing duty on wheat and wheat-flour for a further period of two years of two years

The Factories (Amendment) Act, 1944— This Act is intended to remedy certain defects and meet some difficulties in the working of the Factories Act, 1934

It amends s 9 of the Act of 1934 by adding in sub sec (1) a suitable clause requiring more comprehensive particulars to be sent before commencement of work in a factory

It also amends a 19 of the Act of 1934 by without the restriction which was originally in the Act of 1934

It also amends a 23 by making it clear that the rules providing for "means of escape" as precautions against fire, which have been made by Provincial Governments, should continue to exist

Under the provisions of sections 45 and 54 of the Act of 1934, no woman or child shall be allowed to work in a factory except between the hours of 6 a m and 7 p m and the limiting hours can be varied by a Provincial Government to cover a span of 13 hours between 5 a m to 7 30 p.m. This Act amends sections 45 and 54 so is to extend by an hour the limiting hours in the evening from 7-30 pm to 8 30 pm for the duration of the war

The Indian Patents and Designs (Temporary Amendment) Act, 1944—This Act aims at enlarging the rights of Government Depart ments to use inventions and designs as has been done in the United Kingdom by see 2 of the United Kingdom Patents and Designs Act, 1942 For this purpose 8 21 of the Indian Patents and Designs Act of 1911 is amended Section 21 as existing provides that Government Departments may use or exercise an invention for the services of the Crown on terms to be agreed or failing agreement, settled by the Court

By this Act sub-section (3A) is addded to s 21, and empowers officers or authorities administering any department of the service of His Majesty under sub see (2) or sub see (3) to make, use, exercise or vent an invention upon such terms as are mentioned in sub sec (2) or (3) for any purpose which appears to any such officer or authority necessary or expedient for the efficient prosecution of the war or for maintaining supplies and services essential to the life of the community and the terms of any such agreement or heenee as is mentioned in sub sec (2) shall be inoperative

This Act is operative only during the period of the war and for six months after the cessation of the present hostilities

The Coffee Market Expansion (Second Ameadment) Act, 1944.—Under sub sec (1) of sec 32 of the Coffee Market Expansion Act, 1942, all sums realised by sales of coffee from the Pool by the Indian Coffee Board have to be credited to the Pool Fund There is however a propusion in the Act to provide for transfer no provision in the Act to provide for transfer to the General Fund any excess in the Pool Fund after the requirements of the clauses of sub sec (2) of sec 32 of the Act have been met

This Act therefore makes the necessary amendment in sec 32 by inserting a proviso for transfer of any excess to the General Fund The amount so transferred will be applied for promoting agricultural and technological research in the interest of the coffee industry in India

The Delhi Joint Water and Sewage Board (Amendment) Act—In connection with proposals for extending the drinking water supply system in Delhi certain questions have arisen regarding the interpretation of the Delhi Joint Water and Sewage Board Act, 1926 The view has been taken that the phrase "urban area of the City of Delhi" in the preamble in the jurisd cities of it four constitution of the hole is it in mall in military in mentioned in all a color of its second at in all it for military in the last of the interest of the inte sews of m kilokri,

The present Act remarks the political in the two particular cases a mileculation and said extends the tirisdiction to the property makes an ampliment to the long title art. tible at th presurble of tie Act of 1926 ly ut 11 wil tt words town and sub the fifth! I tato

Labour in India.

A HISTORICAL SURVEY OF 1HL GROWIH OF 1HE LABOUR PROBLEM.

India is and always has been a predominantly agricultural country and over sixt five preent of her working population are dependent on the soll for their principal means of livelihood Agriculture by itself, however does not always afford, either to the agriculturist or to the agricultural labourer, the wherewith it for keeping body and soul together. It is necessary, therefore, for both the smaller cultivators and the agricultural labourers to migrate frequently to the towns and eithes in search of additional work in order to keep the wolf from the door, but, the migration is generally always of a temporary character, and the agriculturists contact with his land is seldom, if ever, permanently broken

Up to almost the end of the nineteenth century there was no State control over condi-tions of employment in any industry in India I'mployers were free to do y hat they liked with the result that Indian labour was exploited Hours of labour to the fullest extent possible were hordinately excessive, rates of wages unduly low and other conditions of employment as bad as they possibly could be. There was no regulation of the age at which children could he employed, there were no periodical or weekly holidays, and there was no legislation to safe guard factory workers from injury through accident caused by entanglement with unfonced machinery in motion With the growth of factors organisation in India and the rapid development of her industries, the minds of certain men, notably the late Mr Sorabjec Shapurjec Bengall OIE, however, began to be awakened to the existence of earlis which by the standards of to day would be considered intelerable, and inceensing efforts at securing some improvement in conditions of work in factories resulted, not withstanding strenuous and universal opposition at the time from all employers, in the passing of the first Indian Factories Act of 1881 This Act gave a limited measure of protection to children, firstly, by prohibiting their employment in factories if they were under seven years of age and also in two separate factories on the of age and also in the separate interiors of the same day, secondly, by restricting their hours of employment to nine per day, and thirdly, by requiring that they should be granted four holidays in a month and also rest intervals in accordance with rules to be framed by local governments The Act contained no restrictions in connection with the employment of adult labour but provision was made for the fencing of such parts of machinery as would be dangerous if left unfenced and for the report-ing of accidents Owing to an almost complete lack of adequate inspection, the 1881 Act became a dead letter in most provinces. Most factories worked from day break to sunset, Sundays were usually working days and, if they were holidays, they had to be used for cleaning. There were no proper intervals for rest or meals. Both women and children were worked for excessively long bours. Ventilation in most faccessively long hours Ventliation in most fac torics was extremely bad and sanitation left much to be desired

A factories Commission was appointed in 1590 and on the basis of its recommendations, a new factories Act was passed in 1891. The qualification for registration was the employment of 50 v others as against 100 in the 1894 Act and local Governments were empowered to notify concerns employing as few as twents. The main features of this Act vere (1) a compulsory rest interval of half an hour, (2) a weekly holiday, (3) non employment of a child under nine and a 7 hour day for children between nine and foarteen, (4) a 11 hour day for women with a 14 hour interval if they were required to work for the permissible maximum hours, and (5) restriction in the employment of yomen during 5 p m and 5 a m

Apart from the mars meetings of workmen which were organised in the eightles by humanitarian social reformers for the purpose of memorialising Government for improvement of eon ditions of work in factories, Indian factory labour was almost up to the beginning of the twentieth century, a slient and unorganised factor in the huge industrial organisation that was rapidly coming into being in India Trade unionism was non existent and there was no channel through which the Indian workman could ventilate his grievances and ask for their redrest. The strike as a weapon of defence against oppressive conditions was almost unknown and such industrial disputes as did occur soon terminated in favour of the employer owing to the unfettered power which he enjoyed of replacing all men who downed tools with blackleg labour.

The last decade of the nineteenth century saw the advent of two new factors in the field of industrial labour in India which were destined, for the time being at any rate, to worsen conditions in Indian factories. The first was the introduction of electricity for purposes of factory lighting and the second was the widespread epidemic of plague. By 1900, the majority of the cotton textile mills in Bombay City and almost all the jute mills in Bombay City and almost all the jute mills in Bengal were lit by electricity, and by the end of that year the rayages of the great epidemic of plague which first broke out in Bombay City in 1896 and soon spread all over the country, resulted in the reduction of the labour force in most centres to a third to a half of its normal strength. The immediate effect of these two events was a considerable increase in working hours. Many of the larger textile mills resorted to day and night working and evidence is not wanting that some mills worked their operatives continuously for stretches of fifteen to twenty hours per day. In Bombay City there were actually anctions for labourers at street corners. The weaker of both the cotton and the jute mills, however, began to be alarmed at the competition from the mills which worked day and night and many of the millowners were not unwilling that Government should step in and prohibit night working altogether.

factories and for the exploitation of nineral desire to improve conditions in their own resources were flowed. Heatle building activity countries." In order to establish universal was evident everywhere and this was naturally peace based on social justice, the Peace Treaty followed by heavy demands for all types and not only laid down general principles in regard kinds of labour. The Utopi in hope which most to questions affecting labour which were remen had built upon were, however, destined to examine the High Contracting Parties to be evaporate into thin air sooner than the vort pessimists could have imagined. Two entirely unioreseen factors intervened to blast these The first was the worldwide epidemie of depreciation in the currencies of most Europan information regarding conditions of employ countries

Similar to the chance which Indian Indus trialists had secured at the outbreak of the war was the one which Indian labour secured at the end of it. The great influenza epidemic had left large gaps in the ranks of available labour. especially as the age groups between 20 and 40 had suffered most heavily A situation very similar to that which followed the great plague of the inhetics was created, but, on this occasion, there were no auctions of mill workers at street corners because as the result of a conn try wide expansion in transport services labour had become much more mobile Notwith standing this, fancy rates of wages were demand ed and were, in many cases, paid Wages, in the more organised industries, however, Wages, lagged far behind the rapid rise in prices and real wages were not enough to maintain the pre war standard of life of the workers The beginning of the year 1919 therefore saw the outbreak of industrial strife on a scale previously unof industrial strike on a scale previously un-flower and during the war, strikes on any organised scale upto their were rare and the employers were not giving anything away in the League of Nations, was among the 39 coun-tries represented. The Indian delegates were organised scale upto their were rare and the employers were not giving anything away in the Government of India, Sir unless they were absolutely forced to do so Prices, however, continued to rise and it was and Mr N M Joshi representing Indian employers Prices, however, continued to rise and it was and Mr N M Joshi representing Indian inhour becoming extremely difficult for the workers to meet even their most necessary expenditure on relating to a number of subjects including the the oxisting rates of wages

The post war boom was short lived bilisation and the closing of munition factories swelled the ranks of the unemployed Rising Hours Convention, but as far as India was concrete and inflation hamstringed the reorganisation of industry and stocks of all kinds of manufactured articles began to accumulate Prowolld be too revolutionary a change for the duction had consequently to be eased off and country and would never be accepted by Indian the trail was laid not only for a reduction in employers. The Conference therefore agreed to employers the conference therefore agreed to employers. The post war boom was short lived factured articles began to accumulate Pro-would be duction had consequently to be eased off and country an the trall was laid not only for a reduction in employers hours of work but also for reforms of a world granta spe wide and far-reaching character which were it was decided that a beginning should be made to be introduced in all countries as the result by the introduction of a 60 hour week in factories of the formation of the International Labour subject to the Indian Factories Act Organisation

THE INFLUENCE OF THE INIERNATIONAL LABOUR ORGANISATION

brought into being the International I abour, Organisation which was entructed with the task of securing, as far as practicable, the observance Influence which broke out in the year following of these principles. EFFECTS OF THE POST-WAR DEPRESSION.

A period of acute depression set in in all industries towards the end of the year 1922 The cost of living index compiled by the Bombry Labour Office showed that prices had risen steadily for two years after the end of the war The annual average of the monthly index numbers for the year 1920 (1911=100) was 183, for 1921 this average fell to 173 and for 1922 to 164 The very 1923 opened with a sharp decline to 156 but for the next five very the index numbers varied between 150 and 161. The enquiry into cotton mili wages showed that the real wages of cotton mili workers in a handland and the their these property lights. Ahmedabad were thirty three per cent higher in 1921 than in 1914. The Ahmedabad Mill owners' Association, thereupon, made the first organised post war move in India for wholesale reductions in wages A cut of 20 per cent was announced with effect from 1st April 1923 The strike of the Ahmedabad cotton mill workers which followed was by far the largest and the most disastrous that had ever occurred in that and resulted in a total time loss of nearly two and a half million man days. A compromise was eventually arrived at by the terms of which wages were to be reduced by 15g per cent instead of by 20 per cent. Labour received a rude shock and It was felt that the turning of the tide had set in

Cotton textile millowners in Bombay had met demands for higher wages between 1917 met demands for higher wages between 1917 and 1920 partly by the grant of dearness of food allowanees and partly by the payment of an annual bonus of one month's pay dependant on profits. In 1924, the Millowners' Association, Bombay, decided that the profits for 1923 would not justify the payment of the bonus. The workers of all mills in the city struck work. The Government of Bombay appointed a Committee of Enquiry under the Chairmanship of Sir Norman Macleod. Cluef Justice of the of Sir Norman Macleod, Cluef Justice of the Bombay High Court The Committee's report was entirely against the workers The Bonus Dispute Strike in Bombay in 1924 was by far the worst that had ever occurred in the country until that year and resulted in a time loss of nearly eight million working days

The depression which set in in 1922 continued for several years. In the year 1925, however, the Government of India came to the rescue of the Cotton Textile Industry and the workers employed in it by abolishing the excise duty of 31 per cent, which had been levied on cotton manufactures in India for many years past In that year, millowners in Bombay announced a cut of 121 per cent in wages. This announce ment was followed by a general strike which lasted for over two months and which resulted

illiteracy and inadequate organisation, they were able to take concerted action and to offer a stubborn resistance against any attack on their wages"

As compared with the period which has just been reviewed, the years 1926 and 1927 were one of relative ealm and peace in Indian industries Labour, with a singular unity of purpose, had conducted many hard battles for the mainten ance of the standard of life which it had secured but it had paid dearly for the victories it had won owling to the wages it had lost during periods of protracted stoppages of work caused by strikes The two years 1926 and 1927 were spent in a quiet consolidation of their respective positions both by the employers and the employed and also by Government who had completed a heavy programme of labour legislation. The time lost through Industrial disputes during these two years amounted to just a little over three million man days as against a loss of five millions in 1923, 8 7 millions in 1924 and 12 6 millions in 1925

The year 1928 witnessed the outbreak of It involved nearly 45,000 workpeople industrial strife of an intensity which has been unknown in India at any time before or after that year Two causes were directly responsible for this The Indian Tariff Board (Cotton Textile Indiastry) constituted by the Government of India in 1926 had made a number of recommendations alming at a more efficient conduct and management of cotton textile milis in India A group of these recommendations concerned the introduction, by the mills, of "rationalised" methods of work by which is meant the calling of the property of the calling of the meant the asking of workers to mind more machines The second was the formation of The Workers' and Persants' Party the members of which secured appointments on the executives The main of many trade unions in the country object of this group was to foment widespread discontent with the existing structure of society and this they did by preaching revolutionary doctrines of class hatred, the uprooting of eapitalism and the smashing of stable governments. The industrial strike was the chief weapon in their armours. Following the recom weapon in their armoury Following the recommendations of the Tariff Board, Messrs E D Sassoon & Co, Ltd, who at that time owned eleven large cotton mills in the City of Bombay, introduced certain measures of rationalisation in their Manchester Mills This was at once met by a prolonged strike in that mill Early in the year 1928, a few other groups of mills announced their intention of securing greater efficiency. This was the opportunity which the Communists were waiting for and they took it by the forelock. The strike of cotton textile mill operatives of 1928. in Bombay City was the most disastrous that had yet taken place in Indla All the mills in the Clty were affected and there was complete stop page of work for over sla months The time loss lasted for over two months and which resulted in a time loss of nearly eleven million working days. Both sides were adament but the million man days. Both parties put up different sets of demands. The milliomers, Millowners had given an undertaking to Government to drop the proposal for a wage cut if the excesse duty was abolished. The strike, therefore, ended as soon as the Viceroy's Special Ordinance announcing the suspension of the excise duty was published at the end of November 1925. This strike 'was a great victory for mittee agreed to call off the strike on Government assuring the parties that they would to the employer and it still co th is the imagest a from humb to the sea a under per more of the standard works of refer no modification of mployment in otton tull mill in bomby City Other import at trik during meneding the Trade Disputes A time minor the yer 19.8 or urred in the T ta Iron and Steel particular and placing it mened to many two standard provides and placing it per entity (the C mpany two standard particular) and placing it per entity (the C mpany a Works at Jamshedp ir on the Fat Indi n end South Indi n Railway in the Fort Gi tr J te Mills nd in the textile mili t Sholapur and Cawnpore Tie et ti ties i e n n xion with lithe i d st laid n tes in Indi the year 10 8 re as follow Numb r of disp it

seven millon working days. The Government of Bombay appointed a Court of Inquiry under the new Trade Disputes Act with Mr Justice Pearson as its Chairman. The Court came to the conclusion that all the blame in connexion with this strike rested with the Bombay Girnl Kamgar Union.

We have, so far, in this brief historical survey of the growth of the labour problem in India, occasionally reterred to the activities of cortain labour leaders, strike committees and unions. We deliberately refiained from amplifying these easily references because we are dealing with the subject of 'Trade Unionism in India'' in another Chapter. We may, however, in order to complete the chronicle of the important events of the 3 car 1929, refer briefly here to the split brought about in the Trade Union Congress as the result of the subjective propagands of the Leftists Voting in the Annual Sessions of the Congress was on the basis of the membership of the affiliated Unions. As a result of the affiliation of certain communist organizations, the Communists had secured a majority vote at the Tenth Session of the Congress held at Nagpur in that year. Resolutions were accordingly passed for the boyeott of the Royal Commission on Indian Labour and the International Labour Conference, for the affiliation of the Congress to the League against Imperialism and for the appointment of the Workers' Welfare League, a communist organization in England, as agents of the Congress in Great Britain. This led to the breakaway of the moderate elements in the Congress who set up a new central trade union organization under the name of The Indian Trades Union Federation.

Another important event which occurred in the world of Indian Labour during the year 1929 was the strike of the employees of the B B & C I Railway's Loco and Carriage Workshop at Dohad The railway administration had transferred a number of operatives from their big workshops in Bombay to the new workshop which they had built at Dohad and had given them certain allowances on reduced lates of pay. The men demanded a continuation of the old rates plus Dohad allowances and failing a restoration of the cut they struck work. After the strike had proceeded for some weeks, the Government of India appointed a Board of Conciliation under the Trade Disputes Act and this Board upheld the workmen's claims. Mention should also be made of the initiative taken by the Government of Bombay in that year by passing the first piece of provincial labour legislation—The Bombay Maternity Benefits Act

Statistics of industrial disputes in India have been maintained only since the year 1921. The tremendous dislocation which the subversive propaganda carried on by the communist elements in the trade union movement was responsible for in Indian industries during the two years. 1928 and 1929 can best be judged by the fact that the industrial strife of these two years alone was responsible for a total time loss of 43.8 million man days in the seven years from 1921 to 1927 and the loss of 16.9 million man-days in the seven years from 1921.

The Government of Inquiry under with Mr Justice thoroughly discredited Except for of a comparatively minor character wind organised by the communists in central industries which had not been affected and 1929, there were no general strikes particular magnitude in any centre of it for the next four years

No event of any particular significe importance occurred in the world of Labour during the three years betwee and 1933 Both Capital and Labour sei representatives annually to the Interr Labour Conferences held at Geneva Conventions and the Recommendations at these Conferences and the recommen inide by the Royal Commission on Labour were subjected to careful scruti examination by the Central and the Pro Governments in close consultation wi associations of the employers and the em After the bitter struggles of 1928 and employers were not only auxious to aliov ing dogs to lie as far as wages were con but many of them, in anticipation of the tion which they knew was coming, endea to Improve conditions of employment w. possible The cost or inving was filling wages, expressed in terms of purchasing were rising. The beginning of the year however, saw the intensification of a der which had set in a year or so before continued fall in prices, the purchasing of the agriculturist had worsened and consequence, stocks of manufactured on the hands of the industrialists were at lating in spite of the introduction of 'ra methods of work wherever possible and ioss accounts were showing adverse by Employers now felt that the only after left to them were to close down, to re short time working or to reduce wages mills had already resorted to short time working the state of the factor. and many cotton milis and other factorl been compelled to close down

CONCERTED ATTACK ON WARAITES.

The first beginning at reducing wa organized industry was mide in cotton mills in Bombay. The Midiowners Assoc Bombay, give a free hand to its Membe in the matter. Many mils closed down few months and reopened with offers of reacts of wages. There was little night wand there was a considerable volume employment. Workers had no option accept employment on the reduced. Other mils taking advantage of the site of t

were a bmitted to Government but no Pro in there was much is a industrial strife in the cotton el I Government cept Romi's took any millindastry in Dombay City than ther I d action in the mattr in Mari 1934 the been prior to the tyear Co erament of Don bay Instructed His Labo r Office to in titute a Departm t | Inq iry is to INSIII UTION BY THE GOVERNMENT tile extent to whilin wages I ad I en red c | during they r 1933 34 in the varius entre f

LABOUR UNDER PROVINCIAL AUTONOMY.

With the advent of the new reforms under the Government of India Act, 1935, full provincial autonomy was established in all Provinces in India with effect from the 1st April 1937 Indian National Congress contested most and won the majority of the seats for the Legislature Assemblies in the Provinces of Madras, Bombay, the United Provinces, Bihar, the Central Pro-vinces and Orissa The Labour Policy of of the Irdian National Congress, as set out in its election manifesto is "to secure to the industrial workers a deemt standard of living, hours of work and conditions of labour in conformity as far as the economic conditions in the country permit, with international standards, suitable machinery for the settlement of disputes between omployers and workmen, protection against the economic consequences of old age, sickness and unemployment, and the right of workers to form unions and to strive for the protection of their interests" The earlier resolution of Congress on fundamental rights, generally states in addition, that "the State shall safeguard the interests of industrial workers" and makes special reference to women workers and children Congress Ministries, for reasons set out elsewhere in this volume, accepted office in July 1937 but resigned in all Provinces in November 1939 owing to the alleged failure of the British Government in defining elevely the war aims of Great Britain with special reference to India Whilst the Congress was in power its Labour Poincy was amplified by responsible Ministers in various Provinces either by the issue of Press Notices or by statements made in public speeches For example, in addressing a meeting of the representatives of the workers on the 19th February 1938, the Honourable the Minister for Finance in the Central Provinces declared that 'the Congress Policy in regard to labour will be uniform in all Congress 'rovinces and it will be the same of the Congress to see the and it will be the aim of the Congress to secure vou your rights without any struggle as far as possible." The most comprehensive statement with regard to this policy was contained in a press note issued by the Government of Bombay in August 1937 from which certain of the more important passages were reproduced at pages 521 and 522 of the 1940 41 Edition of this publication

In Bengai, where a popular Ministry was formed with representatives from the Proja, the Muslim League, the Independent Hindu and the Independent Muslim parties, the policy of the Government with regard to labour was contained in a statement made by the Honourable Minister in charge of the Department of Commerce and Labour to represent itives of the Press in September 1937 Ho stated that some of the important items which the Government of Bengal were considering for the amelioration of labour were the establishment of industrial tribunals, employment exchanges, decasualisation of labour, schemes for health insurance, adequate housing, regulation of employment in shops, conclination of debts, penalising of filegal gratification and the institution of enquiries into conditions of living by means of collecting family budgets with a view to ascertaining whether it

would be possible to introduce minlmum wage fixing machinery and schemes of unemployment insurance

We have during the course of this historical survey made an endeavour to mari, the outstand ing mllestones in the development of the growing eonseiousness of their rights among the toiling masses of the country. This development was never so rapid as that which took place during the years immediately following the advent of Provincial Autonomy The Governments of Bombay, Biliar, the Central Provinces and Berar and the United Provinces appointed Committees of Inquiry to examine existing levels wages and conditions of employment, and to make recommendations In Bomoay and in the C P these enquirles were to relate to labour employed in cotton textile mills In the United Provinces and in Bihar, labour in aii industries was covered Government of Madras, following a pro-ionged strike of cotton mili workers in Colm batore, appointed a Court of Inquiry under the Indian Trade Disputes Act Fortunately for iabour ail these various enquiries were conducted during a period when the textile industries in India were, after a fairly prolonged period of depression, showing signs of revival owing mainly to the Sino Japanese war Prices of raw products had fallen during the latter half of 1937 The margins between costs of production and selling prices had widened to the advantage of industry and it was consequently possible for employers to necept the recom mendations made by various Committees and Courts of Inquiry and Boards of Conciliation for increases in wages and for certain improvements These acceptances in conditions of work These acceptances were, however, not made by employers entirely of their own free will In some cases the Govern ments concerned issued resolutions and notifications accepting such of the recommendations made by the Committees which they concurred in and recommending their adoption by the employers It was obvious that non acceptance of the recommendations made would be followed by legislative ecereion if necessary

During the year 1938 the Government of Bombay put through the Bombay Legislative Assembly after a record debate of nearly 150 hours going over 33 days, their Bombay Indus trial Disputes Act They also issued to the various interests concerned for opinion draft proposals for the conditions to be fulfilled for the recognition by employers of unions of their workers, for the grant of holidays with pay during periods of sickness, and for the regulation of hours of work, rest periods and the grant of holidays in commercial offices, shops, As far as the last hotels, theatres, ememas, etc. As far as the last is concerned, the Bombay Shops and Estab lishments Act was passed on the 31st October 1939

There was a spate of activity for iegislative measures for the amelioration of labour

Central Provinces and Berar Bill were drawn up, occurred during the s ven years from 1030 to for (1) the collection of statistics () fr amending [1935]. The artual numbers of disp t s in 19.8 in 19.8 and in the Indian Entotries Act 1934 to provide and 1939 were 599 and 695 repect it was a sin to the registration of all fact rice and for the lot the registration of all fact fies and not ton 0 to the first of the fatter period w r not so interess be prescribed by Covernment ad (3) to m. LABOUR COMMILLES APPOINTED BY CONGRESS COVERNMENTS

Members—Sir Sorabji Saklatvaia and Mr Sakarlal Balabhai representing employers and Messrs Khandubhai K Desai and R A Khodgilat representing workers' interests, Secretary—Mr S R Deshpande, M B E, Assistant Commissioner of Labour The Committee published an Interim Report in February, 1938 This Report mainly recommended an immediate Increase of about 12½ per cent in the wages of all cotton mill operatives in the Province of Bombily Government published the Report with a Resolution stating that the Committee's recommendations were entitled to the weight and authority of an award of a Court of Arbitration and as such should be accepted both by employers and labour All cotton mills in the Province accordingly gave the recommended increases in wages with effect from February 1938 This increase has come to be regarded is the "Congress Inam" The Committee dispersed for some time after completing its Interim Report Mr Doulatram, the Chairman, fell ill and Mr Deshpande, the Secretary, proceeded on leave Government, thereupon, appointed the Honourable Mr Justice H V Divatia, Chairman and Mr N A Mehrban, M B E, F S S, Secretary The reconstituted Committee commenced its work in Bombay in November 1938 and submitted its Final Report to Government in July 1940 This was published in June 1941 It is a document of over 500 pages containing 485 conclusions and recommendations and is priced at Rs 1-50 per copy

Committee -Labour Inquiry Immediately after the advent of the Reforms, Cawnpore was a storm centre of conflict between Capital and Labour In July 1937 industrial strife culminated in a complete stoppage of work in almost ail cotton textile mills in the City and severni units in many other industries were also A settlement of the strife was reached nffeeted in August by virtue of one of the terms of which the Government of the United Provinces agreed to appoint a Committee to examine and report on the conditions of life and work of labourers employed in factories in Cawnpore Chairman—Sriyut Rajendra Prasad Saheb, Members—Mr B Shiva Rao and Professor S K Rudra The Committee's Report covering a wide field of subjects and including a host of recom-mendations closely following those made by the Bombay Committee was submitted to and published by the Government of the United Provinces in April 1938

The Central Provinces Textile Labour Inquiry
Committee —The Government of the Central
Provinces and Berar appointed a Committee
under the Chairmanship of Mr N J Roughton,
108, Financial Commissioner, in February 1938,
to examine and report on the wages question

D R Gadgil and S A Brelvi, Associate Members—Sir Sorabji Saklatvaia and Mr Sakarlal Balabhai representing employers and Messrs Khandubhai K Desai and R A Khodgilar representing workers' interests, Secretary—Mr S R Deshipande, in B E, Assistant Commissioner of Labour The Committee published missioner of Labour The Committee published Report mainly recommended an immediate linerase of about 12½ per cent in the wages of all cotton mill operatives in the Province of Bombay Government published the Report with a Resolution stating that the Committee's recommendations were entitled to the welght and authority of an award of a Court of Arbitration and as such should be accepted both by employers and labour—All cotton mills in the Province. The terms of reference of this Committee were, however, restricted to an examina mittee were, however, restricted to an examina tion of the Interim Report of the Bombay Committee with a view to assessing the extent to which the recommendations contained in that Report could be applied to mills in the Province. Members—Messrs A C Sen Gupta, V R Rathypa, M L A, and C C Desai, I OS, Teehmeat Advisors—Messrs S H Bathwalia and R S Rukar The Report of this Committee with a view to assessing the extent to which the recommendations contained in that Report could be applied to mills in the Province. Members—Messrs S H Bathwalia and R S Rukar The Report of this Committee with a view to assessing the extent to which the recommendations contained in that Report could be applied to mills in the Province. Members—Messrs S H Bathwalia and R S Rukar The Report of this Committee were, however, restricted to an examina mittee were, however, restricted to an examina tion of the Interim Report of the Bombay Committee were, however, restricted to an examina tion of the Interim Report of the Bombay Committee were, however, restricted to an examina tion of the Interim Report of the Sorbay and the recommendations on the Province of Bombay Committee were, however, restricted to an examina tion of the Interi

The Bihar Labour Inquiry Committee —This Committee was appointed in March 1938 to inquire into the conditions of iabour in industry in the Province and to make recommendations, for their improvement Chuirman—Mr Rajen dra Prasad, Deputy Chairman—Mr R R Bakhale, Members—Professors Abdul Barl and S K Saran, Dr R K Mukerjee, and Messrs M P Gandhi, Jagat Narain Lal, H P Chandri and G M Hayman This Committee's Report which runs into nearly 300 pages and contains over 150 recommendations was submitted to Government in June 1940 and was published in August during the same year

With the exception of the Central Provinces and the Bihar Reports, the Reports of the two other Committees dealt with above were sub mitted to Government after the resignation of the Congress Governments by whom they were appointed. The more important of the recommendations made by these Committees cover a wide field of social legislation which can only be put through by popular Governments and which cannot be made the subject-matter of Governors Acts. All the Governments concerned lave, however, taken administrative action in connexion with such of the recommendations as could be given effect to either by the issue of departmental orders or by circulation to the interests concerned. Quite a number of the recommendations made by all these Committee have been taken up for consideration by the ferences of Labour Ministers with a view to the passing of uniform Central legislation applicable to all Provinces. The questions so far discussed and those on which action has been initiated will be dealt with under the heading of "Conferences of Labour Ministers."

We shall deal with the more important matters which have happened in the world of Indian Labour since the outbreak of the present War in the next chapter

SECOND WORLD WAR-ITS EFFECTS AND REPERCUSSIONS

REPERCUSSIONS

In the previous CI, it were gritted to it was not the growth of the world war of 1914 184 4 one it still yards and manner the pf the lot it the growth of the level in man to the labour problem in this country. The war is not easily for the very local new serpence of the country of the count

owhere Association in the continuous and the contin Wich Japan started railling the sale I lowards the dof 1910 and it ough ut the ye r 1911 it to be an interest of the condition of the plane of the p completing their plans for post-war security for wages by securing to the workers adequate labour. The objects which Dr. Ambedkar has dearness allowances to enable them to maintain been aiming at cannot be described better than the standard of life which they had at the in his own words which we take from the opening speech which he delivered as Chairman of the Second Tripartite Conference

"Ever since the basis of social life was changed from status to contract insecurity of life has become a social problem and its solution has occupied the thoughts of all those who believe in the betterment of human life. There has been an enormous energy spent in chunciating the rights of man and the different sorts of freedom which must be regarded as his inchen-All this of course is very good, What I wish to say is that there able birth right very cheering will be very little security unless and until, to use the words of the Report of the Economic Group of the Pacific Relations Conference, these rights are translated into terms which the common man can understand, namely peace, a house, adequate clothing, education, good health, and above all the right to walk with dignity on the world's great boulevards without the fear of a

The quinquennium 1940 1945 has seen an expansion in Indian industries which not even the most optimistic of persons would have ever dreamt of as even possible before the War started To day (July 1945) India and her workmen are producing commodities, articles and munitions of War which, five years ago, were the special prerogative of the highly industrialised countries of the West There has occurred an unparalleled rise in employment Women have come into Industry, commerce and trade in increasing numbers. There have been bitter struggles and disputes between employers and labour for bigger wages, for higher rates of dearness allowanees, for greater participation in War profits These would be too numerous in character to deal with here Many of these disputes were solved without actual stoppages of work by referring them to Courts of Inquiry and Boards of Conciliation created under the Trade Disputes Acts and to Adjudicators appointed under Rule 81A of the Defence of India Rules Quite 1 number were, however, solved only after bitter and prolonged strikes Among the more recent of these big strikes was that of the cotton mill workers in Nagpur and other textile contres of the Contral Provinces and Berar who downed tools for nearly three months in connexion with their main demands for a 40 per cent increase in wages and for a bonus equivalent to three months' wages The latter was secured before resumption of work. We regret want of space will not permit us to deal even briefly with others

DEMANDS FOR DEARNESS ALLOWANCES.

One of the carliest repercussions of the War was the panie it caused in the commodity markets in India Prices of all foodstuffs and con-snmable commodities shot up and, as far as Labour was concerned, the authorities were at

the standard of life which they had at the commencement of the War With regard to prices, the Government of India had taken power under sub rule (2) of Rule 81 of the Defence of India Rules both to make provision "for controlling the prices at which articles or things of any description whatsoever may be sold "and to delegate these powers to Provincial Governments as well Almost all Provinces appointed Controllers of Prices at Headquarters and empowered Revenue Officers in charge of Districts to act as local controllers in respect of the areas within their jurisdiction Advisory Boards or Price Control Committees were set up to help these authorities. A considerable amount of good and effective work was done when these price control schemes were first initiated because the immediate problem then was to prevent the exploitation of the bona fide consumers at the hands of both the profiteers and the hoarders. The great defect of the system, however, was that each local price controlling authority took independent action without any Provincial or Central co ordination of policy As time wore on, therefore, and the laws of demand and supply began to assert themselves in relation to world markets and the difficulties of securing tonnage for both export and import of con sumable commodities, the work of effectively controlling prices began to grow more and more difficult. The original measures of control ranged over a wido field of commodities. The number of articles under control had, however to be gradually reduced as different sets of economic forces began to assert themselves in The work relation to particular commodities of the Controllers of Prices began to be mainly confined to a close study of the diverse economic factors that were in play with relation to particular articles and to the periodic issue of lists of fair prices at which certain controllable commodities could be sold A detailed description of the measures adopted when the Prices Control'scheme was first launched was given at pages 535 to 537 of the 1941 42 Edition of this publication and it is not necessary to traverse the same purely historical background over again here. Consequent, however, on the introduction of rationing in Bombay City with introduction of rationing in Bombay City with effect from May 1944 and its extension to other towns and areas, most Provincial Governments in India have set up large establishments to deal with questions connected with food supply Control has been extended over a wide field of commodities and everything possible is being done to keep down prices

A recent development has been the appoint ment, by the Government of India, of Controller Generals of Civil Supplies These Officers, with their large staffs of Inspectors, control almost all imported manufactured articles many of which cannot be purchased without securing permits from the authorities concerned and all of which are sold at controlled prices

One of the most vexed questions in Indian industry since the advent of the second World War has been the mulntenance of the workers' once faced with two major problems of prime pre war standard of life During the carlier importance (1) the devising of measures to stages of price control, prices varied within check profiteering by controlling prices, and narrow margins. The official cost of living index (2) the stabilising of the existing levels of real for Bombay City with prices in 1922 24 as the b section at 105 for A with 105 for Sept mb

by the Ranguel ir Lorid of Conciliation for the sliding with a of degree a allowances but the payment by cotton null in Bombay of a line rate which amounts pull are somewhat less than of degrees allowance of two annua for each day a time endopted by the Millowners' Association, work would soon be parted. The Government bombay of Bombay took up the que tion of the revision. of the rate of dearness allowance hitherto pald? by the member milis of the Millowners' As ocia in India are those that obtained in cotton tion Bombas, with the As ociation and as a textile milis in Ahmedalad. In an earlier paraceult of the discus lons which folio ed the graph we have stated that in awarding an addless across with fluctuations let the goal of the discussion with fluctuations let the goal of the cotton. varying with fluctuations in the cost of living of one point over the figure of the official cost of living index between 124 and 14. The allowance was living thicky for Ahmedahad for the month of to be at its 4.5.0 for 26 worling days rishn by successive stages of four annax and three anna for each rise of one point in the index to Rs. 9 for each rise of one point in the index to Rs. 9 for each rise of one point in the index to Rs. 9 for each rise of one point in the index to Rs. 9 for each rise of the point of the eather should be compensated to the extent of 66.67 per cent of the actual rise in the cost of living at any particular days. Post of the beinger was to be made The Government of Bombay land a comprehensive Press Note on the subject in August 1911 In the course of which they expressed the ferrent These were started but great difficulties were hope that employers in all other industries in experienced in connexion with their running Bombas would fall into line with the Millowners Association Bomby, and pay dearness allow of the Industrial Court. In alew, however, of ances to their workers necordingly. Between the continued improvement in the condition August 1941 and the time we go to Press for tills of the cotton textile industry in India, the Ldition (Iniv 1915) the Millowners' Association, bomony, revised their sliding scale of dearness allowances on several occisions, the just revision covering fluctuations in the index between 204 and 223 for which deveness allow ances ranging from 23 8 0 to Rs 28 per month of 20 working days were payable. The cost of living index for Bombay City for the month of April 1943, however exceeded the limit of 223 dermess allowance for any particular month and stood at 225. The Millowaers' Association would be increased by 45 per cent with retrodecided not to issue any further extensions of spective effect from July 1941. This agreement its shifting scale but to a recover the statement of spective effect from July 1941. decided not to issue any further extensions of its silding scale but to appounce the amount of dearness allowance payable as against the cost dated 15th September 1941. It is of inferest to of living indox for any particular month as soon observe that on the basis of this agreement the as the official figure for the index for that month dearness allowance for cotton mill workers in a particular. In account to the transfer of the index for that month dearness allowance for cotton mill workers in a particular in the country of the index for that month dearness allowance for cotton mill workers in the past of the index for t as the official figure for the index for that month is available. In accordance with this decision the dearness allowance due for the month of Ahmedabad for the month of October 1943, the dearness allowance due for the month of Ahmedabad for the month of October 1943, amounted to as much as Rs 77 0 9 for eight and the 26 working days. It would be of interest to Minicabad Millowances. Association in the mention that the highest peak in the dearness allowances are paid to cotton mill workers in Bombiy City was reached in September 1944, when the index for the cost of living for that City reached 250 against which an amount of Rs 34 6 0 for 26 working days was paid. Most large employers in the City of Bombiy such as was rejected by the Court. The original award large employers in the City of Bombiy such as General Motors (India) Ltd, Messrs Lever Brothers (India) Ltd, the Bombay Garage, the Soonderdas Saw Mills, Messrs Godrej and Boyce Manufacturing Co, Ltd, and a host of others are paying dearness allowances to their workers on the basis of the shiding scale of the Millsyners Association Remines As of the Millowners Association, Bombay As the result of adjudication proceedings in a recent dispute between the Bombay Electric Supply & Tramways Co. Ltd., and its employees the Bombay Millowners' scale of dearness allowances to the employees of this company as well A group of large engineering firms in Bombay such as Messrs Richardson and Cruddas, the Mazgaon Dock of Messrs Mackinnon Mackenzie & Co., Messrs Alcock Ashdown & Co., Ltd., and a few others have laid down a sliding scale of dearness allowances based on

official cost of fiving index for worling class, an increase of one per cent, over earning in Bombay City touched 122 for the month of from existing lease rates of pay for every real June in that year. The reward marked tendency of two points in the cost of hving index for at that time for prices to rise still further and it appeared that the limit of 10, to 123 full down the Bombay true Co, Itd, has also adopted by the Bombay true Co, Itd, has also adopted by the Bombay true Co, Itd, has also adopted by the Bombay true Co, Itd, has also adopted by the Bombay true Co, Itd, has also adopted by the Bombay true Co, Itd, has also adopted

The highest rates of dearness allowances paid ular date. Part of the balance was to be made up by opening a number of cost price grain shops and the Scheme was abandoned with the consent Aimedabad Textile Labour Association, success fully pressed a demand on the Ahmedabad Villowners' Association in the middle of the year 1941 for the uncompensited balance of 3333 per cent in the rise of the cost of living at Aimedabad to be made good to the workers and the two Associations reached a further agreement on the 13th Aimedabad to the workers and the two Associations reached a further agreement on the 12th August 1941 by virtue of which the was ratified by the Industrial Court in an award was rejected by the Court The original award of the Industrial Court was based on a submission entered into between the Ahmedabad Millowners Association and the Textile Labour Association and the Textile Labour Association, Ahmedabad By virtue of one of the articles of that submission the dearness allowances awarded by the Industral Court were to be read up to the angle of the European

ancenames and brieflyers and brief monder All technical per onnel who are I ritish Indian subjects or visite municants from Malva Burma, Acpal and Portugue e and I reach India and who are over the age of 17 and under the age of 50 are, under he wy penalties for default, liable when called upon to do so to undertake employment in the National Service

The Central Government has power to declare any factory which is engaged in the production of munitions or other war supplies or in work which is likely to resist the efficient prosecution of the war to be a factory engaged on work of national importance and on the declaration of a factory as such it becomes a "notified factory"

The Ordinance gives powers to the Central Government to constitute for such areas and in such places is it thinks fit National Service Labour Tribunals to exercise such functions as have been assigned to them by the Ordin mee Each Iribunal is to consist of a Chalman and not less than two other members all of whom must be servants of the Crown at has the right to associate with itself in its deliberations such other persons as it thinks fit Every notified factory has the right to apply to a Tribinal or to the Central Government for technical personnel An important function of a Tribunal personnel An important function of a Tribunal is, therefore, to find the necessary personnel for such notified factory. With this object in view, National Service Labour Tribunals have been given power to ascertain particulars of the technical personnel employed in all industrial undertakings, the suitability of such personnel for employment in national service and the capacity of the undertaking to release such personnel or any part thereof for such employment. In order to enable the Tribunals to discharge these functions they have been given

clothin, and medical attendance. Men sont and rath Scheme and to advise how overson arcentified to inexpitation allowence be adjusted to meet the prisent day and both if authorized. Promorlous detend on its stry and (2) to advise Governe clicknes. A scheme has recently been adapted how root trainers to y be utilized for on the interpolation of the interpolation with plan of ladastell reconstruction with and back

At the earlier states of the scheme effections in the latest state of the scheme effection on the improvement of training and the production of a later article in some and the production of a later article in some and the production of a later article in some and the distinct of the Railian and the manners of the results and the order of the Railian and the most be not been formed at most be absorbed. have not been formed at most he adquirter lindagers and to senior Chalement centres. With a view to lumbo in, the train and Services Labour Leibning and Services Labour Leibning. centres. With a view to impro in, the train ing stimilards or instructors classes for ins tructors have also been started in all training centres. Hindust mide being taught with the object to universally training in this innounce throughout the country. Recruitment of a better type of trainer is being effected by regulation e indidates seeking admission to training centre to pass intelligence tests on the lines of the psychology tests given in other countries. A measure adopted to improve the physical standard of the trainers is to give sharf oil at the rate of the passengers, a day to make the rate of two terspoonfuls a day to under doveloped men. A total quantity of 18 099 the of this oil was bought from the Government of Madras for this purpose. In order to enable trainces who have not passed the prescribed trade tests qualifying for industrial employment. it the date of conclusion of hostilities, the Government of India have decided to continue their technical training scheme on a diminishing barls for a period of 18 months after the War Trilnees will continue to receive free instruction wind the usual stipends and concessions. A nation of a nation of the New Instrument Mechinics Training Centre was started at Hindupur near Bangalore with 275 sevis in the year 1914 for training boys in munitions but also for their mainten the manufacture of precision tools which at repair in the field. It is to meet this one time was considered musnitable for India. The tride is open to voung men who have reached Matriculation Stindard and are between the ages of 17½ and 30. They are trained under the guidance of a British expert. Trainees get a scholarship of Rs. 59 4 0 per month with free food, lodging and elothes

The Technical Training Scheme has demonstrated that, with intensive training semishilled men can be trained for all industries and that the standard of such men, after from slx to eight months' training, is at least up to, if not above, the standard reached under ordinary peace time apprenticeship schemics of two to grade technological institute in India three years duration. The Government of on the lines of the MTT to provide India felt that if the training imparted under the instruction and training in technology. Technical Truning Scheme is supplemented by further biassed' training, the final product would to adjust the scheme to the wartime needs of civil industry they decided to set up an Advisory British Minister of Labour, made a scheme to the wartime needs of Commuttee whose functions are (1) to review the cisting methods and syllabuses of training which he proposed to put into effect for

pl n of lading reconstruction with secretary in the Labour Department's man and the Director of Tribing, Di of Iabour, is the Nie Chairman of mittee At a recent meeting of this C held in Bombiy in Ichruiry, 1945 it w to start a training scheme distance crife-men for the post war needs of cl try in India and to aim at a nation of training including a National Cer Criftsn inship on the completion of t

The immense possibilities which the Training Selvence holds for Indian sout industrialisation of the country after have not set been realised in India workers are at any time an asset of gr to a nition and it is generally admi one of the most serious setbicks to the ment of Indian industries in the past the ab ence of trained workers. With the ab ence of trained workers break of War and the alfal important mechanisation quickly assumed, the r skilled worlers whileh a nation or a also to build up an army of skilled which after the war will enable India to on equal terms with other highly indi-countries that the Technical Irainin of the Government of India has been c

It would be of interest to observe ! a view to secure an adequate supply of personnel to meet the demands of the trative services and industrial develo the country in the post wir period, the ment of India have appointed a Spec miltee with N R Sarkar as Chairman der the question of the establishment grade technological institute in India on the lines of the MTT to provide

WAR INJURIES (COMPENSATION INSURANCE) SCHEME.

A War Injuries (Compensation Insurance) Scheme was enacted by the Central Government under the War Industries (Compensation Insur ance) Act, 1943, which was brought into force on the 16th November 1943 The objects of this (Maintenance) Ordinance, 1941, factory workers, mine workers, workmen employed in the major ports, and to workers employed on my estate where cinchona, coffee, rubber or tea is grown The amount of compensation is roughly the amount of compensation is roughly the difference between the amount paid by Govern the Regional Committee for Bombay City is under the Chairmanship of Mr H L Butler, Commissioner of Police, Bombay to workmen covered by the Essential Services (Maintenance) Ordinance, 1941, factory workers, the Workmen's Compensation Act if the war PAYMENT OF FAMILY ALLOTMENTS injury had given a right to compensation there There is no limit as regards the monthly salary of the workman as in the Workmen's Com-pensation Act Insurance has been made com pensation Act pulsory for every employer covered by the Act who has to take out a policy of insurance from the Central Government on payment of an advance premium at the rate of annas four per Rs 100, subject to a minimum of Rs 8, on the wage bill for the quarter ended 31st December 1943 if the employer was an employer for one quarter before the 1st January 1944, otherwise for any subsequent quarter during which he became an emp oyer for the first time, provided the quarterly wage bill has exceeded Rs 1,500 All the premia received from the employer go to make the War Injuries Compensation Insurance Fund from which all payments of compensation, etc , will be met The fund cannot be utilized to pay compensation to Crown employees as the Crown is not required to pay insurance premia in respect of its employees The same machinery in respect of its employees. The same machinery as administers the War Injuries Scheme is to be utilized for the purpose of the War Injuries Compensation Insurance Scheme.

UNSKILLED LABOUR SUPPLY COMMILIEFS.

During the earlier stages of the War the supply of unskilled labour had been satisfactory requiring no measures for its control or allotment the end of the year 1942, however, there were Indications that the problem of supply of such labour was assuming importance in a few areas The Government of India therefore deelded to set up both Provincial and Regional Labour Supply Committees for areas where serious shortages were being experienced or were likely to be anticipated and a beginning was made by the setting up of such a Committee at Jubbulpore where the needs of the Central Government establishments predominate The Committees have no statutory powers They are ordinarily, under the chairmanship of the Chairmen of the National Service Labour Tribunals of the Provinces in which they are established. followed by the local undertakings of the Central be taken in respect of such hartal, the Provincial Government—any differences to be decided by Government may by order in writing require that Government at headquarters The functions of Unskilled Labour Supply Compiletes and places of analysis to take within such Their recommendations are to be that Government at headquarters The func-tlons of Unskilled Labour Supply Committees such place of employment to take, within such are as follows (1) to co ordinate the recruitment time as may be specified to secure that the hartal

of unskilled labour for all Government under-takings in the area, (2) to arrange a priority of utilization of any other recruited labour and of existing labour forces in accordance with any priority orders that may be received from competent authorities, (3) to advise on any measures necessary to secure adequate unskilled labour, force, meluding all amenities and condi-Act is to impose an obligation on the employer tions of service, grain shops, housing, medical to pay compensation in respect of war injuries to workmen covered by the Essential Services on seales of wages and dearness allowance. The

A scheme was sanctioned early in 1942 enabling Government servants in "threatened" areas to arrange for a regular monthly remittance of a portion of their salaries (not exceeding 50 per cent) to their families living away from them The scheme has now been extended to all daily rated labourers in Central Government under takings whose employment is expected to last for at least 12 months from the date of first appointment

PREVENTION OF HARTALS.

We refer elsewhere in this publication to the widespread disturbances which occurred in India malespread disturbances when occurred in India in August 1942 following the arrest of Mr M K Gradin and the leaders of the Indian National Congress as a result of the All India Congress Committee deciding, at its historic Session of 6th/8th August in Boinbay, to empower Mr Gandhi to launch a Civil Disobedience Movement in this country. These disturbances included hardle or starpings of work for the included hartals or stoppinges of work for pro longed periods in many industrial units in several centres in India. All the cotton textile mills in Ahmedabad remained totally closed for A number of other factories nearly four months and large engineering workshops in Bombay, Cawingore, Nagpur and in many other places were also affected and essential War production was considerably interfered with In order to present the first the figure of classifications. vent a repetition of similar trouble in the future, the Government of India, by a notification dated the 17th April 1943, have amended the Defence of Indla Rules by adding a new rule—Rule 56A for the Prevention of Hartals in Places of Employment

'Hartal' has been defined as any concerted cessation of work or refusal to work by a body of persons employed in any place of employment, except a eessation or refusal in furtherance of a trade dispute with which such body of persons is If in the opinion of a Pro vineral Government a body of persons employed in any place of employment is likely to take part directly concerned in, or is taking a part in, a hartal, then, without prejudice to any other proceedings which in the project of the proceedings which in the project of the p

There has been an increasing tendency in most Provinces in India during recent years especially in Bombay, to take advantage of Section 5 of the Frectories Act, 1934, by notifying all factories employing ten or more persons as "frectories" for the purposes of the Act In this connection it is of interest to record that the connection it is of interest to record that the connection it is of interest to record that the connection it is of interest to record that the connection it is of interest to record that the connection it is of interest to record that the connection it is of interest to record that the connection it is of interest to record that the connection it is of interest to record that the connection it is of interest to record that it is at times insufficient to secure operatives against danger to health or serious discomfort, the United Provinces conducted a detailed in provided however, that the cooling power can the United Provinces conducted a detailed inquiry into alleged sweeted labour in small factories for a period of over two years. He found that in over 300 factories employing 4,000 workers labour was sweated, there were no fixed hours of work and health and sanitary conditions were deplorable The Government of the United Provinces thereupon took immediate action by

- Age and Sex Groups Factory operatives are divided into four age and sex groups (1) adult males, (2) adult females, (3) children of both sexes, i.e., persons over 12 and under 15 years of age, and (4) 'adolescents defined as persons of both sexes who are over the age of 15 years and under the age of 17 years but who have not been certified as fit for employment as adults. Such adoicscents as have not been so certified are to be deemed to be children
- (c) Hours of Work -The maximum limits of eleven hours per day and sixty hours per week inid down by the 1922 Act for both adult males and females are permitted only in the case of seasonal factories. The maximum hours permitted for percinial factories have been reduced to ten per day and 54 per week subject to the proviso that persons employed on work necessitating con-tinuous production for technical reasons and per sons whose work is required for the manufacture or supply of articles of prime necessity which must be made or supplied every day may be employed for not more than 56 hours in any one week The maximum hours of work permitted for both uncertified adolescents and children have been limited to five per day both in seasonal and in perennial factories
- (d) Spreadover -By "spreadover" is meant the limitation of the period of consecutive hours during which the daily limits of hours of work may be availed of by the owner or occupier of a fretory. This principle was introduced in factory legislation for the first time in 1934. The spreadover in the case of adults is limited to thirteen consecutive hours and in the case of children to seven and a half continuous hours, but the continuous period of eleven free hours in every twenty-four hours in the case of adults and of sixteen and a half free hours in the case of children must include the hours between 7 pm and 6 am for both women and children. The effect of the Amending Act of 1944 on this question has been dealt with below. The power to grant exemptions in the case of women where technical reasons require that work should be done at night, e.g., in the fish curing industry, continues to be allowed. during which the daily limits of hours of work may be availed of by the owner or occupier of a fretory This principle was introduced in factory legislation for the first time in 1934

- provided, llowever, that the cooling power can be appreciably increased without involving an amount of expense which would be unreason able under the circumstances
- (f) Welfare —Provision is made for four matters in connection with workers welfare (1) for the maintenance of a suitable and Provinees thereupon took immediate action by declaring all such factories as employed 10 or more persons as factories for the purposes of the Act. The Second Conference of Labour Ministers held in January 1941 decided that the Factories Act should be so amended as to make registration of all factories employing to make registration of all factories employing more than 150 persons, to make registration of all factories employing more than 150 persons, to make registration of all factories employing more than 150 persons, (3) for the reservation of suitable rooms for the use of children of women employed in factories employing more than fifty women, and (4) for the maintenance of adequate first and declaring all such factories employed in factories employing more than 150 persons, (3) for the reservation of suitable rooms for the use of children of women employed in factories employing more than fifty women, and (4) for the maintenance of adequate first and declaring all such factories employed in processes. aid appliances
 - (9) Rest Intervals and Holidays The provisions of the 1911 and the 1922 Acts with regard to rest'intervals and the weekly holiday were maintained subject only to verbal modifications of a minor character
 - (h) Hol lays with Pay—The Factories (Amendment) Act, 1945 which comes into force with effect from the 1st Junuary 1946 provides for compensatory holidays and holidays with pay In cases where, as a result of the passing of an order or the making of a rule exempting a factory or the workers therein from the provisions of the Act relating to a compulsory weekly holiday, a worker is deprived of any of such holidays, he must be allowed, as soon as circumstances. of such holidays, he must be allowed, as soon as circumstances permit, compensatory holidays of equal number to the holidays so lost. The provisions with regard to holidays with pay will enforce, in all perennial factories an annual paid holiday of 10 days for adults and 14 days for children. These holidays can be accumulated over a period of two years. Haif of the wages payable for these holidays are to be paid before the worker proceeds on leave and the balance on his return. A more liberal provision will on his return A more liberal provision will not be affected by this law and factories providing benefits substantially similar to those laid down in the amending Act can be exempted from its provisions

THE PAYMENT OF WAGES ACT.

Perhaps the most advanced and difficult pieco of social legislation attempted in India is the Payment of Wages Act which was passed by the Central Legislature early in 1936 and amended In a minor particular by an Amending Act in 1937 A detailed note on the history of this piece of legislation will be found at pages 503 and 504 of the 1938-39 Edition of this publication The more important provisions of this Act which were brought into operation with effect from the 20th May 1937 are as follows

- (a) Scope of Application —The Act in the first instance applies to factories and rallways but Provincial Governments are empowered to extend it to trainway or motor omnibus services, docks, wharves or jettics, inlind steamer vessels, mines, quarries or oil fields, plantations, and any other class of workshops or establishments in which articles are produced, adapted or manufactured with a view to their use, transport or sale.
- (b) Wages Wages for purposes of the Act means all remuneration, capable of being expressed in terms of money, which would, if the terms of the contract of employment, express or implied, were fulfilled, be payable, whether conditionally upon the regular attendance, good work or conduct or other behaviour of the person employed, or otherwise, to a person employed in respect of his employment or of work done in such employment, and includes any bonus or other additional remuneration of the nature aforesaid which would be so payable and any sum payable to such person by reason of the termination of his employment but does not travelling allowances, employees' melude contributions to provident funds, gratuitles

Many industrial establishments, especially cotton textile mills in India, grant good attend ance and efficiency bonuses in addition to wages These bonuses operate as fines in cases where the standards for earning them are not attained The Government of India, while framing the Act, included such bonuses within the ambit of "wages' but the definition of this term as far as bonuses are concerned has been widely interpreted The Government of Bombry held that existing good attendance and efficiency bonuses wherever they obtained must be paid without conditions and notified all factories accordingly As a test ease, the Arvind Mills in Ahmedabad were proscented in the City Magistrate's Court for nonpayment of these bonuses in cases where the conditions for carning them were not fulfilled The Magistrate held that bonuses were wages and directed that the deductions made should be refunded to the workers The matter was taken into appeal in the Court of the Assistant Judge, Ahmedabad, where the decision of the Magis trate was upheld. The Mills thereupon filed a further appeal in the High Court, Bombay, which reversed the Ahmedabad judgments and held that all bonuses must be carned. The Govern-Central Legislative Assembly to amend this Act with a view to clarifying the position of 'bonuses' The employee filed an application against the

- (e) Wage Periods -No wage period is to exceed one month and all wages are to be puld in coin and/or currency notes
- (d) Time of Payment—The wages of all persons employed in concerns employing less than one thousand persons are to be pald before the expiry of the seventh day after the last day of the wage period in respect of which the wages are payable and in establishments employing more than one thousand persons before the expiry of the tenth day. Where employment is terminated by the employer, all due wages are required to be paid before the expiry of the second working day following that on which the employment is terminated
- (c) Permissible Deductions Deductions from wages are perinlitted only in respect of fines, absence from duty, damage to or loss of goods expressly entrusted to an employed person for custody, housing accommodation supplied by an employer, for recovery of advances or for adjustment of over-payments of wages, for income-tax, for contributions to or repayment of advances from provident funds, for schemes of postal insurance, for dues to co operative societies and Deductions on orders made by courts of law are also permitted in respect of such amenities and services supplied by the employer as the Governor General in Council or a Provincial Government may, by general or special order, authorise The Central Government promulations of the Central Government promulations of the Central Government promulations of the Central Government of Central Government promulations of the Cent authorise gated a Payment of Wages Amendment Ordi nance in 1940 amending the Act to enable deductions being made from wages with written antilo risation of the employed person for investment in any War Savings Scheme approved by a Pro vincial Government - The Act does not permit an employer to make deductions from wages in respect of the value of material damaged in the process of manufacture and to hand over the payable on discharge, or the value of any housing same to the employee concerned Such a system recommodation or services rendered to the worker by his employer the worker by his employer Ahmedabad where it was estimated that a total sum of nearly fifteen lakhs of rupees was deduct ed annually from the wages of about 25,000 weavers in respect of weaving fines and the value of damaged cloth handed over to them
 - (f) Fines—No fines are to be imposed on children, i.e., persons below the age of fifteen years. No fines can be imposed save in res peet of such acts or omissions as have been exhibited in notices which have received the approval of the Provincial Government or of an authority which a Provincial Government may prescribe in the matter and unless the person who is fined has been given an opportunity of showing cause against the fine. The total amount of fines which may be imposed on any person during any wage period is not to exceed half an anna in the rupee of wages for that wage period and no fine can be recovered in instalments or after the expiry of 60 days from the day on which it was imposed All fines are to be recorded in prescribed registers and all realisations from fines are to be expended on objects beneficial to the workers Provincial Governments have been empowered to make rules in connection with most of these matters

niring, maintaining or taking down any sewers, the fire brigide, railway mall service, sons employed in outdoor work in the po tal disablement d telegraphic services, operations for winning tural petroleum or matural gas, blatting erations and exeavations, ferry boat acrylees, chona, coffee, rubber or the plantations, etricity or gas generating stations light uses, elnemitograph picture producing and ublting, divers, elephant and wild animal

rsons have also been brought within the ppe of the Act Persons employed through b contractors by a person fulfilling a contract th a railway are also covered. The Government of Madras have recently brought persons ployed in plucking coconnuts within the pe of the Act As far as sermen are con ned, those employed on slips registered India are covered But if accidents are covered ke place within the three mile limit of the ritorial waters the Aettapplies even to those iployed on ships not registered in India But the a view to facilitate the settlement of times in respect of seamen on ships not gistered in India and to avoid litigation, ovision has been made in the Lascar's Agree ent for the settlement of claims for compensaon on the lines of the Indian Act and in default agreement the Commissioner of the Portnere the agreements are signed has been cepted as the final authority to whom these atters should be referred for decision ot only workmen employed within the prenets of a factory or a mine but also men engaged any kind of work incidental to or connected ith a factory or any mining operation are ititled to the benefits of the Act. As far as etories are concerned, those using mechanical ower and omploying more than ten persons those not using mechanical power and employg more than fifty persons are covered rovinelal Governments are empowered to ing within the scope of the Act other classes workmen whose occupations are considered be of a hazardous nature. In pursuance of at power the Government of Bombry

oards engaged in localing, unloading, andling or transport of goods and to all emloyees of Municipalities and District Local oards engaged in occupations ordinarily equiring outdoor work of Compensation Payable —The mount of compensation payable depends, in the ase of death, on the average monthly wages of he deceased workman and in the case of an ijured workman both on the average monthly ages and the extent of disablement. The erm 'wages' includes overtime pay and

we extended the scope of the Act to persons

nployed on motors or other mechanically

ways, factories, mines, seamen, docts, the monthly wages of a worker are calculated sons employed in the construction, repair the amount of compensation due is decided demolition of buildings designed to be or lich are of more than one stores or of twenty in a tabular form the amounts of compensation height or of dams and embankments, ds, bridges or tunnels, or whites, quays, sea distribution in respect of each of sevences arising maintaining or taking days and station parable in the case of an interest man antion payable in the case of an injured workman egraph or telephone line or overhead electric whose monthly wages are not more than Rs 10 es or eables, acrial ropeways, canals, pipe lines are Re 500 for death Re 700 for permanent total and half the monthly wages for temporary disablement for a workman whose monthly wages are between Rs 50 and Rs 60, the cor-Rs 15 respectively. The maxima for persons earning over Rs 200 per month are Rs 4,000, Ra 5,600 and Rs 30 per month respectively. In the case of minors the amounts of compensations of the case of minors the amounts of compensations. tion for death and for permanent lners and keepers and salarled motor drivers disablement are at a uniform rate of Rs 200 d cleaners. Recently persons employed in and Rs 1,200 respectively, and half the rehouses in markets employing ten or more monthly wage for temporary disablement. No compensation is payable in respect of a waiting period of seven days following that on which the injury was caused, but many large firms such ar General Motors (India), Ltd, Messrs Lever Brothers (India), Ltd, and others pro compensation in lieu of wiges with effect from the date of

> Permanent total disablement means (NOTE such disablement which permanently incapa-citates a workman for all work which he was eapable of performing at the time of his accident Any combination of injuries totalling 100 per cent loss in earning capacity is regarded as permanent total disablement even if the combi nation of injuries does not arise in one accident)

Who are Dependents -These are defined in two categories firstly, those who are in practic ally all cases actually dependents, and secondly, those who may or may not be in that position The first includes a widow, a minor legitimate son, unmarried legitimate daughter and a The second includes a widowed mother widower, a parent other than a widowed mother, a minor lllegitimate son, an unmarried lilegitimate daughter, a minor legitimate or illegitimate daughter if married or widowed, a minor brother, an unmarried or widowed sister, a widowed daughter-in law, a minor child of a deceased son and a paternal grandparent

General -The interests of dependants in cases of fatal accidents have been safeguarded by ensuring that (1) all cases of fatal accidents should be brought to the notice of the Commis sloner, (2) in all cases where an employer admits liability the amount of compensation payable is to be promptly deposited with the Commissioner, and (3) in cases where the employer dischalms liability and there are good grounds for believing compensation to be payable, the dependants get the information necessary to enable them to judge if they should make a claim or not

A contractor has been given the right to be indemnified by his sub contractor if he has had to pay compensation either to a principal or to a workman

An employer is permitted to make to any dopendant advances on account of compensation orm of food, clothing, free quarters, etc After rupees and so much of such aggregate as does not exceed the compensation payable to that a bar to the maintenance of the p occeding depend at is to be deducted by the Commis proved d that the Commissioner is satisfied that sincer from ant compensation and reped to the an application was made in the reason, ble belief amployer Further the Commissioner may that the injury we such that a payment could define a sum up to 18 from the amment of h made under it is said act in that the compensation for the funeral expe e of a Provincial Government certifies that the appliances of the work of the country of the same to the failor was rejected.

Effects on Industry

A compulsory system of workmen's compensation enhances the cost of production but not to any appreciable extent. In the case of coal mines, the increase in east has been estimated to be not more than annas four per ton of earl (Fide para 39 of the Report of the Indian Coal Committee, 1925) However, the owners of many of the smaller earl mines were compelled to close down their mines but this was due mainly to the severe depression with which the In the Punjab, the pro-Industry was then faced prietors of the coal mines in the Jhelum District were reported to be not satisfied with the privileges enjoyed by the miners under the Act as some of them had to pry as compensation on a single accident more than they could earn during An unexpected increase in the number of serious and fit il accidents may undoubtedly make a big hole in the profits of a concern but the remedy for this lies in accident insurance There can, however, be no denying the fact that the introduction of workmen's compensation has helped eonsiderably to improve the standard of safety in the country Taclittles for accident insurance are now being provided by a number continued to render its valuable eo operation | Decept for the Assam Maternity Benedit in the prompt settlement of claims. In Bombay, Act which covers women employed in both insurance companies are now concerned with half factories and on plantations and the last Act insurance companies are now concerned with half Commissioner Insurance companies as a rule contest only cases involving questions of law or principle and are of benefit to all concerned

Association, Ltd., Bombay, is an organisation of employers one of whose objects is the mutual insurance of members against liability to pay compensation or damages to workmen employed by them or thele dependants for injuries or accidents, fatal or otherwise, arising out of or in the course of employment

The Government of India has now announced that It is their intention to provide for Workmen's Compensation in one comprehensive scheme which will cover sickness insurance, maternity benefits and compensation for accidents

MATERNITY BENEFITS I.FGISLATION.

A Bill introduced by Mr N M Joshl in the Central Legislative Assembly in 1924 to provide for the payment of maternity benefits to women employed in certain industries was thrown out. The Government of Bombry, however, took up the question a few years later and the Bombay Maternity Benefits Act was passed in 1929 This was substantially amended by an Amending Act passed in 1925 A similar Act was passed nees in 1931 These were Act passed in 1935 in the Central Provinces in 1931 Since then, the first Acts of their kind in India or leading insurance companies in the country and the most important or these are the Claims Bureaux in Calcutta and Madras The Calcutta Claims Bureau which represents many of the leading insurance companies operating in India.

Maternity Benefit Acts have also been passed in the Provinces of Madras, Bengal, Sind, Assam, Punjub, and the United Provinces claims Bureau which represents many of the leading insurance companies operating in India. leading Insurance companies operating in India deals with a large number of claims and offers valuable co operation to the authorities in settling compensation claims. This Burcau continued to render its valuable eo operation in the prompt settlement of claims. In Bombry, and the prompt settlement of claims. In Bombry, and the last Act which covers women employed in both insurance companies are now observed with belt factors and on whether the last Act. the number of eases that come up before the all the other Maternty Benefit Acts are Commissioner Insurance companies as a rule applicable to women employed in factories contest, only cases in all the other Maternty Benefit Acts are The subject of extending the benefits of such legislation to women employed in Mines was In these provinces insurance is widely resorted discussed at the Second Conference of Labour to by the employers especially in the textile Ministers held in Tanuary 1941 and as the result industry. The Millowners' Mutual Insurance of those discussions the Central Legislature

application of the union itself, or if the Registrar By virtue of Setion 115 of The Insurance Act, is sitisfied that the certificate has been obtained 10.8 Incurance business carried on by a trade by fraud or mistake or that the union has ceased union is not subject to the provisions of that to exist or has wishilly and after notice contravened any provision of the Act, or if it has allowed any rule which is inconsistent with the Act to continue in force or his rescluded any rule which is required by the tet. Any union aggreesed by the refusal of a Pagistrar to reclister it or by the cancellation of its registration may prefer an appeal to a judge appointed by the fire Government of India, in September 1940, Provincial Government for the purpose, and, in Issued n eircular letter to all Provincial Govern the event of the disinisal of such an appeal, the ments inviting opinions as to the application agglesed parts has the right of a further appeal of the Insurance Act, with such modifications to the High Court

Obligations | Urions —The general funds of registered trade unions cannot be spent on objects other than those specified in Section 13 of the Act nor on political objects. But the Act makes provision for the creation of a separate political fund, subscription to which may be collected from such members as voluntarily desire to contribute to All registered unions are required to submit annually to the Registrar duly audited state ments of accounts in prescribed forms together with changes in officers and the executive and a copy of the rules corrected up to date. Notices of all changes in the rules or of the registered name or the registered address of the office of the union, of amalgamations with other unions or of dissolution must be submitted to the Registrar in prescribed forms within prescribed periods of their occurrence | Tailure to carry out these obligations may result either in the cancel lation of a union a registration or by the impost tion of r fine Fire Act further requires that the rules of every registered union should make adequate provision for the inspection of books of recounts and lists of members by the officers The Govt and members of the union Madras have recently tightened up their regulations in connexion with the maintenance. by registered unions of their registers Among other things, all unloss will now be required to maintain files of vouchers and machinenumbered subscription receipt books

Rights and Privileges of Registered Trade Unions -The Act confers on registered unlons the right to corporate existence and of perpetual succession with power to acquire and hold both movable and immovable property and to enter Into contracts. A registered trade union is immune from prosecution for criminal conspirity in respect of an agreement, unless it is one to commit an offence, made between its members for the furtherance of a trado dispute or for restraint of trade and from any legal difficulties arising therefrom. It also enjoys mmunity from envil suits in certain cases

appoint a Registrar of Trade Unions A pointed out in the opening paragraphs of this union is to be registered in the province in Chapter the Government of India and the which its head office is situated and if this is transferred to another province the registration.

Ilitidered unions are empowered under the ndividual person from being an Officer of mode Indian Trails Unions are empowered many form lian one Union

The resistration of a union may be cancelled or any obligation to recure professional advice withdrawn at any time by the Resistrar on the as to the actuarial coundness of such business The result therefore has been that certain Act unions are underfolding unsound schemes of insurance now banned by the Act especially that form of it which is carried on on the basis of the dividing principle. With a view to protect the interests of members of trade unions i he are and might be the victims of importares, ments inviting opinions as to the application furt in the necessary, to insurance business Imposed on Registered Trade carried on by Tride Unions

> One of the most vexed questions in connexion with trade unloss in India is that of their reconition by the employers. We are dealing with this question more fully in the Chapter on Trade Unionism in India Many Bills aimed at compelling employers to recognize unions of their workers have been introduced by private members in Provincial Tegislatures but these falled to carry the support of the Governments concerned. The subject was discussed at the Second Session of the Labour Ministers Confer ence and, as a result of the decisions then reached the Government of India drafted a Bill int nded to add a New Chapter dealing with the Lecognition of Trado Unions and Rights and Liabilities of Recognised Trade Unions to the This was circulated Indian Trade Unions Act to ill Provincial Governments for opinion after consultation with the interests concerned In the light of the criticisms received, the Government of India drafted a new Bill on the subject and this was introduced in the Central Legislative issembly by the Hon ble the Labour Member on the 13th Aovember 1943 on a motion for elrculation of the Bill for eliciting public This Bill seeks to compel an employer opinion : to recognise a tride union which fulfils certain prescribed conditions and is approved by a Board of Recognition (where one has been set under those non recognition stances being made an offence punishable by law On critical examination, the Bill has been found to be so full of Insurmountable difficulties that It is very doubtful if the Government of India will proceed with It In the form in which it was introduced in the Legislative Assembly

As far as statistics of registrations are con corned, tables showing the numbers of registered unions on all the provincial registers in Briffal India at the end of each financial year together with the membership and income of those which furnished returns have been incorporated in this section in some provious issues of this publica The administration of the Indian Trade Unions Act is entirely on a provincial basis years 1927 28 up to 1939 40 was published at undeach Provincial Government is required to page 487 of the Edition for 1942 43. As we have appoint a Registrar of Trade Unions Act is entirely on a provincial basis years 1927 28 up to 1939 40 was published at appoint a Registrar of Trade Unions. transferred to another province, the registration publication of annual reports on the administration bas to be transferred to that province tion of Labour Laws for the duration of the War

Is test as I ! g to I !! gal S! is nd Lock outs - any strike o locko it which any obj other than or in addition to tie f theran e of a trado dispute within the trade or industry in Defence of India Rules vould also be exercicable which the strikers or employers loosing out are by the Provincial Covernments subject to engaged or which is designed or calculated to erriain qualifications inflict severe and general hardship upon the community and there by to compel any Government in British India, the Lederal Railway Authority or the Crown Representative to take or abstrin from taking any particular course of Adjudicators appointed in connecton with action is lie at Persons furthering lilegal, strikes or lock outs are liable to punishment while those refusing to take part in them are protected from trade union dischilities to which they might otherwise be subjected

Rule 81A of the Defence of India Rules.

This was promulated by the Government of India in January 1942 and has been numered on several occasions since it was first probable gated. The text of fuls Ordinance as amended up to the 10th Navember, 1944 has been published at pages 210 to 216 of the December 1944 leane of the Libour Gazile (Bombas). The object of Rule 814 of the Defence of India Rules is the avoidance of strikes and It empowers the Central Government to make, by special or general order, providen for (a) prohibiting, subject to the provisions of the order a strike or lock out in connection with any trade dispuie, (b) regulting employers or workmen to observe for such period as may be specified in the order such terms and conditions of employment as may be determined in accord ance with the orders, (e) referring any trade dispute for conciliation or adjudication in the manner provided in the order, and (d) enforcing for such period as may be specified in the order all or any of the decisions of the authority to which a tride dispute has been referred for adjudication, provided that no order made under (b) shall require an employer to observe terms and conditions of employment less far our ible to the workmen than those existing in the undertaking at any time within three months preceding the date of the orders A recent amendment made in December, 1943 requires A recent the authority making an Order referring any particular dispute for adjudication to specify, as far as may be practicable, the matters upon which adjudication is necessary or desir The Central Govt is empowered to abie amend or vary such matters or to postpone specification pending a preliminary enquiry

By virtue of the above Rule, the Government of India Issued a General Order on 6th March 1942 preventing any person in any undertaking (defined as any undertaking by way of trado or business) from going on strike in connection with any trade dispute without having given to his employer, within one month before striking, not less than fourteen days' previous notice in wilting of his intention to do so. This order previous notico in This order also lays down that where any trade dispute has been referred to a Gourt of Inquiry or a Board of Conciliation under the Trade Disputes Act, 1929 or for conciliation or adjudication under an order made under Rule 814, no person employed in any undertaking concerned in the linto two schedules. All matters which regarded dispute shall go on strike until the explry of two the relations between employers and employees for standing orders for months after the conclusion of the proceedings upon such reference. The Central Government,

Most Provincial Governments have made extensive use of the powers conferred on them b. Rule SIA of the Defence of India Rules in referring tende disputes to adjudication Adjudicators appointed in connection with dispute in the Province of Rombas have be a judges of the Rombas High Court or gentlemen of equal standing rules as Mr. In T. Latificate, our, 105 (Retd.) or Mr E. Annuatts, 105 (Rtd.) In the Provinces of Bengal and Sind, the Commissioners of I abour have hern appointed. The awards of Adjudi-enters cover a wide range of subjects recarding wate rate and conditions of employment. It is not possible for us to catalogue all the dispules which have been referred to adjudication since the promulgation of Rule 411 of the Defence of India Rules but we may mention that regular Information on the inbject is published in the Indian Labour Gazette

Essential Services (Maintenance) Ordinance, 1911.

This Ordinance has been dealt with in the Chapter on "Second World War-Its Effects and Repercussions. Its main object is to present workers in certain essential services which have been 'declared' by Government to be such from leaving their employment this Ordinance however, a worker who disobers any lawful order given to him in the course of his employment is liable to be punished. An order not to strike work would be a lawful order Section 6 of fiels Ordinance further empewers the Central Government or, with the previous sanction of the Central Government, a Pro vineral Government to make rules "regulating or empowering a specified authority to regulate the wages and other conditions of service of persons or of any class of persons engaged in any employment or class of employment, in any concern which has been "declared" as an essential service under this Ordinance As far as is known, Bengal is the only Province in India which has framed Rules empowering the Labour Commissioner, Bengal to issue directions regulat lng the wages and other conditions of service of persons coming within the scope of the Ordinance subject to certain conditions

Bombay Industrial Disputes Act, 1938

This Act is perhaps the most advanced and ontstanding plece of Labour Legislation ever attempted in India Put ln a nutshell, the object of the Act ls to make all strikes and lock-outs illegal until such time as the procedure provided for in the Act for conclination and arbitration is exhausted. All industrial matters arbitration is exhausted. All industrial matters relating to wages, conditions of employment, privileges, rights or duties of employers or duties of employers or duties. employees, or the mede, terms and conditions of employment or non employment are divided Into two schedules All matters which regulate such as rules of conduct or standing orders for operatives are listed under Schedule I Matters by virtue of two notifications dated 12th March connected with wages, hours of work, conditions and 20th May 1942, have directed that the of employment, etc., with regard to changes powers conferred on it by Rule 81A of the in which employers are required to give notice

and potential emicrants, and, on the other (x is brought into effect from 15th November and, to ensure that no restrictions are imported 1940. The Punjah Frede Limplose of Act came which are not justified. Provincial Governments, into four with effect from 1st March 1941, the are empowered, subject to the control of the Bonal Shops and Establishment act from 1st Government of India, to impose control over the April 1941 and the Sind Art from 20th November forwarding of assisted emigrants (chapter III) 1941. The que tion of framing entrailegislation or over both their recruitment and their for for the grant of a well's holiday to shop workers warding as occasion may dietate (chapters III in those Provinces which have no legislation and IV). No license is required for recruiters on this subject was discussed at the Second but the forwarding of recruits to As an must be set on of the Labour Ministers. Conference made through the prescribed routes where arrangements for feeding, rest and medical restand it have been made and by authorised forwarding agents. It is made unlawful to assist persons under 16 to migrate unless they are accompanied by their parents or guardian. A married woman who is living with her imstand may only he assisted to emigrate with the consent of the husband I all effect was given to the Royal Commissions recommendations regarding repatriation (sections 7 to 11) and further provided that where 15 employer fulls to make all the necessary arrange monts for the repatriation of a worker within fifteen days from the date on which a right of repatriation arises to an emigrant labourer, the Controller may direct the employer to despatch such labourer and his family or to pay him such compensation as may be prescribed within such period as the Controller may fix (sections 13 and 15)—Section 3 of the Act makes provision for the **1**5) appointment of a Controller of Linigrint Labour with some stiff and possibly one or more Deputy Controllers for supervising the general adminis tration of the system which the Act suchs to establish. The charges for this establishment are to be met from an annual cess called the Emi grants Labour Cess which is to be levied at such rate not exceeding Rs 9 per conformat as the Central Government may determine for each year of levy The cess is collected by the Con troller by the sale of certificates of embgration Every assisted emigrant has to be provided by the employing interest on whose behalf he was recruited with such a certificate All particulars about the emigrant together with a running record of the details of his employment in Assam are given on it—Fallure to provide a certific ite Is punishable with a fine which may extend to Rs 500 The rate of cess was reduced by the Government of Indla from Rs, 5 to Rs 3 from 1st October 1938 It was subsequently rused to Rs 4 for the year commencing 1st October 1939 which retains to Rose 1930 which retains to Rose 1930 which retains to Rose 1930 which retains 1930 which retai 1039 which ratch continues for the current year 11039 which ratch continues for the current year The provisions of this Act were intended, in the first instance, to apply only to emigration for work on ten pitintations in eight specified districts in Assam, but power is retained to extend its application to other industries and to other districts in Assam if necessary

SHOPS IFGISLATION IN INDIA

The first Province in India to mact le-lelation I stablishment: Act on the 30th October 1939 The first object of this act is to make it possi | Pinjab and Sind—enacted similar laws during ble, on the one hand, to exercise all the control there is 1940. The Pinjab Act was extensively over the recrultment and forwarding of as isled amended by with the first like Sind institute of the Pinjab Irade I mainfeature is 10 the Assault and regulated by the interests of actual Act was an added in 1944. The Bomby is and notice that employed and regulated by the interests of actual Act was an added in 1944. The Bomby is the notice of the other transfer and forwarding and potential and regulated and regulated by the interests of actual actions as a subject of the other transfer and forwarding and potential and the other transfer a The Punjah Frule Limplovery Act came and the Conference decided that such legislation was nece ary. The Government of India drew up 1 Bill on the subject and this was presed by the Central Legislature with the title of the Weekly Holldays Act, 1942, early in that year The option for the application of this Act in any Province which has no Shops' Legislation rests with the Government of that Province

We shall first proceed to describe The Bombay Shops and I stiblishments Act in some detail and we shall then give a brief outline of the manner in which the Bongal, the Punjab and the Sind Acts differ from the Bombay prototype The Bombay Act deals with three main types of establishments sliops, commercial establishments and restaurants, eating houses, theatres and other piaces of amusement or entertainment

Application of the Bombay Act -This Act covers commercial establishments, shops, theatres or any other places of public amusement or entertainment, restaurants or eating houses Government Offices and Offices of Local Anthor Itles, clubs and residential hotels, bazars or fairs for the sale of work for charitable or other purposes from which no profit is derived, hospitals, nursing homes and dispensaries, stalls and refreshment rooms at wharves and docks, chemists' and druggists shops as are approved by the Provincial Government by a general or special order, and persons exclusively employed in the collection, delivery or convevance of goods are excluded from the operation of the Act. The Act does not apply to persons Itles, clubs and residential hotels, of the Act The Act does not apply to persons occupying positions of management or employed in a confidential enpacity, persons whose work is inherently intermittent such as that of travellers converges and constalers. travellers, ennuassers, watchmen and curetakers, and persons evelusively engaged in preparatory or complementary work, such as clearing or forwarding elerks or messengers

Shops —Section 7 of the Act prescribes the maximum hours of work of persons employed in shops at 91 per day

This is light an hour longer than the state of the s in shops at 91 per day This is half an hour longer than the ordinary factory day Every person omployed in a shop is to be given at least person omployed in a shop is to be given at least person omployed in a shop is to be given and no one day in a week as a holiday with pay and no person can be employed for more than five continuous hours unless he has had an interval of rest for at least half an hour The Act makes

or limiting the spread over es the other Acts do

s far as hours of vors are concerned, the combay Act places a daily limit in respect of tops and places of amusement, and a monthly mit in respect of commercial establishments. n contradistinction to this, the Shid Act pre-ribes a maximum or 51 hours per week for ersons employed in commercial establishments, in Bengal Act 50 hours a verl for shops and the

uniab Act 51 hours a week for shops and ommercial establishment. The Bengal set des not place any limitations on hours of ork—dally, weekly or mouthly—in commercial stabilishments but places a mealmum limit frem hours per day for work in shops and in laces of amusement. The Punjab Act pre-

The Punjib Act pre eribes a uniform tentiour day as the meximum hat may be worked in any establishment overed by it The Punjab let endeavours to restrict dual mployment by providing that the hours worked

y in Individual employee with two or more mployers should all be taken into account for urposes of recording. Whereas payment for vertime beyond the permissible delly hours s to be made at a time and a quarter in Bombay Bengal and Sind, the Punjab Act regulres vertime in excess of dally hours to be paid for t double rates

While the Bombay, Punjab and Shid Acts provide that all the employees covered by these dets should get one holiday every week, the Bengal Act, goes much further and prescribes hat all employees should get one and a half holdays in each week. The Bengal and the Punjab Acts, moreover, prescribe that every hop shall also be closed for at least one and a lelf days and one day respectively in each reek

As far as employment of children is concerned he Bombay and the Sind Aets provide that 10 child below the age of twelve years shall be employed in any establishment covered by the Act The Bongal Act has no provisions with egard to the non-employment of children whereas the Punjab Act prescribes a minimum nge limit of fourteen years. The Punjah Act also prohibits the employment of any voing person in any shop or commercial establishment to which the Act applies before 8 and or after 7 pm Hours of work are not to exceed seven per day or 42 per week and no young person is to be asked to work for more than 3!

hours at ono stretch without an interval for rest Whereas the Bombry and the Sind Acts make no provision for the prompt payment of wages, the Bengal Act prescribes that all wages must be paid within ten days of the end of the period for which they are due and the Punjab Act prescribes a fortnight for this purpose

osing hour is altered to up m by Government twelve months continuous employment with full pay after every osing hour is altered to up m by Government twelve months continuous employment with other time. The Punjab is the only Profince which provides for opining hours—tight to accumulate up to 28 days and, in addition, usual leave on half pay for ten days in a number and 0.30 am in vintra and every year and Punjab—14 days for a years to Punjab Act, therefore under the provided of the provid emplosment

> I'do provident which are to be found in the Punjab Act but not I 1 the Bombay, Bencal and Simi Acta deserve special mention (1) no employer ma fine any employee to an extent greater than three plea in the rupee of his monthly wiges and (2) One month a notice or one month a pay in lieu of notice to be given by the employer for termination of service

The Central Weekly Holldays Act is a very elmple mereure as compared with the four Proxincial prototypes which we have dealt with above. As its title implies it is mixely confined to making providon for the crint of a neckly holidas in certain classes of establishments i very shop must remain entirely closed on our div of the necl. Ill persons employed otherwise then in a confidential capacity or in a to itlou of marriement in iny shop, restaurant or theatre must be allowed a holiday of one whole dix in each week. Provincial Govern ments are emporered. If they so desire, to close shops for an additional half day in the week or to permit employees in theatres and restaurants to enjoy an addition il half day hollday in every week. No deduction or abatement is to be made from wakes in respect of any holldar that may be granted under this Act. No provision is made in the Central Act for employees in hanks The Act contains the usual proand offices visions for inspection, penalties, rule making power and enforcement. The Weekly Holidays Act was brought into operation in the N W I Province, in the Province of Bihar, in British Baluchistan and in Ajmer Merwith during the verr 1043

The Sind and the Bombay Act have placed the duty of enforcement of these acts on the Local Authorities, whereas the Bengal and the Punjab Acts icave enforcement with the Provincial Governments. It has been estimated that the Bombay Act applies to slate to seventy thousand concerns in Bombay City alone. The Bombay Musiciality has appeared one Chief Bombay Municipality has appointed one Chief Inspector (G R PRADHAY, Ph D) and five semor and eleven junior inspectors for the inspection work in the Municipal limits of the Cilia. The Galernment of India have published City The Government of India have published an excellent review on the working of Shops Legislation in India at pages 293 to 301 of the March 1015 again of the March 1015 against March 1945 issue of the Indian Labour Gazette

THE INDUSTRIAL STATISTICS ACT, 1942

The collection of statistics regarding wages, conditions of employment and other matters relating to industry in India had hitherto been effected through the goodwil and voluntary effort of the industrial units concerned. This method was not considered satisfactory. As a matter of fact the Government of Bombay had introduced to the Gove The Bombay Act makes no provision for leave with pay all the three other Acts do Sind—15 days' leave with pay during every year of service to lapse if not availed of within two months at the end of the year, Bengal—

Inter of fact the Government of Bombay introduced a Bill for the Collection of Statistics in the local Legislative Council as early as in 1924 but that Bill was dropped owing to the year of service to lapse if not availed of within against the adoption of such a measure Practi

of the most important recommendations by the Royal Commission on Labour In in its report which was published in 1931 or the setting up of an Industrial Council dia on the lines of tripartito representation overnments, Employers and Employees s not possible for the Government of Indla e effect to this recommendation for many is but at the Flird Conference of Labour crs, Sir Firoz Khan Noon sald that it was e consideration of the Conference whether ne future it would not be healthler to op the practice of having joint meetings plovers, workmen and representatives of innents. The Reports of the Proceedings been published is Bulletins of Indian tries and Libour and copies are obtainable The Manager, Government Publications, Dellu

olishment of a Tripartite Conference

: Government of Indla give quick effect to roposal made by the Honble Sir Firoz Noon at the Third Conference of Labour ters for greater collaboration between yels, workers and Governments and they ned a Plenary Conterence of all these sts to meet in New Delhi on 7th August to decide upon the following matters -

The desir ibility of establishing a Labour renee as a permanent organization to meet st once a year,

The desirability of instituting a Standing ory Committee of this Conference which l meet whenever Government thought it sary to invite them to meet and to advise inment on matters placed before it, and

ne constitution of these bodies

3 Conference decided that a collaborative inery composed of the representitives of rnments, employers and workers in India d be established forthwith for the consideraof all questions relating to the conditions of ir and resolved that the constitution of the ry Conference should be as follows man—The Hon'ble the Labour Member of tovernment of Indla, Members—(1) Three sentatives of the Government of Indla ding one representative to represent Minor inistrations, (2) Eleven representatives of inees, (3) Six representatives of industrially rtant States, (4) Two representatives of the iber of Princes to represent other States, nated by Government, four each in agree with the Employers Federation of India the All India Organization of Industrial

sts and ve must handle ill problems of following members should be constituted and industrial development with (1) Two representatives of the Government of Indla of whom one—the Hou'ble the Labour Member—would be the Chairman, (2) One re presentative each of the Governments of Bengal, Bomb is and the United Provinces to be selected by the Governments of these Provinces, (3) Three representatives of the remaining Provinces, one each to represent (a) Madris and the Central Provinces and Berar, (b) Assam, Bihar and Orissa and (c) Punjab, Sind and the North West Irontier Provinces to be selected by agree ment between the Governments of these Pro vinces preferably by a system of rotation, (4)
Iliree representatives of Indian States including
one representing the Chamber of Princes, and
(5) Five representatives each of Employers and Employees, four from each group being nonlinated by the Government of India in agree ment with the two leading All-India Associations of Linployers and the two main Associations of Employees, the fifth Member in each group being nominated by the Hon'ble The Labour Member The second and the third sessions of the Tripar tite Libour Conference were held at new Dellii on the 6th and 7th September, 1943 and on the 27th and 28th October, 1944, respectively

The main function of the Standing Labour Committee is to consider and examine such questions as might be referred to it by the Plenary Conference or by the Central Govern ment taking also into account suggestions made by Provincial Governments, States, the Chamber ot Princes and representative organizations of Employers and Workers The Committee is competent to report to the Plenary Conference on matters referred to it by that body and to advise the Central Government on matters referred to it by the Government of India referred to it by the Government of India The Plenary Conference also rets in an advisory capacity Whereas the Plenary Conference is to meet at least once in every year, the Standing Labour Committee is to meet as often as it might Defining ln general terms the procedure be convened by the Central Government for the constitution of these bodies consideration of questions that may be before it By the time we went to Press for this issue By the time we went to Press for this issue (July 1945) six meetings of the Standing Labour Committee were held—four at New Delhi on the 30th November and 1st December 1942, on the 25th January, 1943, on the 27th Tune, 1944 and on the 17th March, 1945, respectively, one at Bombry, on the 7th and 8th May, 1943 and another at Lucknow on the 25th and 26th January, 1944 The agenda and proceedings of the Standing Labour Com and proceedings of the Standing Libour Committee have covered a wide range of subjects which want of space prevents us from dealing with here Mention may, however, be made that the only item discussed at the 6th meeting of the Standing Labour Committee was the convergence of the Standing Labour Committee was the nated by Government, four each in agree with the Employers Economic of Labour Office on Professor with the Employers Economic of Labour Office on Professor Adarkar's Report on Health Insurance for Industrial Workers in India This note has loyers respectively and the remaining three present other classes of employers, and (6) en representatives of employees to be nated by Government, four each in agree with the All-India Trade Union Congress the Indian Federation of Labour respectively the remaining three to represent other overs interests. It also decided that a logical field of the scheme here.

The inck of accurate and reliable stics of wages in India has been adversely nented upon and regretted by almost Commission and Committee appointed c country since the beginning of the century our whose work was considerably hampered

yould be of interest to observe that eertain India in connexion with the devising of schemes of Social Security are engaged in collecting country wide data regarding wages and earnings in ali industries

> The blame for the lack of information about wages in India cannot lie entirely at the doors of the Central and Provincial Governments The collection of satisfactory wage statistics is always an exceedingly difficult matter and more particularly so in India where conditions vary so markedly and widely Morcover, as will be seen from the observations which follow under the heading of "Pay Periods" there are wide variations in the periods and methods of wage payment The situation is further complicated by the fact that the nomenciature adopted for de signating occupations also varies widely between district and district and concern and concern in the same district owing to the use of a host of vernacular and arbitrary terms and of nick-Even in concerns which use standard English occupational terms, the position is rendered more difficult owing to the existence of the gradings which have been referred to The necessary preliminaries to the con above duet of any satisfactory enquiry into wages in India, therefore, must be (1) the establishment of a uniformity of method, (2) the standardisation of occupational terms (as pointed out above, this is now being attempted) and (3) the thorough adjustic point of the control of the education and instruction of the ciercal staffs of the units to be covered in the proper use of the standardised designations and in the accurate The existence filing up of the required returns of wide variations in rates and conditions, moreover, makes it advisable to cover as many as possible if not all the units in the industry under survey in order that results which are not biassed one way or the other may be secured in view of what has been stated it is obvious that no Government in India can undertake a comprehensive enquiry into industrial wages unless it has it its disposil an adequate and thoroughly trained and experienced staff for tho purpose

Since its establishment in 1921, the Labour Office of the Government of Bombay has con ducted five enquiries in the years 1921, 1923, 1926 1933 and 1937 into the wages of cotton textile mill workers in the Province of Bombay an enquiry into agricultural wages covering a period of twenty-three years from 1900 to 1922, in enquiry into the wages of poons in Govern ment and commercial offices in 1922, enquiries into the wages of all municipal employees in cans be considered as being the dominant the Province in 1924, of elerical employers in Railway and Commercial offices in Bombay City in 1925, of printing press workers in Bembay City in 1929, of workers employed in the building trade in Bombay City in 1985, and of all em ployees in the retail trade in various important towns in the Province in the same year. In 1934 the Labour Office conducted a general wage census covering all workers in all working perennial factories in the Province including cotton mill operatives. The second part of this census covering sectories was conducted. census covering seasonal factories was conducted The results of the notably by the Royal Commi sion on Indian in the winter of 1935 36 The results of the pur whose work was considerably hampered special enquiry which that Office conducted into result of the paucity of satisfactory infor on on five subject. PAY PERIODS.

There is a complete absence of uniformity as regards the periods for which proments of wages are made in the various branches of industry in India In scarcely any industry is there a single period of payment. Different systems are found in establishments belonging to the same industry and in the same district, and within the same establishment different classes of workers are often pald for different pay periods If generalisations may be attempted, the jute industry in Bengal, coal mines, tea plantations, seasonal factories, oil milis, rice and flour milis and certain classes and groups of workers in Government establishments such as the Security Printing Press at Nasik pay wages for periods of a weal. Payments on a fortnightly basis range between payments for haptas or wage periods of fourteen and sixteen days for weavers and spinners respectively in the cotton mills in Ahme dabad to bimonthly payments for periods from the 1st to the 15th and from the 1sth to the end of the mouth in textile mills in Brouch and various other centres in India The month is the accepted wage period for the railways (includ ing railway workshops), cotton textile mills in Bombay, Sholapur and several other centres, engineering workshops, dockards, printing presses and for the persons employed in the mechanical and maintenance departments of almost all concerns which pay wages to process operatives weekly or fortnghtly. Wages are calculated on both the monthly and the fort Wages are nightly bases in sugar mills and tanneries In the Tata Iron and Steel Works at Tatanagar where over 50,000 workers are employed wages are paid weekly to men on daily rates and monthly to those on monthly rates most general system of payment in the case of casual labour is that of daily payment Supervisory and elerical staffs in all Industrial estab lishments are paid on a monthly basis

The question of shortening the wage period universally in India by law to a week or a fortnight has been considered by the Government of India, in consultation with the Provincial Govern ments and Interested persons and bodies, on three different occasions within the last twenty Attempts were also made to amend the Payment of Wages Act In such a way as to achieve this object. The proposals, however, fell through owing mainly to the opposition of the monthly paid, workmen who appeared to prefer the system of monthly to fortnightly or weekly payments. Their argument was that if rents and bills were to be settled monthly thay rents and bills were to be settled monthly they would be in difficulties if they had frittered away their weekly earnings

HOURS OF WORK.

The existing restrictions in hours of work in factories and mines subject to the Indian Tactories and Mines Acts have been described in the sections dealing with those Acts Speak week The veckly hours of work in Indian mines vary widely and ringe from 38 to 51 hours per week. The cotton textile industry in almost all centres normally works a uniform 9 hour day except in a few concerns which work a 97 or 10 hour day from Mondays to Fridays and a 54 hour or 4 hour day on Saturdays A recent develop ment in the cotton textile industry is to work shifts on the basis of what is known as The Relay By this system a unit does not stop work during the noon recess and continues working throughout a whole shift, different batches of workers being given rest intervals by turns and the remainder being asked to do double substitute work for the time being Messre E D Sassoon & Co, Ltd, in certain of their cotton milis in Bombay City, have been working three shifts of seven hours each for the last seven or eight years, but conditions in these mills are highly rationalised that is to say, more machines are allotted to each worker siders being asked to mind two sides and wervers six looms as against the normal of one side As far as the Jute Mill industry and two looms is concerned, the Indian Jute Milis Association entered into an agreement intended to protect and defend the trade of the Indian Jute Milis which came into force on the 15th March 1939 for a period of five years in the first Instance and which was renewed in the year 1944. The hours of work were to be ordinarily limited to forty-five per week. If 75 per cent of the signature was renewed for a decimal to the hours of work signatories voted for reduction, the hours of work might be reduced to a minimum limit of 40 hours per week and if 51 per cent of the signatories voted for an increase the hours might be raised to a maximum limit of 54 which might be exceeded only under extraordinary eireumstances such as a evole of prosperity or war Under these conditions milis with 270 iooms were entitled to work up to 72 hours per week. If one unit Under these In a "group of mills," ie, under the same management, did not work the full complement of hours allowable, it was permitted to transfer the unutilised number of hours of work to the other unit under the same management Throughout the year 1944, jute mills have been permitted to work 54 or 72 hours per week according to their loomage strength as is provided for in the principal working Time Agreement Coal has, however, governed the actual ability to work these hours and the supply of easi was particularly poor during the latter half of the year, affecting single shift steam driven mills much more than others

All the dockyards, many of the larger engineering and almost all the railway workshops work a 48 hour week but the daily hours vary according to the control of the control cording to the number of hours worked on a short The hours in many of the mechanic Saturday shops of textile mills and in the larger non engi neering factories are usually haif an hour to an hour less than those for process workers and ap proximate more closely to those in large engineering plants Factories engaged in the pro (Governor Ge et l'n Coun il to m k rules for daddon of metalware however work in Fast in Minister of hours permi ble were work in Fast in Minister of hours permi ble with the fast of minister of the control of the fast of grant manber of hours permi ble with a fast of the fast of minister of the control of the fast of fast way asson I factories work a minform 10 hour of y's ra nts Hours of Limpton men Rules 1931 crail the days in the week except on the com were promulated and put fatte defect. RECRUITMENT

workshops, was effected through the medium in 1914 and they have been successful in proof a recruiting agent, a Sardar, a Mulladam or curing the services of Mr John Lee, MA a jobber As a result, however, of the recommendations made on the subject by various Committees—notably the Royal Commission on Indian Labour and the Bombay Textile Labour Inquiry Committee which have con demned thus method of recruitment owing to the abuses winch have come to be associated with it—many of the larger and more progressive concerns have appointed Labour Officers who are directly responsible for all new recrultment The old method is, however, still largely prevalent in the majority of the industrial concerns in the for the last fifteen years Early in 1926, the eountry

There are various forms in which a recruiting agent is remunerated. He may be a salaried employee with a commission for every recruit he brings in, or he may receive a hump sum payment for each recruit or a gang of recruits, or he may be paid a recurring sum for each man he places in employment as long as that man continues in employment Whatever be the method by which an employer remunerates the recruiting agent, it is fairly well known that the agent keeps a continuous hold and grip on the recruit he places in employment and extracts from inm recurring sums of money whilst lie continues in that employment under pain of his iosing his job

The evils in connection with recruitment were most marked in the ease of casual or substitute The Millowners Association, Bombay, have trekled the problem by establishing what is known as the "Badh Control System" The daily number of absentees in a cotton mill in Bombay are averaged and an additional per centage is added Each mili issues badi or substitute eards to this number of workers Daily casual vacancies are filled only from such card holders and whenever there is a permanent vacancy it is fliled from these eard holders The evil influence of the jobber is thus eliminated The system has been highly commended by the Textus Labour Inquiry Committee and the Textle Labour Inquiry Committee and the Government of Bombay have recommended its adoption by all mills in the other centres of the eotton textile industry of the Province

No reference to the appointment of Labour Officers in industrial concerns in India would be complete without mentioning the lead given in this matter by the Millowners Association, Bombry, and the excellent work done by its own Labour Officer, Mr R G Gokhale The Association, through Mr Gokhale, conducts special classes for the training of Mill Labour Officers and actively supervises and controls the work done by all such Officers where they have been appointed through the Association Following the example of the Millowners' Asso ciation, Bombay, the University of Calcutta, in co operation with the Indian Jute Mills Association, has recently inaugurated a special course of social work for giving suitable training to labour welfare officers engaged in jute mills The course covers both theoretical training and intensive practical work in the field, i.e., the jute mills themselves. The Indore Christian College has also recently started a course for the training of Labour Officers

The Indian Jute Milis Association which has appointed a large number of Labour Officers,

(Oxon), who has had a large experience of Personnel management in the United Kingdom to flil if

MEASURES FOR ENFORCING DISCIPLINE.

Tilo measures adopted by industrial em pioyers in India for enforcing discipline have engaged the earnest attention of both the Central and the Provincial Governments in this country Government of India instituted a country wide inquiry into the extent of the deductions made by employers from the wages of their workpeople In respect of fines and other matters subject was partly examined by the Bombay Strike Enquiry Committee (Fawcett Committee) in 1928 29 and again more fully by the Royal Commission on Indian Labour in 1929 30 and both these bodies made a series of most important The Payment recommendations in the matter of Wages Act was passed in 1936 in order to implement these recommendations

The two matters with regard to the discipline of thoir workmen which Indian industrial em ployers compialn of most are the large extent of labour turnover and the high degree hlgh iabour That both absenteelsm turnover and high absenteelsm are to found in several Indian industries cannot be demed, but, few, if any, employers have taken the trouble to examine the root causes for them The investigations conducted by the Labour Office of the Government of Bombay go to show that both labour turnover and absenteersm are highest in concerns and Industries in which wages are lowest and where conditions of employment are least attractive and that they are lowest in concerns and industries in which wages are comparatively high and where other conditions of For example, the employment are attractive Bombay Labour Office compiles monthly figures of percentage absenteeism in cotton textile mills in Bombay, Ahmedabad and Sholapur Textile wages are highest in Ahmedabad and lowest in Sholapur The annual averages of percentage absenteelsm in these three centres for the year 1944 were Ahmedabad 5 70, Bombay 11 35, and Shoiapur 15 34-figures which tell their own story Low wages and adverse conditions must necessarily tend to weak incalting incapacity for sustained effort and to the growth of a desire for change in order to improve one's These are problems which the new autono mous provinces in India and Indian industrial employers will have to try and remedy instead of devising methods of enforcing good attendance and continuity of employment by the infliction of monetary penalties and other forms of municipants. punishment

Under the Payment of Wages Act, every employer is required to draw up lists specifying the acts or omissions for which fines will be inflicted. These lists have to be approved by such authority as a Provincial Government may prescribe and are required to be prominent-ly displayed in all places where the employees Apart from this concerned are working created a special post of a Schor Labour Officer employers were not required to draw up any within two months of the d te f the applicatio jute mill workers

th Industrial Court constituted u d r the Act In accordance with these provisions the Com-missioner of Labour Bomb y settled the bt nd ing Orders for Cotton mill operative i Bombay Ahmedah d Sholapur and other cent es in the Anmedah d Shotaphi and other that is as as a province of Bombay in S ptember and Ottober 1939. by most municipalities s the Tata electricity generating ating plants, the Bombay Electric Supply amways Company, Ltd , and the Burma orporation, to mention only a few of many, contributory schemes for the benefit of jority of their workmen Several others chemes for their supervisory and clerical hments but not for their workmen The isual amount of deduction from pay is elfth of the monthly pay but the amount uted by employers varies from 50 per 100 per cent of the amount put in by The rate of interest may be fixed may fluctuate with the rate at which ment or the employer borrows money ident fund rules make provision for loans cribers from the balances standing at the of their accounts in respect of their own ptions, and for the compulsory repayment Subscribers are entitled to se loans w their own subscriptions at any time on ent or on reilinquishing their posts but the it of that share of a contributory pro fund account which represents the em subscriptions depends on the putting in fied periods of qualifyings ervice—periods how considerable variation Government of India have drawn up

f Model Rules for Provident Funds for all employees in India These Rules insidered at the Fourth Meeting of the g Labour Committee of the Tripartite nee held at Lucknow in January, 1944 ntral Government hope to release these Rules for publication in the near future

Sharing -Profit sharing had so far nknown in India but some go ahead s are adopting this in their plants ta Iron and Steel Company bas adopted ie which provides that when the amount the shareholders as dividend exceeds ore during a financial year, every employee d been in the continuous employ of the ly throughout the vear is to receive a ore paid as dividend

erative Societies —The co operative move is made very rapid progress in industrial hmeuts ail over India during recent years, more workers have co operative credit for their employees Aimost air ailway in India have co operative banks and banks in addition to credit societies l information on the whole subject is e in the different annual administration of Registrars of Co operative Societies various provinces

Grain and Cloth Shops -Employers' nd cloth shops were very common in uring the period of the first world war, th the subsequent fall in prices, the y of these shops disappeared Truck

for permanent workmen in the factories. Payment of Wages Act, 1936, prohibits employe Most of the from making deductions from wages or from public utility companies and corporations receiving payments from their employers i purchases from employers' shops Most Pi vincial Governments in India had, however notified cheap grain and cloth shops as "ame itles" in respect of purchases from which en ployers may make deductions from wages all such cases both the qualities of the articl sold in such shops and the prices charged f them are controlled by a 'prescribed anthority who is generally the Chlef Inspector of Factoric As a result of the outbreak of the Second Wor War, all Provincial Governments in Ind liave not only notified cheap grain at cioth shops as "amentles" for the purposes the Payment of Wages Act but bave open such shops of their own and have also encourage employers to do likewise The articles sold : these shops are bought at wholesale prices ar are sold without any profit except for a sma addition to cover working expenses of the sliop The only statistics available with regard to grain shops established by employers in India for th benefit of their employees are those containe in the excellent Annual Reviews published b The Millowners' Association, Bombay, of th Labour Situation in the Bombay Cotton Mi Industry With the introduction of Ration ing of eertain food grains in Bombay i May, 1943 and with the extension of rationin to other cities and areas in India, arrangement have been made between Government Ration lng Departments and large employers of labou for the establishment of Government controller grain shops in hundreds of industrial plants is Sales from these shops are largely the country on credit, recoveries being effected from ply Today (July, 1945) it may be safely asserted that almost every large employer and labour employing organization in India has provided a cherp grain shop for its workers

Loans and Advances—Speaking generally most industrial concerns in India do not grant ioans to their workers except during periods of an acuto shortage of labour when recruiting agents are empowered to inquidate debts in order to attract the required workers to join industry But, all workers who subscribe to provident fund onth's pay, plus an additional haif a But, all workers who subscribe to provident that pay for every 25 takins in excess of schemes in such concerns as have them or who are members of co operative credit societies can secure loans on easy terms both as to interest and to repayment A few concerns, however, have set apart special funds for the purpose 'Advances —applying the term to the small erv fair percentage of concerns employing sums of money advanced against earned wagsson the other hand, are more widely prevaisnt The Payment of Wages Act empowers Provincial Governments to frame rules for the regulation of these advances but no interest on such advances is now permitted

INDUSTRIAL SAFETY.

As in other countries, the industrial progress of India has been accompanied by an alarming increase in the number of industrial accidents The explanation generally offered for the increase is that the Workmen's Compensation Act is operating as an inducement both for workpeople on in England was primarily aimed at and for employers to report accidents more ers' sbops (known as "Tommy Shops") frequently than in the past But, the increase at which was compulsory and the e at which was compulsory and where at which was compulsory and where in the number of serious accidents suggests that the problem is a more serious one, and, that in

apits of the statutory requirement will factory mannely feal crious (i.e. a clients which and mine owners and frame engred in the leading i prevent a person returning to work for 1 d, and unloading is shipts in the comply within the or more part in union are to be reported to the matter of the fed g of danger us me within the or more part in union are to be reported to the matter of the fed g of danger us me within the or more part in union and to the little that the control of the lantern lectures nd the o gant tion of special sets first committees in the 1 rg writin p The Milliamera Association Bombay has done on term in e on the gine injury mylv a conditable amou tof gool w k! please the property of the pro the Linear State of the properties of the properties of a cold into recommendation with the F tory D partin at the D minar State of the properties of a cold into recommendation in the F coles Act a cold into the properties of th As ociation it is posted attractic sists for the term of the term A sociation of the first this color of the first this

These are regularly inspected by the Mills have been sold to the work district and sub-divisional officers and every the cost by easy instalments covers endeavour is made to maintain as high a degree of 5 to 7 years while some have been of sanitation as is possible. Almost all sugar them. Many houses have been by of sanitation as is possible. Almost all sugar them. Many honers have been by factories provide housing for their employers workers them every non-resonance of land because the factories are located near large to them with moneys advanced to the sugareane planiation. Large slum clearance from A large number of houses to the sugareane planiation. programmes have been drawn up by Munici- own gardens and a big garden h politics and Improvement Trusts in almost all in the middle of the Settlement the larger towns and cities in India and much has been provided with good reads, t useful work has been done in the last culit and playgrounds which are equ years by acquisition and demolition

The ploneer work in the field of Industrial housing has been done by the railways which have spent nearly 50 crores of rupees to date in providing adequate residential quarters for different classes of their employees, and by the Government of Bombay who have built 207 charls with nearly 17,000 tenements for industrial labour in Bombay City The industrial labour in Bombry City The latter is a part of a gigantic scheme launched in 1920 by the late Lord Lioyd, then Governor of Bombry, for the construction of 625 chawle having 50,000 tenements in all. The rents of the tenements in these chawls vary from Rs 5 to Rs 8 per month. The chawls are situated at Nalgaum, Worh, Sewri and at DeLisie Road large numbers of Cheutta, Rombas, originate in congreg Cawnpore, Madras and Karaelil, the Calcutta in canal areas in ea and Bombay Port Trusts and the Improvement etc., of sugar cane Trust in Bombay have done much to house their own labour and also to supply low rented tenements for other classes of industrial workers Perhaps the most magnificent schemes of Industrial housing conceived in India by private employers are those inunched by the Tata Iron and Steel Company Ltd at Jamshedpur and by the Empress Milis under the agency of Messrs Tata Sons Limited at Nagpur The Tata Iron and Steel Company has laid out the town of Jamshedpur on Gardeu City lines, and had, up to Tune, 1945 constructed 8,428 houses of up to Tune, 1945 constructed 8,428 houses of different types for its employees, and has now a further extensive programme of housing construction in hand as soon as the difficult conditions ereated by the war are removed. The plans provide for the building of 5,000 quarters of irrigation channels and of other wat during the next five years. The capital cost of town buildings put up by the Company up to 31st March 1945 was about Rs 143 lakhs. The Company has furnished all quarters carrying a rent of Rs 15 a month and above with electric lights and fans and the work of electrification of the lowest rented quarters is and samitation in areas outside multiple of the rapid extension of the lowest rented quarters is and samitation in areas outside multiple of the rapid extension of electrification of the lowest rented quarters is

INDUSTRIAL HEALTH

Such statistics of licalth and mortality as are collected and published in India relate to the whole community and no statistics are compiled scparately for industrial workers alone. In the absence of such data it is not possible to generalise about these matters The problems associated with bealth are always difficult, they are much more so in a country like India where the solution of the problems associated with physical health and social environment is complicated by the evils of ignorance and poverty to which is commonly added a fatallstic outlook arising, it may be, from the low standard of living which has been the experience of so many generations past Climatic conditions, lightly insanitary housing conditions and the illiteracy of the people also contribute to re curring outbreaks of such deadly tropical diseases as cholera and small-pox in epidemie The wide spread prevalence of malaria in certain congested areas of the Provinces of Bengal, Bombry and Madras is responsible for a considerable undermining of the health and the vitality of the poorer classes who cannot afford to sleep under mosquito nets, and although the more advanced municipalities are doing all they can to combit the disease by filling up wells and surface-treating simil ponds and pools of stagment water, melarla still continues to take a big toll of human life Bert bert and tuberculosis in Biliar and Orissa, hala azar among the jute workers in Bengal, ank vlostomiasis in South India and tuberculosis in the Punjab are some of the many diseases which are widely prevalent in certain tracts,

The maintenance of the good health of town and city populations is in the hands of the municipalities and although all provincial Governments appoint health officers for groups of districts to supervise and co ordinate the work of the municipalities, the interference and control of Governments in these matters is of a somewhat nominal character But wherever control is possible, Government have done much to make for an improvement in sanitary and hygieule conditions For example, following the recommendations of the Royal Commission on Indian Labour in the matter, several provisions for the maintenance of the good health of factory workers have been meorporated in the Indian Factories Act, 1934 These include the maintenance of cleanliness in accordance with rules to be framed by local Governments with regard to lime or colour washing, painting, deodorising and disinfecting, the provision of proper standards of ventilation and the adoption of adequate measures to prevent the inhalation of gas, dust and other impurities generated in the course of work, the installation of apparatus for cooling the air in factories in which the humidity of the air is artificially increased, the prohibition of overcrowding by laying down iministrative effort is to be avoided, plans for

the standards of cubic feet of space to be provided for each worker, the provision of suitable and sufficient lighting, the provision of adequate supplies and sources of water both for drinking and for washing, and for the muntenance of sufficient latrine accommodation separately for male and female workers Remarkable progress has been recorded during the last five years with regard to the installation of air conditioning and cooling plants progress in this direction hitherto confined mostly to spinning weaving sheds but since 1939 ex and weaving sheds but since 1939 expansions have been made in other departments as well by installing large boods and trunks harnessed to powerful exhaust fans, to enable the steam to be drawn away from sizing Attempts are also being made to reduce dirt to a minimum and many cotton mills have installed special plants to carry the dust away

As in most things connected with the welfare of labour, Indian rallways are in the forefront in the matter of the provision made for medical and and relief All railways maintain fully equipped hospitals with qualified surgeons, plysicians and nursing staffs at suitable centres In addition to fully equipped dispensaries in charge of qualified medical officers at all places where there are sufficient numbers of workers to As all the industrial workers of fustify them Government have free access to Government hospitals and dispensaries, the provision of separate medical establishments attached to large Government establishments has not been considered necessary in the case of concerns under the control of the Provincial Governments but the Government of India have provided adequate medical facilities in most of their own establish ments such as His Majesty's Indian Naval Dockyard and their various Ordnance and Ammunition Factories Several of the larger municipalities and public bodies such as the Port Trusts also maintain their own hospitals and dis pensarles for the benefit of their workers Following the lead of Government and public and local bodies in the matter, almost all the large labour employing establishments in India-cotton and jute mills, mines, engineering work slops, ten plantations, ctc —maintain fulli equipped dispensaries in charge of whole or partime qualified medical officers. The Tata Iron and Steel Company conducts a large hospital with special surgical, maternity and gynecological wards in addition to six dispensaries and the first all effects at Lambedour saries and two first ald stations at Jam hedpur both for its own employees and for the public All employees of the Company and their families receive free treatment

Now that Germany has been totally defeated and victory for Great Britain and her Allies in the Second World War seems certain all the Allied countries for the last year or two, have been giving considerable thought and attention to all kinds of schemes of post war reconstruction Various Commissions and Com mittees to deal with different sets of problems have been appointed India las not lagged behind 'A drive to improve health could tions must necessarily be in the forefront of any programme directed towards improving the standard of the stindard of living in the port war period If dissipation of financial recources and ad

and experienced Welfare Officers specially to other Governments, employers and welfa trained for the job All this is, however, but a workers who might like to know as to what All this is, however, but a drop in the ocean and the vast majority of employers in India have no welfare sehemes of any kind at all It is obviously not possible for us to give even the briefest outline of the different schemes that are in existence in India within the compass of a work such as this

Welfare work for labour employed in Indian industries has, since the advent of Provincial Antonomy, been taken over by Government Proneering work in this direction was done by that great and zealous friend of Indian Labour-Mr Gulzarl Lal Nanda, since 1921 the Sceretary of the Textile Labour Association, Ahmedabad and Parliamentary Secretary for Labour to the Prime Minister in the Congress Ministry in the Province of Bombay He knew that employers as a whole were doing little or nothing for the welfare of labour and that no amount of persursion would yield tangible results knew that legislation to enforce welfare measures would not create that personal enthusiasm which is so vital for the success of any welfare scheme that might be launched. He persuaded his Cabinet to set aside a sum of Rs. 1,20,000 in the budget estimates for the year 1938 39 for industrial welfare and he then started looking for a benevolent person or persons who would donate the necessary buildings and eguipment for the purpose Hc found such a person in Mr Ramnath Podar, Managing Director of the Toyo Podar Mill in Bombay who contributed a sum of Rs 15,000 for the building of a recreation centre at DeLisle Road in Bombay The lead given in the matter by Bombay has been successively taken up by the Governments of the United Provinces, Bengal, Sind, the Central Provinces and Berar and Biliar Central Government too have recognised the value of Governmental effort in the field of Labour Welfare and in May 1942 they appointed Mr R S Nimbkar, the prominent Labour Leader of Bombay who for many years was the Secretary of the Girm Kamgar Union (Red Flag), Rombay, as Central Adviser on Labour Welfare to the Government of India Assistant Labour Welfare Advisers have also been appointed by the Government of India in different Provinces Acting under the advice of Mr Nimbhar, the Government of India have launched wide schemes of Labour Welfare in all Government Ordnance, Ammunition and War tactories and these scheines have been placed in charge of expert Welfare Officers

The total sum provided by the Government of Bombay for Industrial Welfare" in the Budget Estimates for the current financial year (1945-46) amounts to nearly two and a half laklis of rupees The other Provincial Govern ments who have gone in for this type of work are not spending as much but still their activities In this direction are showing a tangible widening year by year. For example the funds allotted by the Government of the United Provinces for its Labour Welfare Scheme for the year 1945 46 amount to Rs 1,57,600 It is not neces sary for the purposes of this note to give an account of the manner in which Government activities in this direction have grown during recent vers. We are however, giving a fairly full account of the scheme as it stands in the Province of Hambley today for purposes of graduates.

workers who might like to know as to what being and what can be done in this field

Government Welfare Centres in the Province Bombay are divided into four types "A" B", "C" and "D" recording to the ty and the extent of the activities provided and t times at which they are open—The scope of t times at which they are open. The scope of t work in the "A" type centres is of a ye comprehensive character and covers almost : forms of outdoor and indoor recreational activ ties, periodic cinema and dramatic performanc and bhajan parties, the running of library and reading rooms, the organization of debate magic lanterns and other lectures and mai types of educational classes, the provision nursery schools, medical ald and advice (maternity and health, radios and add a gran These centres are open from 8 30 11 in the inornings and from 5 to 9-30 in th evenings for men and boys and from 1-to 5 the afternoons for women and girls but if hursery school section supervised by a full tin lady teacher is open at each "A" type cent from 9 30 1 m to 5 p m - The "C" type cent are open from 7-30 to 10 30 a m and from 6 p m for men and best and literacy and sevil 9 pm for men and boys and literacy and sewn classes and indoor games for women are conducted from 1 to 4 pm. Boys under 16 year of age are debarred from attending at any of the centres after 7 pm The activities in the "C type centres minly and reading rooms only cover outdoor recreating only cover outdoor recreation. The Mun cipality of Bombay has placed several ope spaces in Bombay City at the disposal of Government for this purpose. ment for this purpose -

An "A" type centre was crected at DeLis Road out of the contribution of Rs 15,000 mvt to Government by Mr Ramnath Podar and th started functioning in March 1939 Twandational full fledged "A" type centres were started at Worli and Naigam with effect from 1st June 1940 At the moment of writin (June 1945) there are three "A" type centres! Bombay and one in Ahmedabad One is in the process of completion at Shelapur. There are process of completion at Sholpur There are eight "C' type centres in Bombay, four a Ahnedabad, five at Sholpur and one at Huh and there are four "D" type centres in Bombay. Plans for Post War Planning and Reconstruction in the Province of Bombay provide for 3 "B type and 6 more "C" type centres for Bombay one additional "A" type and six more "C" type centres for Bombay one additional "A" type and six more "C" type centres" for Almandational type eentres for Alimedabid one additiona 'A'' type and 3 more 'C' type eentres fo Sholapur and the establishment of one "B' type centre each at Viramgaum, Broach Surat, Julgaon, Nadiad, Amalner, Dhulin Barsi and Hubli

The Industrial Welfare Scheme of the Govern ment of Bomby also covers an Industria Training Workshop at Ahmedabad which wa established to impart instruction in elementar, engineering work to apprentices. The primar, aim of the workshop is to afford help in solving the problem of industrial unemployment also intended to raise the standard of skill and efficiency of operatives in the cotton texti-industry. A sum of Rs 65,000 was carmarked in the budget estimates for the year 1941 4: from the Development Fund for the nurchage of Nince of Bombay today for purposes of guidance from the Development Fund for the purchase of

* The figures for Juno 1943 and onwards by different Provinces for their cost of living are for the calendar month Prior to that series and also by the same Province for the

In addition to the cost of high index series which the Labour Office of the Government of Bombay compiles for working classes in Bombay City, it also compiles similar cost of series compiled in India in the same way as we living index series for three other centres in the have done for Bombay It will be noticed that Province of Bombay (1) Ahmedabad, (2) the general averages for the old and the new Sholapur, and (3) Jalgan Those for Ahmedabad, - 1035 Province of Bombay (1) Ahmedabad, (2) Sholapur, and (3) Jalgaon Those for Ahmedabad and Sholapur are published regularly in the Labour Gazette along with that for Bombry City The average prices for the year ended July 1927 have been adopted as the basis for the Ahmedabad series while the one for Sholapur is based on the average prices for the year ended Fanuary 1928 Details regarding the scope and the method of compilation of the Ahmedabad and Sholapur series have been published in the issues of the Labour Gazette for January 1930 and for February 1931 respectively. The introduction of prices control and rationing have neces sitated changes in the compilation of the group index figures for cereals and pulses in a similar way to that adopted for the cost of living index figure for Bombay

Other Provinces in India which complle cost

with the average prices for the twelve months from July 1935 to June 1936 as base. The India we are reproducing in the table below the mouthly movement of the index since January has been changed to August 1939 In 1940 the United Provinces, one series with August 1030 as the base is compiled for working classes In Campore and five other series with prices at 31st July 1939 equal to 100 are specially complled for low paid Government employees at Lucknow, Benares, Barellly, Meerut and Gorakh The Government of Biliar complles cost of living index numbers with the average cost of llving for the five years ending December 1914 as the base for the following six centres in the Province Patna, Muzastarpur, Monghyr, Jamshedpur, Jharla and Ranchl Average prices for five years are also the base for cost of living indexes for Lahore, Slalkot, Multan, Ludhlana and Roh tak in the Punjab but the base period in the Pun jab is the quinquennium ending December 1935 The Government of Orlssa complies a cost of living series for its headquarters town of Cuttack on the same method and base as those adopted by the Government of Bihar and another with average prices during the year 1939 40 as base, for Berhampur

In view of the varying base periods adopted Prior to that series and also by the same Province for the they are for the month ending on the 15th series for different centres in that Province, we in each month duce the cost of llving index figures for a number of centres in one table. It is obviously not possible for us, with the space at our disposal, to give separate tables for every cost of living series for Bombay City for the two years 1935 and 1936 are very similar (1935—old 101, new 100, 1936—old 102, new 101) The general trend in prices is fairly uniform all over India and we are included that the forces and we are inclined to the view that the figures for Bombay may, for all practical purposes, be regarded as fairly continuous from 1914 to 1944 with 1914 as the base for the whole of India

Under a recent scheme adopted in 1942, it is the intention of the Government of India to centralise all the work hitherto done by the various Provinces in India in compiling cost of living indexes under the control of a Central Director of Cost of Living Indexes with his headquarters at Simla Mr S R Deshpande, WBE, Blitt (Ovon), who was for many vears Assistant Commissioner of Labour in the Bombay Labour Office was appointed to this post with effect from May 1942 Mr Deshpande 1958 of present a number 1958 of present a number 1958 of present a number 1958 of present a number 1958 of present a number 1958 of present a number 1958 of present a number 1958 of present a number 1958 of present a number 1958 of present a number 1958 of present a number 1958 of present and present a number 1958 of present and present a number 1958 of present and present a number 1958 of present and p of living index series for working classes are Madras, the Central Provinces and Berar, the United Provinces, Bihar, the Punjab and Orissa Mysore was the first Indian State to start the centres in India with a vigw to compilation of a cost of Living Index for the and revising old cost of living indexes

The Government of India have had under con the Commission was made with a view to protect sideration certain other pieces of legislation which workers from harassment for debts After were also designed to improve the lot of the industrial worker Following the recommendations of the Labour Commission, the Govern ment of India have amended the Civil Pro cedure Code with a view to exempting salaries below a defined limit from attachment Another recommendation of the Labour Com mission was that at least so far as industrial workers in receipt of wages or salary amount Ing to less than Rs 100 per month are concern ed, arrest and imprisonment for debt should be abolished except when the debtor has been prored to be both abic and unwliling to pay Government of India after consulting the provin-

consulting public opinion and the vlews of th various Provincial Governments on this question the Government of India came to the conclusion that (ontral legislation on the subject was no called for The Government of Bengal, at the suggestion of the Government of India, passe a Workmen's Protection Act in 1934 which make besetting of industrial establishments for th purpose of collecting debts a criminal and eogal: Some other provinces are als able offence contemplating similar legislation Moneylenders' Bill Introduced by a non officia member in the Bombay Legislative Conneil Murch 1934 was an effort in this direction on the recommendation on an experimental scale restricted to the province of Deihi in the first of the Bill to a Select Committee winstance. A third recommendation of the Wilt lost

GROWTH OF THE TRADE UNION MOVEMENT IN INDIA

The earliest known trade unlons in India were (1) the Bombay Millhands' Association, a loose Both these types of leaders together with organisation formed in 1890 for the purpose of some of the more intelligent of the worlers and the company of the purpose of some of the more intelligent of the strategies. memorialising Government for improvements in factory law and which soon became moribund after the passing of the 1891 Act, (2) the Amalgamated Society of Railway Servants of India and Burma formed in 1897 by Anglo whereas most of them fell into a state of mainter than the concessions in wage rates were concerned, but the concessions in wage rates were concerned, but the concessions in wage rates were concerned to the concession of them fell into a state of mainter than the concession of the fell into a state of them the concession of the fell into a state of them the concession of the fell into a state of them the concession of the fell into a state of the f Indians and Domleiled Europeans employed on railways, more as a friendly society than a combination for securing concessions, (3) a Printers' Union started in Calcutta in 1905, and (4) the Bombay Postal Union which was formed in 1907 The Kamgar Hitwardhak Sabha, Bombay, which came into existence in 1010, was a body of social workers who were interested in questions connected with the general welfare of iabour and was an association rather for the workers than of the workers Apart from the Apart from the cases cited, the trade union movement, as this ls known in the West, dld not begin in Indla till almost after the end of the first World War

The decade following the end of that War witnessed rapid developments in the field of trade unionism in India, but it must be regretfully admitted that even today organised association of the workers in the country is far below the stage of development which it has reached in Great Britain and in many other countries of the world The reason for this can be put in a nutshell lack of a will to organize as far as the workers are concerned and the absence of efficient leadership Some labour leaders were men who had the good and welfare of labour genuinely at heart But quite a few went into the movement merely for the opportunities which it would give them for coming into the limclight Whereas the former went about affairs with a measure of considered moderation, the latter were mere propagandists and mischiefmakers who strung together all kinds of impossible and preposterous demands in the hope that by doing so they would transport Indian followed by the creation of both prolineal as

first constituted themselves into strike con Many of these committees seemed on the conclusion of a dispute, a good few of then emboldened with the success they had met with set themselves to the task of creating permaner associations or trade unions of the worker These were the beginnings of the trade unic movement in India, and within a period of fit vears (1919 to 1923) scores of unions were forme in all parts of the country As there are I official records to show the names of and the niemberships claimed by these carlier bodie nothing definite can be stated with regard eith to their number or to their total membership but it can be safely asserted that the movement had made a fair penetration on the railways, l postal and telegraph departments, among seamt and in the textile industry in Ahmedabad Cit and in some other centres

The pressing need for a co ordination of the activities of the individual unions was recognisat a very early stage of the movement and be eentral and provincial federations were forme A central organisation at the apex was all necessary because only such a body could ma recommendations. But a regard to the person recommendations with regard to the person of the labour representation on Indian deleg tions to the Annual Sessions of the Internation Labour Conference Thus, the Ali India Tra-Union Congress was formed in 1920 on national basis The Central Labour Boan Bombay, and the Bengal Trades Union Feder tion were formed in 1922 The All Ind Railwaymen's Federation coordinating Railwaymen s Federation, co ordinating unious of railwaymen on an industrial basis, w formed in the same year and this was clost

whole of the blame for this unwarranted strills certain modifications and the new to the Bombay Girni Kampar Union. The publication of this report and the effects of the tion. In 1935, the two sections of movement from which it took ten trade union. Trade Union Congress composed the and the agent of the section and it was agreed that the parents of the section of the section and it was agreed that the parents of the section of the sectio

The communists made a successful attempt in 1929 of ther to capture or to break the All India Trade Union Congress They adulated the Bombay Girni Kamgar Union with a membership of 51,000 and the GIP Rail ray Workers Union with a membership of 41,000 to that bods during the sear and with the auristance of the voting strength which there to o unious together with some of their other unions gave them, they captured both the Congress and its I xecutive Committee at The Touth Session of the Congress which was held in Augpur in that year Resolu tions were adopted favouring the additation of the Congress to international communist organica tions and for the boxeott of the Royal Commision on Indian Labour the International Labour Conference and the Round Table Conferences on Indian Reforms Moderate trade unionists under the leadership of Mr N M Joshi thereupon seceded from the Congress and formed a new organisation called the Indian Trades Union Lederation The Ali India Railwaymens Federation which was till then affiliated to the Trade Union Congress left that body in 1929 and remained outside till 1935

At the eleventh session of the All India Trade Union Congress held at Calcutta in July 1931, a further split occurred in its ranks and the combine thes extreme left wing under the lendership of organisation Messrs S V Deshpande and B T Randly agreement agreem extreme left wing under the lendership of organisation. The principal terms broke away to form the All-India Red Trade both these bodies were that the unionism in India was at a therepresents the representation on the joint General unionism in India was at a thoroughly low cbb of and none of the three national organications Congress be fift, fifty-44 members fr speak on behalf of Indian indour, but, as accept the constitution of the Nation the International Labour Conference the Connections to accept the constitution of the Conference the Connections to accept the constitution of the Nation that International Labour Conference the Connections to accept the constitution of the Nation that International Labour Conference the Connections to accept the constitution of the Nation that the International Labour Conference the Connections to accept the constitution of the Nation that the International Labour Conference the Connection was to accept the constitution of the Nation that the International Labour Conference the Connection was to accept the constitution of the Nation that the International Labour Conference the International Labou Government of India necepted the Indian Trades Union Federation as the body competent to reinting to general strikes and affiliat recommend delegater for the International international bodies should be decided

With a view to bring about unity in the ranks of Indian labour, a committee called the Trade Union Unity Committee was appointed at a representative conference held in Bombay on representative conference held in Bombay on the 10th May 1931 under the auspices of the Dightcenth Session of The Ali-India All India Railwaymen's Federation This Union Congress held at Bombay on the Computation of the Computation This Computation of the Computation of the Computation This Computation of the Computa Railwaymen s Federation Committee found that three different and distinct sections of labour were in existence in India—
(1) the communist group, (2) the hberai group, and (3) the rest—and that the gulf which divided the communists from the other sections was not bridgeable The Committee, therefore recommended a piatform of unity for the remaining sections of labour in India It was proposed to organise and unite all unions which accepted this platform of unity under a new federation to be called the National Federation of Labour At a joint meeting between the General Council of the Indian Trades Union Federation and the did not satisfy Mr Aftab All and he disaft Provisional Committee of the National Federation of Labour held at Calcutta in April 1933,

be recognised as the central organ For inc. classes in India. In the Lebruary of the same year an actenched between the representative In its Trade Union Congress and Trades Union Februation by virtue Joint Committee of the two organ to be formed with a view to explorh blitles of common action with the : the affiliated unions of both in which an effort towards commo agreed matters was made was the entered into between the National of Labour and the Ali India Congre Party for foint action on specific p economic issues At the end of the the Antional Trades Union Federa membership of 83,000 with 62 affiliant the Mi India Trade Union Con membership of 46 000 with 98 affilial It is interesting, however, to note that unions of Ahmedaliad which draw,th tion from Mr. Gandhi have throughou aloof from both three bodies

At a special foint session of the Trade Union Congress and the Trade Union Tederation held at on the 17th April 1938, it was deombine these two bodies into on combined the accept the constitution of the Nation eott Union l'ederation in toto The the Conneil was to act for the combini with the one tirce fourth's majority If this scheme weil, the task of unification should be further and the two bodies merged h The Provisional Affiliation entered into at and 29th September 1940

This very same Session, honever, was sible for vet another split in the Congres Session adopted a resolution of neutre connexion with the War Effort but elements headed by Dr Affab All Presi The Sermen's Union at Calcutta desi support the War Effort The Trade Congress while adhering to the principle neutrality, however, gave a free hand to stheir affiliated members as desired to sthe War Effort The American Congression of the War Effort The War The tion of Labour held at Calcutta in April 1933, the two federations were amalgamated on the basis of the platform of unity as finally evolved by the Trade Union Unity Conference but subject to office at Bell Mr Jammadas M Melt was Growth of Trade Unions in the Province of pointed its Previous and M M Noy Ha C eral Secretary Two hundred trade but in Bombay in the Secretary Two hundred trade but in the Bombay in the Secretary Two hundred trade but in the Secretary Two hundred trade q rier of a nillion have millated tien fres to the new lederation with it corrsin on a country wife compain nipr pa a la for it of upport by India Labor i the War Lifort

an Emergency Committee with a tripartite and the question of "Methods of Coliaboration representative character from its membership between Public Authorities, Workers' Organiza which could meet more rapidly in times of crisis. The Committee set forth two important principles first, that the ILO must continue to function as effectively and as completely as possible in case of war and, second that the continued existence of the Organization as an instrument of eo operation between Govern ments, employers and workers would be of unusual importance in such circumstances

The Twenty Sixth Session of the International Labour Conference fixed to begin on 3rd June 1940 had to be postponed sine die on recount of the War Several Committee Meetings had also to be eancelled By July 1940, Swiss territors was almost completely surrounded by German Occupation Forces and it became increasingly difficult to envisage the continuance in Geneva of an international organization which depended for its effectiveness upon regular communications with its States Members It became necessary, therefore, to establish a working centre outside Geneva and to transfer to it the staff required in order to carry out the obligations of the Organization to its members In August 1940, the Government of Canada officially indicated its willingness for the temporary transfer to the Dominion of the personnel necessary to maintain the essential sorvices of the Organization Montreal was chosen as the most sutable and convenient site for its location and the McGill University very generously agreed to provide the necessary office accommodation and library facilities. The transfer from Geneva to Montreal necessitated drastic administrative changes and reduction in personnel The work of eolicetion and distribution of information regarding labour and social conditions throughout the world is now being continued from Montreal and plans have been made for eatrying on unimpaired, as far as conditions permit, all the manifold activi-ties of the Organization from that centre

In furtherance of this programme, a Conference of the International Labour Organisation was held at New York from 27th October to 5th November 1941 and on 6th November 1941 at the White House, Washington Technically the Conference was not a Session of the International Labour Conforence and it, therefore, had no powers to adopt Convertions and Recommendations in the manner provided for in the Constitution of the International Labour Organization but ample evidence of the value of its work is furnished by the influence exercised by its debates and by the action taken by various Governments to implement the more important of the resolutions which it adopted Further. this Conference has a particular importance attaching to it as the first general international meeting held in the world since the outbreak of the War Thirty-four States Members of the Organization were represented, twenty-two of them by delegations including representatives of them by delegations including representatives of Governments, employers and workers Major played by the International Labour Organization. C R Attlee, Deputy Prime Minister, represented the Government of Great Britain while the Government of India was represented by Sir Shanmukham Chetty and Mr H S Malk, I OS The agenda consisted of two items (1) consideration of the report submitted by the Director of the International Labour Office under the title of The I L O and Reconstruction' and 2) played by the International Labour Organization of the White House, the late concluding Session held at White House, the late concl

tions and Employers' Organizations"

Some twelve Resolutions were adopted by the The most important of these was that on post-war emergency and reconstruction measures The resolution requested the Govern ing Body of the I L O (a) to easi the attention of Governments to the desirability of associating the International Labour Office with the planning and application of measures of reconstruction and to ask that the International Labour Organization should be represented in any peace or reconstruction conference which may be held after the end of the War, (b) to suggest to Governments that they should, if they had not already done so, set up representative agencies for the study of the social and economic need of the post war world and that such agencies should consult with the appropriate organs of the II.O. (c) to set up from its own membership small tripartite committee, instructed to study and prepare both measures of reconstruction and emergency measures to deal with unemployment, in eo-operation, where necessary, with govern mental, inter governmental and private agencies, (d) to make full use of the existing organs of the I LO and set up such new agencies as may be needed in order to meet the responsibilities implied in the Resolution (e) to direct the programme of the ILO to fulfil the purposes of the Resolution and (A) to report on the subject. the Resolution, and (f) to report on the subject matter of the Resolution to the next and subsequent meetings of the International Labour Conference so that the ILO should be in a position to give authoritative expression to the social objectives confided to it in the rebuilding of a peaceful world upon the basis of improved labour standards, economic advancement and social security. A second resolution endorsed the social and economic principles of the Atlantic Charter and urged that the fullest use be made of the machinery and experience of the ILO in giving effect to these principles Another resolution provided for the continuation of the world Tartic Conference held by the work of the World Textile Conference held by the ILO in 1937 and requested the Director to begin immediately the preparation of a definite scheme for the establishment, under the egis of the ILO, of a World Textile Office, based on the transmitted of t the tripartite principle, to be responsible for the international organization of measures to secure prosperity and social justice in the textile in dustry. The leading resolution on Government employer-worker collaboration declared that real collaboration is possible only 'within the framework of deceases to relate a possible on the framework of deceases to relate a possible on the framework of deceases to relate a possible on the framework of deceases to relate a possible on the framework of deceases to relate a possible on the framework of deceases to relate a possible on the first possible on the the fra mework of democratic political institutions which guarantee the freedom of association of workers and employers "and if in law and in fact the right of industrial organizations to represent workers and opposed to the results of th workers and employers is recognised by the State

In addressing the Conference on the part to be played by the International Labour Organization in the winning of the War and of the peace at the concluding Session held at White House, the late President Roosevelt said. "In the planning of Suphinformatical section the International Labour

GOVERNMENT ADMINISTRATION OF LABOUR QUESTIONS.

Prior to the year 1920 there was little co | Government could not provide him with adordination between the Centre and the in matters connected with I about. It would not be wrong to say that prior to that year provincial Governments in India took little staff. The Government of Madras appears to Labour matters. The part a Labour Commissioner in the year 1920 of the Officer's duties were, however, primarily of the control of the con enpation by India in the First Session of the Officer's duties were, however, primarily International Labour Conference held at Washington in 1919 and the increasing interest taken by the Indian public in questions connected with operations for the betterment of the comby the Indian public in questions connected with of the Depressed Classes in the Province Isbour made it necessary, however, both for the Special regard to provision of water of Government of India and the Governments of the more industrialised Provinces not only to describe the greater of the representation of the considerable of experience in the form of special schools and the consider the question of the representation of labour in the Central and provincial legislatures but also to allocate to special departments or offices the administration of labour questions The Government of India established a Labour Bureau in the year 1920 which instituted inquiries into certain phases of factory work and published some reports in a series known as "Bulletins of Indian Industries and Labour" Before the utility of the Central Labour Burcau could be established it was abolished in March clintlon has only been placed upon him c 1923 on the recommendation of the Indian Retrenchment Committee The Department of Labour of the Central Government had, however, endcavoured to carry on as much as possible of the work inltated by that Bureau but owing to its limitations in staff and personnel it was not in a position to luitiate and conduct all India in quiries into wages and conditions of employment in Indian Industries Since the advent of the War and the creation of the Tripartite Labour Conference the Department of Labour of the Government of India has considerably expanded its staff and it now deals with a much wider range of subjects than it did before the War

The Government of Bengal, in 1920, invested a Deputy Scretary in the Commerce Depart-ment with the additional work of a Labour Intelligence Officer whose duty would be to keep a record of industrial disputes in the Province as well as of labour organizations It was intended that this officer should conduct special inquiries from time to time as circumstances required but settle owing to financial stringency, the Provincial arise

of assistance in the form of scholarship boarding grants and to the administration Criminal Tribes Settlements He was a watch and study the conditions of labour, I ularly industrial labour, throughout the vince and to keep Government informs periodleal reports of its movements and te cles and of the existence of any disputes be employers and employed The duty of sc labour disputes through negotiation and recent years

The lead in the matter of the creation proper and stable department of Govern with investigators and in adequate state staff to deal with all questions connected labour was taken by the late Lord Lloyd, Governor of Bombay, who ercated a L Office for the Bombay Presidency in In the Government resolution announcin establishment of this office the following declared to be its functions

- "(1) Labour Statistics and Intelliger These relate to the conditions under which li works and include information relating to cost of living, wages, hours of labour, fi budgets, strikes and lock-outs, and si matters.
- "(2) Industrial Disputes -As Capel and knowledge are gained and the activit the Labour Office develop it will promot settlement of industrial disputes when

The "Labour Gazette" also gives, once in every six months, complete information with regard to all known trade unloss with tion with regard to all known trade unions in the Province The only Province in India, which maintains a first class and up to date illbrary or books and periodicals on all kinds of matters connected with Labour is Bombay

THE CENTRAL GOVERNMENT

The work of the Labour Department of the Government of India has increased considerably since the outbreak of the present war Apart from purely labour matters, i.e., legislation affecting conditions of employment, regulation of factory conditions, etc., it has wide responsibilities in regard to other subjects, eq mines, electricity, orrigation the Central Public Works Department, Air Rald Precautions in factories, etc. This Department administers and controls all matters in connexion with the work of the National Service Labour Tribunais, the Technical Training Scheme, the Bevin Training Scheme, the Civil Pioneer Force and the system of Employment Exchanges The latter are, The however, as yet in an embryonic stage. The Labour Department has continued active co operation with organised employers and labour through its Tripartite Conferences and Standing Labour Committee A Labour Inves tigation Committee has been set up as a means of acquiring information preliminary to the consideration of further development in Social Services A Special Officer (B P Adarkar) has been appointed to investigate problems of Health Insurance In accordance with one of the recommendations of the Rau Railway Court of Inquiry, the Labour Dept opened a new Branch for conducting family budget inquiries in important rallway centres all over India and for commiling cost of living index number series for these centres The work of this Branch will be to co ordinate and eventually echtralise the eompilation of all eost of living index number series which are being compiled by the different Provincial Governments at present Mr S R
Deshpande, MBE, Blatt (Ovon), who since
1924 was Assistant Commissioner of Labour
with the Government of Bombay, has been
appointed Director of Cost of Living Indexes in
connexion with the work of this new Branch with
effect from May 1942 Mr Deshpande's headquarters are at Simla In the same month the

and labour conditions in the outside world Government of India appointed Mr R S Nimb Its contents include statistics and discussions kar, a prominent Labour Leader from Bombay, regarding the cost of living index series which its a Central Adviser on Labour Welfare Mr Libour Department at New Dellil Dr T D Jack Professor of Leonomics in the University of Aberdeen who joined the Mulistry of Labour, London, on the outbreak of the War, was appointed a Labour Adviser to the Government ot India in December 1942 On Dr Jack relliquishing his appointment in 1943, the Government of India secured the services of Mr B L Witers, a Semor Official of the British Vinistry of Labour as Labour Adviser to Government but this Officer died in Simia in September, 1944. The present executive staff of the Department is is follows

OTHER PROVINCES

In Assam the main question connected with labour is that concerning the recruitment of labour for ter plantations from other provinces As inter-provincial inigration is a central subject, the Provincial Government are not very actively interested in the special consideration of other labour questions Notwithstanding this how ever, the Government of Assam have obtained the approval of the Government of India and the vote of the Legislature for appointing the Controller of Emigrant Labour as part-time Labour Commissioner with a whole-time Assis tant In Assam A S R PILLAI is the present Controller of Emigrant Labour and Com missioner of Labour He is also the Registrar of Trade Unions in Assam The present whole time Asst Commi of Labour is KUMUD CHANDRA DATEA The only important event of interest that his occurred in the field of labour in Assim during 1943 44 is the creation of the Workmen's Compensation Deposit Scheme Labour conditions in Orissa and the North West Frontier Province are not considered such as to justify the appointment of Labour Commissioners In Orissa, the Director of Development (H Lal, I CS) is the Labour Commissioner and the Revenue Commissioner (R P Ward, I CS) is the Registra of Trade Unions In the North West Trontier Province, the Secretary to Government in the Legislative Department has been entrusted with the work of industrial Ind labour disputes and Malik Khuda Baksh Khan Ba, LLB is the Registrar of Trade Unions In Ajmer-Merwara, the Entra Officer, Ajmer-Merwara, is Registrar of Trade Unions

Almer Merwala constitutes quite an important industrial irea with its cotton Mills and rulway workshops So far, however, there attachment has not been any administrative machinery to look into the various problems of labour in that area. The Central Government have, therefore, recently, decided to form an organisation with a Labour Officer at its head to look after the welfare and various other problems relating to labour in Almer

INDIAN STAIFS

The rapid industrialisation witnessed in India especially since the advent of the Second World War in 1939 has not been confined to British India alone but has also extended to the Indian States as well After the end of the First World Wir, there was a slight tendency for industry in British India to migrate to the States owing to the absence of jabour laws and restrictive sonditions of work but most of the progressive States such as Hyderabad, Baroda, Mysore, Gwalior, Indore, Travaneore, Cochin, etc., have endeavoured during recent years, to bring their labour legislation into line with the Labour Laws in British India with the result that industrial workers in these States are now assured of conditions very similar to those obtaining in British ferring Statutory recognition on each Association three Conferences of Labour Ministers convened by the Government of India in the years 1941, 1942 and 1943 and their representation in the Tripartite Labour Conference and in the Stand ing Labour Committee ereated in 1942 have given as a result of disputes between masters and men

and the leveling up of conditions of work in the States with those obtaining in British India Misore shows the most notable advance in recent years in the field of labour legislation and some of the measures adopted in the last year or two in that State show an advance even as compared We conclude this chapter with British India by giving below a few interesting details regard ing the extent of industrialisation and the inea sures adopted in the administration of matters eonnected with labour in a few States which have supplied the necessary information on the subject

MYSORE

Prior to 1941, Mysore had a Factories Act, a Mines Act, a Workinen's Compensation Act and a Maternity Benefit Act Labour problems in Mysore have, however, been brought into con siderable prominence as a result of rapid indus trialisation in the last few years In addition to 28 new plants, 25 large industrial concerns of which 17 were State aided and eight State owned were established in the State during the decade ending 1941 The total number of large industrial undertakings stood at 330 by the end of 1943 and these gave employment to an average of nearly 86,000 workers An amendment made to the Mysore Factories Act in 1942 extends the scope of the Act to all factories employing ten or more persons instead of 20 as before thus bringing almost all factories in the State within its purview The Mysore Workmen's Compen sation Act was considerably liberalised and the operation of the Mysore Maternity Benefit Act was extended to women employed in mines in the same very. The Code of Civil Procedure was also amended in such a way as to ensure the exemption of the wages of workers from

The most advanced piece of labour legislation in India States today is the Mysore Labour (Emergency) Act enacted in 1941 and placed permanently on the Statute Book in January 1942 This Act creates machinery for the peace ful and speedy settlement of industrial disputes and seeks generally to promote the welfare of labour Among its many provisions are those relating to the setting up of a Department of Labour with a Commissioner and three Assistant Commissioners of Labour and a Court of Indus trial Arbitration the framing by the Commis sioner of Labour, of Standing Orders for work men, and the conferring of the rights of associa tion on all labour employed in the State Court of Industrial Arbitration, consisting of a Judge of the High Court as its Chairman and two independent members decides industrial disputes referred to it by Government or by agreement between the parties and decides appeals from the Orders of the Commissioner of Labour regarding Standing Orders The erection of rival unions of workers is avoided by prescribing a single Association each for industrial undertakings employing not less than 100 persons and by con The participation by some States in the immediately it is registered. By the beginning onferences of Labour Ministers convened of June 1944, 52 unions with a total membership of June 1944, 52 unions with a total membership of June 1944, 55 unions with a total membership of June 1944, 55 unions with a total membership of June 1944, 55 unions with a total membership of June 1944, 55 unions with a total membership of June 1944, 55 unions with a total membership of June 1944, 55 unions with a total membership of June 1944, 55 unions with a total membership of June 1944, 55 unions with a total membership of June 1944, 55 unions with a total membership of June 1944, 55 unions with a total membership of June 1944, 55 unions with a total membership of June 1944, 50 unions with a total membership of June 1944, 55 unions with a total membership of June 1944, 55 unions with a total membership of June 1944, 50 unions with a total membership of 31,260 workers in 74 industrial undertakings covered by the Act were registered in order that war production might not be interfered with an added impetus to planned industrialisation Under the guidance of the Asst Commissioners

BARODA.

The total number of registered factories in the Barodi State on the 31st July, 1944 was 170 of which 80 were perennial and 90 sersonil. The total number of persons employed in all factories employing more than 20 persons was 11,771 Baroda was one of the flist states in findia to enset a Mines Act. The Baioda Mines Act, 1908 contains provisions in regard to health and safety of workinen employed in the Mines and safety of workinen employed in the Mines As for as other Labour Laws are concerned the Government of H H The Maharija Gulwar of Baroda has adopted, with certain changes to suit local conditions, the Indian Factories Act, 1934, the Workmen's Compensation Act 1923, the Trade Disputes Act, 1929, the Trade Unions Act, 1926, the Payment of Wages Act, 1936, and the Bombay Materiaty Benefit Act, 1929 Under the Biroda Factories Act, the ina illium permissible weekly hours of work are 60 for perennial factories and 66 for seasonal factories as against 54 and 60 respectively in the Indian Act The Baroda Act makes no provision for weekly holidays but it provides for at least 52 holidays in a vear and a minimum of four holidays in a month is obligatory Sections 78 and 79 of the Indian Act have been omitted The Workmen's Compensation Act and the Rules framed thereunder have been adopted in toto. In the Baroda Maternity Benefits Act, the benefit is to be at the rate of smanns a day as against 8 annas a day as in the Boinbay Act Sections 6(3) and 18A (relating to the appoint ment of Conciliators) have been omitted from the application of the Tride Disputes Act, 1929 The Baroda Trade Unions Act has important variations from the British India Act on which it has been modelled, (1) No Associations or Unions of Government Servants, whatever be their objects, are permitted, (2) the forming, by Unions, of political funds is not recognised, (3) the proportion of persons connected with an industry which is covered by a Union to outsiders on its executive has been fixed at 663 and 331 per cent respectively and (4) Section 30 of the British Indian Act has been omitted Under the Baroda Payment of Wages Act, all wages have to be paid before the capity of the tenth day following the period for which they fall due In the application of Rule 81A of the Defence of India Rules, the period of notice required for the declaration of a strike or a lock out is six weeks

A Labour Officer whose main duty was to endeavour to bring about settlements in labour disputes was appointed in the year 1938 addition to conciliation work he is entrusted, as Special Registrar of Co operative Societies for Workers, with the work of organising co operative Societies and other welfare Schemes with the help of employers. In the year 1943, the Government of Baroda State instituted an inquiry into the general financial condition of the cotton mills in the State and the conditions of lebour employed in them with special reference. of labour employed in them with special reference to recruitment, wages, hours of work, labour welfare and efficiency

With a view that the increased earnings accruing to industrial workers in the State as a

Societies By the end of February, 1945 twenty such Societies with a membership of 24,301 workers had been established in the State The total amount of savings as at the same date amounted to Rs 20,19,962 personnel of the Government of Baroda dealing with administrative matters connected with Labour is as follows

Director of Labour and Registrar of Trade Unions G V BHATT, M \ (London)

Labour Officer, Inspector of Factories under the Payment of Wages Act and Special Registrar of Co operative Societies for Labour B S DESAL B AG

Inspector of Factories D B ARTE

INDORE.

In October 1943, Indore was the fifth largest eentre of the eotton textile Industry in India with seven mills having 213,446 spindles and 6,301 looms. The total number of factories on the register on 1st October 1944 was 485 of which 322 were perennial and 163 seasonal These gave employment to 30,297 workers in all of whom 26,377 were employed in cotton mills Labour legislation in Indore is almost parallel to that in British India and includes Factories, Workmen's Compensation, Trade Disputes, Payment of Wages, Trade Unions' and Maternity Benefit Acts The Indore Trade Disputes Act provides for the appointment of Courts of Inquiry and Boards of Conciliation to deal with disputes and also for a Labour Officer to secure the maintenance of liarmonious relations between Standardisa the workers and their employers tion of wages have been secured in cotton textile mills and labour has been decasualised by the introduction of the Badh Control System on the lines adopted by the Millowners' Association, Bombay Safety Committees to prevent accidents in factories have also been established MUNITAZIM-I-KHAS BAHADUR CAPT H C DHANDA, BA (Ovon), Barrister at Law, Commerce Member, Holkar State, is the Minister in charge of Labour, Rai Ratan V N Sherle kap, L M E A M Tech I is Registrar of Trade Unions and Inspector of Factories and R S Datl, BA, LL B is the Government Labour Officer

COCHIN

Unlike Mysore, Baroda and Indore, the large industrial population of Cochin State is organised on a cottage basis. The number of concerns on the Factory Register at the end of the last official year (18th August 1944) was 103 employing 12,806 persons Today Coehln State has all the labour laws which have been enacted in Indore with a Doek Labourers' Act in addition Recent additions include in Employment of Children Act and the Employee's Fiablity Act The administration of labour matters is generally in the hands of the Director of Industries and Commerce who is also the Labour Commissioner, the Registrar of Trade Unions and Conciliator, under the Trade Disputes Act (V K ACHUTA MENON, M A, B Com) The Factories Act and the Workship Company of the Menon A of th result of war conditions might not be frittered the Workmen's Compensation Act are, however, away in drink etc. the Baroda Government under the immediate administrative control decided to start to operative Thrift Societies for the workers. The Government have guaran tred the security of all deposits made in such respectively.

CIVIL AVIATION

The development of internal air services in [f ciliti s including wir le s and meteorol gy India was first easayed by Lo d (then Sir Georg) The developmenta as a result of the war I ve Lioy du ingh is Government of Domany (1918) grou feed Inaddition to routes it v resel before 23) The first air service was org match by the Boyal Air I war daily services from Peel war to Madras Governme to I India between Kar chi and Bomhay and was operated by the Boyal Air I war daily services from Peel war to Madras I was testablished as a tempo any and e perimental measure of in the fair resetting results are some and the contained and the control of the co collected and its contin ance as a purely comm r cial concern was not ad ocated

planes had already been purchased for the service | The frequency was increased to five and they were sold, one of them being retained for the use of Their Excellencies the Earl and Countess of Willingdon, who had newly arrived in first class mails to Empire participating countries India on the appointment of the Earl to be were conveyed by air. On the empire system of Viecroy Excellencies' service until 1934, when a new upto date aeroplane was purchased for their use and their old one was retained for the use of senior Government officials

Annual Annual

Efforts to attain the desired result were revived successfully in 1933 Arrangements were made with the British Government and British Airways, Ltd, for the extension of the London Karachl air service across India from Karachl to Singapore, as a link in the England Australia air Singapore, as a fine in the England Australia an service. A private company called The Indian Trans Continental Airways, Ltd., was formed with a rupee capital and a majority of Indian Directors, in which British Airways, Ltd., held 51% of the shares, Indian National Airways, Ltd 25 per cent and the Government of India 24 per cent. This Company then operated jointly with British Airways a well is service from with British Airways a weekly service from Karaelil to Singapore, where it connected with Qantas Empire Airways' weekly service from Singapore to Australia

Indian National Airways, Ltd was established largely through the efforts of Mr R E Grant Govan, CBE, to participate as a shareholder in Indian Trans Continental Airways, and to develop feeder and other internal air services in North India They opened a bi weekly scrylce between Calcutta and Rangoon and a daily service between Dacca and Calcutta with prospects of extension to Assam Under a ten year contract with the Government of India they also instituted a weekly service from Lahore to Karachi, to link with British Air ways London-Karachi services The Rangoon and Dacca services from Calcutta were abandoned In 1935, owing to lack of public support

Before all these developments, however, the first move had taken place in Western India Through the enterprise of Tata Sons Ltd., under a ten year contract with the Government of India, a feeder service was started in 1932 between Karachi, Bombay and Madras, connect-ing at Karachi with the London-Karachi service From the beginning of 1935, British Airways London-Karachi service, and with it the Trans India service to Calcutta and the feeder services, Karachi Lahore and Karachi Bombay-Madras, wero operated twice weekly The second trans-Indla service was extended to Australia in 1936

Empire Air Mail Scheme — The initiativo in this development was taken by His Majesty's Government In September 1936 an agreement was reached with the Government of Indla and the Government of India simultaneously negotiated with the Government of Ceylon for the extension of the Karachi-Madras service to Colombo The new services were inaugurated on the 28th February 1938, with four services a week The freeach way from London to Calcutta quency of the two feeder air mail services in Indla, Karachi viz, Karachi-Madras Colombo and Lahore was simultaneously increased to four, each service maintaining connection with the easterly and westerly flights of the main trunk tralia)

when the services in the Australian section were augmented at the end of July, 1938, and all the appointment of the Earl to be were conveyed by air. On the empire system of The machine continued in Their air services, Imperial Airways and its associated less service until 1984, when a new up-companies, including Indian Trans Continental Airways, Ltd, flew a total distance of approx lmately, 7,000,000 miles in 1938 as against 4,300,000 in 1937 and the total load earried rose from 6,315,400 to 12,392,000 ton mlles In the early months of 1939, 550 tons of mali consisting of 50 000,000 letters were earried each letter travelling on an average 4,750 miles

> The Empire Air Mail scheme was suspended in September, 1939, on the outbreak of the War with Germany, but a restricted service was main tained until June, 1940, when, on Italy's entry into the war, air malls to the United Kingdom were totally suspended In December 1940, the possibilities of introducing a direct air link between Britain and Durban were investigated and a 'short circuiting' route was inspected by Major J. R. McCrindle, Deputy Director General of the British Overseas Airways Air Scruice to Lngland was renewed in August 1945

Service -This India-England Airgraph new service was inaugurated on February 2, 1942 The algraphs were photographed at Bombay on a miniature film measuring about half an inch square The films were sent through out by air from India to the United Klingdom where a photograph facsimile, measuring about with five inches by four inches, of the original letter, Inder was made from the film and delivered to the addressee by the British Post Office enclosed in a cover. The rate of postage originally fixed at fourteen annas was reduced to eight annas on March 2. The airgraph service was dis continued in July 1945

> services —In 1937 Internal air Tata Sons, Ltd, established a service between Bombay and Delhi, calling at Indore, Bhopal and Gwallor This service operated twice weekly during the fall scason It was, however, Besides this Tata Sons suspended in 1943 Bombay -Trivandrum have extended their service to Triehlnopoly where it connects with one of the four main services to Colombo This service is also operated scasonally during the fine weather months Surcharged air mails fine weather' months are carried on both services

> The Air Services of India Ltd, Bombay inaugurated in November, 1937, an air service from Bombay to Bhavnagar, Rajkot, Jamnagar and Porbandar in the Kathawar States The service was terminated in 1940 The twice weekly Bombay/Poona/Kolhapur Line was also terminated due to War in 1940

> The Indian National Airways run two services viz, Delhi Lahore-Karachi and Karachi Calcutta via Lahore and Delhi, the former once a week, the latter twice a week, in each direction

> The K L M were operating once a week between Lydda (Palestine) and Sydney (Aus tralia) They have now suspended their services

across India in view of the international situation | 1 great success After the entry of Italy into the war, Lydia, in amateur competitor and was regarded as having Priestine, became the westbound terminus of contributed in an Important degree to general

the service

During the period of the war Messrs Tata Sons Ltd under the title of Tata Air Lines and Indian National Airways Ltd entered into an agreement with the Government of India for the operation of various internal air routes for the benefit of the War Department. The entire eapacity on these services, was placed at the disposal of the War Department who met the enthre east of operations from Defence cetimates Civilian traffic was earried only when space be came available after meeting the demands of the military traffle

Aeronautical Technical Institute —Since 1937 the Air Services of India, Limited, run the Aeronautical Technical Institute at Jammagar which has provision for training a limited number of students as ground Engineers according to the course prescribed for "A" and "C" iternees and also for "B" and "D" licences issued to the course of the by the Government of India

Indian Air Races — The first Indian Air-race was flown over a Delhi-Agra-Jhansi Lucknow-Agra-Delhi course in February 1932, and was very successful There was a similar race over approximately the same course in February 1933, when the entries were good and included two competitors who specially came out from Eng-land for the contest and the event was again completely successful

There was no race in 1934. One was programmed for December 1934, to be flown from Calcutta to Bombay with a halt for one night at Cawnpore Six months' notice was given and substantial cash prizes, in addition to the Viceroy's Challenge Trophy, were offered, but only six entries were received. The Aero Club Committee in their announcement to this effect said that in their opinion the pro to this gramme was too ambitious for the class of competitors who had hitherto entered, most of whom could not afford to fly to the start, race over 1,200 miles and then fly home They added, "Air racing, like every other form of racing, costs money and can only be encouraged by the patronage of wealthy sports men and in India this has been the exception rather than the rule up to now" The only funds regularly available for the purpose are the interest on one lakh of rupees given by Sir V Sassoon to form an Irwin Flying Fund and a day's halt at Singapore, only 14 days for flying sport prizes The fund is held by a were spent on the round journey. The sar return trip by bout takes about one month of Civil Aviation and the Chairman of the Aero

It was won by an Indian air mindedness in India

All-India Air Rally—On the 5th and 6th December 1938, an All-India Rally was held at Karachi on the occasion of opening of the newly constructed Air Port Building His Excellency the Governor of Sind performed the opening ceremony and gave away the prizes to the Winners

Ali flying clubs in India affiliated to the Aero Club of India and Burma participated The Viceroy's Cup given for the best aggregate results obtained by one of the competing clubs was won by the Karachi Aero Club The Sir Victor Sassoon Challenge Trophy given for the best all round progress during the year was awarded to the Karachi Aero Club

International Flights -In 1938 there were 21 international flights to, from or aeross India by non Indian Aircraft and one flight to India by an Indian Aircraft

Two Royal Air Force aeroplanes succeeded in flying non-stop from Ismailla (Egypt) to Darwin (Australia), a distance of 7,126 miles Darwin (Australia), a distance of 1,120 mines which was flown in just over 48 hours at an average speed of 149 miles per hour. A third machine indeed owing to lack of fuel only a few bundled miles short of its destination. These hundred miles short of its destination flights were alded by the aeronautical wireless and meteorological services in India

The origin of these two races was the offer by Their Excelleneles the Viceroy (the Earl of Willingdon) and the Countess of Willingdon, of a Challenge Trophy for such a race

The origin of these two races was the offer by at the beginning of January 1939 by the German Pulos, Licutenants Pulkowski and Jennet The distance covered was approximately 4,000 miles and the feat was claimed to be a record for light aeroplanes. Licutenant Pulkowski unfortunate aeroplanes. Licutenant Pulkowski unfortunate the death in an accident to the aeroplane at Madras

> Two French mulitary acropianes crossed India in January, 1939, on their way to Indo China

> Record flights were made in March, 1938, by Flying Officer A. E. Clouston and Mr. V. Ricketts from England to New Zealand and back, and in April 1938 by Mr. H. F. Broadbent from Austra iia to England

Owners -- While no Flying by Private Owners — While no flights by Indian private owners were note worthy from a record-breaking point of view, three of them descrie mention A private owner in a two seater Hornet Moth flew with a passenger from Calcutta to Batavia and back Inclusive of two days sight-seeing in Batavia and a days halt at Singapore, only 14 days were spent on the round journey. The same return true by heat talks about two properties.

Club

The second flight was from Lahore to Sriaagar and back. The pilot claimed to be the first private owner to take a single engined aeroplane race from Madras, via Bombay to New Delhi and Entries were received not only from different over the Pir Panjal Range lie found it necessary parts of India but from abroad. The race was to fly as high as 19,000 feet.

Se eral improvements larve been mad to let may be the limit of the limit tions level 11

The installation of new wireless equipment is ferred with the upper Air Office to Deihi still in progress both on the Trans india route aviation section will be responsible for the orga and the South India route and the process of improvement will be earned several steps fur-ther by the programme of new works sanctioned When it is completed it is expected that the full development of the present whicless pro gramme will be reached and a sufficient number of operators will have been trained to provide for all current weather reports, including rethe full hours of watch demanded A 24 hour service is now being given at D I stations on the Trans-India route, but for the present I stations except at Kaiachl, the short and medlim wave installations at the aerodromes will not usually be manned for more than 18 hours dally

On the South India route the acronautical wireless service between Kuraeln and Bombiy, on the strudard ination wave length of 900 metres, is regularly used by Tuta's aircraft relieve congestion at Karachi it is intended to latest report on Weather Notice Boards at adopt a wave length of 850 nietres for the South acrodromes or to get reports by W/T while India route as soon as a second medium wave transmitter and receiver have been installed there

South of Bomby, wireless service for ivin tion is at present operated on the shipping wave length of 600 metres of Madras and Colombo pending the completion of aeronautical stations it these places. Tata's aircraft operating on it these places Titr's aircraft operating on this section of the route are not it present equipped with wireless and the traffic consists of point to point messages

own wireless station at Bhuj rerodrome. This station gives advance information regarding weather conditions for the Bhuj Karachi and Bhuj Ahmedabad sections and also intimates the pilot in advance the condition of the Bhuj landing ground during the monsoon

Wireless communication facilities are also given from this station to British Airway's flying boats when operating on the Karachi Jai/Raj Samand route

Meteorological Services—Lurther improvements were effected by the India Meteorological Department in the Meteorological arrange ments for aviation. New double flight pilot balloon observatories were established at Raj Sam'nd and Gwalior to meet the requirements of the flying boat service. The pilot balloon and current weather observatory at Gwadur was transferred to Jiwani, the pilot balloon and current weather observatory. current weather observatories at Allahabad and Alipore (Calcutta) were moved to the aerodromes, and a temporary observer was posted at the seaplane base at Calcutta for the issue of special reports, particularly regarding visibility for the benefit of the flying boat service On the Karachi Colombo route, the observatories at Bhul, Nalegaon and Hyderabad (Begumpet) began taking regular afternoon pilot balloon observations and arrangements were made for an additional pilot balloon ascent at Ahmedabid in the early morning. The observatory at Bangalore also commenced an additional daily pilot balloon observation in the afternoon

A new aviation section has been set up at the

ulsation of the meteorological service on air routes, and, when transferred to Delhi, will mainthin halson with the Clvil Avlation Depart

The international codes have been adopted ports of dangerous phenomena and improve ment thereof New editions of the pamphlet on meteorological organisation for airmen and of the Aviation Weather Codes (Pocket Card) were issued

On the Trans India air route, the routine arringements for the Issue of forecasts upper wind and current weather reports by W/T to all main aerodromes and to alreraft in flight were continued Airmen are able to refer to the in the alr at routine times and at other times on requisition On other routes weather reports are prepared by the Meteorological Office to suit the time table and needs of the air services

Arrangements have been made for the routine distribution of pilot balloon and current weather reports along the Larachi Colombo route and the system is working satisfactorily

point to point messages

In August 1930, Tata Air Lines erected their two wireless station at Bhuj nerodrome This latter empowers the Central Government to atton gives advance information regarding. take measures for the sanitary control of air navigation in emergencies

> The Indian Public Health (Aircraft) Rules are based on the International Samtary Con vention for Air Navigation, with modifications to suit conditions in India

> International Commission for Air Navigation -India was represented at the 26th Session of the International Commission for Air Naviga tion held at The Hague during Mayand June 1938, by Mr J A Shillidy, OSI, IOE (retd)

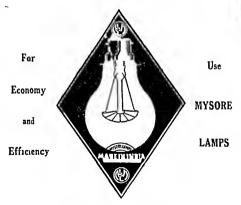

Aeronautical Maps - The preparation of a series of aeronautical maps for India on the seale of 1/1,000,000 has been undertaken by tho Survey of India Hitherto, there have been two series of general maps on this scale, namely the "Carte Internationale" series and the ' India and Adjacent Countries' series order to facilitate the work of keeping the maps up to date, it has been decided to concentrate in future on one series only The "Carto Inter-nationale" has been selected and this will be the basis of the new aeronautical maps essential first step the map sheets are being com pletely revised and reprinted in turn sheet is completed a special edition will be pre pared on which will be surprinted air information conforming so far as possible with the re commendations for the International Local Aeronautical Map of Anneve F of the International Convention

The Aeronautleal information comprises de Upper Air Office, Agra, which will be later trans | tails of aerodromes and landing grounds, wire-

THE SUEZ CANAL.

Opened formally in 1869, the Suez Canal commercial interests. Incidentally, nearly 60 constitutes an artificial waterway about 105 per cent of the total tonnage passing through miles long, linking. Port Said on the Mediter the Canal is British. The enterprise is managed ranean with Sucz on the Red Sea The Canallla I gapt shortens the route from England to Calcutta and Bombay by 3,660 and 4,500 miles respectively, also, of course, substantially reducing width was 72 feet and the depth about the distance to Australia Using the Canal, the Mediterranean ilect could reach the Singapore Canal Company in regard to the deepening of the deepening Mediterranean fleet could reach the Singapore base in less than three weeks. The alternative route round the Cape lengthens Britain's lines of communications by about 4,000 miles

Control and Finance

The Sucz Canal is controlled by a company, the market opoil # property, valued in it £120,000,000, (before the war) passes to the Lgyptlan Government when the concession expires on November 17, 1968 the This is of course in default of other arrange This is of course in detault of other arranged can pass in the 21 hours. One simplifies, ments. The British Government owns 44 still to tie up to let a second pass, though the per cent of the shares, thanks to Disraell's still to tie up to let a second pass, though the celebrated coup in 1875 when for £4,000,000 he is plenty of room for both. The biggest vess celebrated coup in 1875 when for £4,000,000 he is plenty of room for both. The biggest vess celebrated coupling the bankrupt. Khedlye is to navigate "The Cut" was of 27,000 ton The shares before the war were hold lngs valued at £84,000,000 and the profits amounted to about £3,500,000 a year Most of the cuaranteed by an International Convention of remaining shares are held in France, but 20th October, 1888. The provisions of the not by the French Government, which Convention are that subject only the convention are that subject only the convention are that subject only the convention are that subject only the convention are that subject only the convention are that subject only the convention are that subject only the convention are that subject only the convention are that subject only the convention that the convention are that subject only the convention are that subject only the convention that the convention are that subject only the convention that the does not own a slivre 21 Frenchmen, 10 Britishers, a Dutchman and self defence and to action to injure the safet an Egyptian Only three of the British director represent the British Government, the remain provided that the rules are observed, on the freing seven represent British shipping and use of the Canal

Development

the Canal is to offer a slightly great depth of water than that available ports cast of Suez It is claimed that, with the It is claimed that, with th ports east of Sucz exception of Sidney, there is no Lister port which at low tide has a greater depth water than that now provided in the Can throughout the full length of nearly 100 mile Todas, the Canal Is on an average, 45 feet det and 70 vards broad. It can be traversed just under thirteen hours. About 15 ship can pass in the 21 hours. One ship has, however

Travel in India.

only to the wealthy, the lessured and those who had friends in the country. The cost of the journey was very high, the methods of transportation were very glow, and the fact lities for travel were so indifferent that he was a bold man who consigned himself to the mercles of the country without a sheaf of letters of introduction Nowadays travel in India is casy and is no more expensive than travel in other countries. The Indian railways provide facilities on the trunk lines which climinate—at any rate reduce—changes to a minimum and the Indian Hotels have improved very considerably in the last few years

The traveller to India has a choice of many ports by which he may enter To the majority of visitors from Enrope and the West, Bombay provides their first glimpse of India, while others enter by Calentta, Madras and Karachl and via Colombo

Owing to its geographical position Bombay is known as the Gateway of India through which for more than a century, the import and export trade of India has largely passed Ash-purple against the dawn, the spurs of the Western Ghats, thrones of mystery, stand sentinel about the inner sanctuary of Bombay Harbour Among and above these mountain heights Wellington fought the battles which earned for him his early multary greatness. early military greatness Every school boy knows the stories of the Mahratta campaigns and the bright anecdotes of Rapput | and wild waste

Lifty years ago, a tour in India was possible courage and chivairy, but Rajputs and Mahrat by to the wealthy, the lessured and those tas are not all that India has They are only a few of the tribes and clans that inhabit this vast sub continent One of the greate attractions of Indla for the visitor is the great diversity to be found in every respect, mode of llving, dress, food, language and religion In fact a traveller can never get bored You will find life in its most up to date form and next to It the customs and habits of a nation which have not changed for hundreds of years will surge past you in a picturesque procession. You will hear a medley of strange sounds—the tinkle of the temple bells, the throb of the drum, the chant of the 'muezzin' announcing that God is Almighty and Mohammed is his Prophet and the song of the Pandit consisting of character sketch of 'Rama' or 'Krisha' The tropical sun blazing like a ball of molten gold in a turquoise sky, the silver moon saling across the purple vault of heaven will awaken in you feelings which you have never known If the visitor seeks variety and pietures queness, there is no region in all the world so full of vivid colour, of populous eitles, of buildings designed by master architects, of bygone days, of diverse rices, of absorbing subjects for study and observation such as the eustoms, religions, philosophy and art of one of the oldest civilisations

To the true lover of nature, the betanist and the naturalist, India can offer every charm in forest, mountain, valley, cultivated plain,

To the sportsman it can turnish sport such and wander awhile ab ut the g rdens where as few somatries can give th titer in the you will find exquaste gilmps s of snowy forest the great unsheer in many livers the structures so light and graceful that they seem will sipe in the sheels the tong will do rest on a of showard curpol and climbin duck the sightin pl, and many another kind campanile. 3

in which are introduced verses from the Konar i hosts have passed into India to disturb the In the main courtyard stands the famous pillar of solid wrought iron devoid of rust and dating back to about 400 A D Visitors to Delhi should not miss seeing the Kutab for it is unique in India

New Delhi, the eighth city of Delhi, is worthly to rank with its seven predecessors, Kutab, Siri, Tughlakabad, Jahanabad, Firozabad, Purana Qila and Shahjahanabad, the presentday Delhi Here you find an example of town planning carried out by some of the leading architects and engineers in the world on a site where they could start with a free hand

If you decide to take the route northwards from Bombay via Rajputana, then you will be a side of sec another but equally interesting side of India Rajputana, the land of chivalry, attracts the visitor as few places do Alone at Udaipur is there, in its perfection, the fairy palace of one s childhood, just such a long cataract of marble terraces and halls falling into the waters of a mountain encircled lake, is the illustrator of an Andrew Lang fairy book delights to draw

Mount Abu, the Rapput Olympus, combines the delights of a hill station with one of the historic homes of the gods. The Dilwara Temples, the masterpiece of Jain architecture, contain some of the finest carvings in India Forests of marble columns, carved and polished till they resemble Chinese ivories, are linked by flying arches that twist and twine from pillar to pillar like exquisite creepers, softening outlines and producing the effect of a symphony of graceful movement

Northwards from Delhi is the Punjab and the North West Frontier Province whence most of the recruits for the Indian Army come Here you will find Amritsar, the home of the Sikhs, Lahore, one of the most ancient and famous eities of India, the Khyber Pass, the historic gateway into India from the North, the flourishing cities of the Canal Colonies which have risen up since British Engineers have harnessed the waters of the Punjab the Land of the Five Rivers' which formerly ran to waste and many another Through the Punjabaiso you will travel to reach Kashmir, famous since the days of the Moghul Emperors

The gloty of Amritsar is the Darbar Sainb he Goldon Temple) The payements of The pavements of the sacred tank are all of marble from Jaipur and the tank itself contains a sheet of water 510 feet square in the midst approached by a marble causeway, riscs the Golden Temple, nearly cubical in form and decorated with wonderful richness

Lahore grew in importance with the dawn of Moghul supremacy when Babar, the founder of that dynasty, made it a place of Royal Residence, reminiscences of which are to be found to-day in the pleasure gardens, tombs, mosques and pavilions of Moghul architectural beauty which have won undying fame for that dynasty here and elsewhere in India

Khyber Pass, the great natural highway into India through the almost impregnable mountain barrier of the North-West Frontier, is rich in historical association and has from time

peace of her people and continually after their destiny It is still the great trading route between India and the Central Asian States On Tucsdays and Fridays when the continual string of caravans of great shaggy camels laden merchandise, accompanied by stern, strong and pieturesquely dressed men with their women and children from Central Asia are moving to and from Afghanistan, the pass presents a most interesting and unique sight

Kashmir, described by poets as "an emerald set in pearls" is a land of rich forests and upland pastures, of slow flowing rivers and glittering mountain torrents, ringed with an almost unbroken girdle of mountain snow capped all the year. capped all the year If you can imagine Venice set in the heart of Switzerland, that is Srinagar, the capital of Kashmir Life is good as you glide along the face of the lakes in a houseboat when the lotus flower is out and the banks are one mass of colour with the snow expect mountains in the background When days are warm on the lakes, a trip can be made up the valleys and you can live in Arcady and see the bear in his native haunts and the mountain does on the hill-tops

For those who have arrived at Delhl via Bombay an interesting return trip can be made via Benares and Calcutta Many visitors, however, enter India via Calcutta and from here also many interesting tours can be made

Calcutta, one of the first trading ports of the British East India Company in India, was founded by Job Charnock, it is now the second largest city in the Empire Its public bulldings, the Indian museum, the Fort, the Jain Temple, the Hindu bathing ghats along the river front, the Hindu shrines par tacularly the 'Kali Temple' are all worthy of attention attention

Before winding your way towards Dellu, trips should be made to Darjeeling and to Puri The ambition of every visitor to Darjeeling is to see Mount Everest, the world's highest peak, and, in order to do so they must travel some 7 miles away, past Ghoom station to Tigor's Hill (8,514 ft) as from Darjeeling the mountain is not visible. The best time to see sunrise on Mount Everest is in the carly Spring or late Autumn Then at the end you will find 2 view unequalled in any other part of the world Twelvo peaks over 20,000 feet with the awe inspiring Kanehanjungha in the centre are spread out before you

Darjeeling is one of the meest hill stations in India and is unequalled for its snow view-From any where in the town you see the ave inspiring Kanchanjungha The sheer grandeur of the Kunchanjungha snows give Darjeeling a high place in the list of hill stations

Puri also is an easy run from Calcutta There in front of the gate of the temple is the famous black marble pillar, one of the most beautifuliv worked things in India with a tiny figure of the Dawn on its capitol Incongruous as it may seem, in Puri all caste vanishes The significance of this can be understood only by those who know India Once a year the image of immemorial been the route by which conquering | Krishna is carried in procession upon the

do better than visit Mysore Elephants range throughout the southern forests and from time to time keddali operations are undertaken when wild elephants are captured in stockades. Tigers, leopards and bears are numerous and bison are found in certain forests. The famous Gersoppa Falls present one of the most beautiful sights of wild untarnished nature to be found in India. Many of the temples contain examples of the finest carving, and Seringapatam famous as the capital of Tippu Sultan and about nine miles from Mysore is well worth a visit. For those who are travelling from Bombay to Colombo an interesting trip can be arranged via Mysore.

At Madura and Trichinopoly will be found examples of some of the best and most interesting work in South India

Madura has been aptly described by European scholars as the "Athens of South India" and from time immemorial has been the abode of South Indian culture in all its aspects

It contains one of the finest and largest temples in South India and unlike many other temples the tourist is allowed to wander without restrictions over most of it. Near Shiva's shrine and in the hall (Mandapam as it is called in the Vernicular and Sanshrit) of a Thousand Pillars can be seen some of the finest carving in stone in all the world. The workmanship is so fine, the cluseling so delicate that one is lost in silent admiration as one looks at the representations of the Hindu Pantheon and at the graceful figures of men, women and animals

Trichinopoly is noted for its rock temple and about three miles away is Srirangam with its famous temple which is claimed as the earthly abode of Vishnu the Lord of Creation

Travancore, the most beautiful and fertile region in all southern India has many charms to offer the traveller within its domains. It has scenery ranging from a countryside of lakes, creeks and canals, to low hills, undulating land, rice fields and forests of cocoanut and arecapalms, with a heavy undergrowth of pepper vines and tapioca. The dominant note in Travancore is one of luxuriance in vegetation. It has a wonderful highland zone with mountains touching heights of from 5,000 feet to over 8,000 feet, and hills covered with the densest of virgin jungle, the home of great herds of wild elephants and blson, tiger, bear, black panther and wild boar, and where hes the lovely Perivar and see wild life in its natural habitat.

Irivandrum, the capital, is also accessible by well-kept roads from British India, and is connected by air with Bombay, Madras and Colombo, except during the monsoon

About seven miles south of Trivandrum Kovalam, a pleasant seaside resort with go facilities for bathing Cape Comorin, t Land's End of India, is the southernme foint of Travancore, where the sunrise and sums are magnificent sights. It is a sacred spot Hindus and a place of pilgrimage as the reput abode of Kanyakumari, the virgin Goddess whom the temple there is dedicated.

North of Trivandrum is the ancient town Quilon and to the north of this, a pleasant tr by boat along delightful backwaters or by c along a good motor road, is the busy seapo of Alleppey

No one visiting India should miss the opporti nity of seeing Burma for it is a country extraordinary charm, a country of contrast Whatever be your hobby, whatever be your n terest, be it sport, history, ethnology or botin or should you be merely fond of beautif scenery you will find a greater variety in Burn than in probably any other country can see huge snowy ranges and alps spangle with rhododendrons and flowers unknown t science You can find magnificent jungle almost impenetrable to man, bordering rushir the plans Should you be adventurous an seck the wilder regions, you will find great gaps in the frontier unvisited by civilised me and peopled by head hunters, Chins, Naga and the flerce Black Lisu Yct you will als find civilisation in the big eities like Rangoo and Maymyo Rangoon, the capital, is c special interest in that it possesses the famou Shwe Dagon Pagoda, the Sacred Golden Pagod visited by more pilgrims than any other Buddhis Temple in Indo China

This short account of India is not intended to be comprehensive and does not even mentiomany of the interesting places to be visited but it is hoped that it will give some indication of the wonderful page-intry, the magnificen buildings of an older age, the sport, and the many things of interest which India and India.

alone ean offer
Dueember, January and February are the most pleasant months for a visit to India. The days are pleasantly cool and except on the seaboald the nights are cold. India speaking broadly has no winter except in the far north. It is a land of sunshine and colour. But the traveller arriving before November, or strying in the country beyond the month of Marchaust expect to find the tropical sun asserting its sway unless he wends his way to fair Kashmi or to one of the hill stations of India, Similar the summer capital of India, Darjeeling the delightful or one of the many others situate among the hills of India.

about 65 inches, a major portion falling in the during their stay at the station months of October, November and December Pleasant showers are experienced during April, May and June, the season months and help to keep the station dust-free for parties and picnics Neither hot nor cold, Kodarkanal ever accords a warm welcome to every visitor seeking a holiday, a haven of ease and comfort to recoup and rejuvenate, free from the heat of the plains Kodaikanal is the delight of the gardener Flowers bloom all the year round

Water-Supply —The town enjoys the benefit of an excellent water-supply from the Pambar stream which was dammed and converted into a Within the last thirty years, reservolr in 1914 there was not a single occasion on which the water was found to be chemically or bacteriolo-This is mainly due to the fact that the entire catchment area comprising 500 acres has been properly enclosed

Amendies —Kodaikanal affords a variety of exhibitanting amusements to the tired visitor The lake is the chief attraction and is skirted by a three-mile road which provides excellent walks Overlooking the lake are the several residences The excellent golf course is popular during the season The many waterfails make for ideal picme resorts The "Fairy-fails" just below the Observatory, "Silver Cascades" on the Law, Ghat Road, "Bear Shola Falls" extremely pretty and a good place for picmes and "Glon Falls" on the way to Vilpatti, are some of the propular alghts. popular sights

Coaler's Walk (so named after a Lleutenant who was on duty in the district from 1870 to 1872) is a semi circular footpath, by the side of the English Church, which runs along the southern brink overlooking the plains. The view from here is considered by many as unrivalled. On Coaler's Walk the visitor is alone. with nature in its varied profusion Away in the hazy distance lies the ancient city of Madura as at Coonoor or Ootacamund, but the natural and on the right the rugged face of the cliff known surroundings are even more beautiful, and to as the Dolphins Nose

"The Pillar Rocks" arc three masses of gramte, some 400 feet high, which stand on the edge of the same side of the plateau as Coaker's walk but about three miles farther on They The Kulu Valley (Valley of the Gods, so are reached by a fine road which runs through named because of each little Hamiet having its beautiful scenery well wooded with processor beautiful scenery, well wooded with pines and eucalyptus and form a favourite rendezvous for picnic parties Between and below them are several caves and chasms into which the more adventurous can descend

Solar Observatory.—Crowning the heights of the Palni Hills, and 850 feet higher than the lake is the Government Solar Observatory surrounded by beautiful fir plantations

Sport —The adventurous can find big gama within a few mlies of Kodaikanal is not popular on the hills for lack of facilities Hiking finds many votaries The station is well equipped with the ordinary amenities of life

Kodaikanal Club is open to visitors are also the Boat Club, an Indian Club and a Hotels and travellers' bungalows Ladies Club are available The Municipal authorities pub | Trom Pathankot to Manail, a distance of lish annually a list of bungalows available about 198 miles, the road is through well rooded

The station has a mean annual rainfall of for renting and are willing to help visito

For those in quest of real rest, tonic air ar the company of serene nature there is no bett place in India than this lovely hill station

The latest addition to the roads on the hil is the Goselien Road popularly known as the "Forty-Miles-Round" leaving the municipal teaching the municipal teaching the municipal teaching the municipal teaching the state of the control of the contr limits at Pillar Rocks to the Berijam lake an thence to Mannavanur and back to Kodaikana The Scenery throughout is of pleasing downs l contrast to the wooded areas in the vicinity of Kodaikanal

The South Indian Railway has opened a: Out Agency on the hills for through booking and transport of all descriptions of traffic between Kodarkanal Road station and the hills cum Road tickets to the Out Agency are issued from and to all stations in India and Ceylon A regular bus service connects all important trains at Kodaikanal Road station Picasure cars can also be obtained on previous notice at about Rs 20 for each trip

KOTAGIRI.

It is about 14 miles from Coonoor and 18 miles from Ootacamund Motor buses run from Coonoor railway station dally in connection with the Mail trains and the road journey does not occupy more than an hour The bus fare not occupy more than an hour is about ten to twelve annas per passenger for a single journey Cars are also available at about Rs 7 per trip or Rs 10 to and fro

Kotagirl stands, similar to Coonoor, on the lower ridge of the main plateau, but 500 feet higher than Coonoor and 800 feet below Ootaca mund Ooty, it thus enjoys a climate half way between that of Coonoor and Ootacamund—the mean day temperature being 62 degrees. It is also visited by the north cast monsoon and its rainfall is identical with that of Coonoor

There are not naturally the same facilities those who seek rest and seclusion in a mild form it is an ideal resort

Hotel —Blue Mountain

KULU VALLEY.

own dcity) is situated north of Simla and east of Kangra Thero is a fairly good motor road from Pathankot via Baljnath Paproia and on via Mandi through the Kulu Valley to Manaii, where the road terminates and only a track is then available over the Rohtang Pass (13,500 ft) to Lahoul, thence to Leh and Ladhak

From Pathankot to Baijnath Paproia there is also a small mountain railway running a long pull and a strong pull from the lake bund daily service, but the connection for passengers though only two miles in distance proceeding via Amritsar is not very satisfactory proceeding tra Amritsar is not very satisfactory at the present time as the service is Inter and 3rd class only It is cheaper and quickers to travel from Pathankot by bus—the fare Pathan kot-Baijnath Paprola is less than Rs 4 per person

No other motorable roads into Kulu are available but the journey could be made by trekking from Simia and a few other centres

From Pathankot to Manail, a distance of

way nearby ...The Valley is open the whole year and having a fairly temperate climate it can be vited at any time. SIMLA.

The summer headquarters of the Government of India (Central Government) and the Government of the Punjab, the General Headquarters and the Royal Navy, is situated on several small spurs of the lower Himalayas at a mean elevation of 7,100 feet above sea level The Governor-General and C -in C are in residence in Simla from May to October every year

From the beginning of October to about the as fir as Narkunda middle of December, Simla enjoys the best lovely

For those who prefer a more luxuriou cleetric head works at Pykara is within 18 miles mode of travel, rail motors are run by the rai of Ootacamund and is worth a visit way and en route the seenery is superb wit Ootacamund is the administrative centre of the District and the seat of the Government of Phododendron At Kalka motor cars are axal able for those who would prefer to travel b road and the journey is completed within 3

There are several excellent hotels in Simla the Cecil, Corstorphans, Clarkes, Grand and fo orthodox Indians, Hindu, Muslim and Royal In Mashobra, 7 miles out of Simla, there are the Gables and Wild Flower Hotels Boarding houses are in the minority, the best known is Talbot House The YWCA and the YMCA hostels are open for the greater portion of the year

The climate of Simla may be divided into four seasons of about three months each starter beginning with January, rough, snowy stormy and raw The second dry and sunny with gradually increasing dust and heat The third rainy, damp and relaxing The fourth bright, eleri and bracing In May and June the average maximum temperature is about 73 degrees. In January and February the average minimum temperature is about 36 degrees.

There is a very good road into the interior and hikers to Narkunda, Kotgarh and Rampur Bushahr are lodged in rest houses that line the From Simla there are 2 routes to Mus soone a distance of 145 miles and little difficulty is experienced for accommodation en route, permission to occupy Dak bungalows and Forest Rest Houses must be obtained from the officials concerned

There are also direct routes to Tibbet, Srinagar, (Kashmir) and Dalhousic, and motor vehicles are permitted to ply by the Municipality on a pass The secnery en route is

CLIMBING IN THE HIMALAYAS.

Owing to their immensity and the time and and K2, both about 28,150 ft, though which cost involved in undertaking expeditions into is the higher of the two is not certain the Himalayas a great deal of mountaineering and exploration remains to be done in the world's Himalayas began some eighty years ago when highest mountain range. There are over fifty surveyors crossed high passes and scaled peaksummits of 25,000 ft and of these only two, Kamet (25,447 ft) and Nanda Devi (25,660 ft) pioneers must be mentioned the Schlagintwell have been scaled, whilst there are innumerated by the state of the scale of the schlagintwell have been scaled, whilst there are innumerated by the scale of have been sealed, whilst there are innumerable lesser summits of such formidable difficulty, owing to the comparatively recent geological formation of the range, that judged by modern mountaineering standards the majority are inaccessible. The highest pical is Mount Everest, which by latest measurements is 29,141 ft. Next come Kanchenjunga product by pioneers must be mentioned the Seniaghus of a bothers, who in 1855 reached a height of 22,329 ft on the Eastern Ibl Gamin, one of the Survey of Kamet, whilst I Survey of India set up plane table at 22,040 ft is the same district plane table at 22,040 ft is the same district plane table at 29,040 ft is the same district plane table at 29,040 ft is the same district plane table at 29,040 ft is the same district plane table at 29,040 ft is the same district plane table at 29,040 ft is the same district plane table at 29,040 ft is the same district plane table at 29,040 ft is the same district plane table at 29,040 ft is the same district plane table at 28,040 ft is the same d

proceeded to its main task

Camp I was established Thenceforward the expedition was dogged by exceptionally bad pre monsoon weather which greatly hindered the establishment of camps and made the ascent to the North Col 23,000 ft prolonged and arduous work Camp IV, 22,800 ft was not established until the middle of May after a 40 feet ice wall on the North Col slopes had been climbed The expedition was equipped with wireless which enabled weather reports to be received from the meteorological anthoritles One installation was at Darjeeling, one at the base camp and a third at Camp III, 21,000 ft Camp III was linked to the North Col by field telephone so that messages could be received up to 23,000 ft from the plains of India in a short space of time

Owing to a series of blizzards and high winds Camp V was not established until May 22nd But it was pitched at 25,500 ft several hundred feet higher than previously The party was then cut off for three days by a furious blizzard and exventually had to retreat to Camp IV. The Camp was re established on May 28th and on May 29th Wyn Harris, L Wager and J L Longland continued the ascent and finally pitched Camp VI at 27,400 ft, 600 ft higher than in 1924, after a magnificent effort on the part of the porters Longland then brought the porters down but had a terrible time in a blizzard and only by exercising great mountaineering skill steered them down to Camp V The following morning Wyn Harris and Wager made a reconnaissance of the route to the summit and failing to discover a route along the crest of the north east ridge finally followed the same route as Norton in 1924 They were stopped by dangerous conditions at 28,100 ft and returned to Camp VI where they met Shipton and Smythe who had come up from Camp V, after which they descended to Camp V The following morning Shipton and Smythe were unable to leave Camp VI owing to a high wind but on June 1st they made their attempt on the summit

An hour and a half after leaving the Camp Shipton had to return owing to some internal trouble. Smythe carried on alone and reached approximately the same point as Wyn Harris and Wager before he was forced to retreat owing to the deep powdery snow resting on the steep slabs. Shipton descended to Camp V the same day in very bad weather and Smythe spent a third night at Camp VI descending to Camp IV next day in a blizzard. Owing to frostbites, strained hearts, and high altitude deterioration the party had to retire to the base camp. A week later they returned to Camp III to make another attempt. Owing, however, to the breaking of the monsoon this had to be abandoned and the expedition returned to Darjeeling.

An extraordinary attempt to climb Everest was made in 1934 by Maurice Wilson, a young airman Having penetrated Tibet in disguise he marched to Everest and with a few porters went on in reaching 21,000 feet He then succeeded alone and nothing more was heard of him, until his body was discovered near the site of Camp III, 21,000 feet, by Mr C E Shipton's party in 1935.

The 1933 expedition established its base in the Rongbuk Valley on April 17th and on April permission for a further attempt to take place 21st Camp I was established Thenceforward from June 1935 to June 1936 inclusive

As there was no time to organise an attempt on the summit it was decided to send out a small party under the leadership of Mr E E Shipton This had as its objects Collection of data as to monsoon snow and weather conditions, ex amination of alternative routes from the west, the trying out of new men for the summit attempt, physiological observations, a sterio photogrammetric survey, examination of ice formations on the North Col

This expedition proved that Everest cannot be ascended during the monsoon and that the only hope of an ascent is during the period immediately before the monsoon

Conditions during the monsoon are extremely dangerous and the party had a narrow escap from an enormous avalanche that fell from the slopes of the North Col

During the course of this reconnaissance two dozen peaks over 20,000 feet high were ascended

The 1936 expedition was led by Mr Hugh Ruttledge and included three of the 1933 climbers Messrs Shipton, Smythe and Wyn Harris, and one of the 1933 Signals Officers Lieut Smith It encountered exceptionally bad Windham weather and unusual conditions Before the monsoon, snowstorms rendered the mountain unclimbable and the usual pre-monsoon northwest wind was lacking to clear the snow away However, Camp IV on the North Col was established to schedule and the party were in position to attack the summit when the weather broke and two feet of snow forced them to retreat down the dangerous slopes of the North Col To cap their discomfiture the monsoon arrived on the exceptionally early date of May 24th Two attempts were made to re open the route to the North Col but on both occasions the party were in great danger and the attempt had to be abandoned when Shipton and Wyn Harris were carried down by an avalanche and nearly lost their lives Subsequently reconnaissance parties ascended the main Rongbuk glacier and examined the west side of the North Col which, in spite of Mallory's unfavourable verdict, was found to be not only practi le but less found to be not only practi dangerous in monsoon conditions than the east

The 1938 expedition consisted of seven climbers, H W Tilman, E E Shipton, F S Smythe, N E Odell, Dr C B M Warren, P Lloyd and Capt P R Oliver and was led by Mr Tilman It was considerably smaller than previous expeditions owing to economic reasons and because experience has shown that the small light expedition has as good and perhaps better chance of achieving its object than a large cumbersome expedition rendered comparatively immobile by its transport and tied down to a fixed plan Though the expedition falled to reach the summit of Mount Everest it fully justified these beliefs and cost only £2,500 as against the £10,000 or more of previous Everest expeditions

The expedition reached Rongbul on April 6th and established Camp 3 on April 26th Wind and cold made further advance impossible

and the party descended to the Kharta valley Several determined attempts to reach the for a rest and to recuprent from influents summit of the mountain in August were bounds chills and sore throats. They returned in the in an end by the break up of the weather middle of May during the commencement of the before they attained success. monsoon which broke on the nuprecedented date of May 5th one month to its weeks easier that named. The rote up the North Col was to ced in dangerous monw conditions and the party in the Market with an even stronger in dangerous sensor conditions and the party perty which sudded annually desired to the stated with an even stronger perty which added annual the state of the date of the state of the state of the date of the state of t monsoon which broke on the nuprecedented dato day an attempt wee made to reach the summit Couditions however proved impossible nwing to deep monsoon snow and the party was to ced to retreat after resching a height of 7300 ft. A further attempt by Tilman end Lloyd on June 11th m t with no more success and the expedition had to be ahandoned

broke The p rty retreated but owing to the storm and ill equipped camps retreat became a route during which no few r than nine lives wer lost Herren Merki Welz nbach and Wie land and six Darjeeling porters—men who bad accompanied the 1933 Everest Expedition

A further G rman attempt to elimb Nanga Parbat w a made in 1938 under the leadership of Dr Faul B uer Durig the second half of July th partys ec eding in reachi ga height of or 123 000 ft hat were fr act to retreat by

discovery of the route to the Nanda Devi basin ed by bad weather They also explored an Anglo-American party, the leader of which was Mr H W Tilman, successfully scaled Nanda Devi via its south west ridge, Messrs H W of the Survey of India In addition, Mr Smythe Devi via its south west ridge, Messrs H W Tilman and N E Odell being the chimbers to reach the summit This expedition was remarkable in that owing to the siekness of the porters the climbers had to carry their own camps up the mountain. This is the finest and most difficult peak yet elimbed in the Hlmalayas

In 1939 the first Polish expedition to visit the Himalayas succeeded in making the ascent of the East Peak of Nanda Devi Unfortunately an accident led to the death of M. M. A. Karpinski and S. Bernadzikiewicz on Trisul above the Milam Glacier

Lt Col C F Stochr, RE, and Lt D M Burn, RE, lost their lives on 12th August 1932, while chimbing on Panjtarni, near Pahlgam ln Kashmir

In 1935 an attempt to scale Peak 3,625,400 feet, in the western Karakorams, was made by Lieut J Waller, Lieut J Hunt, Dr J S Carslaw and W R Brotherhood, RAF A series of bliz zards were experienced but the party reached a height estimated as 24,500 feet. There is no great difficulty between this point and the summit

In the Autumn of 1935 the summit of Kabru was reached by Mr C R Cooke who was accompanied to the foot of the final rocks by Mr G Schoberth who was forced to give up owing to a high altitude, cough and the risk of frostbite This ascent was made on November 18th, an unusually late date and is of great interest as proving that high Himalayan peaks can be elimbed in early winter at least

The 1936 French expedition to the Karakorams, like the Everest expedition, encountered very bad weather and accomplished little

After Nanda Devithe most remarkable ascent of 1936 was that of Smiolchu, a peak once designated as the "embodiment of Inaccessibiin the Kanchenjunga range This was made by a small German party under the leader ship of Herr Paul Bauer Simolchu is one of the most beautiful peaks in the Himaliyas

In 1939, a party of Munich mountaineers, consisting of Herren Grob, Paldar and Schmaderer, made the first ascent of the Tent Peak in the Kangchenjunga range and attempted the Twins Peak but were defeated by bad weather

Other ascents in Sikkim were made by Mr Marco Pallis's party who attempted Simvu unsuccessfully and by Mr C R Cooke and Mr F Spencer Chapman who ascended several peaks of over 20,000 feet including the Fluted Peak

During the summer of 1937 a number of peaks were climbed, the most notable being Chomolhari 23,997 ft by Mr F Spencer Chapman with one porter, and the Mana Peak 23,860 ft by Captain P B Oliver and Mr F S Smythe The latter completing the control of the completing the control of the control of the completing the control of the control o on Nilkanta and Dunagiri which were frustrat-lassistant Surveyor-General

with three Tibetan porters climbed seven peaks of the Zaskar Range among them the very difficult peak of Nilgiri Parbat, 21,264 ft During this expedition Mr Smythe came upor some remarkable tracks in the snow which the Tibetan porters believed were made by a Mirks or Abominable Snow Man These tracks were afterwards identified as bear tracks by the Natural History authorities in London It is believed that there is now enough evidence to explain this strange legend of the Himalayas

Garhwal was visited in 1939 by a Swiss expedition led by M. Andre Roch and two fine peaks were sealed, Dunagirl and the Wedge Peak

In 1938 Mr C S Houston led an expedition to the Karakoram during the course of which a bold and determined attempt was made to climb K2, 28,150 ft After failure to obtain a footing on the N W ridge, the party, which included several veteran Sherpa porters, ascended the N E ridge to a height of 26,000 ft

A further attempt on K2 was made by an American party in 1939 but ended in disaster, Mr Dudley Wolfe, and three Sherpa porters losing their lives in stormy weather high up the mountain

Another expedition to the Karakorams was that undertaken by Capt J B Harrison, Lieut J O M Roberts, Mr R A Hodgkin, Dr T Graham Brown and Lleut J Walier together with Dr G A J Tcasdalo and Dr Elizabeth Teasdale The principal objective was Masherbrum, 25,660 ft After establishing Camp 7 at 24,600 ft Harrison and Hodgkin reached a height of about 25,000 ft before being forced to retreat by bad weather In descending to Camp 6 they were overtaken by a blizzard and forced to spend a night in the open as the result of which they were serlously frostbitten The devotion of the Sherpa porters prevented a more serious disaster

exploration of the Badrinath, Further Kedarnath ranges at the sources of the Ganges as well as various ascents was made by a German expedition under the leadership of Dr R Schwarzgruber in the autumn of 1938

The Survey of India are now very active and much work has been accomplished during the re-survey of Garhwal and Kumaon under the direction of Major Gordon Osmaston, whilst several thousand square miles of country have been mapped by Messrs Shipton and Tilman during their expeditions to the Shaksgam in 1937 by Mr. Shipton during this expedition to the 1937 by Mr Shipton during his expedition to the Karakoram in 1939

The Himalayan Club was founded on 17th February 1928, at New Delhi with the object of Spencer Chapman with one porter, and the mana Peak 23,860 ft by Captain P B Oliver and Mr F S Smythe The latter completing the ascent alone as Capt Oliver was insufficiently acclimatised Three other peaks of 21 400 ft, the late Sir Geoffrey Corbett, Secretary 21,500 ft and 22,481 ft were also climbed by Messrs Oliver and Smythe and attempts made India, and to Major Kenneth Mason, M C, R E, on Nilkanta and Dunagiri which were frustrat-

Freemasonry in India

In 1728 a dispensation was granted by the Gr nd Lodge of England to Geo Comfret authorising him to open a new Lodge in Ben gal Gf bis personag nothing further is known butunder C pt Farwinter who in the following year succeeded him as Freynorial Grand Master of India a Lodge was cetablished in 1730 which in the Eugraved Lisia is distinguished by the arms of the East India Company and is described as No 72 at Bengal in the East Indes
The next Pro inclai Grand Masters were James
Dawson and Zeeb Gee who h id office in 1740
after whom came the Hon Roger Drake appointed 10th April 1755 The lest named was
Governor of Galentia at the time of the attack m de on the actilement by Surajah Dowl h in 1755 Drake missed the horror of the Black Hole by escaping and was accused of deserting his poet int though present at the rotaking of Calcutta by Admiral Watson and Citye it is im settlement

The minutes of the Grand Lodge inform na that William Markett Provi cial Grand Master that William Maskett Provi cial Grand Master of Calcutta was present at the meeting of that body November 17 1700 and we learn on the same anthority that at the request of the Lodges in the East Indica Cullia Emith was pointed P G M in 1762 At this period it weather cases in the Calcut master of the Provincial to cleet the Provincial Grand Muster an ually by the majority of the Grand Muster an ually by the majority of the rotes of the members present from amongst those who pasted through the different offices at the [Prov] Grand Lodge and who had served as Dep Prov Grand Lodge and who had served as soon as notified to the Grand Lodge of Engtend was onnimed by the Grand Master without its being thought an intrinsement of without its being thought an intrinsienten on the precogative in second cance with this practice. Samm! , Madras - The earliest Lodge in Southern | India 180 °2) was established in Madras in 1752. Three others were also established about 1765.
In 1767 Capt Edmund Pascal was an Three others were also established about 1765 10, 1767 Capt Edmund Paccal was ap pointed? O ht for Madras and its Dependencies and in the following year another Lodge was established at Fort 2t George In 1768 the Athol (or Ancienia) invaded thi District and in Athol (or Ancienia) invaded the District and in 1781 established a Provincial Grand Lodge and both these Provincial Grand Rodles continued outs these Provincial Grand Rodles continued working peaceably side by side nutil the Union Indeed though not generally known these two Grand Bodies made an attempt at coalition long Grand Bodies made an attempt at common long before any such movement was made by their parent bodies the Grand Lodge of England and the Ancient Grand Lodge and Malden in his History of Freemasonry in Madras states that lo a great measure they anceeded At the Unico is 2813 at the bodies in Madras grave their allestance to the United Grand Lodge One event probable that he remmed the duties of his worthy of note was the initiation in 1774 at masonic Messatier the calamity that befell the Trichinopoly of the eldest son of the Nawab of Arcot, Umd t-nl Umra who in his teply to the congratulations of the Grand Lodge of England stated he considered the title of English Mason a one of the most h nourable that he possessed This domment is now stored in the archives of the United Grand Lodge

> Bombny —Two Lodges were established in this Presidency during the 18th century Nos 234 at Bomb y in 1758 and 559 in Surat in 1798 both of which were earlied on the II is, notif the Union when they disappeared A Provincial Grand Master J mes Todd was appointed but there is no record that he excited his functions and his name drops out of the Freemanns Calendar in 1709 1n 1801 an Ath 1 Varrant was granted (No 22 to the 78th floor which was engaged in the Masterla, Wat under 8if Arthur, Weilesley In 1818 Lord Morta was changed in the Masterla Wat under 8if Arthur, Weilesley In 1818 Lord Morta was consended and the Masterla Wat of the Masterla Wat of the Masterla Wat of the Masterla Wat of the Masterla Wat of the Masterla Wat of the Masterla Wat of the Masterla Wat of the Masterla Wat of the Masterla Wat of the Masterla Wat of the Masterla Wat of the Masterla Wat of the Masterla Wat of the Masterla Wat of the Masterla Wat of the Masterla Wat of the Wat of the Masterla Wat of the Masterla Wat of the Masterla Wat of the Masterla Wat of the Masterla Wat of the Masterla Wat of the Masterla Wat of the Masterla Wat of the Masterla Wat of the Masterla Wat of the Masterla Wat of the Masterla Wat of the Masterla Wat of the Wat of the Masterla Wat of the Wa both of which were carried on the il ta until the there and also to grant a dispersation for holding a Provinct I Grand Lodge for the purpose of making the Hon Mountstuart a Mason h having our essed a wish to that effect. The Petitions

In 18 3a Military Lodge G lon in the We t was formed in the Domb y Artillery and in telled at Poona a No 15 of th Coast of Coromandel outlined working nutil 179 when it reseques years however have been successful on only two Lodges much to the distillation in seems from the season of the distillation of the seems from Lane at second that in 1830 it was substant to the season of the sea of "Orion' secoded and formed the "Lodge now bears No 338 on the Register of Scotland 20s of annot ta orla " ago t

in the secession of some of its members who year 1818 when a Lodge of George No 549 on the obtained a warrant, on the recommendation of the Parent Lodge from the Grand Lodge of England
Two years later it was discovered that no notil
fication of the existence of "Orion-in-the West"
had reached England, nor had any fees been
received, although these including quarterages
had been paid into the Provincial Grand Lodge,
Coverned to the result of Western India," at Bombay for the admission of Indian gentlemen
that been paid into the Provincial Grand Lodge,
Coverned to the result of which is seen at the present day
Thus the seed planted of Trabinocolum 1774 Coast of Coromandel 1t was further ascertained that in granting a warrant for a Bombay Lodge by the initiation of Umdat-ul-Umra has borne the Provincial Grand Master of Coromandel fruit resulting in the initiation of thousands of had exceeded his powers Ultimately a new Indian gontlemen of all eastes and creeds, and warrant No 598 was granted as already stated in 1833 Lodge "Perseverance" was started in Bombay No 818 in 1828 Up to this time the jurisdiction of the Grand Lodge of England in India had not been invaded, but in 1836 Dr James Burnes was appointed by the Grand Lodge of Scotiand P G M of Western India and its Dependencies No Provincial Grand Lodge No Provincial Dependencies Grand Lodge however was formed until 1st January 1838 A ed Grand Lodge of England, the Grand Lodge of second Scottish Province of Eastern India was Ireland and the Grand Lodge of Sectiand hold started which on the retirement of the Marquis of jurisdiction in India By far the largest is the Tweedale was absorbed within the jurisdiction first, the next largest is the third and the number of Dr Burnes, who in 1846 heeame Provincial of Lodges under Ireland is as yet small The Grand Master for all India (including Aden) but with the proviso, that this appointment was not Five District Grand Masters independent of each to act in restraint of any future snb-division of the Presidencies Burnes may be best described as being in 1836 in ecclesiastical phrase as a Provincial Grand Master "in partibus infidelium" for whatever Lodges then existed throughout the length and breadth of India were strangers to Scottish Masonry But the times were pro-pitious There was no English Provincial Grand Lodge in Bombay and the Chevaller Burnes, whom nature had endowed with all the qualities requisite for Masonio Administration, soon got 36 to work and presented such attractions to Scottish Freemasonry that the strange sight was witnessed of English Masons deserting their mother Lodges, to such an extent that these fell into abevance, in order to give support to Lodges 34 newly constituted under the Grand Lodge of Scotland In one case, indeed, a Lodge "Per-severance" under England went over bodily to Scotland, with its name, jewels furniture, and belongings, and the charge was accepted by

crace of its existence in 1020 the civilan element 1 Scotiand 1 ms Longe still exists in Bompay and From this period, therefore, Scottish Masonry Here 'Orion' unrecognized at home, aided flourished, and English Masonry declined until the Rulls of the Grand Lodge of England was again the result of which is seen at the present day Thus the seed planted at Trichinopoly in 1774 which has gone far to establishing that mutual trust between West and East a distinguishing, or Speculative Freemasonry eharaeteristle A Provincial Grand Lodge was re established in Bombay in 1860, and converted into a District Grant Lodge in 1861

The Grand Lodge of England—All three Constitutions of the United Kingdom, the United Grand Lodge of England, the Grand Lodge of Five District Grand Masters independent of each other and directly subordinate to the Grand Master of England by whom they are appointed Bengal

Scientific Surveys

Zoological Survey of India—it was systematic collections since 1814 Organised the line of

are to Investigate the fauna of India, to maintain the National Zoological collections of India and to arrange and preserve the Zoological and Anthropological galleries of the Indian Museum In addition the Survey issues two series of publications upon Zoological research, namely The Records and Memoirs of the Indian Museum and an Anthropological work entitled "Anthropological Bulletins from The Zoological Survey of India" The leadquarters of the Survey are at present temporarily located at Benares Cantt

Botanical Survey -The Botanical Survey department of the Government of India was The Superinunder the control of a Director tendent of the Royal Botanie Garden, Calcutta was ex officio Director The Director having retired sinco December 3, 1939, the Department The duties is awaiting some reorganisation of the Director are distributed amongst (1)
Dr K P Biswas, MA, DSe (Edin), FRSE,
Superintendent, Royal Botanie Garden, Calcutta, (11) S C Sen, BSe (Cal), BA
(Cantab), AMI Chem E, Superintendent,
Cinchona Bengai and Principal Quinne Officer
of the Government of India and (11) the Government of India, and (111) S N Bai, M Sc, Ph C, Curator, Industrial Section, Indian Museum There is a staff There is a staff at headquarters of one officer for systematic work and at the Indian Museum a Curator who is engaged in the development and maintenance of the Industrial Section The Director held administrative charge of the Government of India's einehona distribution in India

The existence of the Botanical Survey, like that of the Geological Survey, has both a cul tural and an economic justification On general grounds K is obvious that a progressive Government should acquaint itself with the vegetable resources of the area it administers, and although apart from the cinchona operations, the activities of the Survey cannot be said to have much immediate economic applicability—consisting as they do of investigations and researches into the systematies, limnology, distribution of plants, ecology and economic botany of plantlife -the work accomplished in pure and applied botany at the Royal Botanie Garden during the last century and a half has exercised a profound and far-reaching influence upon the develop-ment of Agricultural Science and Forestry in The irreplaceable dried plant materials obtained by botanical explorations and preserved for more than one hundred and fifty six years at the Herbarium of the Royal Botanic Garden, Calcutta, and several thousands of indigenous and exotic trees, shrubs and herbs cultivated in the open, prove to be most useful in dealing with such questions of considerable State importance as naturalisation of useful plants, introduction of new vegetable products into the eountry, the adaption of raw produce to the requirements of manufacturing industry, land utilisation, preservation of rural areas, provision of national parks, drainage, sanitation and public health

been such well known members as Anderson, Wood Mason, Alcock and Annandale

The Survey is unique in that all its officers are Indians

The main functions of the Survey travellers and rough chart of the coast.

The Survey of India may be said to have been founded in 1767-ten years after the battle of Plassey-when Lord Clivo formally appointed MajorJames Renneil the first Survey or General of Bengal, at that time the most important of the East India Company's possessions, though there were carlier settlements in Madras and Bombay

Rennell's maps were originally military reconnalssances and latterly chained surveys based on astronomically fixed points, and do not pretend to the accuracy of modern maps of India based on the rigid system of triangulation commenced at Madras in 1802 and since extended over and beyond Indla Even now, however, the relative accuracy of these old maps makes them valuable in legal disputes, as for instance in proving that the holding of a Bengai landowner was a river area at the time of the Permanent Settlement of 1703, so that he is debarred from its benefits

From these beginnings, this department has gradually become primarily responsible for all topographical surveys, explorations and the maintenance of geographical maps of the greater part of Southern Asla, and also for geodetic work

Geodesy means the investigation of the size, shape and structure of the earth, and the geodetic work of the department consists of primary (or geodetle) triangulation, latitude, longitude and gravity determinations From these the exact "figure" of the earth is obtained, whereby points fixed by triangulation can be accurately located on its curved surface This system of fixed points holds together all topo graphical and rovenue surveys, and the existence of such a system from the early days of the department has avoided the embarrassments eaused in other countries where isolated topo graphical surveys have been started without a rigld framework, with the inevitable result that they could not be fitted together

A geodetic framework is, therefore, essential in any large survey, but there are a number of other activities, all of them ultimately utilitarian which can be suitably combined with its execu tion, and the following are some of those which are earried out in India

Precise levelling for the determination of heights,

Tidal predictions and publication of Tide Tables for thirty-nine ports between Suez and Singapore, but due to the war, all Geodetic activities not directly related to the war have been suspended

The Magnetic survey, Observation of the direction and force of gravity,

determine Astronomical observations to latitude, longitude and time,

Seismographie and meteorological observations at Dehra Dun

Indian geodesy has disclosed widespread anomalies of gravitational attraction in the earth's crust, which have recently led to a re Survey of India —The first authoritative earth's erust, which have recently led to a remap of India was published by D'Anville in consideration of the whole theory of isostasy

Though revenue survey is primerily a record of individ al property boundari send is u con cerned with the nrface f atures gr und levels and exact geographical position as ential to a topographical survey it was on the whole found ec nomicel to earry out both surveys together

By 1905 however all the Provinces hed taken over the revenue surveys for which they h d slw ys p id and the Snrvey of India w a e abled to conee trate its energies on a complete new s ries of modern topographical m p ln several colours on th 1 inch to 1 mile scale recommended by a commission which s t that time to consider the exi ting map of India

This new se ies had been rend red nec ssary by the natural demand for more detailed infor metion to he shown on map especially aer gard the portray 1 of hill features by contours and proper el ssification of communi ations

for the prosecution and assistance of research, and plague, who examine the proposals for the propagation of knowledge and experimental research work and make recommendations incasures generally in connection with the to the Scientific Advisory Board The Board causation, mode of spread and prevention of line recently appointed a Clinical Research communicable diseases The Association can claim to be amongst the pioneers in organised medical research on a large scale and its work has been widely appreciated in other countries lighter a technical report describing the research

The control and management of the Association are vested in a Governing Body, the President of which is the Member in charge of the Department of Education, Health and Lands of the Government of India This body is assisted by a Scientific Advisory Board of which not less than three members have seats on the Governing Body The Director-General, Indian the auspices of the Association are published Medical Service, is the Chairman of the Board in the Indian Journal of Medical Research and the Public Health Commissioner with the Government of India is the Secretary of the Board and of the Governing Body Membership of the Association is open to non-officials Every donor of Rs 5,000 is entitled to become a permanent life member, while every able from Messrs Thacker Spink & Co, 3, subscriber of Rs 100 per annum can be a Esplanade East, Calcutta, on payment temporary member

until 1929, composed exclusively of Was, officials, but in that year the Raja of Parlakimedi made a donation of Rs 1,00,000 to the Associa-tion and was appointed a life member In the made a donation of Rs 1,00,000 to the Association and was appointed a life member. In the same year the Government of India, after taking into consideration the question of liberalising the constitution of the Governing liberalising the constitution of the Governing that against the constitution of the Governing that against the constitution of the guestion of pharmacology, indigenous drugs, material mor liberalising the constitution of the Governing tality, helminthology, medical mycology, dra Body, decided to enlarge it by including three contains and filariasis, protozoal parasites representatives of the Indian Legislature, two concerned drops. Lala again, dried Body, decided to enlarge it by including three representatives of the Indian Legislature, two representatives of Medical Faculties of Universities Incorporated by law in India and one eminent non medical scientist to be nominated by the Governor-General As a result of further representations from the Universities and the Legislature, thus Body was again enlarged in 1933 by the addition of a third representative of the Medical Faculties of Indian Universities, whilst it was decided that the non medical scientist should in future be elected by the Indian Science Congress Association

A Recruitment and Appointments Board has been formed from amongst the members of the Governing Body of the Association to select and recommend officers for appointment in the Medical Research Department and the All-India Institute of Hygiene and Public Health, Calcutta

In order to ensure the closest co operation between workers and to prevent overlapping of efforts, an annual conference of medical research workers and administrative heads of Mcdical and Public Health Departments used to be convened under the auspices of the Association up to 1938 (In that year it was decided that the Conference should be held biennially in future No Conference has, however, been held since nor is one to be held in 1944 on account of the war) At this conference free discussions were held on the work ference free discussions were held on the work accomplished and on proposals for future work. The results of the discussions enabled the members of the Scientific Advisory Board to make their recommendations for the programme for the following year. The Board is assisted.

The Association maintains the Nutrition Laboratories at Cooncor, which carry out investigations which have a direct bearing on the problem of nutrition in India. The make their recommendations for the programme for the following year. The Board is assisted.

The Indian Research Fund Association—by Advisory Committees consisting of workers This Association was constituted in 1911 with on more important items of research, eg, a sum of Rs 5,00,000 set aside as an endowment choicen, malaria, maternal mortality, nutrition Advisory Committee to draw up a plan for the development of clinical research in India Flic Scientific Advisory Board annually pub work done on the various enquiries carried out under the auspices of the Association during This report is obtainable each calendar year from the office of the Secretary, Governing Body, Indian Research Fund Association, Scerctariat, New Delhi on payment

and its "Memoirs" and the "Journal of the Malaria Institute of India," all of which are issued under the authority of the Association and have now a firmly established position in the scientific world. These publications are obtain

Since the inception of the Association a large The original Governing Body of the Association number of enquiries have been carried out and from small beginnings great expansion of its activities has taken place Enquiries which cuncer, epidemic dropsy, Lala azar, dried blood plasma, sandfly fever, typhus, bacillary dysentery, snake venoms, fluorosis, etc

Besides financing investigations which are conducted by workers in its direct employment, the Association gives grants in aid to institutions and also to outside workers. The ex penditure for the last few years has amounted to between seven and eight lakhs of rupees per The Association has been supporting annum the Malaria Institute of India, which now enjers international recognition The Association also maintains the Southern India Branch of the Malaria Institute of India at Coonoor, which was previously financed by the Rockefeller Foundation As a part of the activities of Sir Organisation and in commemoration of Sir Ropald Ross supports association with India. Ronald Ross's intimate association with India, an experimental malaria station was opened in Karnal in January, 1927, and named the Ress Field Experimental Station for Malaria" This was transferred to Delhi on 1st March, Besides carrying out experiments in connection with the prevention of malaria, annual classes are held at which candidates from all over India are shown the latest methods for dealing with the malaria problem. The Public Health Section of the Institute has been taken over by Government since April, 1940

Proving of Wills

Every year, before the programme of the fleid surveys is deelded upon, the Provincial Governments are asked to give details of geological investigations, mineral surveys or (a) An Annual Remew of Mineral Production engineering enquirles which they desire to have carried out Such dofinite programmes of fieldwork may also cover the Indian States, and may be carried out free of charge If, however, any special problem has to be dealt with which does not come under the regular programme of the Department (eg, a mineral survey of a particular area, an enquiry connected with a particular engineering project, or short-term investigations involving specialised goolo gical knowledge), a charge may be made for the services of the officers deputed for such work

The results of the investigations and researches of the Dopartment are published in-

- Records of the Geological Survey of India, which includes the Annual Reports, Annual Mineral Review, and short papers One volume of 4 parts is published annually Every 5 years, a Quinquennial Review of the Mineral Production of India, is published as a separate volume of the Records
- Memoirs of the Geological Survey of India, each volume dealing in detail (22) with a particular area
- (111) Palaeontologia Indica, which deals entirely with palaeontological matters

As a part of the Records, a series of Bulletins on particular minerals have been published in These Bulletins are intended to summarise the geological information available in India on commercial minerals. As each edition goes out of print, these Bullotins will formed with a view to providing geological be revised and reprinted.

During the war a strategic branch has been formed with a view to providing geological information and advice for the Allied Forces

- the contents are mainly production statistics relating to the previous year
- **(b)** A Quinquennial Review of the Miner Production of India, giving a review of the trend of the industry during the past 5 years
- (c) Bulletins, summarising geological know ledgo on mineral occurrences—the Bulloting are of longer term interes than (a) and (b)

During the War, publication of the Record (except Builetins) and Memoirs has been suspended, but will, it is hoped, be resumed in the near future

The advice of the Geological Survey of Indle is taken by the Central Government and other on all questions of mineral policy. To encourage and assist the teaching of geology in classes and colleges, the Department presents collection. of minerals, rocks and fossils and gives iecture to students and at times to the public with s viow to popularising the study of geology

geological functions of the Mineral Utilisation Branch of the Dopartment, which was established as a war measure, are being taken over by the newly created Mineral Development Circle

PROVING OF WILLS.

always advisable to prove the Will as early as present, a surcharge of 25% possible If the Will is in a vernacular, it has to be officially translated into English A petition is then prepared praying for the grant of probate of the Will All the property left by the deceased has to be disclosed in a schedule to be annexed to the petition Values must be shewn as at the date of the Petition and Probate gage enoumbrances Fees will be calculated on such value The Values of immovcable properties are usually assessed at 16% years' purchase on the nett Municipal assessment, in the absence of a report from a competent architect

Scale of Probate Duty -- Up to Rs 1,000-Nil For the next Rs 9,000 (ie upto Rs 1,000—Ni Service in certain circumstances

Earthquakes

Physical days one finds and ther relating the state of th

recorded from tlns region (April 1843) From the apex of the Peninsnla to Madras, however, runs a region of minor shocks, probably connected with some dislocation in the earth's erust, though there is no direct evidence of this These three units, then, constitute regions of decreasing intensity of earthquakes as we travel from north to south They are indicated on the accompanying map, which is essentially the same certain observations in the ease of the Baluchistan as the one prepared by W D West of the earthquake of 1909 He remarks that certain Geological Survey of India Causes —It will be unnecessary to go into the

origin of the individual earthquakes, but a few remarks on the main causes of these phenomena will be illuminating While minor earthquakes may be due to volcanle activity, the major ones are almost invariably the result of movement along dislocations in the earth's crust or "faults" as the geologists call them, and thrust planes In the case of thrust planes certain scts of rocks override others, instead of being merely The epicentre, that is the place of dislocated maximum intensity, frequently coincides with these faults or thrust planes, which proves that a close relationship exists between earthquakes and the dislocations A number of important faults run close to the southern edge of the Himalayas and the Himalayan foot is therefore a very unstable region A similar fault runs along the foot of the Shan Plateau in Burma while the Kyaukkyan fault runs north and south in the Northern Shan States, and has probably given rise to earthquakes It may, however, be pointed out that it is only such 'faults' as are still active that give rise to earthquakes Thus the faults In the Peninsular area appear to be inert and there fore few earthquakes occur there Although the lmmediate cause of the shocks may be movement along a fault or faults, the ultimate cause is often the rapid denudation of steep ranges, which upsets the equilibrium of the earth (Kangra, 1905) in the readjustment of which these move ments occur There is, however, no consensus of opinion on this point for in Norway, where the steep monntain ranges are subject to rapid denudation, there are no earthquakes. The cause may be more deep seated as, for example differential ecoling and contraction of the earth's interior The same result is achieved by the slip plng of large alluvial masses in deitale areas or their uplift owing to tectonic forces (Rangoon Dee 1927) The regions where mountain ranges, take sharp bends, being highly folded, are naturally areas of pent up strains seeking rellef and are therefore zones of great danger. The vlolent Quetta earthquake of 1935 and the earlier of Mich and Sharigh (1931) were of the

Suleiman, Bugti or Kirthar ranges Frequently more than one cause contributes to these carthquakes and the results are then even more disastrous

ones of Mach and Sharigh (1931) were of this nature, for these places he near sharp bends in the

Factors Controlling Damage and Loss of Life—The Intensity of the carthquake is not the only factor upon which the extent of damage and loss of life depends Much depends upon the time of shock, the nature of the buildings, the habits of the people, etc. Thus the amount of habits of the people, ctc damage done is often greater in India, where pucca houses are more common, than in Burma, where houses are mostly wooden, though the latter may suffer more from fire, as happen ed in the case of the Pegu earthquake (5th May, 1930)

The time at which the earthquake occurs make: 3 considerable difference to loss of life, for an carthquake occurring at night takes people un awarcs (Kangra, 20,000 lives lost, Quetta, toil of life 25,000) Had the Bihar earthquake, in which 10,000 lives were lost, occurred at night the toll of life would have been unthinkable Dr A M Heron, Director, Geological Survey, makes communities suffered more heavily than others because more of their number slept indoors and, being better off, hvcd in two storicd houses, which naturally suffered more damage The fact to be emphasised is that the loss of life, etc, does not entirely depend upon the severity of the shock,

but upon the time of occurrence and various

other factors

Sources of Information—Very little is known of the Indian earthquakes previous to the year 892 AD and accounts of the earlier of the recorded earthquakes are necessarily Incomplete T Oidham has recorded the different sources of information of the earlier Indian earthquakes in his catalogue Among the works m which records of Indian earthquakes later than 892 A D occur are the Tarikhul Khulafa (History of the Calipha), the Alkamul-fi-l Tarikh by Ibnulathir—a historical work of the Arabians, the Mer-at ul-'Alam, an unpublished work in the ilbrary of the Royai Asiatic Society of Bengai, Badáoní (Bibliotheea Indiea), Báber's memoirs With one or two exceptions no really severe earthquakes took place in the Indian region between January 1943 and March 1945 How

continent Two shocks of slight intensity were felt at Srinagar in Kashmir and at Drosh in Chltral, on Feb 6, 1913, at intervals of 30 Seconds On Feb 9, an earthquake of slight Intensity was felt in parts of Assam Silght shocks were felt over a wldc area—Rawalpindi, Muzassarabad, I Khan Ganhati, Gulmarg and Srinagar 9th Sept 1943, at 1036 IST The on 9th Sept epicentre of this earthquake was near the Hindu Kush Mountains An carthquake of great intensity with epicentre in Assam was felt in parts of Assam and North Bengal, on Oct 23 at 23, 54, IST Slight shocks were felt at D I Khan on Nov 27 at 15 15 IST

ever, a number of shocks of slight to moderate

intensity were felt in different parts of the

On Feb 29, 1944, an earthquake of great intensity, with epicentro in the Maidive Islands, was felt in the Ceylon region at 22 58 IST An earthquike of moderate intensity with epicentro near the Andrama Islands, was recorded on Sept 27, 1944 During 1944 further shocks were felt in different parts of India—Krshmir, Bihar, Assam—but none of them is of much importance

Between Jan 1945 and March, 1945 reported shocks are all of small Intensity and occurred in Nepal and Assam

Much In Kháfi Kháns Muntalhab ullabáb, etc formation is gleaned from the Journals of the Royal Assatzc Socrety of Bengal, the Philosophical Accounts of the later earth Transactions etc quakes appear in detail in the records and mem oirs of the Geological Survey of India, from which much of the information here given is drawn

brower of metrons with h it is reported fallin into a like cancel has w it so a w an and a secondary and it is

2014 August 1833 -Icht in Kiintmandu (Nepul) and North Biliar In Khatmanda alone greater part of Baluchistan and was connected 100 houses were levelled to the ground and a with an old fault line that runs along the foot similar fate overtook other places continuous agitation for full 24 hours

An earthquake of great Intensity affected Burma, more particularly Amarapura and Ava, on 23rd March 1839 It is reported that shocks continued for four or five days, every fifteen to thirty minutes 200-400 lives were lost and pagodas and other buildings in Asa, Amarapura and Sagaing suffered heavily

19th February 1842 —I asted for about three minutes in Rabui and affected Pesinwar, Jallalabad, etc. It was very destructive at Peshawar and one third of the town of Jailalabad was destroyed. Hot springs at Sonah became cold and the amount of water also diminished The area affected was about The epicentral area was 216 000 square miles probably near Jallaiabad

Numerous later earthquakes which occurred in different parts of the Indian region do not call for much attention as they were of minor im portance. Two earthquakes which affected the portance Two earthquakes which affected the Decean in March and April 1843 may be here recorded, for the Deccan, being a stable landmass, is rarely affected by eartiquakes of any intensity, Sholapur, Maktal, Singrurgarh, Beilary, Kurnool Beigaum were all affected and much damago was This is the only earthquake known in the done Deccan which caused considerable damage epicentre was near Beilary

Severe shocks, local in their effect, occurred in Upper Sind on 24th January 1852 Fort Kahan was completely rulned and about 350 persons were killed

24th August 1858—Burma was affected, but e shocks were not of great intensity. False the shocks were not of great intensity. False Island situated sonth east of Cheduba Island (18° 38' N 93° 551' E) disappeared entirely under the Ocean The same carthquake affected the Punjab and Bengal, but very little damage miles was done

10th January 1869 - Experienced in Assam (Cachar), total area where shocks were feit was 250,000 sqnare mlies

A severe carthquako occurred in the Bay of Bengal on the morning of 31st December 1881 The radius of the area affected was about 800 mies, and the total area over which the shock was feit was in the neighbourhood of 2,000,000 square miles most of it being sea It was feit at Gaya, Hazaribagh, Agra Ootacamund Callent in India, and in Burma at Akyab where it was followed by the eruption of a mud voicano in Ramri The northernmost point affected was near Monghyr

30th May 1885 —This earthquake, although comparatively not so severe, resulted in heavy loss of life and about 3,000 persons perished in The epicentre was a few mlles west Kashmir The radius of feit area of Srinagar 450 miles, the total area affected being about 110,000 square miles

14th July 1885 - The epicentre of this earth quake was north west of Daeca It was felt violently throughout Bengai, but extended also into Chota Nagpur, Bihar, Sikkim, Bhutan and Assam The area affected was approximately 230,400 square miles

20th December 1892 —This was felt over the There was of the kolak range in a h h F direction Traffoot of the range is are by a depression and numerous springs which are indicative of the fault. It is interesting to note that as a result of this earthquake the area west of the fault subsided about one foot and moved southward about 21 feet! The earthquake was, however, local in its effects

> The worst earthquake which has affected Assam and probably the greatest within historic times occurred on 12th June 1897 Stone build lags in Shiliong, Goalpara, Gauhati, Nowgong and Syihet were almost entirely destroyed everywhere and Calcutta was seriously affected Over 1 600 lives were lost and the earth quake was felt in an area of 1,730,000 square The earthquake was caused by a ' movemiica ment along a thrust-plane or thrust planes and along secondary thrust and fault planes, which had a maximum length of about 200 miles and a maximum width of alout 50 miles. This movement was due to the rellef of differential strains set up in the interior of the earth

The district of Kangra in the Punjab suffered heavily on 4th April 1905, more particularly because the slocks occurred early in the morning when people were still asleep There was heavy the loss of life—20 000 persons having pershed The The area affected was 1,625,000 square miles. Kangra and Dharamsala were completely destroyed The main shock was from north to south, followed by an equally severe one from south to north The carthquake is ascribed to movement along one of the reverse faults of the Hlmalayas

21st October 1900 — This earthquake affected the Kachhi plain, Baluchistan Considerable damage was done and over 200 lives were lost The radius of the felt area was about 15 15 miles The clongated epicentre was N W —8 R The earthquake was presumably in direction due to the presence of a fault, though, the area bolng covered with alluvium, this is more or less eonicetural

A violent earthquake occurred over the greater part of the Northern and Southern Shan States on 21st May 1912, and was feit practically over the whole of Burma, Slam and Yunnan An area of 125,000 square miles was affected Shocks continued the following day and were followed on the 23rd May by a severe shock which was felt over an area of severo shock which was felt over an area of 375 000 square miles Numerons after shocks continued in May, June, July and August, when they finally ceased The epicentre was close to the great Kyanklyan fault in the Northern Shan States

No severe earthquake is recorded during the six years following the last earthquake in Burma, but a violent shock was felt on 8th July 1918 and affected Eastern Bengal, Assam, Burma, North west India as far as Lahore It was most strongly feit in Srimangal (Assam) where many ten estates were runed The total area over which it was felt was 800 000 square miles This tearthquare and the strongly of earthquake was due to subsidence along a fault It was accompanied by pouring out of sand, mud and water from fissures created in the ground, tun Altho gh the area is co ered with ivi m nd dire t obs r atious ire not po sibil prob bilty of a ch a rore of eakne s

6th January 1938 -Two shocks were felt November 1939 which was felt at Jammu, at Drosh in the Chitral District, North West Mianwall, Delira Ismail Khan, Peshawar, Rawal

14th April 1938 -An earthquike shock was felt at Monywa In the Lower Chindwin district Burma, at 7-47 a m Cracks appeared in the walls of several buildings, but there was no loss of life

3rd May 1938—Two shoels were felt at Intervals of about five seconds at Shiilong in Assam at 10 21 pm. The shocks lasted for about 40 seconds There was very little damage over the valley to property and no loss of life

16th August 1938 —Shocks were experienced in the Upper Chindwin district, Burma, and were felt over a fairly wide area The shocks which iasted about 30 seconds, seem to have been severe at Kalemyo Pucca buildings and Pagodas tumbied down, but there was no loss Smaller shocks were also feit at Mawlalk Paungbyln, Mingin, Indaw, Kalewa, Homalln Tabyin ete

7th February 1939 -Two shoeks were felt at Drosh in Chitral at intervals of two seconds, but there was neither material damage nor loss of life

Reports received by the Geological Survey of India from various parts of India and Burma show that 82 earthquake shocks were feit in 1937 ln Indla With the exception of the rather severe shock of 14th November, whileh orlgi nated in the Hindu Kush region and affected a considerable tract of north-west India, the rest were of slight intensity unavtended by any damage to hulldings or persons

Regionally the shocks were distributed as

foliows -

Burma, 28, north eastern India, Including Slkkim, Nepai and Tlbet, 31, north western India, Including Kashmir, Chitral and Baluchistan, 21, and Peninsular India, 2

The epleentre of the shock of 14th November 1937 has been located in the Hindu Kush mountains, north-west of Drosh, in Chitral This has been deduced from observers' reports and from seismographic records available from the Meteorological Observatories at Bombay, Agra, Calcutta and kodalkanal This shock was felt at such distant piaces as Kabul, Dehra Dun, Simia, Multan, Dera Ismail Khan and Roorkee

At least slxty earthquake shocks were felt in India during the year 1939 Fortunately all these shocks, without exception, were of slight intensity and exused neither loss of life nor serious damage to property

About twenty of these shocks affected the unstable Assam region, of which four were felt at Dhubrl, slx at Gauhatl and a like number at Shillong, Kashmir, Drosh (Chitral State) Quetta, Rawaipindl, Giigit, Lahore, Shikarpur (Cutch), Peshiwar, Begumpet (Hyderabad State) and many other towns experienced shocks during the year

It is unnecessary to give details of the large number of shocks felt during 1939 for most of these were of minor importance Mention must however, be made of the earthquake of 21st There was no loss of life or damage to property

Frontler Province Another shock of the same pindl, Sringar, Daihousie, Kabul, Gligit Skardu, intensity was felt on the 7th January, but there etc. Its epicentre was in the Hindu Kush range, was no dumage or loss of life being situated at 36° N 75 5° E. Its focal depth was 200 KM

The intensity of this earthquake at Srlmagar and Gligit was VII on the Mercali seale At Srlingar three shocks were feit at intervals of 10 seeonds ench Cracks developed in the walls of the Observatory and other buildings in the city At Gligit, which suffered three shocks at intervals of 2 seconds each, boulders slipped down from the surrounding mountains and dust spread all

During 1940 earthquake shocks were felt at Gulmarg in Kasimir, at Barmer (Rajputana) and at Bhuj and Radhanpur in the Western Indian States

At Gulmarg two shocks of moderate intensity were feit on the 3rd August at 14 45 (IST) and cracked walls of Autcha houses Shecks of me derate Intensity were also felt on 8th August and 21st September, 1940, but apart from eracks in Intcha houses no damage was done Barmer and Binij experienced a slight shock on 31st October while Bhuj had another shock on 13th November, 1940

There was no loss of life or serious damage to property during any of these carthquakes

A large number of earthquake shocks occurred In India during the year 1941 It is unnecessary to give details of all these but particulars of three or four of the more important ones may be given

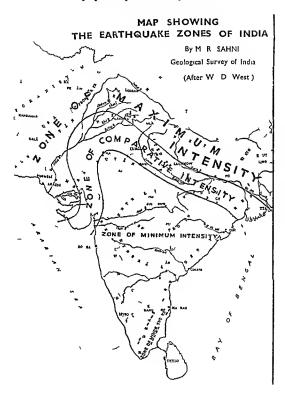

An earthquake of moderate intensity took place on the 21st of January 1941 at 18 16 hours (IST) with its epicentre to the north of Assam The shocks lasted for about one Assam The shocks lasted for minute but no damage was caused

Another earthquake occurred on the 26th June at 17-27 hours (IST) This earthquake whose epicentre lay in the neighbourhood of Nicobar Islands, was of very great intensity and was feit in Madras, Cluttagong, Chandwali, Colombar 18 the Colombo, etc Extensive damage to buildings occurred in Port Blair where 4 persons were killed and 4 seriously injured The duration of the shock was iess than half a minute

On the 30th of June at 23 58 hours (IST) & shock of moderate intensity was felt at Port Biair Its epicentre lay in the neighbourhood of north Andaman

Another earthquake occurred on the 29th of September at 8 5 hours (IST) at Quetta The shocks lasted for about 35 seconds and caused damage to Laccha buildings and mud houses in Quetta

Three earthquikes of slight to moderate intensity were recorded during the year 1942 reported On 22nd March a quake of moderate intensity was felt at 7.38 hours at Lahore, Rawalpindi and Simia The epicentre was in the Hindulush mountains A third earth. Rawalpindi and Sinila The epicentre was in the Hindukish mountains A third earth quake of slight intensity was felt in parts of India on the 15th of May 1942 at 22-25 hours (IST) The epicentre in the hindu Kush

Posts and Telegraphs.

POST OFFICE.

The control of the Posts and Telegraphs | Bombay, Delhi and Madras General Post Offices of India is vested in an officer designated and of the larger of the other head post offices Director-General of Posts and Telegraphs | whose office is attached to the Department of Posts & Air of the Government of India For the efficient working of the Department there is a Limincial Adviser, Communications. The superior staff of the Direction, in addition to the Director General himself, consists on the postal side of one Senior Deputy Director. General one Deputy Director General, Postal Services one Deputy Director General, War two As istant Directors General, Establishments one Assistant Director General Pestal Services

Balm bistan Lach of the first seven is in charge of a Postmister General and the Slud and Baluchistan Circle is controlled by a Director Posts & Telegraphs The Central Circle comprises roughly the Central Provinces and the Cautral India and Rajputana Agencies

The Heids of Cheles are responsible to the Director General for the whole of the postal ar rangements in their respective encles including those connected with the converance of mails by rullways, inland steamers, and air services All the Postmisters General are provided with and Assistant Postmasters General while in the Sind and Balachistan (Irck the Director is assisted by Assistant Directors In the Bengal and Assam Circle, there is in Additional Postmaster General for the province of Assam with headquarters at Shillong, who works under the Postmaster General The eight Postal Circles are divided into Divisions each in charge of a SuperIntendent of Post

are duectly under the Postma ters-General The Presidency Postmaters have one or more Inspecting Postmaters a Lordinate to them When the dities of the Po-tmaster of a head office become so oncrous that he is unable to perform them fully himself a Deputy Po thuster is appointed to relieve him of some of them, and if still further relief is required, one or more Assistant Postmasters are imploy The more important of the offices sub ordinate to the head office are designated sub offices and are usually established only in sev n Assistant Dy Directors-General and one towns of some importance. Sub-offices transact Post wn Plan and Officer all classes of postal business with the public, all clieses of postil business with the public, submit accounts to the head offices to which for postal purposes, the Indian Empire is submit accounts to the hard offices to which divided into cight circles, namely, Bengal and Assam, Bihar and Orissa, Bombay, Central Midras, Punjab and North West are direct drainings with Government for illustration of the country of the land. Uni ed Provinces and Slud and treasuries The officer in charge of the an office works it either single handed or with the a-si-tunce of one or more clerks according to the amount of business

Branch offices are small offices with hmited functions ordinarlly intended for villages and are placed in charge either of departmental officers on small p y or of extrucons agents, such as school masters, shop-keep re, lad halders or cultivators who perform their postal duties in return for a small emuneration. The audit and accounts work of the Pot Office.

is entrusted to the Accountant-Gineral, Posts nd lelegraphs, who is an officer of the linuxed Department of the Government of India and is not sub-rilhate to the Director General. The Accountants General, all of whom, with the processory of the order of the processory of the order of the processor of separate necessary st ff of clerks, perform at separate he adjunctors the actual audit and a counts work of a certain number of postal circles

In accordance with an arrangement which offices or Rulway Mail Service as the case may be and each Superintendent is assisted by a certain number of officials styled Inspectors. Generally there is a head post office at the headquarters of each revenue district and other like to the same district and other like to the lead office for purposes a number of client post office. The lead office for purposes a number of client policy and expectally in towns by opening subordinate to the head office for purposes a number of client towns by opening subordinate to the lead office for purposes a number of client towns by opening subordinate to the lead office for purposes a number of client towns by opening subordinate to the lead office for purposes a number of client towns by opening of accounts. The Postmasters of the Calcutta, under the control of the Post Office.

in Telephone work there is one Deputy Director General (Telephones) and in Wircless matters there is one Assistant Dy Director General (Wireless) In the Circles the scheme which has been introduced follows closely on the lines of the experimental one referred to above. For telegraph engineering purposes India was divided up into five Circles, each in charge of a Director. These five Circles were divided into eighteen Divisions each in charge of a Divisional In 1922 Sind and Baluchistan Circle was formed with its headquarters at Karachi This Circle is under the charge of a Director of Posts and Telegraphs On the 31st March 1924 there were 7 Circles and 20 Divisions With a view to complete fusion of the three branches of work the engineering work of the Bombay and Central Circles was brought under the control of the respective Postmaster-General in 1925 and tals unification was gradually extended to other Circles The fusion was completed in March 1930 The telegraph traffic and the engineering brunches in the Circles are now controlled by the Postmasters General and the Director of Posts and felegraphs, Karachi There is also one Deputy Director of Telegraph Traffic as one Deputy Director of Telegraph Traffic each at Calcutta, Bombay and Madra-to look after the speedy disposal of traffic There are now 23 Lugineering Divisions With effect from the 1-7-1939, the Superior Telegraph Engineering and Wircless Branches have been amalgamated at a Single Service viz,—Telegraph Engineering Service—Class I The audit and accounts work of the Telegraph Department is, like that of the Post Office, entrusted to the Accountant General, Posts and Telegraphs, assisted by a staff of Dupty and Assistant Accountants General Inland Telegrams and Tariff —Telegrams sent to or received from places in ludia or Burma or Ceylon are classed as Inland telegrams The tariff for Inland telegrams is as follows -For delivery in India Private and State Express Ordinary Rs a Rs a Minimum charge 1 10 0 13 Each additional word over 8 0 2 n For delivery in Burma Private and State Express Ordinary Rs a Rs a 2 12 1 6 Minimum charge Each additional word over 8 0 0 For delivery in For delivery in Ceylon Lhasa (Tibet) Private and Private and State State Ex Ex-Ordi-Ordl press nary press nary Rs a Rs a Rs a Rs a Minimum charge 2 0 2 8 1

Empire Social Telegrams (GLT) for the purpose of transmission and delivery to a territory or place to which NLI service is available is deferred until the morning of the day following the day of acceptance where there is no NLT service but a DLP scrvice is available an Lumpire Social Telegram is deferred and delivered on the second day following the day of acceptance or as soon as possible thereafter Minimum charge for an Empire Social Telegram is Rs 360 for the first 12 words (excluding the Special Instruc-tion GLT-which vill not be charged) and 43 annas for every additional word

The only Speelal Services admitted in Implie Social Telegrams are "Reply Paid" and De Luxe"

Telegrams -Telegrams Foreign De Luxe sent to certain foreign countries for delivery on an artistle form in an envelope of the same character. A supplementary charge of four annay per telegram in addition to the charge at the appropriate rate according to the class (1e). Urgent, Ordinary, Code, Deferred, DLT, etc.) is charged tor such telegrams. This De Luxe Service in not available with U K for the duration of the war.

Posts and Telegraphs—The capital outlay of the Indian Posts and Telegraphs Department of the In

accepted for most non emplre countries from the lith of December to the 6th January Inclusive of special reduced rates subject to a minimum charge for 10 words per telegram Implie countries except Sudan such greeting may be conveyed by means of Empire Socia Telegrams

Growth of Telegraphs—At the end o 1897 93 there were 50,305 miles of line and Compared to this there were 112 100 miles of line including cible and 1053 600 miles of the includes conductors on the 31st March 1914. The mimbers of departmental telegraph offices were 257 and 90 respectively, while the number of telegraph offices worked by the Post Office rose from 1631 to 4,031

The increase in the number of pald telegrams dealt with is shown by the following figures -

		1897 93	1043 44
Inland	{ Private State Press	4,107 270 860 382 35,910	17,413,000 4,318,162 31a,853
		1897 93	1943 44
Foreign	{ Private State Press	735,679 9 896 5,278	3,479,212 257,955 76,725
		5,754,415	27,919,873

The outturn of the workshops during 1943 44 represented a total value of Rs 138,30,000

Wireless -The number of messages handled during the year 1943 44 by departmental wireles stations in India was nearly 407,000 shows an Increase of about 23,000 over the previous year

Telephones:—With effect from the 1443 the Licensed Telephone Systems at Culentia, Bombay and Madras and with effect from the 1943, the Licensed Telephone Systems at Ahmedabad and Franchistan Annual Property of the Control of the Co Ahmedabad and Karachi were acquired by Gort on the 31st March 1944, there were about 2,600 exchanges and 116 000 Telephones operated by the Department and Heensed system

Tuberculosis sanatorium at Kasinli ! The opened two years upo provides modern methods lot treatment for patients, who mundered nearly 90 last very, and acts is a terching centre for the training of specialists in tuberculo 14. The the training of specialists in tuberchie la number of inderenso is no pitals has increased considerably in recent years new cent e being opened in Trivincore State and in Homb t Presidency, while Baroda State is at a milling arrangements for a special trealment centre Santtoria have been opened in the Punjah and in Sind, while a project for a constorum in Assam received sanction some time ago. In addition, many general hospitals throughout India now provide increased accommodation for tuberculosis patients and improved arrange ments for the diagnods and treatment of the disease The progress of the New I Tuberculosis (linic has been especially Di llis couraging as it has succeeded in it- in in purpose of attricting the collaboration of the general practitioner. I forta to remedy the delicency in frained personnel were made through post graduate courses conducted by the 1s oclation last year in Patna and I shore and earlier in Bombay and Cakutta

CENIRAL ADVISORY BOARD.

In the field of public health administration the most important event was the second meeting of the Central Advisory Board of Health in January 1939 This Board, which consists of the representatives of the Central Government of provincial Governments and of certain Indian States, was funugurated in June 1937 for the purpose of providing a formula for the discussion and formulation of public health polley Within the short period of its existence it has already given proof of its use fulness. Mention may be made here of some of the valuable results of the joint consultations between the different governments which the existence of the Board has rendered possible during the past three years The problems associated with the health of the motier and child are of supreme importance to every country and, in India, the high rates of child and maternal mortility place this branch of health work in the forefront of the national health programme. A special committee ap pointed by the Board reviewed the whole ques tion and submitted a report, which has been approved by the Board and which should provide for many years a sound basis for the orderly development of maternity and child welfare work in this country

The important part that festivals and large gatherings of pilgrims play in the spread of cholera is a subject of great concern to health authorities in India. While an improvement of the sanitation of the villages and towns through which the pilgrims pass is the most effective means of prevention, its realisation must be slow in view of the cost involved Under the eigenstances the most practical method of minimising the chance of the spread of cholera appears to be the provision of mass protection through anticholera inoculation. The possibilities of introducing a system of compulsory inoculation among pilgrims was investigated in 1939 by a special committee other relating to national reconstruction public licalti in particular, no apology is in for returning to the subject. No useful placed in the subject is no academ

In 1930 the Centril Advisory Hoard a plan of indirect compulsion for the in of pilgrims against chotera The repo Committee on compulsory Inoculation of expressed the deirability of 600 nebetling suitable feetlent centres in the for training out a seeten of indirect irocu plly time northest choices on the lines of th norked out by the Bombas Governmer Pandhurpar pilgrimage. It also empha need of adopting critisis measures wi Committee proposed for providing the fi the trained personnel necessers for ear mass Inoculation

Special attention was pald to ward of fever from fully with the increase c communications with Africa allowed to land in India from the yelle area without having been inoculated or undergoing quarintine. Aircraft arrist rellar fever are is were compelled to pr erribrate that they were effectively disir at either khartoum or Cairo country measures were taken to deal w possible outbreak of the disease The authorities of the Proxincial and Strie ments were requested to report prompti-Public Regith Commissioner even su cases of the disease

SOCIAL LEGISLATION

Repeated stress has been laid in the Commissioner's reports on the fact that health cannot be regarded as an entity from the general social and economic life community. It is, therefore, satisfacto the advent of provincial autonomy a conferment of extensive powers on Pri Governments have been followed in provinces by social legislation which y doubtedly have far-reading effects economic ilse and general well being of the Agricultural indebtedness, land tenur industrial problems, to cite a few examp all receiving serious attention and, in 50 legislative and administrative action \$ raise the standard of life, these measure incellably help in improving the stand public health

In order that there may be no undue or pessimism, it should always be remei that, less than a century ago, conditi Great Britain were not much different from found in India to day and that, with res other countries, reduction of the general rate below that at present recorded in dates back to only a few years. There se reason why India should not accomplish has been achieved in other parts of the if only organised effort is continued public support is given to that effort

POPULATION PROBLEM

In successive reports Health Commiss have drawn attention to the urgency at portance of the population problem and question has such an important bearing others relating to national reconstruction it is for instance not merely a matter of the HEALTH SURVEY AND DEVELOPMENT Mith in I trie of p p lation out tripping the food upply in the pres it of n restrict

(w) Publication and Propaganda "Teprosy in India" a quarterly journal published by the Association is a record of the study of leprosy and of auti icprosy work in India and other countries Recently a new propaganda book entitled "Popular Lecture on Teprosy" by Dr Dharmendra has been published, which gives the main facts about leprosy in simple and non technical language

Other actualies—The Association has played an important role in the Conference and Committees etc appointed in India to formulate principles of anti-leprosy compalgu Recently it has collaborated in the production of the "Report on Laprosy and its Control in India" and the "Report on Leprost Survey" by Committees appointed by the Central Advisory Board of Health, Govt of India, and the Indian Research Fund Association respectively. Tho former gives a comprehensive survey of the leprosy problem in India, and will serve as a hasis to formulate the principles of anti-The report on leprosy leprosy work in India surveys deals with the principles of the surveys as well as with the practical outlines of the work

The treatment of leprosy—The mainstay in the treatment of leprosy has been injections of chaulmoorga (hydnocarpus) oil or its pre parations Recently encouraging results have been reported by the use of certain sulphone lareas and then widely applied

the disease and in order to study the possibility drugs such as "Promin" and "Diasone's of evolving suitable methods of isolation of It is set too early to assess the value of this infective cases for the control of the disease group of drugs in the treatment of ignory The treatment with chaulmoorga oil is of value in Individual cases. It cannot be expected to control the spread of leprosy with treatment

> Control of leprosy - Leprosy can be controlled by raising the general economic and social conditions of the population and, by preventing contact of infective patients with healthy people, specially children The only sure mothod of preventing contact with infective enses is the isolation of these cases in leprest hospitals, sanatoriums, or colonies, etc. Great difficulty is experienced to provide institutional accommodation for all the infective cases in The total accommodation in all the country the institutions in India at present is for about 15 000 patients whereas a rough estimate of infective cases places the figure at 21 lakhs Sa some other methods of isolation are urgently needed to supplement the institutional isolation

The two alternatives are the isolation of the patient in his nome, and the isolation of ali the patients of a village or a group of villages in huts made in the outslitts of the village Home isolation is practicable only in families with sufficient financial resources. Village Isolation appears to be specially suited to India, problem and limited with its big inprosy problem and limited resources It is desirable that methods of village isolation should be developed in suitable

BLINDNESS IN INDIA

All over the East, and in fact in most tropical; and sub tropical countries, blindness is most prevalent and only recently have people come to realise the gravity of this huge problem

India is regarded as a land of blindness by many in foreign countries, whether this statement is justified or not, at present it is difficult to

It is probably correct that there are about one and a half million blind persons in India and for every one person blind there are three partially blind, out of a total population of about 360 millions whereas the census figures of 1931 show about haif a miliion blind persons

The system of ophthalmie relief now prevailing in Egypt was started in 1903 by a gift of a sum of £43 000 hv Sir Ernest Casselis Thus arose the ophthalmic section of the Public Health Department under a Director of ophthalmic hospitals and a start was given by establishing eye hospitals These hospitals became a definite branch of the Egyptian Government in 1906 The scheme subsequently developed, the cost being borne partly by Government grants and local taxation and partly by donations and subscriptions

Between 1904 and 1914, sixteen eve hospitals were opened in various parts of the country, the permanent hospitals being reinforced by travelling eye dispensaries which are an important part of the system

to count the number of blind, although the of 4,66,95,536 (eensus 1931)

method is very simple to earry out, i.e., a person is considered blind when he cannot count the fingers of a hand held up in front of his eyes at a distance of one foot

This is the method followed in Egypt and this was adopted by the Government of Bengai in the census of 1931 at the suggestion of Lt Cel C O'G Kirwan, CIE, IMS

The first biind relief Association in India was started in Western India in the Ratanguri District by the late Mr C G Henderson, I CS, in 1919 In subsequent years, several branches were inaugurated This Blind Reijef Associa tion earried out a special survey of the blind in some districts with the following results and wherever this has been done, the census figures have been found far too low Nasik Dist 4.4 per 1000. Byapur 2.6, Ratnagirl 1.5, the corresponding eensus figures are 1.74.0 7 and 0.7. In the United Provinces a Deputs. Commissioner lead a court made and found no less missioner had a count made and found no less than 9 persons blind per 1000

Mr Henderson resigned from the service in 1928 and an All-India Blind Relief Association was started in the year 1929 due to his devotion and energy

Ortant part of the system

In India there has been practically no effort 35,000 blind persons out of a total population count the number of blind, although the of 4 66 95 538 (consult 1931)

In March 10 of the 4s celation for the Fre en and hospitals but operations ero only done little of Billottes Benear was started in Calcultist where in door accommodation can be with a strong Committee with Sir George arranged Bankh, the then Chief Justice of Bengal a All operative works ere s spended o e week. President

The first noteble donation of 500 dollars was receiled from Mrs. Winlfred Holt Melher Founder Secretary New York Association for the Blind New York USA who with her hu band came to finds in connection with the work of prevention of blindness Six years i ter in March 1936 the first travellin eye di prasary was started in Bengs I vy this As ocla tion out of a gift of its 35 000 from Their Haje ties Silver Jubilee Fund the amount being the budgeted r curring cost of the dis pens ry for five years

By 1940 the Association posse sed four such tra elling eye dispensaries and it was in 1939 to that the Government of B agai a actioned a recurring grant f Rs 15 000 for three years. In M reh 1941 this Association added one more tra elli g eye dispensary making a total of

five now operating in Beng 1

These tr velling eye dispensaries have been started as a temporary measure until su h tim as there are mo e eye surgeons and sufficient eye hospitals accetered throughout Hengri Upto March 1941 85 606 cas a have hen freated and 8 071 operations have been per

All operative works ere a spended o e week before a dispensary is due to move on so as to enable the doctors to complet the after care of the operations they have done

In addition to preventive and curative works medical officers as a routine method c rry 11 t n er ameration of the bil d by method whi h re almple and accur to They also carry ut chool I pection ri systematic surv y of eye defects amongst sel ool students

MALARIA.

Malaria is without doubt India a msjor pulle i smilenter to influence the incidence of mal risheaith problem both from the point of view of a cendently not better of the control of the c

or the vill ges one subject to make two-thirds of the vill ges one subject to make the vill ges one subject to the total and that of the control of the total and that the vill ges of the vil

The Mainth in-titute of India, which has for by either authority until proposed prevention year past been engaged in malaria schemes have been thoroughly investigated. researches, has made clear the directions in which practical nutl malaria works should be tackled. The time scenis ripe for a wider use of the knowledge available, but it is much to be feared that financial stringener will continue to handlcap progress Recognising the importance of the malaria problem, the Government of India some veirs ago placed a special grant of ten lakhs of rupees at the disposal of the Governing Body of the Indian Research Lund Association for miling research. On the advice of the Public Health Commissioner, the Governing Body decided that this grant should be devoted to intensive control schemes extried on for a period of years in restricted areas in order to demonstrate the practical method required for reduction of the meidence of malaria **Pollowing** that decision, grants were made to four provin elal Governments on the conditions that those Governments contributed amounts equal to the IRI t grants and that approved schemes should be placed in charge of experienced anti-In addition, a grant was made malarul officers to Delhi Province for auti malarmi work in the Najafgarh Health Unit area and for additional schemes in the villages lying round the cities of Delhi and New Delhi

In Madras, Bengal and the United Provinces suitable areas were selected on the recommenda tion of officers of the Malaria institute of India n consultation with the provincial Directors of Public Health The grant to Assum provided additional lunds to the Assum Medical Research Society which had been engaged for some years past in intensive antimalarial work it is believed that these five year schemes will not only be of great benefit to the local populations concerned, but will form a valuable guide to all Governments and malarlologists in India in planning future anti malariai work

Recent malarial surveys have shown that parts of Eastern Bengil, formerly regarded as free from malaria, are subject to moderately severe outbreaks of the disease. Mularia is largely a rural problem in India and during the past few years different methods of combating the disease have been tried intensively in certain parts of the rural areas of Delhi province these measures deserve adoption in other parts of India. Much of the minor sanitary work necessary for eridicating mosquito breeding can be carried out by the people themselves if they are prepared to devote a small part of their lessure to such labour Draining marshes, elearing the jungle, filling up hollows in which water collects—these are put of a village lm provement scheme to winch the villagers should contribute their share of work for the common

Whilst all these facts Indicate that the problems associated with malaria have by no means been lost sight of, they are so important that much more requires to be done before any marked general reduction of malarn incidence Both governments and local will be obtained outhorners will require to allot much larger sums than in the past for anti-malarial works if permanent betterment is to be relieved Moreover, no expenditure should in future be sanctioned cheap cost

finally approved by skilled malariologists

PLAGUE

Plague in India started in Bombay in 16 and, within a short thae, the disease spre widely through the country It reached maximum in 1904 with a total mortality 1,143,903 In contrast to this the averannual mortility from plague during 1935 & was 18,759 That a considerable reduction in its geographical distribution has also take place is clearly indicated. The N W F Pro vince, the Punjab, Delhi Orlssa, Bengal, Sind Assam and Ajmer Merwara were free from the disease during the year, while in Madras Presidence. dency plague was prevalent only in a mild form After a marked decline in the number of plague dea h4 from 24,560 in 1933 to 406 in Bombay Presidency in 1938, this province registered an increase to nearly 1,500 deaths in 1939. In the other provinces the position in 1930 was sub stantially the same as in 1938. However, the However, the history of pingue through the centuries is a warning against taking a complacent view of the reduced prevalence of the disease in India It is known that the disease can smoulder in its endemic homes for long periods and that, on certain occasions, it acquires an increas d striking power and spreads far and wide in epidemic waves into distant lands, to retreat again after a while to those areas where it permanently resides While therefore it is gratifying that plague as a public health problem has been of decreasing importance within the past decade, the fact that endemic foci exist makes it imperative that no slacking of effort for its complete cradiention should be permitted In fact the fight against the disease both by administrative measures and by research into its epidemiology, treatment and prevention has continued uninterrupted during the whole period

A considerable diminution in the incidence of plague has taken place in India within the last decade This satisfactory position was main tained in 1940 when the provinces of Baluchistan, Ajmer-Merwara, Sind, North West Frontier Ajmer-Merward, Delhi, Orissa and Assam reported no cases of the disease The Punjab and Beng it were also reported free from Infection except for a few reported excess. Bombay Presidency vione experienced a relatively extensive epidemic, the number of deaths from plague being 5,573 in 1940, as against 1,472 v. 1993. 1,472 in 1939

In March 1941 it was announced that ex Bomby with sulphathazole in the treatment of plague had yielded results which appeared to offer an effective cure for this seourge Lt Col 8 Sokhey, Director of the Institute, said that by the use of this drug at Bettiah in Bliar and later at the Plique Hospital at Latur la Hyderabad, Decean the percentage of recoveries in uon septicemic cases was cent per cent while in septicemic cases the cure was 80 per cent. The drug was prepared at the Institute and was available in quantity at a Institute and was available in quantity at a

Mosopotamia, nine lakhs on the Afghan War and Junior Red Cross was 6,63,029 in 16,958 group Warderton Proposition in Magazetamia and less against 6,17,021 in 15,076 groups in the Waziristan Pxpedition, in Mesopotamia and India combined it had spent on Red Cross

objects in all about 117 inhas

It closed its career in June 1920 under the following circumstauces In the summer of 1919, an invitation had been received to Join the International League of Red Cross Societies having for its object the extension of Red Cross work in the sphere of purely civil activity Though there was then no formally constituted Red Cross Society in India, the invitation was accepted, thus giving India a distinct position in a world wide League of humanitarian societies A Bill to constitute an Indian Red Cross Society was introduced by Sir Claude Hill in the Imperial Legislative Council in March 1920, and duly passed into law as Act XV of 1920 This Act handed over the balance of the tunas of the Joint War Committee to the new Society and anthoris ed it not only to direct the utilisation for war purposes of the capital funds at its disposal but also to devote the interest, as far as possible, for civii purposes As contemplated in the Act of Constitution of the Society, its activities are com-pletely decentralised, and are being carried on through so Provincial and State Branches under which there are 024 sub branches

The objects on which the funds of Society may be spent are

1 The care of the sick and wounded men of His Majesty's Forces, whether still on the active list or demobilised

2 The care of those suffering from Tuber culosis, having regard in the first place to soldiers and sailors, whether they have con tracted the disease on active service or not

Child weifare

Work parties to provide the necessary garments, etc., for inospitals and health institutions in need of them

Assistance required in all branches of nursing, health and welfare work, auciliary to any organisatious which have or may come into being in India and which are recognised by the Society

Home Service Ambulance Work

Provision of comforts and assistance to members of His Majesty's Lorces whether on the active list or demobilised

The Society has five grades of subscribing members, namely, Honorary Vice Presidents, Patrons, Vice-Patrons, Members and Associate Their respective subscriptions are Members Rs 10,000, Rs 5,000, Rs 1,000, Rs 12 annually or a consolidated payment of Rs 150 and any thing between Re 1 and Rs 12 annually or consonaated payment of Rs 50 The number of adult members of all categories enrolled during 1943 was 29,348 as against 28,374 in

previous year To stimulate interest in the aims and objects of the Society amougst the future generation, the Junior Red Cross movement has been instituted which embraces the student population the 50 Provincial and State Branches, 27 have organised Junior Red Cross groups, which is a clear indication of the fact that this children's branch of Red Cross Society which seeks to develop a child's personality by encouraging his individual initiative, making him think and act, is being firmly established all over India At the end of the year the total membership of the

as against 6,17,081 in 15 976 groups in th previous years

Constitution—His Excellency the Vicero President of the Society The Managin is President of the Society Body ordinarily consists of a Chairman to b nominated by the President and 25 member of the Society of whom 12 are the Vice President nominated by Provincial or State Branches, sciented by the Society at the Annual Genera Meeting from among the members of the Society and 5 nominated by the President

The pres at Charman of the Managing Body is The Hon'bic Mallk Sir Firoz Khan Noon k 081, k 01E, and the Secretary, Sardai Bahadar Baiwant Singh Para 0BT

The Indian Red Cross Society professes itsel as an essentially Indian Society Most of its members (about 96 per cent.) are Indians It is controlled in India. Its headquarters are at The Society received a gift of a New Dellai lakh and a half of rupees from H H the Nawat of Junagadii to build headquarters offices in New It has branches in every Province of British India and in several Indian States These in whee are again sub divided into districts, so that there is a network of Red Cross centres ail over India The provincial branches appoint representatives to the Central Committee, called the Managing Body This Central This Central body, after deduction of management expenses, distributes all its income from invested funds among the branches for their activities

Like other Red Cross Societies, the Indian Society has never lost sight of its primary obligation to act as an auxiliary to the Army Medical Service in case of war It maintains a Central Supply Depot administered by head A large number of military hospitais quarters are supplied with additional equipment and comforts, and these are much appreciated The Bengal Branch has a Literature Committee, which supplies regular parcels of literature to troops, especially to those stationed in ionely outposts, and many grateful letters of thanks are received. Discharged soldiers suffering from chronic discases, particularly tuberculosis are referred by the Army Medical Service to the Red Cross, which follows up the men on their return to their villages, and arranges, where possible, for their treatment Under this scheme many hundreds of cases have been dealt with

The greater part of the Society's income is ent upon its peacetime programme it seemed to those who directed the Society in its early years that the first and most crying need was to teach mothers how to bring up healthy children and child welfare has been placed in the forefront of its programme

The health visitors employed in the child welfare centre are trained at Health Schools where are at Delhi, Lahore, Calcutta, Poona, Lucknow and Bombay Several students from India have been constant acceptance by the India have been granted scholarships by the League of Red Cross Societies to follow the international courses for Public Health Nurses in The training is now arranged by the Indian National Committee of the Florence Nightingale International Foundation with the London help of a scholarship given by the Indian Red Cross Society from the income of a special endowment received by the Society from the Silver Jubiles Fund Silver Jublice Fund

Special mention must be made of the Army care but unable to receive relial from any other child well re-centres most of which receive public or charitable Fund generous support from Red Gross funds. These generous support from Red Cross funds. I nesse-entres are run for the wives and children of B itish and Indian troop and are doing excellent work. The Central Provinces and Ber r Branch of the Society opened n Aursery School in Nagpur and tils ploneer school ander Red Cross auspices has proved a great success

Popular health education is carri d on steadily by the Scelety by varied methods Health lectures in many different vern culars are regul rly organised under Red Cross anapices

St. JOHN AMBULANCE ASSOCIATION (INDIAN COUNCIL) AND

St JOHN AMBULANCE BRIGADE OVERSEAS (EMPIRE OF INDIA).

The St Join Ambulance Association was Membe 8. Annual Members and Annual founded in 1877 by the Order of the Hospital Associates. Their respective subscriptions are of St John of Jerusalem in Lugiand, and has Rs 1,000 Rs 500, Rs 100, Rs 5 and Rs 2 for its objects -

- (a) The instruction of persons in remiering First Aid in cases of accident or sudden lilness The instruction of persons in rendering and in the trusport of the siel and injured,
- (b) The instruction of persons in the ele mentary principles and practice of marsing, and also of hygiene and sanilation, especially or a sick room ,
- (c) The manufacture, and distribution by saic or presentation of ambulance material, and the formation of ambulance depots in mines factories, and other centres of industry and trame

(d) The Organisation of Ambuiance Corps invalid Transport Corps, and Nursing Corps

(c) And generally the promotion of instruc tion and carrying out of works for the relief of suffering of the sick and lujured in peace and war independently of class, nationality denomination

An Indian Council of the Association was constituted on a regular basis in 1910 It has since issued over 5,54,000 certificates of proficiency in First Aid, Home Nursing, Hygiene and Sanitation and Domestle Hygiene and Motherer if and over 2,000 tokens such as Verwiese, Modelliers, and Reviews and Vouchers, Medallions inbels and Pendants for special proficiency in those subjects tion over 1,111,000 certificates have been issued in the elementary course for school students known as Mackenzie School Course in First Aid, Hygiene and Sanitation

The object of the Association is not to rival but to ald the medical man and the subject matter of instruction given at the classes qualifies the pupil to adopt such measures as may be advantageous pending the doctors arrival, or during the intervals letween his visits

During the year 1943, 73,410 persons attended courses of instruction in First Aid, Home Mursing Hygiene and Sanitation and Domestic Hygiene and Mothercraft Of these 53,173 qualified for the Assolution's certificates in 47,48 in First 4id, 2,80 in Home Nursing, 613 in Hygiene and Sanitation and 302 in Domestic Hygiene and Mothercraft

The St John Ambulance Association took up the question of training in ARP as early as 1938 Since then it has issued 5,015 certificates in this course, of this many are Brigade personnel During 1943, 51 classes in this subject were held at various stations and 4°9 qualified for certificates—72 for Instructors, and 367 for ordinary certificates. This instruction has thus made great strides at various towns in India in constitution that the level A.R.B. measures for the nection with the local ARP measures for the protection of civil population from air attacks In order to assist in the speeral drive in this subject the Government of India gave a grant of Rs 10 000 in 1941

The Association has five grades of members

The income of the Indian Conneil at head quarters consists primarily of interest of scenariles a fixed annual grant from Govern ment, fees for certificates and membership subscriptions

Their Excellencies the Vicercy and Viscounte: Was ell and His Lacellency the Commander in Chief as President, Lady President and Chairman, respectively, with 23 members form the Indian Connell The general business of the Inhan Council is conducted by an Lecentive Commitee of whileh Sir Cameron Bidengeh, ROLL esi, 10s, Knight of Grace of the Order of St John of Jerusalem, is the Chairman and Sardar Bahadur Baiwant Singh Puri, obe. the General Secretary

The St. John Ambulance Brigade Overseas is a m isormed alsciplined hody of men and women, all of whom are holders of First Aid and in the case of women also Home Nursing certificates They meel together recularly for practice, are Inspected and re examined annually and nader take to turn out for public duty whenever required

The Brigade in India is commanded by Sir Cameron Budenocia as Chief Commissioner for the Impure of Italia Under him are 10 Projects eovering almost all the provinces in Britin India and some of the Indian States, with he alguarters at Lalore, (aleutta, Bombay, Madras, Bangalore, Luchow, Nagrur, Patna, Delhi Karachi, Peshawat, Shilong, Indore, Cuttack and Sceunderabad, and there are three also on the North Western East Indian and G I P Rallwitz In charge of each Di tree there is an Acceptant Commission. there is an Assistant Commissioner or a Commis ioner necording to the membership strength of the District and as the work of the Brigade hes so much in the medical and surgical sphere, the Officers in Churge of the Districts are generally the administrative heads of the Civil Medical Departments of the respective pro-vinces It is their business to organise and maintain the training and efficience of Aminianes and Nurshig Divisions and to see that they are available for public service on occasions when they are required

At the end of 1943 the Brigade in India con sisted of 41) Aminiance Divisions, 187 Nursing Divisions and t4 Cadet Divisions (boys and girls) with a total membership of about 18,000 These Disions render first ald on public occasions for example festivals processions and public assemblages of all klnds. At times of special emergencies they turn out promptly and remain or distributions. and remain on duty so long as they are required Some of the recent occasions when Brigade members have rendered valuable service are the Bihar Earthquake (1934), when Calcutta members established a camp hospital at Monghy, the Quetta Earthquake (1935) when Lahore members living in-railway trucks at Quetta station gave a limital balance to a calcular neonle namely, Patrons, Honorary Councillors Life station gave valuable help to the stricken people,

THE IOINT WAR ORGANISATION

of the

Indian Red Cross Society and St John Ambulan e Association

Indian Red Cross Society and SI Jhm Ambulan e Association
On the outtre 1, of war in the received in India in many office it it is for the certification of the control of

of all possible comforts and help to Indian facilities in hospitals and convaisseent depot prisoners of war, and the other with the pur chase, storage and distillution of Red Cross stores and comforts for the slek and wounded

Parcels to Indian Prisoners of War-By the Central Organisation, every Indian prisoner of war in German hands is provided every week with a 10 ib food pired, specially planned to supplement prison camp rations and each man is given a periodical 'next of kin' parcel, containing comforts and necessities. and with warm clothing and footgear These are packed and despatched through the Inter national Red Cross Committee, Genera, by the Indian Comforts Fund, I ondon, for the Joint War Organisation in India

The present rate of dispatch is some 15,000 Each parcel costs approxi parcels a week mately Rs 68 To Indian prisoners of wai in Japanese hands individual pareeis could not, at the time of going to piess, he sent all com forts and Red Cross stores have to be despatched in bulk, as opportunities for shipping them occur, being distributed to the men by Inter national Red Cross delegates in the 1 ir East

Comforts for Sick and Wounded -To the sick and wounded of the Forecs in India, over 400 different kinds of Red Cross stores, including 115 items supplied by voluntary worl parties, are available through the Depots maintained by the Central and Provincial Joint War Committees

These depots supply on demand every military hospital in India, in addition to Field Ambil lances, Casualty Clearing Stations, Staging Sections, Field Hygiene Sections, Convaicscent Depots, Ambulance trains, hospital ships, river steamers and other miseellaneous medical units Hospitals and all medical units in the Middle East, Iraq, Iran, Aden and other overseas areas, as well as hospitals on the Burma Front are supplied either direct from India, or through the Depots maintained by the Joint War Organi sations Oversers Commissions, in Cairo, Bagin dad Basra and Ahwaz

It is an inspiring sign of India's progress in manufacture, that the purchasing officer of the Joint War Organisation has found it possible to place with manufacturers or deilers in India orders for the great majority of articles supplied by the Indian Red Cross to the extent of many lakhs of rupees In addition to Red Cross stores for the sick and wounded, very large orders for comforts and amenities for Indian prisoners of war are also placed in India

to the Joint War Organisation's activities is the capacity and range of part-time Voluntary provision of occupational and diversional therapy Organisations

personnel for this vainable work being large provided by the Women's Voluntary Service Physic therapy apparatus, specially designe for the exercise on approved lines of convalence. wounded is supplied to hospitals selected by the Medical Directorate

Aided by substantial grants in aid from the British Red Cross and St John, the India Joint War Organisation serves British sick and wounded in Indla and in Iraq and Iran, in addi tion to the sick and wounded, and prisoners o war of all Indian Services and the Merchant Navi

of Red Cross Services-The Growth growth of the Joint War Organisation 5 services cover haif the world-from tines Lurope in the West to Japan in the East-1: crapincally portraved in the great increase, year by year in its expenditure for the relief of those dependent on it Lypenditure during 1944 is estimated at Rs three crores, nearly twice as much as was spent in 1943, this great increase Lypenditure during 1944 is being due to the vast expansion of the Forces, the lnerence in the cost of supplies, and the need for reserves -to be built up

Public Support-Tho Indian Red Cross and St John is almost entirely dependent for the maintenance and expansion of its essential humanitarian services on the generosity of the That the public realise how people of India much these services mean to the sick and wounded and prisoners of war is shown by their ready response to the Joint War Organisation's appeals notably the first all India drive for tunds during Red Cross Week 1943, when over a erore of rupees were collected, and a further drive in 1944 is expected to result in a sum of over three erores

In addition to the services emimerated above, Red Cross Postal Message Bureum are main tained in Bombay, Caloutta and Madras for communication with relatives, other than internets or prisoners of war, in over 30 enemy occupied countries

The Indian Red Cross Welfare Service is a pald, uniformed body which indertakes duffes in British and Military hospitals, such as handi erafts, Red Cross Store Keeping, librarians, letters or messages to relatives, enquiries from relatives, protein and chapting services the relatives, postal and shopping services, the tracing of missing soldiers by interrogation of wounded comrades, and other activities. This service is not in any way intended to replace the activities of Members of the WVS The main purpose of this service is to obtain better An important and greatly appreciated addition eo ordination, and to undertake work beyond the

INSANITY AND MENTAL HOSPITALS IN INDIA.

In India, faellitles for the eare and treatment of persons suffering from mental disorders is still very lnadequate. To serve a population of voer four hundred million, there are only 17 institutions with a total recommodation for about 15,000 patients. Most of these institutions are ilttle more than lunatic asylums where hardly any provision exists for modern methods.

In India, faellitles for the eare and treatment of the persons suffering from mental disorders is probably for Mysore State Mental Hospital, Bangalore, which is a cost of over Rs 5 laklis, is very well equipped for the eare and treatment of 300 early mental eases. hardly any provision exists for modern methods of treatment

The Bangaiore Mental Hospital is not merely Many patients are even con modern in its buildings and architecture but

The supplemented by grants from Provincial Governments and Indian States Students are property of the MB, BS degree of the Panjab University, with which the College is afhiliated

Officer, Delin Province, and the Agent, Imperial Bank of India Delin The Honorry Secretary who is itso a member of the Governing Body, is the Deputy Director General Indian Medical Service An officer of Indian Audit and Accounts Service acts as Honorary Treasurer The College and Hospital, together with separate hastels for 186 Medical students and 95

Attached to the Hospital there are (1) a Training School for Nurse, and (2) a Training School for Dispensors All particulars as to admission and training may be obtained in the ease of (1) from the Nursing Superint adent, Lady Hardinge Medical College Hospital, together with separate hastels for 186 Medical students and 95

NURSING

Whilst findle ennot show the complete chain of efficiently-nursed hospitals which exists in England there has been a great development of skilled nursing of recent years. This activity is principally centred in the Bengal, Madras and Bombay Presidences, where the chief hospitals, in the Presidency towns are well nursed, and where large private staff are maintained, and a slice to the general public on payment of a prescribed scale of fees. These Hospitals also act as training matatutions and turn out a yearly supply of fully trained nurses, both to

to the services of a Sister, and a reduction in the fees paid for those servics. Thus members of the Association are enabled to obtain skilled nursing at moderate charges on a sliding scale of fees determined by the income of each patient

The control of the Association is in the hands of two Committees, one in England and one in India

The English Committee is responsible for the recruitment of the staff in the United Kingdom, but fully trained nuises are also elluble in India and the Central Committee has the power to enlist them on the spot

In addition to this duty the Indian Committee deal with all matters of administration delegating to the Provincial Branches questions of local significance

Her Majesty Queen Mary is a Patron of the Association

Excellency the Her Viscountess Wavell is President of the Central Committee in India

Hon Secretary -Lieut Col H Williamson, IMS

Chief Lady Superintendent —Miss C Wilson, Central Committee

Lady Minto's Indian Nursing Association. Vicerigal Estates, Simla, and Viceregal Estates, New Dolhi

The Trained Nurses' Association of India and The Association of Nursing Super-intendents of India.

The Trained Nurses' Association of India was founded in 1905 and incorporates the Association of Nursing Superintendents of India It is affiliated with the International Council Hospital, Palwal, Punjab of Nurses and the National Council of Women in India, and the Nurses' Auxiliary of the Chris tian Medical Association is an affiliated Associa Its objects are -

- (a) to uphoid in every way the dignity and honour of nursing profession
- (b) to promote a sense of espirit de corps among all nurses
- (e) to enable members to take counsel together on matters affecting their profession
- (d) to elevate nursing education and to raise the standard or training
- (e) to strive to bring about a more uniform system of education, examination, certifi cation and registration

The Association has accomplished a great deal in rusing the standard of nursing throughout India, in improving nursing legislation and in courses for nurse providing post graduate administrators, sister tutors and health visitors

It strives in every way to promote efficient and adequate nursing for the siek and to improve conditions, not only for nurses but primarily the Nursing Journal of India Rs 6 and Rm for patients The Association is self supporting whose monthly salaries are Rs 50 or under a and is maintained by the nurses themselves

The branches of the Association are Thus Health Visitor's League, the Midnives' 1 d to and the Student Nurses' Association number of qualified members 19 3,103 student members 1,345, totalling 4,448 official organ of the Association is The Nu Journal of India

The year 1918 was doubt disconverting the Germint force to il justice a dispetiency of indian W mas Sifrage but this project a mor difficult in the Lit was a dis pro ed a mor difficult in ther pro ed a mor silincult in ter it was a di-ampoil e not first in t th ugh the Secretary of State had give a ymp thetic reply to the All I dl W men D put tion yet when its Sch eof Ref I drawn p by him d Lord Lh im I rd as th toon i his left to India w p billed ome u I w w wa mada w polited ometi It was wigt the ris of the positical agits the night its wide ing of the electorate was one tion is: Home Ruls between 1914 and 1917 I the ref rms suggested. When the South

borough Franchise Committee was formed to almost entirely based on property, it remained investigate the suggestions regarding franchise in this Scheme, the women sulfragists took every means to bring to the notice of the Committee all the evidence which showed the need for, and the country's support of, the inclusion of women in the new franchise

After the introduction of the Government of India Bill Into Pirllament in July 1919 a number of Indian deputations proceeded to London to give evidence before the Joint Select Committee of Members of both Houses ol Parliament which had been appointed to place the Reforms on a workable basis Mrs Annie Besint, Mrs Sarojini Nahin and Mrs Miss Herabal Tata were the Women who were heard by the Committee in support of the extension of the franchise to women in India

The House of Commons decided that the gues tion was one for indians to answer for themselves and while retaining the sex disqualification in the Reform Bill they framed the Electoral Rules in such terms that if any Provincial Logislative Conneil should approve by a resolution in favour of women's franchise, women should be put on the electoral register of that Province This was the only provision regarding franchise matters which might be changed before a it years' time limit Until after that period women were limitigable for election as Legislative Councillors

Reviewing the position about ten years later the Simon Commission showed the extremely United extent to which wonten enfranchised in the manner set out above, had become quall fled as electors in keept in Burnar where it was comparatively high the percentage of women electors to adult female population was less than one in Madras it was one, in Bombay 8, in Bengal 3 in the United Provinces 4 in Bihar and Onesa 5 and in Assam 2—in Burma it was 4 6 per cent

Madras led the way in the matter of women's franchise and under the operative provision of the Government of India Act, women became enfranchied Other provinces followed suit, and at the time of the inquiry by the Simon Commission seven out of the nine provinces had acquired the right Very con women began to adorn the benches in legi-lative chambers first by nomination and then by election justified the confidence placed in them by spon foring and successfully carrying through many measures of upilit and reform in regard to the status and influence of women. They had so much proved their worth that the Simon Com mission remark in their report 'The women's movement in india holds the key of progress, and the results it may achieve are incalculably It Is not too much to say that India Freat cannot reach the position to which it is pires in the world until its women play their due part rs educated citizens

Burlag their conclusion on these observations the Shuon Commission whiled to bring about a substantial increase in the cristing ratio of young to man voters. In exerci ing the option allowed to them of enfrenchising women the arm term as man, the proximital legistatives did instead racks a significant per ture lit to long is the qualification to note was note, compared to 29 million men.

gesture, because India's women do not of property in their own right

The Simon Commission affirmed that a furth step in developing women's suffrage in Ind should be taken immediately and added may perhaps be found possible to add to the present qualifications two others, nimely, (being the wife over 20 years of age, of a ma who has a property qualification to vote an (11) being a widon over that age, whose husban at the time of his death was so qualified I uddition, the educational qualifications shoul apply to women over 21 as well as to min The Simon Commission maintained that women suffrage should be a cardinal point of the "frat thise system" and suggested "qualification for the vote which will not confine it to the few women who have property qualifications"

During the last ten or fifteen years, the women of India have made enormous progress in severa direction. A great awakening has dawned of them. The ruising of the age of consent for nurriage, then holition of the prietice of dideating girls to temples, the demand for legal and property rights vis a-vis men eint odled in come of the reform meisures—all have tended to raise the status of indian women in their own eyes as well as in the eyes of the world nave marched from reform to reform, and their outlook is for ever widening The Gundli movement evoked an unprecedented outburst of service and sacrifice among Indian women who were thrown into the thick of a politica struggle from whileh the vemerged fully conscions of their poilth il rights and responsibilities. The part plived by the two representatives of India nominiood at the India Round Table Conferences held in London brought them and their kind in the linc-light

Small wonder, therefore, that the Government of India Act of 1935 gave Indian women political rights far in thanne of those enjoyed by them before that dite In terms of number of series women have been allotted 6 seits out of a total of 150 reserved for Britl h Indla in the Federal Council of State and 9 out of a total of 250 x0 Assembly reserved in the laderal Provincial Assembles, women have ro creed to them 8-1 ats in Madras, 6 in Bombas, 5 in Bengal, 6 in the United Provinces, 4 in the Punish in Biliar, 3 in the Central Provinces and Berst.
1 in Assam 2 in Orlses and 2 in Sind

But by far the greatest improvement in women s political rights occurred in the librall sition of the frinclilse qualifications affecting Women live been entranilised wie linve the property qualification in their cos right, or are wives or widows of menso qualified or are wive of men with n service qualification of the peneloued widows or mothers of members of the military or police forces or who po sees in the recognition women not holder its literies quilification. Women not holding it requisite qualification in their or n eight est required to apply to be enrolled, staffing their derived qualification, but this procedure lat been wrived in some provinces. By merry of been writted in some province. such enfranchisement It is orthwated took than six million women fagrings 316 (4) units the Act of 1919) have been given the right !

awakened womanhood of Indla irrespective of the differences of easte and community, race and

class

This organisation, it may be noted, has latterly shown a tendency to transgress the requirements of sectional plea and strayed into wider political It is not, however, difficult to explain aeth ltv this development The women's movement gained considerable impetus by the part played by and the status accorded to, women in the intensive politlerl movement conducted by Mr Gandhl and the Congress since 1920 This asso clation, while it has undoubtedly brought women to the forefront of public activity, has also served to bring their outlook in line with that of the There are doubtless members of the fair sex who hold pronounced views on women's rights and yet do not share the extreme doctrines of Mr Gandhlor the Congress but It can safely be said that they are in a minority in the All-India This will explain the Women's Conference somewhat pro Congress polltical views expressed at the annual sessions of this body

Kasturba Fund — The work in connection with the emancipation of Indian womanisod and the improvement of the lot of Indian women, particularly in rural areas, obtained an enormous stimulus in 1944 45, thanks to the well supported Kasturba Memorial Fund created for the commemoration of Mr. Gandhi who dled under detention in February 1944 At Mr Gandhi's request the trustees of the fund deelded to apply the collections to the establishment of a countrywide organisation to improve the lot of Indian women, especially in villages. This is proposed to be done by providing opportunities for Indian women to secure cducation, acquire knowledge of basic spiltary and luglenic lines and to become alive to their social and political rights. An essential part of the plan is to equip rural areas with up to date maternity hospitals and elinics In order to fulfil this ambitious project a large number of women are being trained in special eamps so that after adequate equipment they can scatter themselves throughout the length and breadth of the land and carry the message of women's uplift to every nook and corner of rural India Among the subjects handled in these training camps are first ald and home nursing, child welfare, village nursing, licalth vielts, rural sankation, balanced diet and cheap remedles The object of these training camps seems to be the raising of an army of experts called "Gram Sevikas" (servants of the village)

Women Jurors —A notable development affect right Indian worsen was the amendment of the Rules of the Bombay High Court enabling women to sit as jurors Lighty women responded, and in July 1944, for the first time in India, fifteen wermen were summoned to serve the large of the on the jury at the criminal se-sions of the Bomba, High Court Thanks to the whim of the ballot box three women were empanelled to try a case in which a young man was enarged with stabbling a woman

Women in Miner The keen awareness which the leaders of the women's movement and the ting word is illustrated by the repeated care and preservation of food, avoid waste is

protests registered by them against the lifting of the ban on the employment of wemen in These were echoed in Parliament when mines made apologetie Cabinet spokesman references to the need for ensuring adequate supplies for coal for war purposes and premiled to secure a revision of the position at an early date

Bombay Session —The annual session of the All India Women's Conference was held in Bombay in April 1944 under the presidentship of There was no se sion Shrimati Kamaladevi of the conference till the end of 1915 "The Women's movement," she sald in her presidential address, "Is an essentially social movement and part of the process of cnabling a constituent part of society to adjust Itself to the con stantly changing social and economic conditions, and trying to influence those changes and conditions with a view of minimising irritations and conflicts and making for the largest measure of harmony Thus it operates as an integral part of the progressive social structure in the broadest sense, and is not a sex war se as many mechanically believe or are led to believe for the issues round which it revolves, such as right of votes, inheritance, entry into professions and the like are an intrinsic part of the bluer Issues striving to overcome the prevailing undemocratic practices that deny common rights to certain sections of society. It is therefore a common of the common of the common common common to the common co therefore a comrade to the struggle of the backward castes and the long oppressed class seeking alike to regain the lost inhoritance of man's inclinable relative. man's inalienable rights

"The Conference would do well to concentrate on a few items and do them well First in importance I would place the training of social services, so eminently needed yet so grievously needed closely allied to this is the neces ity for training women in handlerafts and fostering hand industries. They will provide a means of livelihood to many helpless women. Incident ally, they will add to the industrial production of the country of a live hand to the country of a live hand to the production of the country of a live hand to the line had a live of a liv our country at a time when it is not able to meet our needs

"As essential and as searce are the health As essential and as searce are the near services, particularly nursing A rough set of figures say there is one Nurse for every 56,660 people or to 250 square miles The Health visitors are about one per 350,000 The materials and child walkers may exact is mostly maternity and child welfare movement is meetly a week end show and the entire country can boast of only 800 centres to enter to such a real area and normalistics. area and population. All this makes an appar While admitting that the Women Conference is not the body which ean build up complete health service to meet the country requirements, I feel sure it ean make a smill in appreciable contribution. It can recruit were to the nursing profession, encourage many rest girls to take courses in public health nurser, first ald, industrial, hygiene, etc., and also for more of such courses introduced in our tdictional and specially the title of the courses of the course of the courses of the course of the courses of the course o tional and social in-titutions

manufactured and sent to the Government Oil) for a period of five years commencing f Fretory, Calicut, for purification and blending Up to 30th June 1913, 18,612 gallons of refined oil were produced at the Government Oil Inctory and 21,933 grilons were sold. The Government specified the construction of a factory in Caheut for the manufacture of shark liver oil The construction of a building for the oil factory

The educational work of the Department is becoming one of its most important branches In training men in the technology of curing, eanning and oil manufacture, in co operative propagands and the supply of zoological speelmens for the use of college classes and museums The last named has filled a long felt want and is contributing materially to the advancement There is now no need to obtain specimens from Europe as they can be laid from the Laboratory Assistant, lisheries Station, Lanur, Madras, at moderate prices A Lechnological Institute was opened at Institute was opened at Institute of the first transport of the 1942 to provide for the training of teachers in fishery technology after their regular training in teachers training schools and to provide courseof instruction to fishermen and others interested in different branches of the fishing industry including navigation

Curing -Fish curing is practised l ish extensively everywhere on the Madras coasts its present success is due primarily to Dr Fruncis Day who, after an investigation during 1869-71 of the fisheries of the whole of India, pressed for the grant to fishermen of duty free salt for euring purposes within feneed enclosures He advocated much else, but the time was not ripe and the salt concession was the sole tangible result of his long and honourable efforts salt suggestions were necepted by the Madras Government, and from 1882 a gradually increasing number of yards or bounded enclosures were opened at which salt is issued free of duty and often at rates below the local cost of the salt to Government At present there are 105 fish curing yards scattered along the coast During the year 1912-43, 2,516,881 mainds of fresh fish were brought to these yards for 387,250 curing and maunds of were issued for the purpose. The transactions in these yards resulted in a surplus revenue over expenditure of Rs 15,550

Pearl and Chank Fisheries —While there is no prospect of a pearl fishery for some years to come, owing to the absence of spat fall in the banks, a distinct revival in the clink trade | District was evidenced in the keen competition for the purchase of the last two sersons chraks A total of 458,894 chanks were fished during the verr 1942 43, which will fetch a gross revenue of and other local authorities at a nominal Rs 1,29,776 The rearing of Pearl oysters in for introduction into mosquito hunted continuity with the feedbar of th captivity with the implied possibility of the of water, these anti-malanal operations production of cultural pearls near Krushadai proved snecessful in the places where the Island Pamban started in 1922 has been accounted to the place of t Island, Pamban, started in 1933 has been success- authorities have given proper attention t Another experiment in marking of chanks direction given started in 1931 to study the rate of growth, of Gouram in rural areas was actually pu mortality and migration of the chank in its operation by stocking fine tanks selecte natural haunt, is continuing and so far 4,631 the purpose

General—The value of the fisherics of lishery knowledge and far sighted and eo this extensive deltaic region lies primarily line the enormous area occupied by inland investing public will be considerable waters—rivers, creeks, including the samples, opinion of the experts is that no stream trees. waters—rivers, ereeks, jheels, odd swamps, opinion of the experts is that no stream treets asy nothing of paddy-fields and tanks.

These swarm with fish and, as the Hindu population are free to a large extent from the aversion to a fish diet which is widely prevalent among the better eastes in the south. the demand for fish is enormous Rice and fish are indeed the principal mainstay of the population and not less than 80 per cent of the people consume fish as a regular item of dlet It is calculated that 1 6 per cent of the population is engaged in fishing and its connected trades, a percentage that rises to 2 6 in the Presidency, Rajshahi, and Dacea Divisions 190,865 persons in Bengal subsist by fishing and 272,579 are maintained by the sale of fish. As a freshwater fisherman, the Bengali is most in gonlous, his traps and other devices exceedingly clever and effective—in many cases too effective -so eager is he for immediate profit, however meagre this may be The greatest inland fishery is that of the hilsa (Hilsa ilisha) which annually nugrates from the sea and estuaries in innumerable multitudes to seek spawning grounds in the Ganges and the other great rivers Other valued and abundant river and tank fishes are the rolm (Labee roluta), the hatla (Catla catla) and margal (Curhina margala), prawns and shrlmps abound everywhere Of Important slirlmps abound everywhere Of Important fishes taken in the lower reaches of the rivers and in the great network of creeks spread throughout the Sunderbans, the blickti or bhetki (Lates calcarifer) and the muliets are the most esteemed, apart from these estuarine fishes the most valuable sea-fishes are the Mangofish or Thread fin or Indian Salmon (Polymemus) and pomírets The sea fisheries are as yet little exploited Taking everything into consideration, it can be safely stated that the fishery wealth of Bengal is enormous and is far in access of any other province

Historical — Following the inquiry begun in 1906 by Sir K G Gupta, an investigation of the steam trawl potentialities at the head of the Bay of Bengal was undertaken, the trawler Golden Crown being employed for the purpose The results showed that there are extensive areas suitable for trawling and capable of yielding large quantities of high class fish Much atten large quantities of high class fish tion was devoted during these trawl cruises to the acquisition of increased knowledge of the marine fauna, the results being published in the Records and Memoirs of the Indian Museum For various reasons, the chief perhaps being the hostility of vested interests, the lack of cold storage facilities and the loss of time involv ed by the trawler having to bring her catches to Calcutta instead of sending them by a swift tender, the experiment was financially a failure and was dropped With ever-increasing de-mand for fish in Calcutta and the concurrent rise in prices, the prospects of remunerative steam-trawling are now much more bright. The trade, however, is a difficult one to organise The trade, however, is a difficult one to organise disheries are concerned Bengal has of necessard without a rare combination of technical a more limited scope for its activities the

successfully with a company prepared to de and utilise the local fisherles carried on by I fisherman, provided the two main difficult rapid transport and proper preservation c Originally one fish are overcome Department served the needs of the two Vinces of Bengal and Blhar and Orissa tion was effected in 1920 after which fisher Bengal were administered by the Direct Agriculture The Bengal Lishery Depart was abolished under retrenchment in 1923

During a lapse of 14 years after the clesu the Fisheries Department, the price of fit Calcutta has been soaring high consequent of rupidly increasing demand and the unher monopoly exercised by the small group of ve Interests The economic condition of the ac fishermen was gradually becoming worse di oxploitation by the capitalists and the fish in general were getting depleted due to val causes at work With the increase of distress public naturally clamoured for the re estab ment of a Fisheries Department to protect fisheries interests and to organise and dev the fishing industry on modern lines and improve the general economic condition of fisherfolk. The Bengal Government there appointed a Fisheries Expert to survey existing condition of the Fishing Industry in Province and Industry in the Condition of the Fishing Industry in the Condition of the Fishing Industry in the Condition of the Fishing Industry in the Condition of the Fishing Industry in the Condition of the Fishing Industry in the Condition of the Fishing Industry in the Condition of the Fishing Industry in the Condition of the Fishing Industry in the Condition of the Fishing Industry in the Condition of the Fishing Industry in the Condition of the Fishing Industry in the Condition of the Fishing Industry in the Condition of th Province and to suggest schemes of developi with a view to augment the fish food supply examine the ways and means of bringing abo reduction in the ruling prices of fish, an stimulate commercial enterprise in spet transport, better marketing arrangements, establishment of Cold Stores and Facti for fish by-products. The services of Dr. Ramaswami Naidu from the Madras Fish Department were requisitioned by the Be Government He surveyed the industry submitted a report to Government as a re of which a Department of Fisheries was stal in May 1942 with Rai Bahadur Dr S L H of the Zoological Survey of India as its Direc to organise the fish trade under the War er gency conditions, to conserve the exist supplies and to conduct investigations on t fisheries with a view to increasing the food suf in the province

Fresh water mussels are used extensively Dacca in the manufacture of cheap buttons and in many cases pearls also are for in the mussels which the pearl dealers gat and sell in the various parts of India Dacca bangle factories carry on an import local industry of very ancient standing, the material is almost entirely obtained from South India and Ceylon chank fisheries alrereferred to

- The establishment of a marine aquarium in Bombay and Karachl, if they are able to pay their way as the Madras aquarium does
- The establishment of a bureau of fishcrits information
- The advisability of the transfer of the fish curing yards to the control of the Local Government, and
- The encouragement by the Bombay University of marine biological research

Dr Sorley, in his report, also referred to the value of employing fast motor launches to transport fish to the consuming centres in Bombay from the catching sites

New Era Started —A move in the direction outlined by Dr Sorley was made towards the end of 1933, when the Government of Bombay launched an experiment implementing in some ways his suggestions. The experiment was formally inaugurated by Sir Frederick Sykes, the then Governor of Bombay, at Danda, and was undertaken in co-operation with the head of the fishing community at Danda For the purpose of the experiment a launch was obtained on loan from the Royal Indian Navy (then the R I M) and suitable alterations were made to adapt it to the purpose of a carrier launch. The results achieved by the working of this launch were very encouraging rapidity with which the fish was transported in a much fresher state than had till then been possible aroused the interest of the fishermen, who realised the benefit to their trade of using fast motor transport to bring the fish to Bombay from the catching fields

placed in 1934 an order for the construction of two launches the "Lady Sykes" and the "Sir Lastly, a fisheries information bureau h Erederick Sykes" for the use of the fishermen also been set up. The function of this bure nt Danda has been encouraging is evident from the fact ed with the local and other fisheries. That every year since then has seen an addition information collected by the bureau to the number of vessels. The following four useful to the fishing industry, as it furnish vessels have been built since then by parties information not available to them before connected with the fishing trade

(1) The "Lady Sykes", (2) "Sir Frederick Sykes", (3) "Lady Brabourne, (4) 'Lord Brabourne', (5) Nooremohamadı''
(Old), (6) 'Nooremohamadı'' (New), (7)
'Chandtara'', (8) "Karamat' (9) Salamat',
(10) Karımi'', (11) 'Khajalınd', (12)
Murli', (13) 'Ruparel', (14) 'Rizakı'',
(15) Hydarı'', (16) 'Lada Colville'' All (5) Nooremohamadi" these launches have been built either in Bomb iy

The launches operate between Bombiy and the Kanara coast. The success which attended the introduction of the experimental launches encouraged private individuals to invest in similar vessels to transport fish. The number of privately owned launches at present is 16 @

or along the coast

Larger supplies of fish made available by the launches have induced the flow of private capital in Bombay During 1944 45, 540 gallons of into channels intimately bound up with the fishing trade. Several lee factories and cold later than the storage plants have since been set up at Malwan Vitamin concentrates and Vitamin tablets.

Dr Sorley's more important recommendations on the Ratnagiri coast, and Chendia, on Karwar coast In Bombay, quick free The establishment of a marine aquarlum plant employing the Z process has been inst by a Russian technician at the Kermani me at DeLisle Road and an icc factory and a storage plant have been constructed on the of Crawford Market feature of the last plant is that it has a nui of small chambers which are hired out at s fees either to one individual or to ser collectively This plant also provides for quick freezing of fish

> There is also an see factory and a q freezing and storage plant at Sass Dock (Bombay), where all the launc both Government and private, land their eate This factory and cold storage plant have me long felt want and proved an undoubted b both to fishermen and owners of launches sailing craft It has obvirted the need obtaining ice from remote centres in the c thus saving a good deal of time and expenditi The existence of the cold storage plant at Dock is a welcome facility to the fisherm who are now able to store catches at any h of the day or night when retail vendors are on the spot

A unique feature of the Bombay Governmen fisheries scheme is the provision made to tr youths of the fishing community in the runn and maintenance of motor launches with t ultimate object of enabling them to take chai of their own launches whenever they decide go in for these on in extensive scale I improvement of the economic condition of t fishermen is the paramount considerate kept in the forefront of the whole schen which aims at confining the entire fish trade to the fishing community itself a climinating the need of employing technic hands who are not fishermen by either easter Encouraged by the results, the Government hands who are not fishermen by either easte

That the progress of this experiment is to collate and supply information connec ed with the local and other fisheries information collected by the bureau

The war has led to an investigation of the possibilities of the manufacture of oil from shark livers to replace the dearth of supplies occasioned by the stoppinge of imports of Con Liver Oil from Norway

A simple process of oil extraction, not involvin the use of any complicated machinery, we devised and demonstrated by the department to the local fishermen and to the fisherme at Ratnagiri, Jaitapur, Malwan and Shirodi The demonstrations were largely attended and the fishermen were greatly impressed by the fact that a new occupation and a freeli source of income had been opened out to them. A a result of the demonstrations the fisherine earnestly took up the work of oil extraction and have regularly been sending to the Fisherine Department oil extracted by them. This is refined by the department of the chemistry

The Punjab.

The main duty of the district staff in the to he adopted for improvement of trout fisheric past has been to enforce provisions of the Punjab | The action taken is as under — Fisheries Act 1914 and conserve the existing Fisheries by patrolling livers and streams, in Kulu Valley was changed from "1st November catching and prosecuting poachers and issuing to 1st day of March" to "10th of October to 1st day of March" to "10th of October to 1st day of March" (both days inclusive) however, now been entrusted with Development of Fisheries in addition to their duties of policing and patrolling. The staff were given suitable training not only theoretically but also practically in this connection in March, 1943, and have established a number of fry Farins in each district under their control to stock suitable stretches of water with fish. The number of fishing licenses issued during the year was 10,057 as against 8 203 in the previous year. The increase is due to strict supervision by the staff and rise in the price of the fish which induced the fishermen to take out heenses receipt from l'isheries in 1943 44 amounted to Rs 1,14,184 as against Rs 78,243 in 1942 43

The catches of fishermen were on the whole at Mahili satisfactory in all the districts

Trout -160 Trout licenses for trout waters were issued in Kulu as against 174 of the last vear The decreise is due to the fact that visitors to Kulii were less than last year and a majority of the European Anglers that came for decrease in the issue of monthly and sensonal heenses. As compared with the last year the fishing conditions in the Kulu Valley are improving gradually. Tark in May, 1943, a preceding of the Arglers and other residents of Kulu Valley was convened under the Chairman. Kulu Valley was convened under the Chairman-old trout farm at Mahili a new site at Pat townsissoner at Fatala Additional Tunnelal Kulu has been acquired for another trout farm townsissoner at Fatala Additional Tunnelal Kulul has been acquired for another trout farm Commissioner, at Katrain to discuss the measures. This site is fed by Sojun Nali which is no

A good number of sharks (Saw fish, Hunmer head, and other several ordinary sharks) are explured specially during the months of August September and October and again February and March One variety, the "Basking' shark March (Rhinodon typicus) which grows as large as 60 feet is occasionally fished with harpoons. Its liver yields a large quantity of oil

There are at present two private shark liver oil factories and they are manufacturing a fairly good refined oil, fit for therapentic purposes which is being marketted both as concentrated (20,000 1 u s) and standardised oil (1,600 1 u s)

There are two distinct oyster fisheries in Sind,—both present in the creeks which constitute the mouth of the Indus and its network, specially between Karachi and Ketibunder These are (1) Edible Oyster and (2) the windowplue oyster which yields peuls. An auction held in the year 1944 45 yielded only Rs 800 under certain conditions

The most popular fish in the Indus is the Pulla or Palloh (the well known Indian Shad) This fishery is under the control of the Revenue Dept who lease out different stretches of the Indus The Dumbra and other fresh water earps and prawns are other items in the Indus fisheries

The Hub river which forms the west boundary from Sind and Baluehistan, contain the wellknown sporting fish-Mahseer (Barbustor)

Aplianius dispar (Cyprinodon dispar Day) a well-known mosquito larvivorous fish present in fresh water pools around Karaehi and is used to a certain extent to combat malaria

Two Dehydration Factories started here to meet the requirements of the Defence Forces stationed in India were closed this year as such products were no longer in deniand

Madras Fisheries Department as Fisheries Expert | centres

in report on this is now under preparation. In the meantime the following schemes for the The priving comprise of the following three development of the fishing industry were not. The names are naturally in the local prepared by him and submitted to Government

- Edible oyster culture and establishment of an oyster park
- Development of prawn fishery and manu ficture of seini dried prawns
- The establishment of Smoke houses for smoking Hilsa and other fishes
- The establishment of five Government fish enring vaids in the Sind coast for production of good quality eured fish
- Stabilising the fishing industry and improving the socio economie conditions of the fisher folk
- 6 The establishment of Hilsa Hatchery and a fresh water fishery research station
- The establishment of a Marine Aequanum ın Karachı
- Deep sea fishing experiments with modern type of power crafts and tackle and introduction of fish emrier launches for expeditious transport of fish
- Establishment of demonstration plants for the manufacture of fish manure and fish meal by the utilisation of fish waste and non economical fish
- Establishment of a Marine Biological and Technological station at Karachi
- Establishment of an up to date whole sale fish market with cold storage and ice packing freilities close to the new fish harbour at Karachi proposed by the Port Trust
- State control of the production of shark liver oil and its other products
- Of the above schemes the first four lave already been sanctioned by the Government of Sind and are being put into execution

Other schemes for the conservancy and development of fresh water fisheries of the province are under preparation

Steps have also been taken to improve road In August 1944 the Sind Government communications for expeditious transport of appointed Dr M Rimiswami Naidu of the fresh fish from fishing centres to consuming

United Provinces.

risheries investigations in the United Provinces date back to the sixtes when Dr Day, as Inspector General of Fisheries made a survey of the inland fisheries of India. His report on the fresh water fisheries of India. (1876) includes replies to his questionnaires to District and Taluq officers in the United Provinces which contain valuable information, most of which still holds good. One of the results of Day's the general impression that Mr. Edge dealt anyestigation was the engetinent of the Govern

tion with a reference from the Punjab Govern- his recommendations in the report and his

Fisheries investigations in the United Pro | ment about the regulation of fishing in the

the general impression that Mr Edge dealt mainly with sporting fish and not with fish as food for the general public, his investigations were comprehensive and his recommendations by the Government of the U P in 1920 in connection with a reference from the Punjab Govern-

Travancore,

is nithingted to the University of Tray incore and saited fish, the greater part of which is sold is now under the control of the Professor of in the adjoining tamil districts and Ceylon Marine Biology and Pisheries who co ordinates research and idministration

The coast line of Francheore is 172 miles long and is margined by a shallow water area, within the 100 fathon line, of nearly 3000 square miles Out of this vist expense of fishable waters, only villstance of 5.7 miles is exploited at present and the value of the industry to the State at present is estimated at Rs. 1,20,00,000 per year. The surf swept coast is singularly deficient in harbours and during the monsoon months. fury of the breakers is a source of great limdrance to fishing From Cape Comorla to Trivandrum the unsinkable entamarans composed of logs tied side by side is the only possible by rall. Although, by this means, it was found easy going fishing erift. From Quilon to the possible to send frozen fish to all important northern most boundary of the State small inland towns in South India, the method did not country made canoes are used and from October provo a commercial proposition owing to its to June, when werther conditions are favourable high cost and the competition of iced fish from seine nets are extensively employed Malabar, consequently it had to be abandoned

The esteemed table fish of the coast consists. of pomfrets, seer fish, several species of horsemackerel, tunny, Jew fish, whiting mackerel and thread fins In economic importance, however, shoul fish and fish of inferior quality such as butter fish, sardines, white batt and ribbon fish take precedence Butter-fish, sardines and prawns are abundant in the northern half of the eorst, white eat-fish, white bart and ribbon fish are predominant in the southern half. This This eonspieuous difference in the distribution of shorl fish has been found to be mainly due to shorl fish has been found to be mainly due to the differences in the nature of the ser bottom During favourable seasons, butter fish, white batt, ribbon fish and eat fish are so greatly in excess of the local food requirements that large quantities are salted and dired both for inland consumption and for export Travaneore pure form after elliphorating traces of free acids

The Department of Listenes of the State exports annually about Rs 23,00,000 worth of

As the important shoal fish are seasonal in their appearance certain months are more favourable for fishing than others During these favourable seasons large entenes are landed dally along the coast and the only method of conservation of the large unsaleable surplus is salting and drying. But realizing that salted fish is devoid of some of the essential properties of fresh fish, the Government opened a refrigerating plant in the metropolis for the preservations and storago of fresh fish

The Department also succeeded in devising a cheap and efficient method of picking frozen fish for transport over distances within 72 hours

for the duration of the war

Fish Curing -The prevalent methods of fish curing being impefect and very often universale the salted and dried fish produced in India are usually inferior in quality, which accounts for the low prices they fetch and the limited demand for them In order to stimulate demand by improving the quality, the Department of Fisheries has prepared a scheme of higheries methods of curing and experiments on dehydra tion of fish are in progress

MYSORE STATE

As recommented by the G me Laws poods and Red libratoris? beet concommit the Go erms t i Mysore established been of it. If k on spels of left daily it to Dy truck t 1 1910 a sign of soon faddraneus fool in 1 mch a C the second of the second

The main object of the 11 ners. Department ! is to effect proper conservation of the fisheries on scientific lines with a view to hierea-ing the production of food fishe and to alleviate the economic condition of the fishermen in the

うしつしゃ Job am with at is proposed to start the di velopment work in selected areas in the Kolar Diefrict and gradually extend it to other perisof the State

COCHIN STATE.

The marilime State of Cochin South India, plan for a lag smoke and heat from a common has three types of flately namely, marine, oven for smoking and dehydrating separate lots estaurine and tre h witer. Its soulle cu stline lucludes 19 700 acres of bulwiter abounding in different varieties of fish brought in through the natural openings in Cochin and Grang more Thanks to the heavy moncoon months bearing down rich feed from the mountain and fore a tracts of the Interior the State has her hest so i lishing during the ramy balf of the year

ត្តពិព័ត Marine Estuarine Fishing -- The State has over 800 see going boat, which brim in on an average 23 lakits mounds or the every very consisting of Sardine and Macketel (thron h gillingts) miscell meons varieties life butter fi in ribbon fish, sole fish silver bellier and horse mackerel (caught by bost seine) and shorks rays, seer and other bigger varieties (he haning)

The bulk of the mansoon citch is needed to meet the demand within the State itself while a fraction is salt cured and exported to the markets of Travancore and British India. The annual export trude in cured fish amounts to about its 5 likhs per year. Due to wir conditions, the demand for fish within the State has so mounted up of late that no surplus la now left for its export in ice

Prayn Fishing -The sea, the extensive lagoous and the piddy lands on the cost produce of the year All the varieties are nourshing and tasty. Before the war Burma in general and Rangoon in particular used to provide the best market for hard dried prawn pulp from the State, the annual export amounting to Rs 15 lakhs, but with the fall of Burma now markets have been explored in India and Cevlon with partial success. The Department of Indicates has now resources for preserving prawns in air-tight times which keep the product well preserved for periods ranging from 8 months to one year In the post war era it is quite likely that the State's rich crop of prawns may form raw materials for a caming industry within tho State

Preservation—Salt enring is the most widespread and perhaps the only preservation process which is dependent on the sun—Artificial drying or dehydration is generally resorted to during the monsoon Smoking of fish is also encouraged as there is a demand for this from The Department has devised a Department the Army

of fish in different chambers

Fish Oil Industry - Shark liver oil Riv fiver oil the now being produced by the Department. The hammer heads and saw to he a see fumons for the healing qualifies of their oli particularly in ophthalinic and pulmonary troubi thar liver oil which has a very high percentage of Vitamin A has an exceedingly good mariet in the State. The Cruder form of this oil is used for caulking boats and polithing The stearm is made into in ecticidal leather oans and lotions

Shell Fish Industry -This Indu-try confined to the collection of little heaps of shells vashed ashore. Shells are calcined in Hins to produce lime as a cottage industry Near Wellington Island in the State, orsters are available, their meat being u ed as a specific la westling ill cases and also as a delicaer. The Hehry Department is now exploring the shella.

Farming-T-fuarino fish farming is Tish another contribution made by the Department In the development of the fishing industry A splendld ground for the enture of mugilis and mill fish has been discovered by transforming the unused built for paddy or cocount into a sort of nursery. Separate areas for fishes such as the Bellith, the Indian salmon and lew Ish which appeal to the sporting angier and the enter alke are also marked and planned for systematic operations

Deep Ser Fishing—The State is working up a scheme for the operation of the bort seine of Malabar with the basal platforms of net for muckerel and of drift acts and hook and line to burte white the basal platforms. for bigger fishes like seer, chornimus, rays and shirks

Fire Socio Teonomie Aclivities of the Depart ment are directed towards the hguldation of niliteraev amongst fisherman, by establishing five fishery schools manned by teachers from the fisher community trained in fisheries technique Canals and roads for facilitating transport of fish are also being opened by the Department Co operative Societies have also been established and are being under the auspices of the

The Forests.

many Parts of India indicated the necessity for a strong forest policy, but, whether or not our carly administrators realised the importance of the forests to the economic and physical welfare of the whole country, the fact remains that little or nothing was done to cheek uncontrolled destruction with its inevitable results in erosion and sterilisation of the fertility of the land up for cultivation or are converted into reserved. The years between 1850 and 1857 witnessed the or protected forests. The total forest area of first beginnings of forest conservancy in Southern India During the preceding twenty years far-sighted individuals had repeatedly urged, both in Madras and Bombay, that scientific advice in the management of the forests had become an urgent necessity In 1847 the Bombay Government appointed Dr. Gibson as Conservator of Forests for the Presidence Madras dld not follow this example until nine years later, when Dr Cleghorn was appointed Conservator It was a Memorandum of of Forests in 1856 the Government of Indla issued in 1855, arising as it chanced out of the annexation of the Province of Pegu in Burma which first laid down the outline of a permanent policy for forest conservancy in India Progress was delayed for a time by the disturbed state of the country, but from 1860 onwards forest organisation was rapidly extended, though the earlier years of forest administration were full of difficulties Exploration, demargation and settlement, followed by efforts to introduce protection and some form of organised management, were long and laborious tasks, which are even yet not completed Nevertheless, large tracts of forest were saved from ruin and were gradually brought under increasingly efficient inanagement was in 1862 that the Governor General in Council submitted to the Secretary of State detailed proposals for the administration of forests as a public estate for the welfare of the country as a "The idea that forest is a thing valuable in itself, and, in truth, just as essential to the community as fields of wheat, sugar, or eotton, took a long time to spring up, and, in fact, is not oven now generally realised in that complete manner that is essential before forest management can be said to stand on a proper basis." With the appointment of Brandis basis" With the appointment of Brandis (later Sir Dietrich Brandis) as the first Inspector-General of Forests in 1863 commenced the scien Whitever may have been the opinions held in the past in some quarters regarding restrictions imposed by forest policy, there can now no longer be any doubt regarding the very substantial benefits which have accrued to the country through the formation of an extensive forest estate and that in her forests India now possesses a property of great value, the future importance of which it is hardly possible to over estimate

Types of Forest —More than one tenth of the total area of British India is under the control of the Forest Department These areas eontrol of the Forest Department These areas in North Burma and the Andamans energines are classified as reserved, protected or unclassed State forests. In the reserved forests form an intermediate typo between the wet rights of user in favour of individuals and the public are carefully recorded and limited at

Even in the callest days of the British settlement while the boundaries are defined and occupation the destruction of the forests in demarcated, in the protected forests the record of rights is not so complete, the necrual of rights after settlement not being prohibited, and the boundaries are not always demarcated, while in the unclassed forests no systematic management is attempted, and as a rule the control amounts to nothing more than the collection of revenue until the areas are taken British India under the control of the Forest Department on 31st March, 1941, was 98,258 square miles or 11 1 of the total area This was classed as follows Reserved 72,936, Protected 6,772 , Unclassed State 18,550

Throughout this vast forest area, scattered over the length and breadth of Indla, from tho Himalyan snows to Cape Comorin, and from the arld Juniper tracts of Baluchistan to the Eastern limits of the Assam hills, there is an infinite variety in the types of forest vegetation, depending on climate, topography, soil and other local factors. Vegetationally, the greater part of Trake managing the Indo Gangetic part of India, including the Indo Gangetic plain, must be considered as in the tropics, but wherever there are mountains, such as the Nil giris in the south and the Himalayas and Assam Burma hills in the north, subtropleal, temperate and, in the north, alpine zones must be dis tinguished, each supporting its own forest types Next to the major altitudinal effects, rainfall 19 the most important factor in the determina tion of the nature of the forests, and within each of the main zones, tropical, subtropical, temperate and alpine, there can be distinguished wet, moist and dry forest types. In addition, various edaphic and seral types occur, dependent on local conditions, such as littoral (beach), tidal, fresh-water swamp, and rivernin forests.

The following is a brief description of the main forest types -

I-TROPICAL FORESTS

Tropical Wet Evergreen Forests -Theee are dense forests, with a large number of tree species all mixed together, but according to their heights forming several canopies of layers. The upper eniopy trees, among which Dipterocarps are usually characteristic, are often 150 to 200 feet high, and they very often have clear stems of 100 feet before the first branch is reached. These forests are found in the areas with the beautest rearful. In the the areas with the heaviest rainfall. In the southern or Peninsular region, they occur along the Western Ghats from a little south of Bombay to Tinnevelly, 1e, in the western parts of Bombay, Madras, Coorg, Mysore, Cochin and Travaneore In the northern or Indo Gangetic region, the type is to be found in the wetter parts of Bengal (the submontance and Chitta gong areas), extending into the damper parts of the coastal strip of Orissa, and intermingled with the next two types over almost the whole of Assam The type also occurs extensively in North Burma and the Andamans

to 9,500 feet. They are typically fairly dense grove (Rhi-ophera, Brougmera, etc.) and Sundin evergreen forests in which several species of (Heritera) forests, typical of salt water swamps Oal's and Chestants predominate but many other Many of the trees have still roots for support, and species are also present, including to pically deel. I haves or pneumatophores projecting upwards duous trees such as Maple, I lm and Prunus

- whole length of the Himaliyas from the North-West I routher Province, through Rachmil, the call water limit in the deltas of the large Punjab, United Provinces Aspit and the Dir-jeeling district to Sikkin and Blantan. jeeling district to Sikkim and Bhutan, at alti tudes from 5,000 to 11 000 feet, and with a rain full from 10 to 100 inches per year, are to be found extensive conferous forests similar to the temperate forests of Lurope and North America. The chief trees are Spruce, Silver Fir, Vedar (Deodar), Blue Pine (Pinus excelsa), and Tsuja Cupress and Few also occur to a less extent Often these trees are mixed together, but pure crops or one or the other arealmost more frequent, depending on the altitude aspect and other con-I vergreen Onle are also often pre ent particularly on southern aspects, while in the grivels and sand, extensive stretches of which damper situations are often many broud level occur along many river courses both in North and trees also typical of laropean forests such as Maple, Hornbeam, Horse Che taut, Birch, Ilm,
- Dry Temperate Forests -In the inner ranges of the Himalwas, where the South West monsoon is feeble and the rainfall is usually less than 10 inches a veir, and that is mostly in the form of winter snow, is to be found extending from 5,000 to 10,000 feet a drier and more open type of temperate forest. It consists chiefly of the confers Cedar (Deodar), Pinus gerardiana and Juniper (I macropoda), with some Silver Fir and Blue Pine at higher elevations Broad leaved trees, such as Maple, Ash and the floim Oak, occur senttered or in pure patches, while the Ohic spreads up from the dry subtropleal zone. The type occurs in Hazara, Kashmir, Chamba, Inner Garhwal and Sikkim. Among the herbs and

V —ALPINE FORFSTS

Silver Fir and Blue Pine

This gives place to an alpine serub above, consisting of dwarf Rhododendrons, Junipers and other shrubs, interspersed with patches of grass land, which form excellent grazing areas in sum mer, when they are covered with a great variety of beautiful alpine flowers

VI —SPECIAL FORFST TYPES

Among various special edaphic and seral forest types, the following may be mentioned -

- 1 Beach Forests—All round the coast, wherever a fair width of sindy beach occurs, there is a fringe of forest in which Casuarina, ori ginally introduced from Australia, is now often fall and on the prevention of erosion and sudden Elsewhere, | floods most characteristic species small evergreen and deciduous trees form a low

from the swamps to provide aeration for the roots

- rivers, and also in depressions, often old river bods, in parts of Assam Bengal, the United Prosinces and Madras They are subject to prolonged annual flooding and have various species necording to the locality The delta type ln Bengal supports the best of the Sundri forests, often over 100 feet high
- Riverain Forests -Along all the larger rivers on the banks of new alluvium are to be found stretches of moisture loving trees, such as I agerstromia flor regina, Terminalia muriocarpa and Salix tetrasperma. On recently deposited South India, are often to be found forests in various stages of succession, depending on how new or old 13 the deposit, on the rainfall and other local factors. Perhaps the most characteristic are the Khair (Acacia catechu) Sissoo (Dalbergia siesu) and Tamarix forests found throughout Northern India from Assam to Punjab These forests are usually characterised by heavy grass, and with protection they slowly change to a more miscellaneous type of forest by the gradual colo nising of other species

VII —THE BAMBOOS

No account of the forests of India would be complete without a reference to the Bamboos, of which there are very many species occurring in the tropical, subtropical and temperate zones Tall bamboos, such as Bambusa arundinacea and shrubs present are many medicinal plants, such as Dendrocalamus hamiltonii, often form a very dense undergrowth in the tropical semi evergreen and moist deciduous forests, while Dendrocala mus strictus is locally abundant and economically The uppermost forests of the Himalayas, from about 9,500 to 12,000 feet, consist of a dense growth of small trees and large shrubs, chiefly Birch, Rhododendron and dwarf Juniper with pitches of conferous overwood of high level the making of paper, but there are still extensive areas of forests with a dense undergrowth of bamboos, which are not at present economically exploitable and which often greatly hinder other forest operation

Forest Policy—The general policy of the Government of India in relation to forests was definitely had down in 1894 by the classification of the areas under the control of the Department into four broad classes, namely

- (a) Forests the preservation of which is essen tral on climatic or physical grounds These are usually situated in filly country where the retention of forest growth is of vital importance on account of its influence on the storage of the run
- (b) Forests which afford a supply of valuable 2 Tidai Forests—In the Sunderbans of the Ganges Brahmaputra delta, and along the mouths of other large rivers, such as the Mahanadi, Godaveri and Indus, are to be found Man-forests of the North-Western Himalaya

ONDCHOITING.

Broadcasting -For several years, limited; Radio Clubs in Calcutta, Bombay, and Madras, and although the transmitting sets employed by them were of very low power, the broadcasts were popular The elubs were assisted financially by a Government contribution based

The Government of India decided to appoin a Controller of Broadcasting in India and Secured from the British Broadcasting Corpora to Mr Lionel Fielden, who took up his duties in August 1935 and was largely instrumental in Entitled organization of the new Delhi station financially by a Government contribution based

Government, in appropriet their determina upon the revenue from licence fees, but this did not nearly suffice to cover the cost of the transmissions, and the greatest credit is due to the members of those clubs for the sport ing manner in which they provided additional funds and undertook the entire responsibility for the programmes

After nogotiations extending over several on Indian Broadcasting Company Was granted a licence to establish broadcasting services upon lines similar to those of the British Broadcasting Corporation, and stations were erected in Bombay and Calcutta, the services at the former being inaugurated by His Eveelleney the Viceroy in July 1927 and the latter by the Governor of Bengal a month later These stations had each, an aerial input of one and a half kilowatts, the same as that of the 2LO stations in London, of which they were practically duplicates. The programmes were so arranged that both Indian European music were broadcast daily and the news bulletins and market and weather reports were read in two languages

All India Radio — The Indian Broadcasting Company was wound up in 1930 and its operations have since been conducted by the Government of India Government for this purpose formed an Indian State Broadcasting Service, now called Ali India Radio, and instituted a Central Broadeasting Advisory Committee, representative of the non-official public in association with the Departmental officials, to keep them in touch with public opinion. The Committee had as its chairman the Member of the Vicercy's Executive Council in charge of the subject

Government, availing themselves of an India improvement in their financial condition, in intend 1934 35 decided upon a large development of their broadeasting service and allocated substantial funds for the purpose unducement for the expansion of broadcasting expected to provide a first grade service at was the constant growth of revenue from distances more than 30 to 50 miles from the Customs duties on imports of wireless material special areas for which they are intended This showed on the out hand a widespread desire

Government was the opening of a 20 kW medium-wave broadcasting station at Delhi This station was actually opened on 1st Janu Its wavelength is 3386 metres ary 1936 886 kc/s) The wavelength was somewhat in conveniently close to that of Bombay, but at the time when the station was erected it was believed to the best length of medium-sets throughout British India except Baluchistan and the tribal areas of the North West Frontier. wave for transmissions in India It was therefore appropriated for the first 20 kW station to be built. The Bombay wavelength has since been changed. since been changed

The Government of India decided to appoin

Government, in announcing their determina tion to open a large broadensting station in Delhi, intimated that they proposed to follow this by the installation of modern trans mission equipments in place of the existing plants in Bombay and Calcutta and that a similar modorn station would be opened in Madras The thorough investigation of general broadeasting problems throughout India which followed the arrival of Mr Fielden led to a revision of these plans, and through his instrumentality the British Broadcasting transmitting Corporation lent India in the early months of and Calcutta, 1936 the services of Mr H L Kirke A valuable report was presented by this official,

and a plan for wide extension of broadcasting

Mr C W Goyder, one of the foremost wireless,

activitles was claborated

Government engaged

and particularly short-wave, engineering experts in the world, to be their principal engineer for construction and research work. Orders for extensive new equipment for implementing plans for expansion prepared by these experts It included new were placed in January 1937 10 kW short-wave transmitters for Bombay and Calcutta and one 10 kW and one 5 kW short wave transmitters for broadcasting and experimental work in Dellil It also included a 10 kW short-wave transmitter for Madras, for service throughout the Madras Presidency, and a 250 watt 250 watt medium wave of the most modern type apparatus is of the most modern type This makes for economy in working and gives purity of rendering unexcelled in any other country. The short-wave plant is considered of great importance, as it provides a measure of service for the whole of The medium wave transmitters are odition, in intended to give a first-grade service on in expensive receivers in the large towns, but cated sub-owing to atmospheric conditions in India A special during the greater part of the year cannot be condeasting expensive at a result of the service on the service of t

His Excellency the Marquess of Linlithgow, services and on the other hand a prospect of substantial profits to Government through the Increase of imports of wireless apparatus

by amalgamation of the three Presidency Banks of Bengal, Bombay and Madras

The idea of a Central Banking establishment for British India was mooted as early as 1836, and was the subject of a minute by Mr James Wilson, when Finance Member, in 1859 Again, in 1867 Mr Diokson, the woll-known Secretary of the Bank of Bengal, submitted detailed pro posals for an amalgamation of the three Presi dency Banks On various later occasions the matter was brought forward without result and it was discussed by the Chamberlain Commission on Indian Finance and Currency in 1913 The present scheme which has come to fruition was however the result of a rapprochement on the part of the Banks themselves as a result of the experience gained during the war and the realisation of the desirability of strengthening bar extending the Banking system India

The Presidency Banks -The history of the Presidency Banks in their relationship with Government fulls into three well defined stages Prior to 1862 the Presidency Banks had the right of note issue, but were directly controlled by Government and the scope of their business was restricted by their charters. The second period was from 1862 to 1876. In 1862, the Banks were deprived of the right of note issue, though by their agreements of that year they were authorised to transact the paper currency business as agents of Government As com-pensation for the loss of their right of issue, they were given the use of the Government balances and the management of the treasury work at the Presidency towns and at their branches The old statutory limitations on their business were at the same time greatly relaxed, though the Government's power of control remained unclininged. In 1866 the agreements were revised and the paper currency business was re-moved from their control and placed under the direct management of Government third period dates from the Presidency Banks Act of 1876 by which nearly all the most important limitations of the earlier period were reimposed But, very briefly, the principal restrictions imposed by this Act prohibited the conducting foreign exchange Banks from business, from borrowing or receiving doposits payable ont of India, and from lending for a longer period than six months, or upon mortgage or on the security of immorable property or upon promissory notes bearing less than two independent names or upon goods, unless the goods of the title to them were deposited with the Bank ns seenrity At the same time Government abandoned direct interference in the management, ceasing to appoint official directors and disposing of their shares in the Banks The Banks no longer enjoyed the full use of the Government balances Reserve Tresantles were constituted at the Prealdenes towns into which the surplus revenues were drawn and the bilances left at the disposal of the Banks were strictly limited

balances with the Hoadquarters of the Presidency Banks in order to assist the money market

The Imperial Bank of India —Under the Imperial Bank of India Act of 1920 as amended by the amendment Act of 1934 which came into force from 1st April 1935 the control of the Bank is entrusted to a Central Board of Directors with Local Boards at Calcutta, Bombay and Madras and such other places as the Central Board may determine The Central Board of Direc tors slihll consist of -

the presidents, vice presidents and the secretaries of the Local Boards, (a)

(b) one person elected from amongst the

members by each Local Board,
a Managing Director and a Deputy
Managing Director appointed by the
Central Board, (c)

(d) not more than two non officials, noml nated by the Central Government

Representatives of any new Local Boards, which may be constituted, may be added at the discretion of the Central Board

The Deputy Managing Director and the Secretaries of the Local Boards are entitled to attend the meetings of the Central Board but not entitled to vote The Deputy Managing Director is entitled to vote in the absence of the Managing Director

The Central Government shall nominate an officer of the Crown to attend the meetings of the Central Board but he shall not be entitled to vote

Under the Imperial Bank of India Act of 1929 piovision was made for the increase of the capital of the bank The eapltal of the three Presidency Banks consisted of 32 crores of rupees in shares of Rs 500 cach, fully subscribed The additional capital authorised was 7½ erores in shares of Rs 500 each, of which Rs 125 has been called up, making the present capital of the Bank Rs 11½ erores, of which Rs 5,62,50,000 has been paid up. The Reserve Fund of the Bank Rs Rs 6,00,000 paid the Balwice Sheet of 18 Rs 6,00,00,000 and the Balmee Sheet of 31st December 1944 showed the deposits at Rs 237,78,30,028 and Cish Rs 28,31,01,060 with a percentage of cash to llabilities of 11 90.

Agreement with Reserve Bank of India The Bank has entered into an agreement with the Reserve Bank of India which will remain in force for 15 years and thereafter until terminated after five years' notice on either side Provi slons continued in the agreement between the Imperial Bank of India and the Reserve Bank of India are -

The Imperial Bank of India shall be the sole agent of the Reserve Bank of Indla at all places In British India where there is a branch of the Imperial Bink of India which was in existence at the commencement of the Reserve Bunl of Indin Act, 1934, and there is no branch of the Bruking Department of the Reserve Bank of

THE EXCHANGE BANKS

in India are merely branch agencies of Banks having this head offices in London on the 1900 continent or in the Par East and the United 1905 States Originally their husiness w a confined 1919 almost exclusively to the fin neing of the x 1916 hat in recent years 1916 ternal tr de of India most of them while continuing to finance this 1918 part of India s trade have also taken an active 1919 part in the financing of the internal porti n also 19 at the places where their branches are altusted

At one time the Banks carriedon their opera-tion in India aims to et it by with mostly borrowed elsewhere pith lapity in Loodon— to the lapity of the lapity of the lapity of the posits for us in India byodreing rates t in rest much higher the Inte Luglish Banks were able to quot Within recent years how were the base sed die over the til is possible to it act deposits in 1 di on quite as a swour. Buse carries at an done I London and a very lapity carries and bone I London and a very some terms as can b done | London and a very like proportion of the financing done by the first proportion of the financing done by the first proportion of the financing done and the first proportion of the first proportio within recent ye ra

Exchange Banks' Investments.

Turning now to the question of the investment of the Banks' resources, so far as it concerns India, this to a great extent consists of the purchase of bills drawn against imports and exports to and from India

The financing of the import trade originated and is carried through however for the most part by Branches outside India, the Indian Branches' share in the husiness consisting principally in collecting the amount of the bills at maturity and in furnishing their other hranches with information as to the means and standing of the drawees of the bills, and it is as regards the export business that the Indian Branches are more immediately concerned The Exchange Banks have practically a mono-poly of the export finance in India and in view of the dimensions of the trade which has to be dealt with the Banks would under ordinary circumstances require to utilise a very large proportion of their resources in carrying through the business They are abic, however, by a system of rediscount in London to limit the the business employment of their own resources to a comparatively small figure in relation to the husiness they actually put through No definite information can be seenred as to the extent to which rediscounting in London is carned on but the following figures appearing in the balance sheets latest available of the undernoted Banks wlii give some idea of this -

LIABILITY OF BILLS OF EXCHANGE RE-DISCOUNTED AND STILL CURRENT Chartered Bank of India, Australia 576,000 and Cliina Eastern Bank, Ltd 3,041,000 Mercantile Bank of India, Ltd 231,000 National Bank of India. Ltd. 710,000

The above figures do not of course to re-discounts of Indian bills aione, Banks operate in other parts of the worl but it may safely be inferred that bills dre India form a very jarge proportion of the

The bills against exports are largely dra three months' sight and may either be "c or be accompanied by the documents r to the goods in respect of which they are Most of them are drawn on weil-known at home or against credits opened by or financial houses in England and bear they do an Exchange Bank endorsement are readily taken up hy the discount | and Banks in London Any bills pure In India are sent home by the first po Mali so that presuming they are redisco as soon as they reach London the Exc Banks are able to secure the return of moncy in about 18 or 17 days instead of h to wait for three months which would be case if they were unable to rediscount must not be assumed however that all are rediscounted as soon as they reach Lo as at times it sults the Banks to hold u bllis in anticipation of a fall in the Lo discount rate while on occasions also the B prefer to hold the bills on their own acc as an investment until maturity

The Banks place themselves in funds in I for the purpose of purchasing export bil a variety of ways of which the following

the principal -

(1) Proceeds of import bills as they mat (2) Sale of drafts and telegraphic tr fers payable in London and elsew.

out of India (3) Purchase of Council Bills and Telei phic Transfers payable in India to

(4) Imports of bar gold and silver buil (5) Imports of sovereigns from Lond Egypt or Australia

The remaining business transacted by 4,558,000 Banks in India is of the usnai nature and n I not be given in detail.

The following is a statement of the position of the various Exchange Banks carrying on busin in India as it appears from the latest available Balance sheets -

JOINT STOCK BANKS.

Previous to 1906 there were few Banks of this description operating in India, and such as of India and the Indian Specie Bank in 1900 were then in existence were of comparatively after that time there was a perfect street and it importance and had their business confined to a very restricted area. The rapid development of this class of Bank, which has been so marked a feature in Banking within recent years, really had its origin in Bombay.

These Banks mad very gr at at Mes during Bank undertook to pay the depo iters of the first few years of their exist ee but it Allianc Bank 50 per cent of the amounts du was generally suspected in well informed circles to them A panle was averted and a critical to business of many of the B ks was period was passed through with little difficulty of a very speculative and unsafe character a d it was a matter of nn grest snrprise to many people when it became known th t some of the

INDIAN PRIVATE BANKERS AND SHROFFS.

Indian private Bankers and Shroffs flourished pecunious people, but this is hardly fair to the in India long before Joint Stock Banks were ever thought of, and it seems likely that they will continue to thrive for some very considerable time to come The use of the word "Shroff" is usually associated with a person who charges usu-lous rates of interest to im-hope to be able to get into sufficiently close

touch with the affairs of the wast trading com. The extent to which any oos shroff may gre to minity in India to coahie them to grant accome accommedation in the barasar is therefore modelloo become than a few of three trades dependent to make the properties of the trades dependent to make the properties of the trades of t not be permitted to give The shroff a position referred to is one of the safest the Banks can a an I termediary between the trading com engage in munity and the Banks usually arises in some

A stage is reached however when the demands on the hards are greater than they are able to businesseed sharkers and Shikayar respectively the meet businessee the hards are greater than they are able to businesse classwhere than at the He d Office a meet businesseed the hards and the He d Office a meet businesseed the hards and the He d Office a meet businesseed the businesseed the hards and the hards and the hards and the hards and the hards are the hards and the hards and the hards and the hards and the hards and the hards and the hards and the hards and the hards are the hards and

musty and the Hanks usually arises in some thing after the following manner: A shop-keeper in the hazaar with limited means of his based on the states at which they in time can unfaithful after size at the his own mose; has some size at the his shop and the state of the state o to the extent of Rs ... 500 each. A hoondee is not so keen to these places as it is in Bomhay

to the extent of Rs. 4000 each. A noncount to usually drawn at a currency of about . m other to usually drawn at a currency of about . m other to above described are princip ily Marwardes and Islands having their Head Offices for the most area and advances.

Ministants having their Head Offices for the most area and white representations and white representations are not asset of the most area.

THE BANK RATE

BANKERS' CLEARING HOUSES.

The principal Clearing Houses in India are all clieques he may have negotiated on other those of Calcutta, Bombay, Madras, Rangoon, members and to receive in exchange all cheques Colombo and Karachi, and of these the first two drawn on him negotiated by the latter. After are by far the most important The members all the cheques have been received and delivered at these places consist of the Imperial Bank, the representative of each Bank advises the Reserve Bank, most of the Exchange Banks and settling Bank of the difference between his English Banking Agency firms, and a few of the banks and deliveres and the settling Bank is entitled to claim to be a member iffself that the totals of the debtor balances No Bank is entitled to claim to be a member itself that the totals of the debtor balances as of right and any application for admission to agrees with the total of the ereditor-balances a Cicaring must be proposed and seconded by two members and be subject thereafter to ballot by the existing members

| Dank intercenter strikes a min manage to savely itself that the totals of the debtor balances as of right and any application for admission to agrees with the totals of the debtor balances as Cicaring must be proposed and seconded by the debtor Banks thereafter arrange to pay two members and be subject thereafter to ballot the amounts due by them to the settling Bank by the existing members

The duties of settling Bank are undertaken by the Reserve Bank at Calcutta, Bombay, Madras, Karachi and Rangoon and by the Imperial Raccounts with the settling Bank so that the Bank at Colombo and a representative of final halances are settled by choques and book each member attends at the office of that Bank on each business day at the time fixed to deliver cash in any form

The figures for the Clearing Houses in India above referred to are given below —

were sanctioned in 1845 Calcutta to Ranigan (120 miles), the East ernment had therefore again to resort to the Indian Railway, Bomby to Kalyan (32 system of guarantee, and the Indian Midiand miles), Great Indian Peninsula Railway, (1882-85), since absorbed by the Great Indian miles), Great Indian Pennsula Raliway, (1882-85), since absorbed by the Great Indian and Madras to Arkonam (39 miles), Madras Pennsula, the Bengal-Nagphr (1883-87), Rallway Indian Railway building on a serious scale dates from Lord Dalhousie's great minute of 1853, wherein after dwelling upon the great social, political and commercial advantages of connecting the clust either by raily vantages of connecting the chief cities hy rail, he suggested a great scheme of trunk lines linking the Presidencies with each other and the inland regions with the principal ports fall of the exchange value of the rupee, Gov the inland regions with the principal ports. This reasoning commended itself to the Directors of the East India Company, and it was powerfully reinforced when, during the Mutiny, the barners imposed on free communication were severely felt. As there was no private enterprise. Four companies were kalka, the Bengal Central, and the Bengal and North Western. The first became bankrupt, private capital in India readily available for the second and third received guarantees, railway construction, English Companies, the and the Tirhut Railway had to be leased interest on whose capital was guaranteed by the interest on whose capital was guaranteed by the State, were formed for the purpose By the end of 1859 contracts had been entered into with eight companies for the construction of 5,000 miles of line, involving a guaranteed capital of £52 millions These companies were (1) the East Indian, (2) the Great Indian Peninsula, (3) the Madras, (4) the Bomhay, Baroda and Central India, (5) the Eastern Bengal, (6) the Indian Branch, later the Outh and Rebillung State Ballway, and rough not of sula, (3) the Madras, (4) the Bomhay, Baroda and Central India, (5) the Eastern Bengal, (6) the Indian Branch, later the Oudh and Rohllkund State Rulway and now part of the East Indian Rulway, (7) the Sind, Punjab and Delhi, now merged in the North-Western Ralway, and (8) the Great Southern of India, now the South Indian Ralway The scheme laid the foundations of the Indian Railway The scheme laid the foundations of the Indian Railway system as it exists to day

Early Disappointments

The main principle in the formation of these companies was a Government guarantee on which investors would come forward. This guarantee was a five per cent return coupled with the free grant of all the land required in return. on which investors would come forward. This ballisted with rupees, the guarantee was a five per cent return coupled with the Khojak Pass added larg the free grant of all the land required in return sary, but unprofitable, outlay the companies were required to share the surplus profits with the Government, after the gnaranteed interest had been met, the interest charges were calculated at 22d to the rupee, the Railways were to be sold to Gov panies were offcred a rebate on the gross earn ernment on fixed terms at the close of twenty-lings of the traffic interchanged with the main line years and the Government were to exer line, so that the dividend might rise to four line, and the dividend might rise to four line, and the dividend might rise to four line, and the dividend might rise to four lines are lines and the dividend might rise to four lines are lines and the dividen cise close control over expenditure and work- per cent hut the rehate was limited to 20 per cise close control over expenditure and working. The early results were disappointing the early results were disappointing the control of the early results were disappointing to the control of the Railways greatly increased the efficiency of the envil administration, the mobility of the troops, the trade of the country, and the movement of the population, they falled to make profits snfficient to meet the gnaranteed interest. Some critics attribute this to the unnecessarily high standard of construction adopted, and to the engineers' ignorance of carrying power of this gauge. The rebate local conditions, the result was that by 1869 the deficit on the Railway bindget was Rs 166½ the deficit on the Railway bindget was Rs 166½ taking for some more economical method of construction, the Government secured sanction to the building of lines by

that their construction in India was contemporated. And then to test their applicability money available had to be diverted to conto Eastern conditions three experimental lines verting the Sind and Punjab lines from mstre These were from to broad-gauge for strategic reasons

Famine and Frontiers In 1879, embarrassed by famine and by the to the fourth A step of even greater im portance was taken when Indian States were invited to undertake construction in their own territories, and the Nizam's Gov ernment guaranteed the interest on 380 miles

Rebate Terms Established

This induced the fourth period—the system of rebates Instead of a gold subsidy, com cent of the gross earnings Under these con

allege of their deviate assumed to the companies of the c compa ies and that it should only he in cases where the State cannot or will not pro ide adequat funds that private enterprise in this

dr tion should be encouraged

Figur s p eced d by a - i dicate loss

Meantime a much more import nt change the state of the st

contracts under which the guaranteed lines were however, subordinate to the necessity for bring constructed. The five per cent dividend guaranteed at 22d per rupee, and the haif-yearly settlements made these companies sudden increase in the trade of India found the a drain on the State at a time when their stock was at a high premium. The first contract to fail in was the East Indian, the great line connecting Calcutta with Delhi and the North ern provinces. When the contract lapsed, the Government exercised their right of pur chasing the line, paying the purchase-money in the form of terminable annuities, derived from revenue, carrying with them a sinking fund for the redemption of capital. The railmay thus hecame a State line, hut it was released to the Company which actually worked it. a drain on the State at a time when their stock | main lines totally unprepared | Costly work Indian Railway Company brought to the State struction in India was limited only by the in the ten years ended 1909 after meeting all capacity of the money market They fixed charges, including the payments on account the annual allotment at £12,000,000 a of the terminable annuity hy means of year Even this reduced sum could not always then the supplies th charges, including the payments on account of the terminable annulty hy means of which the purchase of the line was made, which the purchase of the line was made, and interest of all capital outlay subsequent to the date on purchase, a clear profit of nearly ten millions. No other railway shows results quite equal to the East Indian, because, in addition to serving a rich country hy an easy line, it possesses its own colleries and enjoys cheap coal. But with allowance for these factors, all the other quaranteed comthese factors, all the other guaranteed com and expenditure after the lines were open for panies which have been acquired under similar traffic. For these purposes a staff of Consultant of conditions as their contracts expired, have Engineers was formed, and a whole system of proportionately swelled the revenue and as sets of the State It is difficult to estimate the amount which must be added to the capital dept of the Indian relationship of the In the amount which must be added to the capital debt of the Indian railways in order to counterbalance the loss during the period when the grew this dry nursing, and when the original revenue did not meet the interest charges According to one estimate it should be £50 mil lions. But even if that figure he taken

Improving Open Lines

Those changes induced a corresponding change in Indian Raliway policy Up to 1900 the great work had been the provision of trunk lines But with the completion of the Nagda-Muttra line, providing an alter native broad-gauge route from Bombay to

Under these new conditions the Last could be remuneratively spent on raiway con be provided

Government Control and Re organisation of Railway Board

As the original contracts carried a definite Government gnarantee of interest, it was necessary for Government to exercise atrong supervision and control over the expenditure during construction, and over management and expenditure after the lines were open for Government have a magnificent asset in their in 1901-02 Mr Thomas Robertson was deputed railway property hy the Secretary of State to examine the whole question of the organization and working of the Indian Railways, and he recommended that the existing system should be replaced by a Railway Board, consisting of a Chairman and two members with a Secretary The alter The Board was formally constituted in March 1905 alter The Board was made subordinate to the Government of India in which it was represented by the Department of Commerce and Industry It prepared the rallway programme of commerce and Industry It prepared the rallway programme of the state of the lines of the l native broad-gauge route from Bombay to Delhi through Eastern Rajputana, the trunk system was virtually complete A direct broad gauge route from Bombay to Sind is needed, hut the poor commercial prospects of the line and the opposition of the Rao of Cutch to any through line in his territories, has for some time kept this scheme in the background. There does not exist any through rail connection between India and Burma, although several routes have been surveyed the mountainous character of the region to be traversed, and the easy means of communication with Burma by sea, rob this scheme of any living importance. Further survey work was undertaken between 1914 and 1920, the three routes to be surveyed being the coast route, the Manipur route, and the Hukong valley route. The Month of the Railway Board in 1908, the constitution of the Railway Board in 1908, the constitution of the Railway Board in 1908 is subjected to excessive control by the De nacted and Karachi given direct hroad gauge of the Chairman were increased and he was

over by Sir Ralph Wedgewood—the Contral Accounts organisation of railways was taken over by the Railway Board The present superior staff in the railway Board, therefore, consists of the Chief Commissioner, the Financial Commissioner, 2 Members, 6 Directors, a Sceretary and 15 deputies and assistants

Railways The work of the different railways was gradually transferred to this office, the North Western Railway being taken over first on the 1st January 1927, the East Indian Rail way following on the 1st April, the Eastern Bengal Railway on the 1st January 1928, and the Great Indian Peninsula and B B & C I Riys inter

Under the Railway Board's pollcy of progressive standardisation, a Central Standardisation Office was established in 1930 under a Chief Controller of Standardisation to provide the means whereby such standardisation would be progressively effected in accordance with changing conditions and as the result of practical experience. The technical Officer under the Railway Board was transferred to this office as a Deputy Controller This office was made permanent in 1935

The question of transferring the eupervision of raliway accounts of State Railways from the Finance Department to the Railway Board was under consideration for some time and in accordance with a resolution adopted, by the Legislative Assembly in September 1925, a start was made with the transfer of the supervision of railway accounts on the East Indian Railway At the same time a separate Audit Staff was appointed reporting directly to the Auditor-General As it was found that the separation of Audit from Accounts led to greater efficiency, a similar organisation was introduced on other State managed railways during 1929 The supervision of Accounts Officers was placed under a Controller of Railway Accounts reporting to the Financial Commissioner of Railways and that of Audit Officers under a Director of Railway Audit reporting to the Auditor-General These two reporting to the Auditor-General These two duties were previously combined under the Accountant-General, Railways, reporting to the Auditor-General The Chief Accounts Officers on railways are now under the General The Chief Accounts. on railways are now under the General Managers and the Controller of Rulway Accounts has been made a Director under the Railway Board

Management

There are two important systems of administration organisation on Indian Railways—the Divisional system and the Departmental s divided into divisions, each under 2 Divisional Superintendent, who in turn has officers of all departments like Civil Engineering, Trans portation, Commercial, Accounts, Stores, the running and operation portion of Mechanical Engineering and on some railways even the Medical, working under him in his division In the departmental system the railway is divided into smaller portions called districts by each department (and districts of the various departments need not be co terminus) and each of these districts is under a District Officer reporting direct to the head of his department. In the divisional system the rulway of these districts is under a District Officer reporting direct to the head of his department in the Hordquarters Office

Clearing Accounts Office

A Clearing Accounts Office, with a State versus Company Management of Statutory Audit Office attached thereto, was opened in December 1926 to take over work relating to the check and apportionment of owned by Government which comprise the

During 1927-28 demonstrations explaining the Clearing Accounts Office procedurs were given to the representatives of the Press as well as to the representatives of the various railways who visited the office to study the new procedure

The Railway Conference

In order to facilitate the adjustment of domestic questions, the Railway Conference was instituted in 1876 This Conference was consolidated into a permanent body in 1903 under the title of the Indian Rallway Confer ence Association It is under the direct con trol of the rallways, it elects a President from amongst the membere, and has done much useful work

The Indian Gauges

The etandard gauge for India is five fect When construction was started six Inches the broad-gauge school was strong, and it was thought advisable to have a broad-gauge in order to resist the influence of eyclones. But in 1870, when the State system was adopted it was decided to find a more economical gange, for the open lines had cost £17,000 a mile After much deliberation, the metre gauge of 3 feet 3% inchee was adopted, because at that time the idea of adopting the metric system for India was in the air. The original intention was to make the metric system for the metric system for India was in the air. was to make the metre-gauge lines provisional, they were to be converted into broad gauge as soon as the traffic justified it, consequently they were built very light But the traffic expanded with surprising rapidity, and it was found cheaper to improve the carrying power of the metre-gauge lines than to convert them So, except in the Indus to the broad-gauge Valley, where the strategic estuation demanded an unbroken gauge, the metre gauge ilnes were improved and they became a permanent feature in the railway system Now there is a great metre-gauge system north of the Ganges connecting. which showed the possible capacity of the 2-6 gauge, there has been a tendency to construct feeder lines on this rather than on the metre gauge

State versus Company Management -

been the subject of discussion in official eircles ways —
a d the public press for many years—In India
the question is confplicated by the fact that the More important companies have not in recent Years been the owners of the rolling we which they manage and the headquarters of their Boards at a list of on. The subject was one perhaps the most important of the term of reference of the Acworth Railway Committee That Commit tolletito and discussed

The subject has all o been discuid on oc a lons in the Cent at Legil tare to ernment of India have howe er d on m ny

Assembly on 3rd March 1924 to examine the proposals for the separation of railway from general finances. The final resolution agreed to by the Assembly on September 20th, 1924, and accepted by Government differed from the original resolution in that the yearly contribution had been placed at 1 per cent instead of 5/6ti per cent on the capital at charge and if the surplus remaining after this payment to General Revenues should exceed 3 crores, only and of the excess over 3 crores were to be transferred to the Railway Reserve and the remaining and was to accrue to General Revenues the same time a Standing Finance Committee for Ballways was to be constituted to examine the estimate of railways expenditure and the demand for grants, the programme revenue expenditure being shown under a depreciation fund This committee was to consist of one nominated official member of the Legislative Assembly as Chairman and 11 members elected by the Legislative Assembly from that body This would be in addition to the Central Advisory Council which will include the Members of the Standing Finance Committee and certain other official and non-official members from the Legislative Assembly and Council of State These arrangements were to be subject to periodic revision but to be provisionally tried for at least 3 years They would, however, only hold good as long as the E I Railway and the G I P Railway and existing State Managed Railways remain under State management and if any contract for the transfer of any of the above to Company management was concluded against the advice of the Assembly, the Assembly would be at liberty to terminate the arrange ments in this resolution

The Assembly in an addendum recommended that the railway services and the Railway Board should be rapidly Indlanised and that the stores for the State Managed Raliways should be purchased through the organisation of the Indian Stores Department

The principles of allocation of surplus laid down in the above resolution has since been amended by a subsequent resolution passed by the Legislative Assembly on 2nd March 1943 which provided, inter alia that from 1st April 1943 so much of the convention as provides for the contribution and allocation of surplus to general revenues ceases to be in force and until a new Convention is adopted by the Assembly, the allocation of the surplus on commercial lines between the railway reserve and general revenues shall be decided each year on consideration of the needs of the railways and general revenues, the loss, if any, on strategic lines being recovered from general revenues

Re organisation problems —The growing complexity of raliway administration in India and the evolution of new methods of controlling traffic have given a stimulus to the efforts of various railways to revise their organisations The general direction in which this re-organisa tion is being considered is that of consolidation into one department of the operating or transportation work of the railway, including the provision of power This system is invariably in existence on those railways which have

zeneral organisation is still on the Departmental basis

The Pope Committee

When the railway finances were in a bad way, a Committee under the chairmanship of Mr F A Pope, General Eveentive Assistant to the President of the L M S Railway, was formed to investigate and inaugurate a detailed analysis of every important achievement of railway operation The Committee started railway operation The Committee started work during 1932 33 and among other things, perfected a system of detailed investigation into individual items of railway working which came to be known as 'Job Analysis'

Mr Pope returned to Indla in 1933 34 and prepared a second report based upon the pregress of the work and on further possibilities of cconomy

The most important recommendations of Mr Pope's second report related to -

- Intensive use of locomotives
- Intensive use of coaching stock
- Intensive use of machinery and plant
- Disposal of Uneconomical wagons 4
- Combining resources between railways 5
- Handling and transport of smalls traffic and of traffic to be transhipped at break of gauge stations
 - Ticketless travel.
- Methods of increasing earnings

As a result of the 1st report of the Pepe Committee, special 'Job Analysis' Organisa tions, were set up on most of the imperiant Indian Railways Their main purpose was to investigate in detail by special methods in dividual aspects of rulway working and suggest means whereby economies may be achieved or the efficiency of operation increased

Having overhauicd the methods of working on the rankays by stages, these organisations have since been abolished

Indian Railway Enquiry Committee

As a result of the recommendation of the public Accounts Committee the Indian Railway Enquiry Committee was appointed in October 1936 This Committee was under the Chairman ship of Sir Raiph L Wedgewoed, CB, CMB, Chief General Manager of the London North Its terms of reference were Eastern Railway

To examine the position of Indian Stateowned railways and to suggest such measures as may, otherwise than at the expense of the general budget,

- (1) secure an improvement in net earnings due regard being paid to the question of establishing such effective ce-ordination between read and an arrival and arrival and arrival arriv between road and rail transport as wis safeguard public investment in railways while providing adequate services by both means of transport, and
- (11) at a reasonably early date, place railway finances on a sound and remnnerative

The report was submitted in June to iction was taken to implement such of the recemiction was taken to implement such of the recem-nend tions as could be accepted without I other izamilation. Where special in entration was postdered necessary this was arranged for

North-Western

The North Western Railway began its existence at Sind-Punjab-Delhi Ralithe way, which was promoted by a Company under the original form of guarantee and extended to Delhi, Multan and Lahore and from Karaehi to Kotrl The Interval between Kotrl and Multan was unbridged and the railway traffe was exchanged by a ferry service. In 1871-72 sanction was given for the connection of this by the Indus Valley State Railways and at the same time the Punjab Northern State Railmay from Lahore towards Peshawar was begun
In 1886 the Sind-Punjab-Deihi Railway was
acquired by the State and amalgamated with
these two railways under the name of the North Western Railway It is the longest railway in India under one administration

Oudh and Tirhut

The Bengal and North-Western Railway was constructed on the metre-gauge system by a company without any Government assistance other than free land and was opened to traffic in 1885 The system was begun in 1874 as the Tirbut State Rallway In 1890 this line was leased by Government to the Bengal and North-Western Railway Since then extensive additions have been made in both sections. It is connected with the Raiputana metre-gauge system at Cawnpore and with the Bengal and Assum Rallway at Kathar and the East Indian Rallway at Benares and Mokameh Ghat.

The Rohilkund and Kumaon Railway was constructed on the metre gauge and opened for traffic in 1884 Later on extensions were added between 1906 and 1916

The Bengal and North Western and the Rohilkund and Kumaon Railway have come under State management from 1st January 1943 From the same date the two were amalgamated and the combined system is named as Oudh and Tirhut Railway

INDIA AND CEYLON

of Rameswaram Island and the Ceylon Gov ernment Railway to Talaimannar on Mannar titland twn points distant from each other shoat 20 miles across a narrow and a liow strait the possibility of connecting these two terminal statione by a railway con trocted on a solidembankment raised in the sand ba k known as Adam s Bridge to supers d Ibe ferry ste mer service which has been established between th se twn points is one of the schemes that has been investigated

In 1913 a detailed survey was made by the South Indian Railway Company and the project sout mplate the construction of a causew y from seat no difficulty. These ction through the six a proposed to construct in the following way A double row of reinforced concrete pile spitched at 10 fact coater and baving their in the following way A compared to the coater and baving their in the said. The spitched at 10 fact coater and baving their late the said that their late the said their lates pile will like he be braced together longs to the said that their lates the said that the sai and transversely with concrete arches and cassing and transversely with concrete ties strote and chains Behind the piles slab of reinforced concrete will be slipped into position the bottom slabs being sunk well into the sand of the selbottom. Lastly the space enclosed by the slabs will be filled in with sand

The possibility of councetiuw India and coast route appears in be the best one but Ceylon by a railway scrose the bank ut sand as present would not be remunerative. This stending the whole way from Rameswaram to would start from Chitagong which is the Ma mar has been reported on from time to termine and theory 1895 various absence have been suggested.

The Bouth Indian Railway baying been extended to Dhannabkodi the anutheromost point fields interacted by the Treatment of Rameswaram Isind and the Coylon Good Rameswaram Isind Rameswaram Isind and the Coylon Good Rameswaram Isind Rameswaram Isind Rameswaram Isind Rameswaram Isind Rameswaram Isind Rameswaram Isind Rameswa from the town of Oblttagong For about 160 miles further it chiefly rans through the fertil rice lauds of Arrakan and crosses all the b g tidal rivers uf the Akyab delta. These include the Kalidan river which drains 4,700 mil s of country and even at a distance of about 39 miles from its mouth is more than half a mile wide About 60 mile from Chittagong the saliway would run into the region of mangrov aw mps which fringe the accast unrth and snuth of the barbon of Kaukkphu stretching nut into the mangrove swamps like ribs from th backbone innumerabl apura nt the Arrakan Yoma bave to be cross d Yoma is a sout mpate the construction of a causaw y from | Arrakan Yome bave to be cross of Yome 1s as Dhannabadel Point on the Indian side to Tells | mountain ridg which extends from C pe manns; Point on the Ceylon side a length of Negrais northwards untilitioses it elif na m side of the property of the proper Negrais northwards untill t forest it elf in a m is of tangied blue set of Aby b and Chittagong. At its southern end th height of the rigge is signific at but it has peak as high as 4 000 feet before it re ches the stitted at 8 ndws at further north it rie smeeh bisher. It is normidable obta le to railway communication between India and Durn This noute estimated to cost about 2 y bonch lin at the larve to be supplemented by bonch lin a to Aby the communication of the control of the added to the £7 000 000 stready referred to

The other routes examined ha e been the Hurang Valley route a d the M nipur route which were surveyed by the late Mr R A Way many years ago The Manip rroute was t mated to cost about 55 000 000 as ith to cross in maied to coarse with the carried to state above high water level and the rails to state above high water level and the rails to state above high water level and the rails to state above high water level and the rails to the rails to state above high water level and the rails to the rails to state would be about four mit a clumbit of the least thereagh the three mit rails of through the thereagh the rails of through the thereagh the rails of through the rails and mure than 100 miles at expert of the rails Indo Birma Connection.

Mines and Minerals.

Mineral Production in Inter-War Period

A general tone of stability was noticeable about 200,000 tons, equivalent to a fif in the mining industry considered as a whole during the period intervening between the two wars. While the output of some minerals showed a decrease, others showed an increase and a telepression but the increased for another minerals whose output was on the increase, end, from one management in the property was the mineral most seriously affected internal demand from iron and steel increase, end, from one management in the property was the mineral demand from iron and steel increase. increase, coal, iron ore, manginese, petroleum and mica stand out prominently

The annual output of coal at the outbreak of the present war exceeded 25,000,000 tons and this output has raised India to the eighth rank among the coal producing countries of the world During the present war, the production could not keep pace with the industrial activity in the

The production of iron ore which was hardly 900,000 tons in 1921 had by 1938 reached the neighbourhood of 3,000,000 tons, the bulk of which was for consumption by the steel industry in India

is slightly more than a million tons, representing represented nearly 80 per cent of the roughly a third of the world production, but world production. The present war during the slump period production declined to further fillip to the activity

in later years had so greatly acceler recovery in prices in this case that by value of output had risen to Rs 4 cre Rs 2 erores in 1929 although the v output was the same in both the years

The lustory of the petroleum and India as one of continued development from a modest figure of 9,500,000 gal country owing to various factors, including production in the Punjab and Assam shortage of labour

The production of iron ore which was hardly notwithstanding the ups and downs in world production

With the output nearly quadruple India

India's normal annual output of manganese production of nearly 6,000 tons in t slightly more than a million tons. representing represented possible of the lights.

Most of the coal raised in India comes from Singareni in Hyderabad, and in Cent the Bengai and Bihar and Orisec—Gondwans vinces but there are a number of coal fleids. Outside Bengal and Bihar and mines which have been vorked at one Orissa the most important mines are those at another.

Provincial production of Coal during the years 1937 and 1948 (which are the latest elatistics a

In 1938 the total production of Indian Coni to the trend of 1934, 1935 and 1936, the rose to 28,342,906 tons or 3,306,622 tons (13 2) of coal from India in 1937 have mo per cent) increase on the output of the previous year and is thus the highest figure yet recorded year and is thus the highest figure yet recorded Burma's share. Since the separation of the second state of the second share where the second share year and is thus the highest figure yet recorded In the years 1031, 1032 and 1033 there was a continuous decrease in production of coal from as a foreign country, and in 9 months the peak figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did in the coal figure of 23,803,048 tons in 1930 In taken a little more than Ceylon did 1934 the direction of change was reversed and production increased by 2,268,281 tons (or 11 4 per cent) from 10,789,163 tons in 1933 to 22,057,447 tons in 1934 in 1935 the increase continued but at a less rate by 959 248 tons (or 4 3 per cent) to 23,016,695 tons. In 1936 there was cent) to 23,016,095 tons In 1936 there was again a decrease by 405,874 tons (1 8 por cent) to 22,610,821 tons, followed in 1937 by an increase of 2,425,565 tons (10 7 per cent) to 25,036,386 the highest output till then, but which has now been greatly exceeded. This increase was alread by all greatly exceeded. shared by ali provinces except Orissa, which showed a slight decrease

The increased output of 13 2 per cent in 1938 was accompanied by an increase of 36 2 per cent in the total value of the coal produced in India to Rs 10,64,23,835 (£7,942,077) in 1938, from Rs 7,81,02,439 (£5,872,364) in 1937

There was also an increase of 10 annas 2 pies In the pit's month value per ton of coal for India as a whole, namely from Rs 3-1-11 to Rs 3-12-1 This increase in value was recorded from all by accident from 274 in 1935, 435 in provinces without any exceptions In opposition 213 in 1937 but the number increased

The average number of persons emp the couldeds during the year showed an of 16 5 per cent The average output pe comployed showed a decrease from the figure of 130 2 tons in 1934, which is protons, the highest figure recorded, to tons in 1938 which is less than the figure for 1937. The figures for the last ning average higher than those previously rethese higher figures are partix due to an incomplete. these higher figures are partly due to an i uso of mechanical coal cutters, and p concentration of work. During recent largo number of collieries have been sh and the labour absorbed in the remaind concentration permits of a proportional r of the supervising staff, resulting in tounage per head The fall in output pe employed in 1938 is of course due to i employment

There was a decrease in the number of

In 1905 the output was 217,427 tous valued at £223,422, since when the smallest production was 150,416 tons in 1917 valued at then to 9 5d per unit in 1932 and 1933 £929,516, whilet the smallest value was in 1909 recovers in output in 1934 accompanied when a production of 644 660 tons was valued the everage price to 10 5d per unit at £607 90. In 1934 there was however, 112 £6d in 1936, rising as high as 22 56 at £607 905. In 1934 there was however, a partial recovery to 106 106 tons valued at £388 210 further increased in 1935 to 641,483 tons valued at £703,030, in 1936 to 813,412 tons valued at £1,124,122 and in 1937 to 1 951,594 tons valued at £3,220,554 but in 1938 there was a fall in output and prices to 267,929 tons valued at £2,032,415. The full magnitude of this catastrophic to the Indian manganese industry is perhaps best realised from the fact that whilet the quantily of the production in 1933 was a little over one fitth of that of the peak year of 1927, the value was less than one twenty second part of the value of the 1927 production. In fact in none of the major Indian inheral industries had the effects of the slump been so seriously relias in the manganese industry, it is gratifying, therefore, that some measure of re covery can now be recorded, though the value of the output is still less than half the peak figure to place a large quantities of ore on the of 1927, with a much higher value

The substantial recovery in 1936 is due mainly to increases in the Baiaghat, Nagpur and Bhandara districts of the Central Provinces, and to the resumption of work in Paneli Mahais The output from Sandur State fell by a third The most pleasing feature of this improvement is the recovery of the Central Provinces production from the trivial figure to which it had fallen in 1933(28,789 tons) to 568,806 tons in 1936

The recovery in 1936 has been set back by dec reases in the Bala Ghat and Bhandara Districts of figures of production and export, yet the Central Provinces, Kconjharin the Fastern the industry as a whole had arrived at States Agency and in North Kanara (Bombay), of relative depression, causing many centres of Mysore State. There has been an industry as a whole had arrived at States (Madras) and in the Chitafdurg to cerse work. Added to mercased a districts of Mysore State. There has been an industry to cerse work. districts of Mysore State There has been an supplies there was in 1931 and 1932 a districts of the production from the Panch decline in the activities of the Iron a Mahals, Chindwara, Bellary, Tumbur and Vizaga industry of the world

In 1976 this fell to 74. will a decrease of over 127 000 ton a close fourth with 80,050 tons forman figures show a narked decr

The fall in the Indian output of m ore of recent years can be correlated will in the price of first grade ore ca kingdom ports, from an average of 2 mut in 1924 to 14 9d per mit in 1 but in 1019 the price fell to 197d

This continued fall in the price of m ore from 1924 to 1932 is to be correlative fact that from 1924 to 1927 the increase of the world's production of management ore was much greater than the rate of in the world's production of pig fron a had although there was a fail in the output of manganese ore in 1928, the very large increase in 1929, greater i justified in the increased production and steel in that year, and it is evident world's available supplies of mang are now much in excess of normal requ The present chief sources of produ Manganese ore are Russia, India t Coast, South Africa, Brazil, Cuba, Czechoslovakia and Japan Russa at a price with which many Indian I cannot compete without a return to become a serious competitor of recei The large deposits of high grade ma ore discovered near Postmasburg in Africa are also being developed. Vincersing competition and falling is not surprising, therefore, that in the apparent prosperity of the Indian mi industry in 1929 and 1930, as judg

SALT

The production of salt in India was almost steady during the past 25 years. In 1921, India produced 1,334,000 tons of salt, the figure dropped to 1,084,000 tons in 1935 when it reached the bottom, four years later the output was piaced at 1,439,000 tons and moved in the following decade between 1,368,000 tons and moved in 1,538,000 tons. The war gave a further fillip to the production of this article of vital necessity and the figure reached new high levels as the years passed by In 1940 the salt production amounted to 1,644,000 tons, in the following year, it increased to 1,778,000 tons and in 1942 it reached the record level of 1890,000 tons. No up to date of level of 1890,000 tons of 1890,000 tons of 1990,000 tons of 19

(b) Estimated

There was a moder te increase in the production of salt in India in 1938 made up t increase in the product n in Northe n India and Mad as will decrea es in the production Sind and B mb γ

Ti e production in Aden was 1 ss in 19 S ti n in 19 the production in Burma showed a large decrease

There was a decrease in the imports of sait into India in 1933

Amongst the research schemes of the Committee, plant breeding schemes for the improvement of quality naturally take pride of place The agencies employed by the Committee for its research work have varied little in character since 1923, though they have grown in number It continues to maintain a Technological I abora tenentiates to maintain a Leenhological Facota tory at Bombay whileh includes a complete yield per acre in 1913 44 was 111 ibs. The ascer experimental spinning plant and a scientific laboratory for research on the cotton fibre and a laboratory for research on the cotton fibre and a recall timed area under improved cotton during 1943 44 was about 52 per cent of the total. The ultimate ideal is to encourage the establishment of single variety tracts wherever agricultural conditions and the limitations of irrigation supply and soil make this possible.

For a considerable period the Committee restricted its grants to applicational research, but in 1930 it was decided that the time had come to add its support to the efforts already being made to bridge the gap between the experiment station and the cultivator and to supplement the funds which the Agricultural Departments were devoting to the introduction of improvements into agricultural proctice Special attention from that time began to be devoted to seed distribution schemes

The Committee has not stopped at the production of better cotton, but from its inception has desord special attention to better marketing, to the prevention of adulteration and other Ham with the cotton trade of the country Regulated Cotton Mark ets existed in Berir before the establishment of the Committee, and that system which had stood the test of time was commended with certain modifications for general adoption Regulated Cotton Markets have now been extra Ushed in Bombay, Central Provinces, Madras, Punjab Hyderabid Barods and Indore Sim Huderabaa State —Ral Paladar Kalidas Harly on the recommendation of the Committee, awhier, Director, Agricultural Research which Provincial Governments are empowered to exclude from any specified area cotton, Fapas or seed from outside unless required for a special purpose and covered by a flecace Prior to the passing of this Act, inferior eottons used to be Resputance and Central India States—Rao imported in large quantities into the staple entron tracts for purposes of adulteration, to the detriment of the reputation of several DDITIONAL MEMBERS NOMINATED BY almost all the important staple cotton areas of Bombay, Madras and the Central Provinces as well as in Broda, Raiplpia, Chiota Hodepur, Hyderabad and Indore, etc. In 1925, on the recommendation of the Committee, the Cotton Glanding and Pressing Lactories Act was passed. This provides for a certain measure of control of ginning and pressing factories and especially for the marking of all bales of cotton pressed ulth a pre-s murk and scrial number which enables them to be traced to their origin Recently the Act has been used for the prevention of watering and for the mixing of non cotton articles with cotton. The Committee has also taken steps to bring to the notice of the trade both in India and abroad those improved varieties willelt have now reached a commercial scale

It may be stated without hesitation that, as a result of the efforts of the Committee, the last mineteen years have seen a marked change in the character of the Indian crop, particularly in the percentage of short and medium staple Equally important is the result of agricultural research and its application to the yield of cotton per acre. The average yield per acre in the quinquennum 1938-43 for the whole country was 110 the. This is 14 per acut, lucher than was 110 lbs This is 14 per cent ingler than for the quanquennum 1927-32 The average yield per acre in 1913 44 was 111 ibs The ascer

Adlr es - Cotton F change Mar w | B r r Bombay

Teleptone -B mbay ho 61 6 Teles at le Ald ess - Cotbo : 1 THE REWITTE THURSTLY.

India has been the home of the cotton trade lealicoes in England. The invention of the from the earliest times. Its cotton, known as white wool was well known to the ancients and its cloth was familiar to the West in the days of the overland route. The name Calleo comes from the fine woven goods of Calicut, and the products of the Dacer handlooms are still remarkable as the finest mushins human skill can produce

Indian Cotton -The exports of Indian eotton began to assume importance with the opening of the sea route They received an immense stimulus during the American Civil War, when the close blocade of the Confederate ports produced a cotton famine in Lancashire, and threw the English spinners back on India for their supply of raw material When the war broke out the shipments of Indian cotton were 528,000 bales but during the last year of the war they averaged 973,000 bales Most of this extton was sold at an enormously inflated price, and induced a flow of wealth into Bombay, the great centre of the trade, for which there was no outlet. The consequence was an unprecedented outburst of speculation known as the "Share Mania," and when the surrender of Lee re opened the Southern Ports widespread rule followed It is estimated that the surplus wealth brought into the country by the American Civil War aggregated £92 millions the cultivition of Indian cotton, although interrupted by famine, has steadily increased For the last season for which returns are avail-Since then reported on was computed at 18,812,000 acres and the total estimated outturn was 4,554,000 bales of 400 lbs as compared with 24,151,000 acres and 6.127.000 bales in 1941-42 Bombay, able, 1942-43, the total area in all territories Punjab, the Central Provinces and Hyderabad are the chief producing areas

Cotton Trade -Bombay is the great centre of the cotton trade The principal varieties are Dholleras, Broach, Oomras (from the Berars), Dharwar and Coomptas Broach is the best cotton grown in Western India Hinganghat cotton, from the Central Provinces, has a good Bengals is the name given to the cotton of the Gangetle valley, and generally to the cottons of Northern India The Madras eottons are known as Westerns, Coeonadas, Colmbutores and Tinnevellys The best of these is Tinneveily Cambodia eotton has been grown with success in Southern India, but it shows a tendeney to revert The high prices of cotton realised of recent years have given a great impetus to cultivation. Government have also been active in improving the class of cotton produced, by seed selection, hybridization and the importation of exotic cottons these measures have met with a considerable measure of success, they have not proceeded far enough to leaven the whole outturn, which still consists for the most part of a short-staple cariv maturing variety sultable to solls where the rains season is brief

Reference has been made to the popularity of the Indian handloom cloths in the earliest days of which we have record. This trade grew so large that it excited alarm in Lugiand, and It was killed by a series of ennetments, commencspinning jenny and the power loom and their development in England converted India from an exporting into an importing country, and made her dependent on the United Kingdom for the bulk of her piecegoods

Cotton Mill Industry -The foundations of the Indian Cotton Mill Industry were laid in the middle of the last century Bombay saw its first mill in the year 1854 owing to the enterprise of a Parsee Merchant, Mr Cowasjee Nanabhoy Davar Other mills followed later, and the following table shows how, by successive stages, the Industry's productive

erpacity i	ias grown			
Year	Number of Mills	Number of Spindles	Number of Looms	
1880 1890 1900 1905 1915 1915 1920 1925 1930 1935 1940 1941 1942 1943	56 137 193 197 268 272 253 337 348 365 388 390 401	1,461,590 3,274,196 4,945,783 5,163,486 6,195,671 6,848,744 6,763,076 8,510,633 9,124,768 9,685,175 10,005,785 9,961,178 10,026,425 10,130,568	13,502 23,412 40,124 50,130 82,725 108,000 119,012 154,202 179,250 198,867 200,076 198,571 200,170 200,890	
1944	407	10,222,107	201,761	

It may be noted that the rate of development has not been uniform in all centres of the Industry in India, and although in the initial stages, the Industry was concentrated in Bombay owing to its advantageous geographical and elimatic situation, this pre enimence of Bombay was not maintained in subsequent years. The industry's development in later years has been more rapid in other Provinces in India and particularly in the Indian States

From 1860 to 1865, progress was materially assisted by the accession of wealth which accrued to Bombay commercial interests owing to the high prices at which Indian cotton was sold during the American Civil War Another factor which contributed to the rapid growth of the Industry was the establishment of a profitable export yarn trade with China In the years 1865 to 1871, the Industry suffered a severe setback to its prosperity owing to the financial crash which followed the American Civil War In the early seventies, after the restoration of credit, the industry made rapid progress, though in the initial stages, the development of the weaving side of the industry was comparatively slow. The profitable yarn trade with China enabled the Bombay mills to make further progress in the 'seventles and 'eightles of the last century.

Cotton Excise Duty—The growth of the industry in India during the early years was regarded with a jealous eve by the Lancishire manufacturing Interests whose agitation resulted in the Government of Indh exempting from import duty coarse yarn and cloth in 1878. This resulted in the substitution of the exempted ing in 1701, prohibiting the use or sale of Indian classes of goods for the medium and fine goods

pre lously imported from England to the th position of the industry the causes of the detriment of the groving indi nous industry depression it extent to which it was due to In 1895 the Indian initial were close if to the free comage of all or. This st p had a diasatt us and almost immedit he effect on the Industry with the pr ision of an autofinate machine but iness with China and J pau esme to a st and still as the exchange drops d by about 1 to 15 per cent to the detriment of I dia. Pariff Board Enquiry—1 special T iff E riy in 103 Go rament di ected the Ta iff Board w s spointed soon aft r to enquire i to Bo rd to enquire into the question of the grant

the meantime the depreciation of the Japanese exchange, consequent on Japan's going off the Gold Standard in 1932, enabled her to place her piece-goods on the Indian Market at abnormally low prices, and offset to a very great extent the protection conferred on the Indian Industry by the 1930 Act Government, therefore, directed the Board to hold a special enquiry into this question, and in recordance with the recommendations of the Board, the duties on forcign plece goods were raised from August 1932, to 50 per cent or 51 annas per pound, whichever was lugher, but in view of the continued severity of the Japanese competition, Government once again found it necessary in June 1933 to raise the level of the duty on foreign piece goods to 75 per cent ad valorem or 64 annas per pound At the same time notice was also given of Government's intention to abrogate the Indo-Inpaneso Trade Convention of 1904

British & Japanese Trade Delegations -This was followed by the arrival in India of an official Delegation from Japan and an unofficial Trade Delegation from the United Kingdom The United Kingdom unofficial Delegates deliberations with Indian inflowners culminated In what has been termed the Mody-Lees Paet of 1933, an understanding which was to be in force until the end of 1935 Similar discussions between certain unofficial delegates from Japan and Indian millowners proved abortive, but the efforts of the Japanese official delegates resulted in a fresh Convention and Protocol being agreed to early in 1934, under which a link was established between the exports of Indian raw eotton to Japan and the imports of cotton piece goods from Japan Japan agreed to take one million bales of Indian raw eotton in return for the right to export 325 million yards of eotton piece goods to this country, with a maximum limit of 400 million yards for an aggregate offtake of 11 million bales of Indian raw eotton was also necorded most favoured-nation treat-ment in respect of her miscellaneous trade. In virtue of the terms of the Protocol, the duties on Japanese eotton piece goods were reduced, with effect from 8th January 1934, to 50 per cent ad valorem with a minimum specific duty of 51 anns per pound on plain grey goods

piece goods imposed by the Cotton Textlle Industry (Protection) Act, 1930, were due to expire on 31st March 1933, but as Government were not able to complete their consideration of the report of the Tarlii Board of 1932 (which had recommended the institution of specific duties based on weight subject to their being combined with alternative ad calorem duties to prevent a loss of revenue and the imposition of a duty of one anna per pound in the ease of yarns below 50s count) before that date, they extended the provisions of the Act for another

The protective duties on cotton yarn and

Bll! --The Cotton Textile Protection Industry (Iextile Protection) Bill of 1934 sought to give effect to the recommendations of the Tariff Boards on the eotion and scricultural industries in the light of the Indo Japanese Proto of and the unomeral agreement entered

So far as yarn was concerned, the Act, as passed, fixed the rates of duties at 5 per cent (British) and 61 per cent (non-British) with a corresponding alternative minimum specific duty of 11 annas and 17 annas per pound on counts up to and including 50s. In the case of piece goods, the levels of the duties were fixed at 25 per eent and 50 per cent on British and non British goods respectively, with a minimum specifie duty of 42 annas and 51 annas per pound on plain grey goods The Act also gua ranteed protection to the Industry for a period of five verrs ending March 1939, but recognized the need for an examination of the scale of duties on two occasions firstly on the expiry of the Mody-Lees Paet at the end of 1935, and secondly, at the end of the Indo Japanese Protocol in March 1937 Accordingly, at the end of 1935, March 1937 Accordingly, at the end of 1935, Government directed the Tariff Board to examine the adequacy of the then existing levels of duty on British goods Accepting the recommendations of the Board, Government reduced, with effect from June 25, 1936, the duty on all United Kingdom cotton piece goods, with the exception of prints, to 20 per cent ad valorem with a minimum specific duty of 31 annas per pound on plain grey goods

Textile Trade Agreement -The Indo Japanese Trade Protocol was subsequently renewed for a further period of three years ending March 1940, without any material modification in the rates of duties applicable to Japanese cotton piece goods. With the separation of Burma from India in April 1937, however, the basic quota of cotton piece goods for Indla was reduced to 283 million yards, rising to a maximum of 358 million yards, leaving a margin of 42 million yards for Burma The negotiations between the Government of India and His Majesty's Government in the

clusion early in 1939, and the new Agreement specifically provided for a reduction of the basic rates of duties on United Kingdom cotton piece goods as under -Printed goods - 171% ad ialorem 15 % ad valorem or As 271 Grey goods

United Kingdom for the conclusion of a new

of view of the volume of cotton consumed, and years, financial assistance has been grant fifth in point of spindles and looms installed The position of the Mill Industry in the national for the purpose of improving the cottage i economy of India will be evident from the fact try's organisation and producing and mail that, at the present time, it consumes more than 50 per cent of the total Indian cotton crop, directly gives employment to about 600,000 workers, and affords subsidiary employment to large numbers of persons who are engaged in various trades which directly depend for their existence upon the Cotton Mill Industry

Hand Weaving Industry—It has been estimated that there are about 2½ million handlooms spread throughout the whole of the country, and that the number of dependents who rely in some measure upon this industry for their support is somewhere near ten millions, we wer Early in 1941 the Government of a number greatly in excess of that supported by appointed a Fact finding Committee (Han any industry) except agriculture. The annual production of cotton goods on handlooms is estimated at nearly 2,000 million yards. The economic position of the cottage handloom weaver in India has, for a number of years, been to the public.

In relation to the world cotton textile industry, receiving the attention of the Government the Indian Industry ranks second from the point India and Provincial Governments For Provincial Governments from central rev methods Despite this assistance, the ind is reported to be in a depressed condition various suggestions have been made from to time from various quarters to remed situation. All these proposals were ear examined at a conference convened by Central Government in December 194 whileh it was decided to set up a Fret F. Committee for the purpose of ascertaining plete freturi data concerning the han weaving industry, as a preliminary to concernessors for the purpose of assisting the concerning the con appointed a Fact finding Committee (Han & Mills) This committee submitted its

or raw pace to rar as minno business is concerned; tion of the yleid of the crop while the latter embodies that relating to the jute export trade and manufacturing industry. Thus, the two reports will appear to give a complete pleture of the jute industry and trade ln India

For the last few years, the Section has been engaged in certain developmental work of a hich the main are -

- (i) Dissemination of jute prices in the mofusial With the help of the Publicits Section of the Committee, jute growers in the interior of the jute growing provinces of Bengal, Blhar, Orissa and Assam are informed of the daily prices prevailing in Calcutta so that they may be well provided with discussions that they may be well as the discussions that they may be well as the discussions that they may be well as the discussions that they may be well as the discussions that they may be well as the discussions that they may be well as the discussions of the discussion of the discussions of the discussions of the discussions of the discussions of the discussions of the discussions of the discussions of the discussions of the discussions of the discussions of the discussions of the discussions of the discussions of the discussions of the discussions of the discussions of the discussions of the discussions of the discussions of the discu
- (ii) Marketing of fibre group from improved seed—Tills scheme is intended to interest growers in improved jute seed witch can give higher yield and at the same time produce Seeds of improved strains are better fibre distributed to growers at concessional prices and the results of grading and marketing of fibre produced both from the improved and local inrletles are studled with a view to demonstrat ing to the growers the advantages of using The seiteme is in operation since good seed the 1942 43 season
- Organisation of Grading Parties -The primary producers are instructed through peripretation Grading Parties to assort inte themselves, according to the trade specifications and sell it on the basis of grades so that the middlemen may not under estimate the value of their fibre. They are also told about the various faults that occur in jute and the steps that should be taken to eradicate them The scheme has been operating from the 1941 42 season
- (1v) Establishment of Co operative Jute Sale Societies—With a view to forming a selling organisation of the growers, a few such Societies have been established in 1942 43 in Bengal, as an experimental measure Three such as an experimental measure Three such societies are also working in Orissa While those in the former province do not provide for credit facilities, those in the latter have linked eredit with marketing
- Study of Indian Market with a view to uncreasing the consumption of jule and jule mation to the grower to assist him tow goods—The war has closed many overseas improved methods of growing and retting, markets for jute and its manufactures, at the getting better prices for his crop. A prelimination of the growing and retting performs of the growing and th substitutes are becoming more important Therefore, a comprehensive study of the Indian market is being undertaken with a view to explore the possibilities of increasing the internal consumption of jute. The scope of the enquiry includes both mill made and cottage industry goods

Principal Officer in charge of the Section -S M Gupta, B Ag (Bombay)

Jute Forecast -- Work on the Jute Census have iong been completed The results of the random sampling survey have been considered to be satisfactory and the method has been adopted by the Government of Bengal for forceasting the jute acreage,

Economic Research -The Leonom search Section keeps constant sigliance reports of the economics of jute Some tant findings relating to the world consi of jute, its trend in recent years and its to the changes in the world market, s those brought about by the war, have published in the Committee's Teconomic 1 Bulletin No. 1 An Investigation in relationship between the demand for a supply and price of inte is now under pithe results of which may have in impearing on the question of the control Other investigations have t jute crop prevailing in Caicutta so that they may be well flute erop other increases from may be desired with finefunctions taking place in the light on some important aspects of the terminal market. This is being done since the industry, such as the productive expects 1030 40 season

(ii) Marketing of fibre grown from improved indirection. The effect of the growth of the market for jute goods manufacture indirection. substitutes and of new uses of jute on th trade is also being investigated on Jute substitutes is expected to be pub soon

> Besides research work on the econom inte, a large volume of information on v subjects pertaining to jute is regularly eol from authoritative sources in different of the world The Committee has also a s correspondent in the Argentine Republ report on the conditions of the jute trade in country A close watch is maintained c developments in economic and comm poiley abroad calculated to replace jute l possible substitutes, and prompt steps are t to collect all relevant information on the su to place it at the disposal of the trade and o concerned

Publicity—A monthly journal, know the Indian Central Jule Committee Bul the annual subscription of which is Rs or 10s (including postage), is published mon containing figures of production, consump prices stocks, imports and exports of inte gridle manufactures, and also information grading the prices and utilisation of substitutes. It also includes items relative export and import restrictions imposed various countries and other information regai the economies of jute and its competitor well as general information of interest to trade. The Committee also disseminate i mation to the grower to assist him tow Investigation into the economics of jute gro has been undertaken in three representa

iron & Steel Company Ste I Works realizated and the nel houring Orisss Feudstory Stat s

The credit for the first consult attempt to I maintain respect of its o ir course. The most manufacture sted in India on a commercial important of in a ures in India to () the course of the time of the course of ftle order f 24 000 million tons Out of this

wans (Permian) coal fields of the Damplar lesin

More than 1,009 million tons of strongly oking coal with less than 800 ash but high in It is likely to have far reaching effects sulphur, occur in the Tertlars conffelds of establishment of several new industries i desam, but these are not at present considered such as foromotive manufacture, and the ureful for metallurgical purposes

The manufacturers of hard coke in India relaon the Jharia couldelds to an overwhelming extent to meet their requirements. With the present wasteful means of extracting coal and the use of metallurgical coal for non metallurgical purposes, some experts consider that the coking coal resources of the Jharla field vill not list for more than 30 years. The Indian Coal The Indlan Coal Mining Committee reported in 1937 that these reserves would last for about 57 years

If the Government and the coal industry co operate and adopt adequate measures for improved methods of mining coal and conserving and econo alsing the use of metallurgical quality coal, the life of these reserves will be extended beyond the gloomy prognostications referred to above

In addition, it might become possible in the future, as the result of technical research, for the iron and steel industry to use coals not regurded as coking coals at present, by blending drawing for rifles and machine gun imagthem with strong coking coals

While the reserves of coking coal in India are not adequate for melting the huge quantity of iron ore available, frequent repetition of this statement has produced an impression abroad that adequate raw materials are not available in India for a large scale iron and steel industry, which is entirely a mistaken view. The metal lurgical industry has taken its ovn precautions to prevent the speedy exhaustion of its coking It is unfortunate that so much coal reserves of India's best coking coal is still being used for steam raising purposes but we can confidently hope that this-practice will tend to diminish in was opened when the Tatas added a W the near future

The coalfields and the Iron ore deposits are situated within a short distance of one another and there are ample supplies of limestone and dolomlte within a reasonable distance of other raw materials

Importance of the Industry in the National Economy—The total expital invested In the iron and steel industry in India is estimated to be about Rs 25 crores Roughly 150,000 men and women are employed directly and indirectly in the Indian iron and steel industry, the re rolling mills and the auxiliary enterprises Including their dependents, the total number of people dependent on the industry in India is about 600,000. The industry is contributing to the Government and the public revenues between

in India accompanied by improvement in the The progress of the steel industry is one of

all fields of the Damodar lessin Company Ltd., may be regarded as the limportant advance in steel making that the young Indian steel industry ha facture of railway wheels, tyres and a which acid steel is specified. The devel and munificture of a low alloy high tens containing copper and chromium knc Historian is another instance. The steel is employed for the construction of the Howrah Bridge

> Besides metallurgical research, fuel rechemical research and research in refra are being pursued in India

Special Steels Manufactured in Amongst special steels now manufactured din and special bars for the manufacture of bullet proof armour plate for the fibri for howltzer shields and gnn turrets, valude of allow steels for the manufacti steel helmets armour plereing bullets and and shear blades for shearing armour ! chrome molybdenum alloy steel for air spring steels for michine mins, special nickel steel plates for gun earringe moun hull curbon steels for high explosive and must dies, high speed steel for my tools and stuniess steel for surgical instrum Other manufactures by the industry in steel mill roll-, steel billets for drawing telegraph wires and barbed wire, and to Admiralty specification for ship buil A process for the manufacture of acid licarth steel required for gun forgings, carriage axles and railway wheels, tyres, has also been developed

A new chapter in India's from and size indi Tyre and Axle plant with up to date mills Unlshlug requirements to their plant at Jams pur and began the manufacture of acid . It is bound to go a long way tow the country's self-sufficiency so far as its regulrements are concerned This might be requirements are concerned n prelude to a large scale manufacture locomotives in India

Munitions Output -Referring India's India's important munitions output, the I "The Amer Office recently announced Technical Mission has recently sponsored se new plants including work for machine t India has also undertaken the manufac of alloy steels which form the component manufacture The special steels silicon has been established in one Indian w and at least half of Indla's requirements Development—The last decade has seen a great expansion of the Iron and steel industry.

At the in 1943 Government have also taken present time imports of fine papers in a prettle increase the output of Indian mills eally stopped and Indian mills are working to full capacity. The emergency has undoubtedly given the newer mills an excellent opportunity of transport facilities for raw matchins i obtaining themselves but with the consider Caustic Soda, etc. Indian paper mills also increased consumption of paper by the tentral and Provincial Governments and the Army, a terious shortes and the general public. From April 1, 1943, the Government of surface.

THE WOOL INDUSTRY.

Wool exported from India consists not only of wool grown in India itself, but of imports of His Majesty's Government, and a for purchasing raw wool from India devar period was reached in Juno 10 agreement stipulated an increase of 12 in the price level then prevaining and Aepul Quetta, Sinkarpur, traitsar, Multan, Kulu, Iazilka, Lahore and Panipat are the main collecting centres for wool received by land from Afghanistan and Iran, whence it is almost invariably railed to Karachi for subis almost invariably railed to Karachi for subsequent export overseas

Imports -There was a sharp increase in the imports of wool and wooliens which were valued at Rs 4,29 takhs in 1940 41 as compared with Rs 2,16 takhs in the preceding year. Almost whole of the increase was attributable to the heavy imports of raw wool for consumption in Indian mills the resources of which were fully mobilised to meet the growing demand for clothing India's ever increasing army Imports of raw wool shot up from Rs 75 lakhs to Rs 279 takhs representing a gain of as much as 272 per cent over the preceding year's Australia was the main supplier of raw wood On the other hand, woollen manufactures recorded a modest gain of about six per cent from Rs 1,41 lakhs to Rs 1,50 lakhs Yarn and knitting wool recorded further drop during the year

The imports of woollen plecegoods showed an the imports of women precessors showed an increase from Rs 35 lakhs to Rs 57 lakhs in value but the quantity was from 52 8 million lbs in 1939 40 to 30 8 million lbs in 1940-41 Arrivals of shawls and lohis from abroad dropped further from Rs 4 lakhs in 1939-40 to Rs 3 lakhs in 1940 41 as compared with Rs 14 lakhs in 1938 39 and were mostly from Landa which lakhs in 1940 41 as compared with Rs 14 lakhs in 1938 39 and were mostly from Landa which lakhs in 1940 41 as compared with Rs 14 lakhs in 1938 39 and were mostly from Landa which has a lakh to the same which we have the same and the same was the same which we have the same was the from Japan which enjoyed the virtual monopoly of this trade in the absence of Germany which was at one time India's main supplier of these varieties

Exports—The year 1940 41 saw a sharp setback to India's export trade in raw wool which amounted to Rs 1,64 lakhs as against Rs 3,23 lakhs in the preceding year and Rs 2,99 lakhs in 1938-39 The drop in quantity should be probably more than that in value since the prices of raw wool were on the upgrade through prices of raw wool were on the upgrade through-of carpets of a fine quality which find a out the year The United Kingdom was by sale in the world market This work in far the most important customer of Indian entirely on handlooms and the carpets wool Following the negotiations between the a high price

The Indian carpet wools continue popular in the United States because e with other carpet wools, they shrink le and are, therefore, desirable for manufacture, therefore, desirable for manufacture grade earpets. But the deman not be fully satisfied owing to shipping diand the restrictions on trade. From 1910, however, a limited quantity was to be shipped to the United States on a local under the licensing system and basis under the licensing system and a mentary quota for the year was later Shipments to the U S A were reduce 18.8 million lbs to 4.3 million lbs

Mill Manufacture—The number of India, Including Indian States, in 19 latest year for which detalls are availal 39, with a total paid up capital of Rs 1,00 The total number of looms and spinds 1,958 and 68,107 respectively

The bulk of the wool used by the Indi is Indian wool, although it is supplement some extent by the importation of meri eross breds from Australia for the man of the finer classes of goods Their ma manufactured goods is almost entirely i ltself

Cottage and Small Scale Industrearned on in various parts of the notably in the Punjab and the United ees Woollen pile earpets are made in the jalls Amritsar had a considerable one time in weaving shawls from passing under fleeco of the Tibetan goat, place has been taken to some degree by nufacture of shawis from imported yarns, but more generally by the mam

Silk

Sericulture has been practised in India for the la t two thousand years and a lot of a ik n ed to be exported in days ion gone t) Non-lower r India h s lost ler export market and ioner r andia in slow ter export market and imports and by its 13 000 000 worth of silks fr in Italy Japan China Switzeri nd and the United him, doin The world dem not for silk and all waste h a shrunk and there is increasing competition from foreign silk goods and mixtures and artificial silk suistitutes. OILS AND OIL CAKES.

The statistical publications, issued by the market for the oil cake in 1 urope a Commercial Intelligence Department of the oil cake, on account of want of stand Government of India show that the export of fleations, is sold at a discount. The all oil seeds from India is stradily going down oil seeds is less than that on oils and except groundants on account of keen inter thence it is easy and economical to national competition

It is economically as well as industrially un sound for India to export her oil seeds instead of manufacturing olis oli cakes and other allied products in India The present practice allows the other countries to derive the manufacturing profits and at the same time deprives Indian agriculture of the great potential wealth of oil cakes as cattle feed and manure

In India there are about 500 oli milis registered under the lactories Act and over 1,000 medium alze nower driven oil milla An immense quantity of oil is, as a matter of fact already manufac fured in this country by crude as well as up to date processes

Village Oil Mills worked by bullocks and handpresses exist in all parts of the country and supply most of the local demand for oil and oil caices The big mills supply the re quirements of the towns and export trade These milis treat all kinds of oil seeds available in the country

The industry has made good progress in the production of mustard oil, castor oil, groundnut oil and linseed oil and as a result the export of these oils and oil cakes to foreign countries has steadily improved during the last ten years The progress in the case of groundnut and easter is very satisfactory

The development of oil milling industry in India has to face the under-mentioned difficulties There are high protective tariffs in European countries which encourage the export from India of raw materials rather than the manufactured products Secondly there is a better freight facilities are available.

hence it is easy and economical to oil seeds by sea than oils or oil ca development in the export trade in oil special consideration of shipping con provide tanks for bulk transport c arranged by the rallway commanies

The standardisation of oils and oil help the industry in finding marlets countries where a better price can be for the articles

It is necessary to educate the Ind rator in the use of oil cakes for fee manurial purposes and it should be: on him that the value of the article depend on the oil content but on of buminoid content of the article oil content in the cake means a high centage of aibummous matter which essential for the cattle

Effect of War on the Oil Industry -During the War of 1914-18 the export of linseed oil, groundnut oil at oil ind increased by 443%, 150% ! respectively over the last pre war ay 1912-13 and 1913 14, but the export had, however no marked change du The oil crushing industry of I period have a good prospect of developmen the present war period

The prices of oils and oil cakes at t mencement of War in September were lo half the prices of these articles du pre war, war and early post-war per account of general low price levels since The present War will have effect in n the price level and brisk trade in oils

Such historical ordinare, a servicial contact of the second control of the black of the service of the second control of the second

modern refineries working with raw sugar (gur) even with the reduced duty on Khandsari of and by Indigenous open pan concerns Sugar Re 080 per ewt there would be a revenue of production in India 1 few years ago amounted about Rs 6,00,000 during 1939 40 But this approximately to half the estimated total consumption within the country Since 1931-32, Rs 135,000 in 1939-40 The amount of duty the years ago amounted about Rs 6,00,000 during 1939 40 But this sumption within the country Since 1931-32, Rs 135,000 in 1939-40 The amount of duty the volume of factory produced sugar has in-levied in 1940 41 was Rs 2,01,000 and in 1941-42 ereased by approximately 700 per eent During 1936-37, India produced over 1,230,000 tons of sugar, ie, slightly more than her estimated con sumption of about 1,150,000 tons in 1936 37, and after two lean years, again produced over 13? lakh tons in 1939 40 The maximum production was achieved in 1943 44, which was estimated to be 1,304 000

Along with a rapid increase in internal produc tion, there has been a sharp decline in imports For instance, from an average of approximately one million tons in the years up till 1930 31, imports fell by about 45 per cent in the following year and dropped to about 250,000 tons in 1933-34 and decreased further to 221,000 tons further to 198,888 tons, and in 1936-37, the net import was only 11,960 tons. As a result of dwindling imports Government are losing revenue from this source. The import during 1937-38 was only 9,410 tons but the import in 1938-39 was over 254,000 tons, in view of the deficit in indigenous production. In 1939-40, due to the greatly increased interval. 1934-35 During 1935 36, imports In 1939 40, due to the greatly increased internal production and the outbreak of the European War, the imports dwindled to about 35,000 tons The yield from this source diminished from over Rs 10 erores in 1930 31, to about Rs 3 81 crores for the financial year ended March 31, 1935, to 3 24 crores for the year cuded March 31, 1936, to Rs 50 lakhs in 1936 37, to Rs 25 lakhs in 1937-38, and to Rs 45 inhis in 1938 39 In 1939-40, however, it went up to about Rs 3,96,00,000 due to increase in imports, necessitat ed by the small cane cop, diseased cane, etc., in 1938-39, in India The imposition of the excise 1938-39, in India duty at the rate of Re 1-5-0 per ewt on factory sugar, and Re 0 10 0 on klandsarı sugar, from April 1st, 1934, has ylelded a revenue to the Government of Rs 97,22,000 in 1934 35, and Rs 1,58,24,000 in 1935 36, and Rs 2,52,62,000 in 1936 37 With the Increase in excise duty on fac tory sugar to Rs 2 per ewt and Re 1 per cwt on Khandsarl sugar the yield during 1937-38 was Rs 3,30,97,000 in 1937-38, and Rs 4,22,44 000 in 1938 39 and Rs 2,47,19,000 in 1939 40 further increase In the excuse duty from March 1, 1940, the yield was about Rs 3,90,00,000 in 1940 41 In the year 1941-42 the amount collected was very much lingher at Rs 6 72 erores In the twelve months ended March, 1943, the amount collected was Rs 4 83 crores In 1943 44, the duty amounted to Rs 6 82 crores, and in 1944 45 to Rs 6 40 erores

Since the imposition of the excise duty it is noteworthy, that this Khandsarl production has gone down considerably From 1st March, 1939 the duty on Khanglsarı sugar was decreased to Re 0 8 0 per ewit, but the definition of 'fretory" in the Saight Excise Duty Act, 1934 was amended, so his to omly the reference to the number of workers employed with a view to enable duty being charged even in sugar on account of the loss of Java, Philippines

Rs 3,92,000

During the year 1937, there was a precipitate fall in the price of sugar and in order to avert internal unrestrained competition a Sugar Syndicate was brought into existence, comprising over 90 milis Later in the year, the industry approached the Government for iegislative interference with a view to avoid over-production of sugar and to overcome Internal unrestrained competition, which brought down the price of sugar to an uneconomically low level The Governments of the UP and Biliur, to whom these representations were made passed Sugar Factory Control Acts, and made it compulsory for every mill to obtain a licence for working sugar factories from the Government. One of the conditions of the grant of licence to a factory has been member-ship of the Indian Sugar Syndicate The Indian Sugar Syndicate has thus been given legislative recognition by the Governments of the UP and Bihar, and all mills working in the provinces of the UP and Bihar are compelled to sell their sugar through the Syndicate The Governments of the UP and Bihar have also appointed a joint Control Board consisting of the representatives of the UP and Bihar Governments, the representatives of the industry, and of cultiva-tors and consumers In 1940, the life of the Sugar Control Act was extended by Bihar and U P Governments up to June 30, 1944, and a Sugar Commission was also appointed by them to be "a final authority, subject to Government control, on all matters connected with the pro duction and sale of sugar, as well as other matters regarding cane-prices, etc "

There was a very large earry over of sugar, approximating over 4 lakhs tons, at the begin ning of the 1940 41 season and us a consequence the U P & Blhar Governments restricted, by means of quota, the production of sugar in fac-tories in U P and Blhar There was no check, however, to the production of sugar in Provinces outside UP & Blhar and in Indian States Since 1942, the policy adopted by Government is to maximise production, and their efforts have met with considerable success, as can be seen from the increase in production in 1942 43 and 1943 44 in spite of handleaps of obtaining sulphur, coal, etc. The production of sugar fell in 1944 45 owing to shortage of cane and transport, difficulties. High prices realised for transport difficulties Gur also diveated cane supplies to some extent from the manufacture of sugar in factories for the manufacture of Gur

During the year 1937 the Government of India imposed a ban on the export of sugar from India, by sea to any country except to Burma, for a period of five years

As a resit of the train, then fitt intrible is an agreement little ow frei ferveret for i wealt letter in with a positie to tak full add ni of the front in the results of the great law the influence of a great limit in cannot be rall as the influence as horter of a great limit, the country and tiere is no large eurol a cit o er for export-

Research — A great deal of research wo k has been done in India during the lass 30 years both been done in India during the lass 30 years both by the Government and by private agencies of superior varieties of cig r tobacco from beautiful translated and Pennsylvania Semantia II vana Alaedia and Pennsylvania

-

The Imperial Council of Agricultural Research, New Delhi, started in 1936 a Tobacco Research sub station at Guntur for the improvement of the quality of eigarctic tobacco It was found that jowar (Andropogon Sorghum) as a preceding erop to tobacco helped to improve the quality of cigarette tobacco better than Maize and Varlga (Panicum Miliaceum)

The India Leaf Tobacco Development Com pany, the largest buyers of tobacco in India, have been experimenting since 1920, chiefly in the Guntur area (Madras) and also in Saharanpur (United Provinces) and Whitefield (Mysore State), on the commercial possibilities of Virginia tobacco production and have helped to build up the Virginia tobacco industry to the position it now occupies

The cultivation of Virginia tobacco in the Mysorc State has increased appreciably during recent voirs due to the impetus given by the Mysore Tobacco Company

Improvement in Marketing —The marketing survey of tobacco conducted by the Agricultural Marketing Adviser to the Government of India revealed the urgent need for standardising the methods of grading and preparing tobacco before putting it on the market With a view to assisting the trade in the above direction, the Indian Tobacco Association which consists of representatives of growers, dealers and manu facturers was formed at Guntur Under the Agricultural Produce (Grading and Marking) Act, rules were framed in 1937, laying down grade designations, definitions of quality, methods of marking and packing for un manufactured flue cured and sun cured Virginia and sun eurod Natu (Country) tobacco In 1943 about 2 million lbs of tobacco valued at Rs 10 laks were graded in Madras, Bongal and Bihar

With a view to controlling the quality of tobacco exported from India, the Government of India have appointed an Inspectorate staff consisting of a Chief Inspector and several Inspectors for examining the quality of tobacco and grading it on the basis of specifications laid down for Agmark grades

In 1939, the provisions of the Madras Commercial Crops Markets Act were applied to tobacco In Guntur District and Bezwada taluk of Kistna District This provides for regulating the market practices regarding weighment, trade allowances and methods of sale A number of A number of market yards has been opened where the growers and dealers are given facilities for transacting their business in tobacco

Production -- More than half the Indian production is concentrated in 5 clearly defined zones, 112 -

THE NORTH BENGAL AREA comprises the districts of Rangpur, Jahalguri and Dinajpur of Bengal including the Cooch Behar State About three fourths of the crop in this area is under N tabacum which includes the varieties locally known as Jair, Bhengr, Naokhol and of Gangetic alluvium, rich in lime generally and Hengl. The remaining one fourth is under in potash in isolated areas. The raising of

rustica varieties for Hoof a and chewing purposes

The soils are grev ashy coloured loams rich Tobacco is sown in the nurseries in potash from August to September and transplanting of seedlings is done from October to December The crop is irrigated from temporary wells and 12 harvested from January to March The leaf is cured by air curing and sun curing methods The produce is marketed from March to October The finer qualities of Bhengi are shipped to Burma, while the poorer qualities are sold in India for cigarette manufacture Hingu and rart of Motivari are sold for making snuff

GUNTUR AREA THE comprises the districts of Guntur, Kistna and adjoining portions of Hyderabad State Varieties of N tabacum are exclusively grown in this area Prior to the introduction of flue curing of Virginia tobacco in 1928, all the tobacco was The tobacco produced in this area sun cured ls grouped into (1) Virginia—(a), Fiue cured (b), Sun cured, (11) Country or Natu tobacco, invariably sun cured In the first group, Harrison Special and in the second group Thoka Alu, Kara Alu varieties are important, Fine-cured tobacco is being used in India and is also exported to the United Kingdom and Lgypt for manufacture of eigerette and pipe tobacco. The sun cured Virginia, and Natu tobaccos are used for making cheaper eigarettes, etc. The soiis are deep, heavy black cotton soils and rich in lime. Tobacco seed is sown in August and seedlings are transplanted from The crop is grow October to November invariably without the help of irrigation an is harvested from January to Murch flue cured Virginia tobacco is marketed from January to April while the sun cured Country and Virginia tobaccos are marketed from March to June There are nearly 6,000 flue curin barns and the Virginia tobacco is cured by means of artificial heat radiated from hot lroi pipes arranged on the floor of the barn sun curing is done by stringing the leaf to jut twine and curing them on racks pitched on the open field for drying in sun To the India. open field for drying in sun To the Indian Leaf Tobacco Development Company Ltd goes the credit for establishing the industry it Virginia tobacco production and for assisting the growers in seed and seedling distribution research and propaganda in manufal require ments, proper methods of curing and ensuring a market for the tobacco by buying the major portion of the production

THE NORTH BIHAR AREA comprises the districts of Muzaff rpur, Darbhanga and Purnea In this area both the N tabacum and N rustice varieties are grown in the proportion of two thirds to one third A major portion of the production of N tabacum is utilised for chewing while a fairly large quantity is bought by the Cigarette manufacturers in India. The production from N rustica is utilised for hooka purposes

The soils are iight, ash coloured, dccp, and

dual Extinction Of Exports -Loid ig, as Viceroy, made the position clear statement in February, 1926, when he ternal policy of other Governments the mient of India had decided to reduce to all countries in the Par East by a roportion annually with a view ultimately ontinuing them altogether une, 1926, it was announced that extine

these exports would take place in ten

riments at the special instance of His to arrangements (prescribed by the League of sty's Government The Conference after Nations) which confine the amount of such chanstive discussion of the phenomena exports to the quantities approved by the Governments of these territories Besides these places, opium is exported to Burma and Aden Before separation, they formed an integral part inces and of the reports of the local committed in India and it has been decided to continue to eoneiuded that it appeared that certain allow them to draw their supplies of opium from India at cost price as long as they require garded as having excessive consumption it The quantities exported to Burma and that Orises and the Ferozepore District Aden during the year 1939 were 22,443 kgs The quantities exported to Burma and

The steady decrease in the average annual considered that there was no evidence of net receipts (after deducting expenditure) from the opium export trade is shown by the following

1910 11	to	1912-13	F	$\mathbf{R}\mathbf{s}$	801	62	iakiı
		1922-23		$\mathbf{R}\mathbf{s}$	183	41	,,
		1924-25		Rs	167	51	,,
	to	1933 34			55		,,
1934-35				${ m Rs}$	19	35	,,

In making this sacrifice, the Government of India had gone further than the requirements of the provisions of international conventions India's voinntary relinquishment of crores-in revenuo has not, however, contributed to the reduction of consumption in the Far Eastern countries, which are now obtaining their supplies of opium from various other sources

Total Prohibition In Assam —The control of poincy about internal consumption rests with Provincial Governments, who are adopting several measures to curtail supply to the public

Since 1919 various restrictivo measures had been adopted by the Government of Assam in of their efforts to eradicate the opium habit, such because as the raising of the retail price, the rationing found that the rate before 1931 had of shops, the issue of passes, introduction of parapid so that stocks were brought to a prohibition in selected areas, and accelerated

The Government of Assam embarked upon a policy of total prohibition in the included areas of the Province from March 1, 1941 A system of quarterly accelerated reduction of oplum rations by which rations of all consumers were reduced at the rate of one eighth of a tolaaccording to the presembed scale—was enforced from September 1, 1939, in the partially excluded areas of the Province with a view to eradicating. this pernicious habit of opium consumption

In these areas within a period of two years
Close supervision is maintained over the
incensed vendors in all parts of British India. the conditions of their ileenses require that the shops shall always be open to inspection, that no opium shall be sold to children or bad characters ried that to avoid complications that that sales shall only be made on the Heensed arise in attempting to sit in judgment on premises and during the prescribed hours, that only nnadulterated Government oplum shall be sold, that credit shall not be allowed, that no consumption shall be permitted on the premises that full accounts shall be maintained and that the names and addresses of purchasers of more than one or two tolas shall be recorded These conditions are effectively enforced by the excise departments of the various provinces

regarded as a surplus country in respect of her resources of raw hides and shins. It is estimated that normally she produces 20 million cattle hides, 5.7 million buffalo hides, 27 million goat and 17 million sheep skins a year. Only a portion of the cattle and buffalo hides is obtained from shaughtered animals and the bulk, about 75 to 80 per cent. Is derived from animals that die a natural death. On account of this reason the output of these hides increases when famine, flood, cattle epidemics, etc., take an unduc toll on livestock. Goat and sheep skins are, however, derived from animals slaughtered for meat and their production remains more or less at a steady level.

Trade in raw hides and skins -Of the total ontput of India s raw hides and skins It is estimated that from 50 to 75 per eent of eattle hides and about 45 per eent of gort and sheep skins are now locally tanned and the balance exported in the raw condition Previous to the European war of 1914-1918, about 56 per eent of the total export of eattle lildes used to go to Germany and Austria and the balance to the other Turop can countries and United States, while 80 per cent of the exported goat skins used to go to United States. The Germans brought the collections, euring and grading of the Indian eattle hides and the Americans those of goat skins to a fairly high standard. The war disorganised this export trade and during post-war years. this export trade and during post-war years the Government of India levied an export duty of 15 per eent on hides and skins with a rebate of 10 per eent for those which were exported to and tained in Empire countries. The object of this measure was to foster in the first place India's leather industry and in the next encourage taining of Indian hides within the British Empire and reduce their export to Germany and other non-empire countries. Later out, the duty was abolished. The measure did not succeed in topping export to Germany which continued to revive until the outbreak of the present war to revie until the outbreak of the present war in 1939 The repeal of the duty helped the revival, and export to Germany rose to about 28 per cent of the total export in 1935 36 The post-war measures, however, increased tanning in India There was a change in the direction of goat skins export also during the post-war period. After the war the United Kingdom developed the manufacture of glace kid and considerable quantities of Indian goat skins are being now exported to that country and the USA share is proportionately reduced Still the USA takes about 3 times as much as the United Kingdom and about 70 per cent of the total export from India India is responsible for the supply of about one third of the total goat skins used in the world's tanning industry and some of her goat skins, especially those of Bengal and Bihar, are regarded to be the best raw materials for high class glace kid

Cattle hides are cured for the export trade by air drying and dry salting. The better grades of the former are dried out, being stretched lengthwise on frames, and are called Framed" hides, and the inferior ones are dried by spread hides Airdrled hides are treated with a solution of arsenie to ward off insect damage before export. Dry salt euring is done mostly in Beugal with a sallne earth known as "Khan sait" which consists principally of sodium sulphate mixed with varying proportions of sodium chloride and earthy matter. Goat skins are mostly dry salted and to a lesser extent air dried. The total export of raw lides and skins amounted to Rs. 3,84,66,560 in 1938.39

me on the ground and arc known as "Crumpled.

Recently the Agricultural Marketing Advisor to the Government of Indla has been attempting to grade slaughtered cattle hides. Hide grading stations have been started at slaughter houses at Delhi, Agra, Bandra (Bombay) Bareilly, Karachl and Rampur, and specifications for grades have been formulated. Hides and skins are included in the Schedule to the Agricultural Produce (Marketing and Grading) Act of 1937. An attempt is being made by the Central Agricultural Marketing Department, Govt of India, to improve flaying in the slaughter houses where grading stations have been started by giving a bonus to flavers. The Department has recently published a Report on the Marketing of Hides in India and Burma (Marketing Series No. 36) and another Report on the Marketing Series No. 40) which contain valuable informations regarding Indian hides and skins

Tanning in India—The tanning industry in India has made great strides since the last Enropean war It may be divided into two eategories, indigenous and modern

Indigenous tanning—This is earried out principally by the people of the tanning caste which is a depressed Hindu community known as the Chamar. They tan according to indigenous methods and their products may be divided into a number of typical groups, viz, (i) the miscellaneous crude leather produced in the villages to meet local needs, (ii) the bag tanned buffalo sole leather produced in the Punjab and Calcutta which is extensively used for making shoes, (iii) tanned sheep skins of the Punjab known as "Kabuli Bheris" used as a cheap book binding leather throughout India, (iv) half tanned leather of Madras and Bombay. The first three varieties are all consumed in India while the better grades of the fourth are exported chiefly to the United Kingdom and from there to other countries. The half-tanned cattle hides and calf skins are known in the International trade as East India tanned Kips and Calf skins. These are retained and finished in the importing countries for making shoc upper and other varieties of dressing leather. The cattle hides used to be tanned formerly with avaram or turwar bark (Cassia aurleulata) which occurs in South and Western India. But since the last war they are being tanned. In Madras with wattle bark, large quantities of which are imported from South Africa. The goat and sheep skins in Madras and these as well as cattle hides. In Boin bay are still tanned with avaram bark. The present annual export of half-tanned leather is valued at about six erores of rupees.

Modern t gr—Leather fr II an as and Saddlery for millicary equipme t has long been in suffictured at Casum ra by these transposes on the standard of the stand

~COIR

Colr is the trade name given to the fibre obtained from the bu k of the account in the product of the control that in the product of the control that in the product of the control that in the product of the control that in the product of the control that in the product of the control that in the product of the control that in the product of the control that in the product of the first that it is a fill green the ghi this control that it is a fill green the ghi this control that is a fill green the ghi this control that is a fill green the ghi this control that is a fill green the ghi this control that is a fill green the ghi this control that is a fill green the ghi this control that is a fill green the ghi this control that is a fill green the ghi this control that is a fill green the ghi this control that is a sell of the fill green that is a fill green the ghi this control that is a fill green th

in the shade and then beaten or willowed with thin bamboo caues The fibre is then returned ** ** * VALUE / CANVA LUDUCE LU CLICUL to the merchant who further cleans this in a revolving drum furnished with projecting spikes resembling thin saw blades made of Iron The fibre is sorted out into colour grades and distributed among the local people who spin this into yarn. The fibre is first made into 'slivers'. and is then either spun by hand or on a wheel This is again returned to the merchant who again grades this for colour and splices the short lengths into a continuous length of 450 yards It is then tied into bundles and is disposed of to the factories where it is either baled up for export or is minufactured into matting, door mats, braid, ship's fenders, rope, etc

The yarn is very errefully graded, both for manufacture and for export, according to its colour, which is, in reality, a gruge of proper retting. The best quality of coir is a golden yellow colour and the lowest grade is a grey colour which shows that the husks have either bren over retted or that the condition for retting have not been satisfactory

Properly retted colr is of the highest quality-It is much more easily spun than machine made colr, because the fibres are clean and free from adhering pith and a much more even yarn is obtained It is much stronger than machine made colr because none of the long or "bristle" fibres have been removed in the process of extrae tion The colour is not only attractive, but is localities on the East Coast for teaching coir an indication that retting has been earried handler of and increasing the output of coir through to the correct stage

cusing minor exhance on termostractic continuous. or to salt or fresh water, and in manufacture it is found to take dyes readily

The value of the Indian trade is considerable, the imports into Great Britain alone, which represent less than 20 per cent of the Indian exports, are shown in the Board of Trade returns to amount in value to more than one million pounds per annum It is an industry which provides a profitable occupation to the densely populated back water tracts of Western India, and it provides the raw material in the shape of yarn and fibre for a considerable industry in More than 80 per cent of the manu factured coir products imported into the United Kingdom are produced in India and more than 90 per cent of the coir varn. The imports of coir fibre from India are meonsiderable and amount to only 25 per cent of the quantity imported. The export of coir fibre from India. represents in value only 0.35 per cent of that of the total Indian exports of coir and coir

The Government of Madras are conducting a corr demonstration school at Beypore near Calcut under the control of the Director of Industries and Commerce, where students are trained in improved methods of cleaning fibre. of spinning of colr yarn on the wheel, of produc ing ropes, belts, mits, rugs, etc

It's proposed to enlarge the activities of the School and also to open fresh centres in sultable localities on the East Coast for teaching coir articles

PATENTS, DESIGNS AND TRADE MARKS.

'Patents,' 'Designs and institute eertain forms and 'Trade Marks eonstitute certain forms of personal granted under the Iudian Patents and Designs rights which are collectively referred to as rights of industrial property. In British Iudia the rights in Patents and Designs are regulated by the Indian Patents are regulated by the Indian Patents and Designs are regulated by the Indian Patents are regulated by the Indian Patents a the procedure under the Act is regulated by patent after the first four years of its term is the Indian Patents and Designs Rules 1933 and the Indian Secret Patent Rules, 1933 The Act and the Rules are contained in the The Act and the Rules are contained in the Patent Office Handbook which is available from granted for an imention, which is defined as the Manager of Publications Call Types Delice. the Manager of Publications, Civil Lines Dellii, at a cost of Re 1 per copy The Handbook contains in addition detailed instructions for those interested in Patents and Designs In the latest edition (6th) of the Hundbook is added a new chapter wherein are collected together some of the important decisions of the Courts, the Central Government and the Controller of Patents and Designs These decisions are helpful in interpreting the provisions of the Indian Patents and Designs Act of 1911. The broad features of the Patents and Designs These tet mus be described as folloss -

TRADE MARKS

The Trade Marks Act, 1940 (Act V of 1940), used in relation to goods for the purpose of was passed by the Indian Legislature in March 1940, to provide for the registration and more effective protection of trade marks in British India Sections 1 and 85 of the Act came into force it once, and under the latter section, intending applicants for registration were enabled to deposit their trade marks ' About 1,58,000 trade malks were so deposited, which were since classified and indexed

Before the other provisions of the Act could Before the other provisions of the Act could be brought into force the Act was amended in 1941 (Act XXVII of 1941) to establish a separate Trade Marks Registry at Bombay under a Bombay Registrar with jurisdiction over textile marks only The Amended Act came into force on the 1st June 1942, but had again to be amended by the Trade Marks Amendment Act. The Trade Marks Register is kept at the Registry at Bombay under the control and management of the Registrar of Trade Marks Mr K S Shayaksha, BA (Oxon), Bir-at-Liu, is at present the Registrar of Trade Marks

A branch of the Trade Marks Registry is established at Calcutta, at which a copy of the Register and the Refused Textile Marks List ire kept The Branch Registry is in Charge ire kept. The Branch Registry is in charge within the above description is not registr of the Deputy Registrar who is empowered except upon evidence of distinctiveness under section 4 (2A) of the Act to discharge, under the superintendence and direction of the Registrar, any function which under the Act may be discharged by the Registrar Any reference in the Act to the Registrar includes a reference to the Deputy Registrar when so dis charging any such function Where the Registrar directs the Deputy Registrar to deal with a particular matter, he has in disposing of such matter the same powers as the Registrar Law by being likely to deceive or cause confusion. At present, the Deputy Registrar of Trade or which are likely to liurt religious susceptionally significantly and the same powers as the Registrar Law by being likely to deceive or cause confusion. At present, the Deputy Registrar of Trade or which are likely to deceive or cause confusion, at present, the Deputy Registrar of Trade or which are likely to deceive or cause confusion, at present, the Deputy Registrar of Trade or which are likely to deceive or cause confusion, at present, the Deputy Registrar of Trade or which are likely to deceive or cause confusion, at present, the Deputy Registrar of Trade or which are likely to deceive or cause confusion, at present, the Deputy Registrar of Trade or which are likely to liurt religious susceptions.

The following is a summary of the important provisions of the Trade Marks Act, 1940

A' mark" includes a device, brand, heading registration libel, ticket, name signature, word, letter or numeral or any combination thereof i 'tinde name a mark used or proposed to be the Registrar might think fit to impose the

indicating or so as to indicate a connection in the course of trade between the goods and some person having the right to use the mark trade mark may be registered only in respect of particular goods or classes of goods Any person who is desirous of registering a mark should apply to the Registrar in the prescribed manner The application may be made either at the Registry at Bombay of at the branch office it Calcutta

Under section 6 (1), distinctiveness is the prime requisite of a trade mark for registration A registrable trade mark must consist of or contain at least one of the following escential particulars (1) name of a company or andividual represented in a special or particular manner, (2) signature of the applicant or some predecessor in business, (3) one of more invented words (4) word or words, laving no direct reference to the character or quality of the goods and not being according to its ordinary meaning 1 geographical name or surname or the name of 1 sect, easte or tribe in India and (5) any other distinctive mark A mark consisting of a name, signature, or any word other than such as fall within the above description is not registrable determining whether a trade mark is distinctive the extent of the inherent distinctiveness of the mark, as well as its acquired distinctiveness by use of otherwise, will be considered The commonly accepted name of any single chemical element or chemical compound is not registrable In respect of a chemical substance or preparation, Trade marks which are contrary to law or mora lity, or disentified to protection in a Court of Law by being likely to decelve or cause confusion, bilities, are not registrable. The Act contains also special provisions for the registration of certification trade marks and for defensive

LIFE FUNDS AND EXPENSE RATIO

The life insurance funds increased by Rs 8 29 crores (Rs 715 clores in 1942) and amounted to Rs 8423 erores at the end of the veir Rs 75 94 erores in 1942

The rate of luterest carned on the life funds during the year after deduction of Income tax at source was 3.88 per cent (3.94 per cent in 1942)

The net rates of interest realized by the Indian Life Offices in each of the five years 1939 to 1943 are as follows -

Year 1939 1941 1942 1943 1940 Rate o f Interest per appum 4 68 4 37 4 17 3 94

The total expenses of management expressed as a percentage of the Premlum income during each of the five years 1939 to 1945 are as follows —

Year 1939 1940 1941 1942 1943 33 2 28 9 27 4 26 7 27 9 Expense Ratio

If the figures of half a dozen insurers having the largest premium income are excluded, the expense ratio in the ease of remaining insurers is tound to be as under -

Year 1939 1940 1941 1942 1943 Expense Ratio 41 8 36 0 34 3 31 3 31 4

HEAVY EARLY LAPSES

One reason for high renewal expense ratios of many insurers is the very heavy lapses, particularly during the early years of a policy sexistence. The following table compares the lapse experience of five old established Insurers with that of five recently established lnaurers

respressed is percentage of the business done in

that ve	ir (1938)	Net Laps	e per cent
	Year	Old insurers	Young insurers
1938 1939 1940	gan an Appallut	2 05 18 32 8 79	10 49 33 61 9 83
		90 16	53 93

The table shows that about 29 per cent of the business transacted by old established insurers lapsed in slightly less than 2½ years and in the ease of voung insurers the percentage is as high as 54 The bulk of the lapses in the year 1939 must relate to policies under which not even one full year's premiums hid been pud. It is well known that the expenses of many insurers exceed the flist year's premiums received and the important fact therefore emerges that nearly 20 per cent of the business done by old esta blished insurers and slightly more than double this percentage of the business done by voung mourers generally result in a loss to the insurers

NON-LIFE BUSINESS

The net Indian premlum meome of all insurers under insurance business other than life insurance during 1943—was Rs 7,63, laklis (Rs 7,38 laklis in 1942), of which the Indian insurers share was Rs 2,89 laklis (Rs 2,06 laklis in 1942) and that of the non-Indian insurers Rs 4,74 5,32 lakhs in 1942) The total lakhs (Rs amount was composed of Rs 3,46 laklis from Fire, Rs 2,80 likhs from Marine, and Rs 1,37 lakhs from Miscellaneous Insurance business

The Indian insurers received Rs 1,66 lakhs from Fire, Rs 73 lakhs from Marine, and Rs 50

liklis from Miscellaneous Insurance business.
The non-Indlan insurers received R5 1,81 Net lapses in each of the years 1938, 39 and 40 and Rs 86 lakks from Miseellaneous Insurance of the new business done in the year 1938 business

The di trib tion of this inc ue mo g t insurers constituted in diffe ut countries is shown in the following + hi --

reflection of her constitutional development. In which bulk largely in Provincial budgets the earliest days of British rule, the Provinces, and especially the older Presidencies, were for all practical purposes independent of the cencontributions from the Provinces These con-tributions were fixed in the shape of definite Regarding possible new sources of revenue, sums, which the Provincial Governments had Federal or Provincial, the Federal Finance Com

Budget in 1928-29 But this did not end the discussion, indeed it was only the first phase The Government

Federal Finance Committee. and especially the older Presidencies, were for all practical purposes Independent of the central government and responsible only to the reviewed as part of the work of the Roumantiority sitting in I ondon. After the middle of the nineteenth century the process was reversed, and the Government of India was allowed as part of the work of the Roumantee of the nineteenth century the process was reversed, and the Government of India was allowed as part of the work of the Roumantee of the reversed, and the Government of India was allowed as part of the work of the Roumantee of the reversed, and the Government of India was allowed as part of the work of the Roumantee of the reversed, and the Government of India was allowed as part of the work of the Roumantee of the order of the work of the Roumantee of the reviewed as part of the work of the Roumantee of the order of the work of the Roumantee of the order of the work of the Roumantee of the order of the work of the Roumantee of the order of the work of the Roumantee of the order of the work of the Roumantee of the order of the work of the Roumantee of the order of the work of the Roumantee of the order of the work of the Roumantee of the order of the work of the Roumantee of the order of the work of the Roumantee of the order of the work of the Roumantee of the order of the work of the Roumantee of the order of the work of the Roumantee of the order of the work of the Roumantee of the order of the work of the Roumantee of the Rouman the smallest Items of their expenditure. This centralisation reached its highest point during the long Viceroyalty of Lord Curzon, who was o jealous of his supreme authority that he sought to deprive the Presidency Governors of their right to correspond direct with the Secretary of State for India. This system was found top-heavy in the days of his successors, and a continuous process of devolution set in In the matter of finance the measures took the form of long-term "contracts" with the Provincial Governments, and later in the assignment of definite heads of revenue to the Provincial Governments, thus removing the dual authority and responsibility which had elogged progress. A much elearer cut was made when the great reform scheme embodied in the government of India Act of 1919 was passed. Here, for all practical reasons, Provincial finance was entirely separated from the finances of the Government of India, and with one reservation the Local Governments were made masters in their own fluancial houses. made masters in their own fluancial houses the commence of India did not then permit them to do entirely without by giving them back less in meome tax than

sums, which the Provincial Governments had to find from their own resources and pay to the Government of India in each They varied between Province and Province, on a scale which at first sight seemed inequitable, but which had a definite logical basis. The total of these contributions was a little less than tenerores of rupees. This was admittedly a temporary expedient, to last only so long as was necessary for the Government of India to reduce its post-war expenditure and develop its revenues to the point when they would balance without drawing from the Provinces. They were an open sore, each Province Claiming that it paid an undue proportion of the total contribution, and that it was starved in consequence. There is general agreement that such a duty evaluation that it was starved in consequence. There is general agreement that such a duty could not be imposed on the cultivator, and its doubtful whether a duty on the manufactured an undue proportion of the total contribution, and that it was starved in consequence. There was no possibility of adjusting these differences, so the contributions were reduced as fast as the finances of the Government of India permitted. Thoy finally disappeared from the Budget in 1928-29. of India

Excise on Matches —The imposition of an excise duty on matches is already under active consideration, and we feel justified in contemplat of India had taken the growing heads of ing the existence of such a duty from the outset revenue—those which issue from taxes on in- of federation. We are advised that the probable resources either almost static, like land revenue, or actually declining, as with excise the vield of the tax for all-India at a reasonable rate, with due allowance for reduced consump revenue, or actually declining, as with excise the where steps are being taken to reduce the consumption of alcoholic liquor in response to the strong Indian sentiment towards prohibition at the same time the Provinces were con in the 1934-35 Budget and has continued since.) Oth r E —it is possible that other as that de elopment takes place an excise cise duthe may occupy an import at pic of levelatthefactory by one Unit-offic Federation is the faces policy of india in the furne but wild be a far on consumers in other Unit wild be a far on consumers in other Unit wild be a from our i ter proposals at it oductio of such masures in the sulf rer ritopowers of taxation that if of rail years of federation (Iffe eli may be not d that if no to hacco ex i e would not preclude the no cise duty on sugar it and in link was brieffederal floor ermet tiromassignim the proceeds imported in the lastic than 10 that is not observed in the contract of

Niemever Report

A necessary prelude to the Introduction of the Constitutional Reforms was an investigation of their safety in the light of the financial situa tion and prospects of India The Investigation was carried out by Sir Otto Niemever whose report was published in April 1936 The Report proposed immediate financial assistance from the beginning of provinced autonomy to eertain provinces partly in the form of eash subventions, partly in the form of enuceitation of the net debt incurred previous to April 1, 1936, and partly in the form of distribution to the jute growing provinces of a further 121 per cent of the jute tax

Annual eash subventions are as follows To the U P Rs 25 lakins for 5 years only, to Assam Rs 30 lakins, to Orissa Rs 40 lakins, to the N-W F Province Rs 1,00 lakins (subject to reconsideration after 5 years), and to Sind Rs 1,05 laklis to be reduced by stages after 10 years

The total approximate annual relief in laklis Bengal Rs 75, Blhar Rs 25, C P Rs 15, Assam Rs 45, N-W I Province Rs 110, Orissa Rs 50, Sind Rs 105, and U P Rs 25, extra recurrent cost to the centre Rs 192 iakhs' almed at by Sir Otto Niemeyer is as follows

from the Raliways, aggregates 13 crores

As regards the provincial share of the proceeds from Income-tax, Sir Otto Niemezer recom mended that haif of the proceeds should remain alth the Centre, while the other half should be distributed among the provinces on the following percentage division -Madras 15, Bombay 20, Bengal 20, U P 15, Punjab 8, Blhar 10, C P 5, Assum 2, A -W 1 Province 1, Orlesa 2 and Sind 2

Sir Otto Niemever suggested that the Centre would not be in a position to distribute any part of income tax proceeds for the first five years from the beginning of provincial autonomy but that it might be in a position to distribute some of the proceeds, though not necessarily the percentage allocated, within the first ten years of provincial distonomy. But this, he said, largely depended on the financial condition of the railways and their ability once again to contribute to general revenues on this point were — His remarks

- "The position of the railways is frankly disquieting It is not enough to contemplate that in five years' time the raliways may merely
- ' I believe that both the early establishment Orlssa is to get a further non-recurrent grant of effective co ordination between the various, of Rs 19 lakhs and Sind of Rs 5 lakhs by six modes of transport and the thorough going equal steps beginning from the sixth year from overhaul of railway expenditure in itself are the Introduction of provincial autonomy, but vital elements in the whole provincial problem"

RECENT INDIAN FINANCE

India, in common with other countries of the world, felt the full force of the economic bizzard which began in 1930 and attained its maximum find means of improving the position to the extent of Rs 1,53 lakhs. The Finance Member mum the following year The net result from extent of Rs 1,53 lakhs The Finance Member the Government of India's point of view announced the imposition of an excise duty on was the introduction during 1931 of two Budgets, the ordinary Budget in the spring annual to 5 annual per ounce and the abolition of of the year and a supplementary Budget eontaining fresh taxation proposais in September

The supplementary budget had been imposing an excise duty on matches introduced only six months earlier He did not, therefore, propose to ask the House at the present stage to approve any extensions or modifications of the plan for raising revenue put forward in September 1931

The 1933-34 Budget—In introducing the budget, the Finance Member summarised the results for the two previous years He results for the two previous years He estimated the general position for 1933-34 to be the same as for the eurrent year, neither better nor worse and in particular that India would be able to maintain the same purehasing power for commodities imported from abroad

the export duty on raw hides Announcing that the Government intended to hand over half the The 1932 33 Budget — Presenting the 1932 33 Jute export duty to the jute producing Provin budget on March 7, 1932, the Finance Member ces, the Finance Member said that the Govern explained that the circumstances were somewhat

> The 1935-36 Budget —This Budget was expected to show a surplus of Rs 1,50 lakhs available for tax reduction The Silver duty was reduced to 2 annas an ounce The export duty on raw skins was abolished. The remaining surplus of Rs. 1,42 lakhs was disposed of, first, in restoring the emergency cuts in pay, and

The 1936-37 Budget —The surplus for 1936-37 was estimated at Rs 2,05 lakhs, and this was di posed of in two ways. List the rem ining.

erores for the year and a prospective deficit on pared with Rs 254 50 crores in the revised the prevaling basis of taxation of Rs 47 crores estimates for 1943 44. The estimates for for the next year Tho revised estimate on defence in 1941-42 was placed at Rs 102 erores, In 1942-43 it was estimated at Rs 133 crores The amount of expenditure on defence services and supplies which the Government of India expect to recover from His Majesty's Government under the operation of the financial settlement would exceed Rs 400 erores in 1942 43

Sir Jeremy Raisman proposed to meet the defielt by raising loans to the time of Rs 35 crores and leaving trantion to cover the balance the tax with the object of immobilising the whole of Rs 12 crores. The new trantion proposals of the excess profits. He hoped to reduce the included (1) the surchinge on meome tax and prospective revenue deficit by Rs 23½ crores by super tax to be increased from 33\frac{1}{2}\% to roughly insing the sense of income tax which was expected 50\%, (2) an all round customs surcharge of to bring in an additional revenue of Rs 8\frac{1}{2}\cdot\\$ to be sevied on existing import tailff every croise and by getting Rs 1 erore from the on raw cotton, petrol and salt, (3) petrol the increased surcharge on tobacco and spirits under to be increased by 25% and post and telegraph customs duties, Rs 10 erores from the increased lates also to be increased. The share of the excise duty on tobacco and Rs 4 eroies by provinces in the intome tax was placed at bringing betelnuts, coffee and ten under the Rs 7,39 lakhs in the current year and Rs 8,37 lakhs in the following year Slr Jeremy estimated the total additional revenue from fresh would approximate to Rs 100 crores

defence likely to be brought to account in India's books during 1942 43, Sir Jeremy revealed that nearly three quarters, totalling Rs 400 erors, would be met by Whitehall In addition Indla with large quantities of aeroplanes, schildes, guns and other equipment without charge, these free supplies already made or expected to be received by the end of the following financial year total roughly an addi flonal Rs 60 crores

total revenue estimates for the coming veir amounted to Rs 199 3 erores, as compared with Defence—The main purpose of these fresh imposts was to strengthen all arms of India's that increases in income facilities and for this a total expenditure. As a result of the budget proposals a revenue 66 per ceut Income tax surcharge would b applied uniformly over all levels of Income

Defence Expenditure - Reviewing defence expenditure Sir Jeremy Raisman pointed out that the revised estimates for the current ver had risen from Rs 133 crores mentioned in the budget last vear to Rs 189 75 erores For the

The 1942-43 Budget—Presenting the Budget on Lebrary 29 1944 the Hon Sir Jeremy for 1912 43 Sir Jeremy Raisman, the Linanee Lusanau Lunance Member, disclosed a revenue deficit of Rs 17 revenue estimates at Rs 284 97 crores as complete of the year and a prospective deficit of Rs 17 revenue estimates at Rs 284 97 crores as complete of the year and a prospective deficit of Rs 17 revenue estimates at Rs 284 97 crores as complete of the year and a prospective deficit of Rs 17 revenue estimates at Rs 284 97 crores as complete of the year and a prospective deficit of Rs 17 revenue estimates at Rs 284 97 crores as complete of the year and a prospective deficit of Rs 17 revenue estimates at Rs 284 97 crores as complete of the year and a prospective deficit of Rs 17 revenue estimates at Rs 284 97 crores as complete of the year and a prospective deficit of Rs 17 revenue estimates at Rs 284 97 crores as complete of the year and a prospective deficit of Rs 17 revenue estimates at Rs 284 97 crores as complete of Rs 18 revenue estimates at Rs 284 97 crores as complete of Rs 18 revenue estimates at Rs 284 97 crores as complete of Rs 18 revenue estimates at Rs 284 97 crores as complete of Rs 18 revenue estimates at Rs 284 97 crores as complete of Rs 18 revenue estimates at Rs 284 97 crores as complete of Rs 18 revenue estimates at Rs 284 97 crores as complete of Rs 18 revenue estimates at Rs 284 97 crores as complete of Rs 18 revenue estimates at Rs 284 97 crores as complete of Rs 18 revenue estimates at Rs 284 97 crores as complete of Rs 18 revenue estimates at Rs 284 97 crores as complete of Rs 18 revenue estimates at Rs 284 97 crores expenditure amounted to Rs 363 18 crore-comprising of Rs 86 57 crores under evil e-timates and Rs 276 61 erores under Defence Thus a revenue deficit of Rs 78 21 Services erores was foreshadowed. He proposed to meet this deflett by measures of ordinary taxation and compulsory deposit The most important of the latter was a provision for advance payments of t is on income from which the was not deducted The compulsory deposit of one fifth at source of the excess profits the was increased to 19/64 of inising the scale of meome tix which was expected

for the min-ation of sterring in 1944 46 with Savings Bank Deposits and Provident Lunds) the exception of £15 millions for the capitali sition of a portion of India's non effective charges and of £10 millions for acquaring the MAS M Rallway, the S I Rallway, and the B N Rallway The outstanding sterling habilities of Government stood on I ebruary 28, 1945 at about £11 millions

The process of repatriation started in 1937-38 with the Introduction of open market purchases and creation of the rupee counterparts in India The first compulsors scheme was introduced on Lebruary 8, 1941 following the growing accumulation of India's sterling balances in Lugland as the result of the Allied demands inhide on India for war supplies. The second compulsory scheme was decided upon on 24 December 1941 and was followed up by the redemption of 3½ per cent sterling stock, funding of rulway appurities and repatriation of rulway. of rulway annuities and repatriation of rallway Debenture Stock during 1942 43 debt repatriated between April 1 The total 1937 and March 31, 1943 was of the face value of £307 26 million at a cost of £305 29 million (Rs 408 08 crores) and was putfully financed by creating rupce counterparts of the value of Rs 234 97 crores Stray parcels of the Government of India Sterling Stock, both dated and undated and of Realizer Debentures beautiful of Control of Co ind of Railway Debentures bought and can celled during 1943 44 amounted to £3 millions, from their balances. As a further measure of residual repatriation, arrangements were made during the current financial year (1944 45) for the acquisition of the Madras and Southern Railway. Milinatti Rulway, the South Indian Rulway and the B N Rulway Those operations Those operations expenditure absorbed a sum of approximately £10 millions

Sterling continued to accrue and £248 millions were added during the 11 months ended Feb mary 28, 1945 to the Reserve Bank's holdings und the total holdings on March 31, 1945 were estimated by the Finance Member to be £1,030 He, however, hoped that the rate of necrual would be slowed down in future both by diversion of some of the demands made on India to other sources of supply and by an increase in compensatory imports In May, the retiring Finance Member was appointed officer on special duty to negotiate the question with Britain

In regard to the dollar balances, the Finance Member stated that in addition to current requirements, India had agreed to accept an amount of £20 millions for the calendar year 1944 and a similar amount for 1945 in order to build the dollar resources The position would be reviewed later on in the light of the relevent statistics

Rs 229 crores It is estimated that by the end of 1944 45 this would have risen to Rs 1,588 crores comprising Sterling loans and Rulway Annuates Rs 43 crores, Rupec loans and Treasury bills Rs 1,278 crores and Unfunded 267 crores dcbt Rs The corresponding figures on March 31, 1946 are expected to be Rs 1,930 crores, Rs 39 crores, Rs 1,571 crores and

Rs 320 crores respectively The capital portion of the Railway Annuities now appears under public debt only for account ing purposes and is offset by a corresponding deposit with His Majesty's Government. The net regular debt will, therefore, be Rs 1,559 crores on March 31, 1945 and Rs 1,904 crores on March 31, 1946 In addition, however, Government are liable to repay the balance's of Depreciation and Reserve Funds of Railways, Posts and Telegraphs, etc., and certain other deposits which, it is expected, will have grown from Rs 27 crores on March 31, 1939 to Rs 240 crores on March 31, 1945 and to Rs 255 erores on March 31, 1946 In other words, is compared with the last pre-war figure of Rs 1,185 crorcs, the total interest-bearing obligations will have increased by Rs 614 erores by the end of the current year and by Rs 974 crores by the

A large part of this increase is represented in, Governments' cash balances and investments inceting the revenue deficits and the capital Actually the amounts required on these accounts total Rs 864 crores, as it is expected that during the seven years ending Problem of Transferring Sterling March 31 1946, the cumulative revenue deficits excluding the provision for debt redemption (Rs 21 crores) will have amounted to Rs 611 trores and the capital outlay to Rs 253 erores. The balance at Rs 407 crores, will be covered by the net balance resulting from the other debt head transactions such as repayment of loans by provinces, issue of rupec coms to the Reserve Bauk small com profits, war risks insurance funds, etc

By far the greater portion of this debt of Rs 2,159 crores is what mily be compendiously termed as productive Thus, the capital outlay on Railways upto the 31st March 1946 accounts for no less than Rs 797 crores on Posts and Telegriphs and other Commercial Deputments Rs 42 crores, Loans and Advances (including the debt due from Burma) Rs 144 547 crores, and cash and investments Rs This crores, miking a total of Rs 1,530 crores leaves an uncovered debt of Rs 629 crores against the pre war figure of Rs 208 crores Even this may not be called wholly unproductive debt for the large Defence Capital outlay of Rs 167 crores cannot be deemed entirely un Public Debt

Excluding the hability for the British Wir Loan, which remains suspended, the total regular interest bearing debt on March 31, (such as the Delhi Capital Outlay) is not without 1939 amounted to Rs 1,158 erores, comprising

the Government is the supreme landlord and assessments proposed by him require the sar the revenue derived from the land is equivalent of the Government before they become the levenue derived from the land is equivalent to rent. On strict theoretical grounds, exception may be taken to this statement of the case. It serves, however, as a substantially correct description of the relation between the Government and the cultivator. The former gives protection and legal security. The later pays for it according to the value of his looking. The official term for the method by which the Land Revenue is determined is "Settlement." There are two kinds of settlements in liddia—Permanent and Temporary that the meaning and his judical decisions ma reviewed by the Chil Courts. It is the of the Settlement. Officer to make a reviewed by the Chil Courts It is the of the Settlement of the subject to make a reviewed by whether affecting the intervention of the people. The intervention of the people of the State or of the people. The intervention of the people of the State or of t ments in India—Permanent and Temporary Under the Temporary Settlement Under the former the amount of revenue has tenures fall into two classes—peasant boil been fixed in perpetuity, and is payable by the landlord as distinguished from the actual cultivator. The Permanent Settlement was introduced into India by Lord Cornwallis at the close of the eighteenth century. It had the effect intended of converting a number of large lord pays on a rental assessment. In the sevenue farmers in Bengal into landlords occur of the former, however, there are two k pying a similar status to that of landowners in Europe The actual cultivators became the tenants of the landlords While the latter became solely responsible for the payment of the revenue, the former lost the advantage of holding from the State This system has prevailed in Bengal since 1795 and in the greater part of Oudh since 1859 It also obtains in certain districts of Madras Incidentally, the Bengal system was the subject of an exhaustive examination by a Commission under the chair-manship of Sir Francis Floud in 1939 40, which produced a radical report—a minority dissenting—in favour of State purchase of land, thus chal lenging the Bengal system of land tenure based on the Permanent Settlement

Elsewhere the system of Temporary Settle ments is in operation. At intervals of thirty years, more or less, the land in a given district is subjected to a thorough economic survey, on the basis of the trigonometrical and topographle surveys carried out by the Survey Department of the Government of India Each village area, wherever the Temporary Settle ment is in vogue, has been carefully mapped, property-boundaries accurately deilneated and the Permanent Settlement in Bengal the occupant does not enjoy these advantages. The duty of assessing the revenue of a district is entrusted to Settlement Officers, members of the Indian Civil Service specially delecated for this work. The duties of a Settlement Officer are thus described in Strachey's India (revised edition, 1911)—"He has to determine the amount of the Government demand to make a record of all existing rights and stances of the holding. Under the Permane ferords of rights made and preserved Under the Permanent Settlement in Bengal the occu-Under and to make a record of all existing rights and stances of the holding. Under the Permant experienced subordinates, almost all of whom less than \$23,000,000 from a total rental exact natives of the country, and the settlement mated at \$12,000,000 Under Tempore of the district assigned to him is a work which formerly required several years of constant work. The Catablishment of agricultural description of the catablishment of agricultural descriptions. partments and other reforms have, however the impost falls as low as 35 and even 25 I id to much simplification of the Settlement eent and only rarely is the proportion of Officer's Proceedings and to much greater half the rental exceeded. In regard to Reform

wari tracts the ryot or cultivator pass revenue direct in Zemindari tracts the l of the former, however, there are two k of Ryotwari holdings—those in which individual occupant holds directly from ernment, and those in which the land is by village communities, the heads of the lage being responsible for the payment revenue on the whole village area system prevalls in the North Bombay, Burma and Assam, Ryotwari ter is on an individual basis, and the Governm enters into a separate agreement with e single occupant. The basis of assessment all classes of holdings is now more favour to the cultivator than it used to be Form what was believed to be a fair average; was levied on the anticipated yield of the i during the ensuing period of settlement. I the actual yield at the time of assessing alone is considered, so that the cultivator; the whole of the benefit of improvements his holding subsequently brought about eithey his own enterprise or by "uncarned in ment." The Government, however, may a new settlement, reclassify a holding so as a new settlement re classify a holding so as secure for itself a fair share in an increm that may have resulted from public works the vieinlty, such as canals and rallways, from a general enhancement of values

EXCISE.

The Excise revenue in British India can be classified into two divisions—one derived from the Central Excise Duties and belonging to the Central Government's finance and the other derived from the manufacture and sale of intoxicating liquors, hemp drugs, toddy and The latter is a provincial revenue Fire revenue from the Central Excise Duties has increased by over 125 per cent during the pist three years. As against a comparatively small revenue of Rs. 7,66 lakhs in 1937 38 and Rs 12.75 lakhs in 1942.43 the budget for 1945.40 forecasts a revenue of Rs 44,99 lakhs These duties are at present levied on motor spirit, kerosene, sugai, matches, steel ingots, tyres stobacco, vegetable product betel nut, coffee, tea and coal cess

The Budget of the Government of India for 1944 45 brought in force important cliniques in the field of Central Excises It raised the rates of duty on unmanufactured tobacco and on cigars and cheroots and included in the central Excise Tariff betel-nuts, coffee and tea

A further change in respect of tobacco was proposed in the following year Accordingly, the highest class of flue cured tobaceo in the excise tariff was sub-divided into three and subjected to a duty of Rs 78, Rs 5 or Rs 38 per ib, according as it was intended for use in manufacturing cigarettes containing inore than 60 per cent more than 40 but not more than 60 per cent, or more than 20 but not more than 40 per cent by weight of imported tobacco. In order to avoid double incidence, tobacco some of the provincial governments reached an agreement with the Centre by which they withdrew the provincial excise duty on tobacco in fieu of a share in the proceeds from the Centre's tobacco excise

The provincial excise revenue in British India is derived from the manufacture and sale of intoricating liquors hemp drugs, toddy and the like The Provincial Gopium. It is a common place amonest certain sections of temperance reformers to represent the traffic in intoricating liquors as one result of British rule. There is, however, abundant forms of systems to the higher has not evidence to show that in pre-British days the always everywhere identical in details driphing of spirituals liquors was commonly in the second and main features the 1 drinking of spirituous liquors was commonly in its essence and main features the 1 practised and was a source of revenue Administration in most provinces of E

The forms of intoxicating liquor chie sumed are country spirit, fermented pal beer made from grain, country brands brandy, etc., locally manufactured malt 1 imported wine, beer and spirits Country the main source of revenue, except in the Presidency, and yields about two-third total receipts from liquors It is usually ed by distillation from the Mhowra Molasses and other forms of unrefined fermented palm inice and rice In Madra large revenue is derived from fresh The British inherited from the Native nistration either an uncontrolled System or in some cases a crude Farming and the first steps to bring these system control were the limitation of the nur shops in the area farmed, and the establi of an improved Out-Still System under the comblued right of manufacture and a special shop was annually granted course was a kind of control, but it only Government to impose haphazard to on the liquor traffic as a whole by mer vend fees It dld not enable Governm graduate the taxation accurately on th head duty principle nor to insist upon a dard of purity or a fixed strength of Moreover for political and other reaso extent of control could not at first be cor

what as follows. Governors and their advistrations in India. The drug is commonly twille not committed to prohibition in principle in the form of pills, but in some places, cl and while reserving the right to make such fur for social and ceremonal occasions, it is ther changes as might seem fit, refrained from it solved in a ster. Opinio smoking also preserversing the policy of their former ministries. In the City of Bombay and other large to On the other hand, they did not extend the policy. The general practice is to sell opinion from even in its modified form, to new areas, but left. Government Pressury, or a Central V the whole future of prohibition open, to be settled bound, to Beened yendors. The right of: by whatever popular regime might later assumed to the public lessold by annual auction to from the moral Issue the fluorical limble atou thon against opinin smoking in clubs and de of prohibition was far reaching. In some now under contemplation provinces it involved a sperifice of anything up to a quarter of the total provincial income raid the imposition of new and burdensome treation A further complication was caused by the existence of Indian States whose territories are inextricably mixed with British India, and which have not yet adopted a prohibitionist policy any more than the Government of India has done Thus the whole tuture of the problemtion experiment is problematical

Drugs - The narcotic products of the hemp plant conserned in India fall under three main extegories, namely, ganja or the dry flowering top- of the cultivated female hemp plant charas, or the resinous matter which forms an active drug when collected separately, and bliang or the dried leaves of the being plant whether male or temple enlipsated or uneul'l The main features of the existing ara tem are restricted cultivation under supervision, storage in Bonded Warehouses, payment of a guantitative duty before issue, refuti sale under licenses and restriction on private possess on licenses to retail all forms of hemp drugs are usually sold by anction. The sale of charahas been prohibited in the Bombay Presidency and in the current budget the expenditu from the 1st April 1922

And here it is pertinent to note that apart for several same loned Shops. Further les In some now under contemplation

The resenue from opium is derived m from exports of what is called provision of to foreign countries and from the sale to vincial Governments of excise opium for lut-The entire quantit consumption in India now exported under the system of direct to Torcign and Colonial governments, the svi of anction siles in Cilcutta to traders for ex to foreign countries having been stopped effect from 7th April 1926 In no case exports permitted without an import certifi by the Government of the country of Impo prescribed by the League of Nations

It was decided to reduce the total of opium exported since the calendar year 192 10 per cent annualis in cacl, subsequent until exports were totally extinguished at end of 1935

Lycke only in is sold to Provincial Governm for internal consumption in India at a fixe l bised on the cost of production is retalled to licensed vendors at rates five the Provincial Governments and varying Province to Province

Opinin has ceased to be a source of rev expected to exceed the receipts by Rs 36 lak

SALT

The sait revenue was inherited by the British from the Gauges and the Brahmaputra Covernment from Native rule, together with a the Bax of Bengal render the manufactu miscellaneous transit dues. These transit dues sea-sait difficult and the bulk of the sin were abolished and the sait duty consolidated and rused. There are four great sources of supply, rock sait from the Sait range and Kohat Mines in the Punjab, brine sait from Bloodly, one-half of the indigenous sait the Sambher Lale in Baintage and manufacture and supply a emdensed on the borders of the lesser Rann of remainder under license and exclse systematically and exclse systematically and exclse systematically and exclse systematically and exclse systematically and exclse systematically and exclusive systematically are systematically and exclusive systematically and exclusive systematically and exclusive systematically and exclusive systematically and exclusive systematically and exclusive systematically and exclusive systematically and exclusive systematically and exclusive systematically and exclusive systematically and exclusive systematical syst Cutch, and sea salt factories in Bombay Madray In the Punjab and Rajputana the salt m ind at the month of the Indus

The Salt Range mines contain an inexhaustable supply They are worked in chambers exervated in salt strata, some of which are 250 feet long, 45 feet wide and 200 feet high. The Rajputana supply chiefly comes The Rajputana supply chiefly comes and evaporated by solar heat Ir the Ranr frontiers of which patrol lines are established for the brine is also evaporated by solar heat and the product is known as Range of Prevent the smuggling of salt into British In heat and the product is known as Range. from the Sambhar Lake where brine is extracted heat and the product is known as Baragara salt. Important works for the manufacture of that salt were opened in Dhrangadhra State in per maund of 82 lbs In 1903, it was reduce 1923. In Bombay and Madras sea water is Rs 2 in 1905 to Rs 1-8-0, in 1907 to Re 1 let into shallow pans on the sea coast and evaluation in 1916 it was raised to Rs 1-4-0. The successions are the sea coast and evaluation in 1916 it was raised to Rs 1-4-0.

Sambhar Lake in Raiputana, salt brine imminactured by Government Agency, and fictories are under the control of the Nort India Salt Department, a branch of the Comm Madras In and Industry Department Bombay the ma infactorles are under the su vision of Local Governments Special tree with Native States permit of the free moven of salt throughout India, except from the Po

From 1888-1903 the duty on salt was Rs In 1903, it was reduce The succe porated by solar heat and the product sold reductions in duty have led to a largely increation throughout India In Bengal the damp climate consumption, the figures right by 25 per capether with the large volume of fresh water between 1903-1908 In 1923 the duty was capether with the large volume of fresh water between 1903-1908

Indla Budget for 1930. After the outbreak of super tox on the stabs of lineme between the War in September 1930, the I hance Member 1830 and the stabs of lineme between the War in September 1930, the I hance Member 1830 and 1832 lakhs (e) Increase in the made no changes in the basic rates of lineme tax. Corporation tax by one annual one is the rates of lineme between the line is the stable of lineme between the line is the stable of lineme between the line is the stable of lineme between the line is the stable of lineme between the line is the stable of lineme between the line is the stable of lineme between the line is the stable of lineme between the line is the stable of lineme between the line is the stable of lineme between the line is the stable of lineme between the line is the stable of lineme between the line is the stable of lineme between the line is the stable of lineme between the line is the stable of lineme between the line is the stable of lineme between the line is the stable of lineme between the line is the stable of lineme between the line is the lineme between the line is in his Budget for 1940 41, but he introduced an rupce but a rebate of one annu in the rupce Licess Profits Tax which was further increased on so much of a company stotal income as in the 1941-42 Budget to 665 per cent. In the is not distributed in dividends other than same Budget, the surcharge on basic rates of dividends payable at a fixed rate and (f) Celling

The budget for 1913 14 laid down a 66 percent Income tax surcharge applied uniformly over all levels of Income It was anticipated that the mereases in income tax, super tax and corporation tax would yield an additional Re 7 crores

the budget for 1944 45 foreshidowed an additional revenue of Rs 8) crores by making of this earned meone relief is estimated if the following changes—(a) The taxable minimum income raised from Rs 1 500 to Rs 2,000, the I maner act raised by three pies the surcharge (b) no change in taxation on incomes upto on lineome tax on sinbs of meone above Rs 15,000

step" system, and this was duly done in the of half an anna in the Central surcharge on income tax and super tax, which had been 25 of the combined rate of lineous tax and super per cent since November 1940, was increased to tax at 64 pers in the rapee which was in forcing per cent. In 1912 13, with retro pective effect for 1943 44

By an ordinance, an exemption of 1/10tl of carned Income subject to a maximum (in terms of income) of Rs 2,000 from income to wis granted for 1945 to The exemptlor would be in respect of meome derived from personal exertion only, and is only in respect of income tax and not super tax. The eost of this earned ancome relief is estimated it Re 10,000, (c) Inclease in Central surcharge and on incomes taxable at the maximum rate

In 1914 The Income-Tax Act was amended as

follows -

An assessee will have the option to pay tax missioner of Income Tix, relief to be grant- quarterly either on the basis of his last assessed income or on the basis of his own estimate or fund contributions and superannuation current earnings. Government will pay 2 per cent interest on all sums paid in advance under the scheine but if the assesses s own estimate, which can be revised during the vear, falls short of 80 per cent of the tax deter mined on regular assessment, penal interest at 6 per cent on the difference will be payable. No penal interest will be pavable when the assessee chooses to pay on the basis of his last assessed To secure compliance with the scheme, and finally, a most important clinnge, section provisions of the penalties section of the liability to pay income-tax lineome tax Act are imported and failure to make all persons called upon by an income tax payments under the scheme is treated as a return, to all persons whose default

HISTORY OF INDIAN COINAGE

e Indian mints were closed to the un cted coinage of silver for the public from bili June 1893, and Act VIII of 1893, passed at date, repealed Sections 19 to 26 of the n Coinage Act of 1870, which provided for olange at the mints for the public of gold silver coins of the Government of India 1893 no Government rupees were could 1897, when, under arrange ments it ade with lative States of Bhopil and Kashnur, the ney of those States was replaced by Gov The re-coinage of these ent rupee4 s proceeded through the two years 1897 1998 In 1899 there was no comage of but in the following year it seeme I that ge was necessary, and it was begun in iary 1900, the Government purchaling the required and paying for mainly will gold icenmulated in the Peper Currency In that and the following month a ve of rupees was coined and over 17 eroies of a in the year ending the 31st March 1910 ling the rupers issaed in connection with conversion of the currencies of Native From the profit accruing to Govern ou the comage it was decided to constitute arate fund called the Gold Reserve Fund e most effective guaranter against tempofluctuations of exchange The was invested in sterling securities, the ist from which was added to the fund exchange had been practically a at a for years, and it was decided that of the ge profits devoted to this fund, six erore d be kept in rupees in India, instead of invested in gold securities The Cold ve Fund was then named the Gold Stan-It was ordered in 1907 that only Reserve alf of the comage profits should be pald

il expenditure on railways

Gold

Since 1870 there had been no comage of double mohurs in India and the last coinage of single mohurs before 1918 in which year coinage was resumed, was in the year 1891 92

A Royal proclamation was issued in 1918 establishing a branch of the Royal Mint at Bombay Pending the completion of the arrange ments at the Branch, Royal Mint, power was taken by legislation to coin in India gold mohurs of the same weight and fineness as the sovercign Altogether 2,109,703 pieces of these new coins of the nominal value of Rs 3,16,45,545, were struck at the Bombay Mint The actual comage of sovereigns was begin in August, 1918, and 1,295,372 sovereigns were coined during the year. This branch of the Royal Mint was closed in April, 1919, owing to difficulties in supplying the necessary staff

The Indian Currency Act of 1927 established a new ratio of the rupee to gold It established this ratio at one shilling and six pence by enret ing that Government would purchase gold at a price of twenty-one rupees three annas ten ples per tola of fine gold in the form of bars containing not less than forty tolas and would sell gold or, at the option of Government sterling, for immediate delivery in London at the same price after allowing for the normal cost of transport from Bombay to London rate of one shiiiing and five pence forty-nine sixty-fourths was notlfied as Government s selling rate for sterling to meet these obligations Great Britain and India left the gold standarp In September 1931 but the buying and selling rates for sterling are still maintained

With the receipt of large consignments of the reserve the remainder being used for gold, the Bombay Mint made special arrange ments for the refining of gold by the chlorine daily amount of 6 000 ou ers of raw sold

The Currency System.

I. THE SILVER STANDARD.

Prior to 1893 the Indian currency system was a mono metallle system, with allver as the standard of value and a circulation of sliver rupees But with the opening and notes based thereon of new and very productive silver mines in the United States of America the supply of silver exceeded the domand and it steadly receded in The result was that the gold value of the rupee, which was nominally two shillings, fell continuously until it reached the neighbourhood of a shilling These disturbances were prejudicial onal to trade, but they were still more prejudicial to the finances of the Government Tho Government of Indla has to meet every year in London a substantial sum in the form of payment of interest on the dobt, the salaries of officials on leave, the pensions of rotired officials, as well as large payment for stores required for State enter-As the rupee fell in Its gold value the number of rupees required to satisfy these pay-ments rose. The total reached a pitch which seriously alarmed the Government, which felt that it might be called upon to raise a sum in rupees which would nocessitate a considerable increase in taxation, which cloud be avoided to consider what further steps should be adopted if possible. It was therefore decided to take in the light of these conditions. The report of measures to raise and fix the gold value of the the Fowler Committee as it was called marked rupee for the purposes of exchange

Closing the Mints -The whole question was examined by a strong committee under the presidency of Lord Herschell, whose report is commonly called the Herschell Report decided in 1893 to close the mints to the un restricted coinage of silver. This step led, as was intended, to a gradual divergence between the exchange value of the rupee and the gold value of its silver content Government cessed to add rupees to the elreviation Rupees remain ed unlimited legal-tender and formed the standard of value for all internal transactions Since Government refused, and no one else had the power to coin rupees, as soon as circumstan ees led to an increased demand for rupees, the exchange value of the rupee began to rise 1898 it had approached the figure of one shilling and four pence Meantime, in response to the undertaking of Government to give notes or rupees for gold at the rate of fifteen rupees to the pound sterling, gold began to accumulate in the Paper Currency Reserve These purposes having been attained, a second committee was appointed under the chairmanship of Sir Henry Fowler the second stage in Indian currency policy

II THE NEW STANDARD.

The Lowler Committee rejected the proposil to re opon the Mints to the free colnage of silver They proposed that the exchange value of the rupee should be fixed at one shilling and fourpence or fifteen rupees to the sovereign further suggested that the British sovereign should be made a legal tender and a curront coin in India that the Indian mints should be thrown open to the unrestricted coinage of gold, so that the rupee and the sovereign should freely c reulate side by side in India The goal which the Committee had in view was a gold standard supported by a gold currency Now under the condition which compelled the Government of India to give either rupees or rupee notes for gold tondered in India, at the rate of fifteen rupees to the sovereign it was impossible for the rate of exchange to rise above one shilling and four renee, save by the fraction which covered the cost of shipping gold to India But if the balance of trade turned against India, it was still possible for the rate of exchange to fall meet this the Fowler Committee recommended that the profits on coming rupees should not be absorbed in the general revenues, but should be set aside in a special reserve to be called the Gold Standard Reserve Inasmuch as the cost of coulng rupees was approximately eleven pence halfpenny, and they were sold to the public at one and four pence, the profits were considerable, they were to have been kept in gold, so as to be freely available when required for the support of exclusing support of exchange

A 16 pence Rupes — The Government of Indla professed to accept all the recommenda tions of the Fowler Committee, actually only a portion of them was put in practice. The official rate of exchange was fixed at one and four pence. The sovereign and the half sovereign were declared unlimited legal tender in India But after a first attempt, when sovereigns soon came back to the treasuries, no effort was made to support the gold standard by an active gold eurroney The gold mint was not set up The Gold Standard Reserve was established, but, instead of holding the Reserve in gold, it was invested in British securities These practices gave rise to conditions which were never contemplated by the Fowler Committee Reference has been made to the Home Charges of the Govern ment of India, which at the time amounted to about seventeen millions sterling a year are met by the sale of what are called Council Bills That is to say, the Secretary of State, acting on behalf of the Government of India, sold Bills against gold deposited in the Bank of England in London These Bills when presented in India were oashed at the Government Trea Now if the Secretary of State sold Council Bills only to meet his actual require ments, it follows that the balance of trade in favour of India over and above this figure would be liquidated, as it is in other countries, by the importation of bullion or by the creation of credits. It is a fact that owing to the failure of the policy of encouraging an active gold

tate decla d 11 intention of selling Council taxe decia d 11 intention of sciling Council illilis on folds without limit at the price of on hilli g ionrence one-eighth—thatis taxas gold import pel t Tle effect of this policy was to limit the import of gold to India incil t was gener lly more coov ni nt to deposit the gold in London and an obtain Cou cil alli again tit than to al in the gold to India hevertheless as the Egyptian e tinn er p wa very largely financed in so erely nell wa sometimes cb per and more c n e lent to si in sovereigns from Egypt nr ven ir m An trails than in buy Council Bill Con ider ble quantiti of counci sill Con ider ble quantiti of sovereign found this way into India and irculated freely paticular in the Bomb 3 Presided the Lo jub a dopart of the

New Measures —The eo clusion of ill's Commissio were that it was nonecessary to support the Oold St ndard by a gold currency that it was not in the advantage of India to en course the int roal use of gold as currency, it tate int roal currency should be supported hy a th roughly adequate reserve of gold and atering that no limit should be fixed to the

branch of the Gold Standard Reserve should be aboltshed, that Reverse Councils should be sold on deinand, that the Paper Currency should be made more clastic; and that there should be two Indian representatives out of three on the II nance Committee of the India Office. The Committee dealt in conclusively all the accumulation of excessive balances in London, the general tenor of their recommendations being "not guilts, but do not do it again." They gave a

Buil Sir James Begble, the only Indian builer on the Committee appended a vigorous minute of distent, in which he urged that the true line of advance was to discourage the extension of the token currency by providing further facilities for the distribution of gold when in creases to the currency became necessary, including the 1890c of an Indian gold coin of a more convenient denomination than the sovereign or the half sovereign

IV. CURRENCY AND THE WAR OF 1914-18

The report was in the hands of the Government of India before the outbreak of the list war some lumedlate stops were taken, like the aboli-tion of the sliver branch of the Gold Standard Leserve, but before the Government could deal entirely with the temporising recommendations of the Commission, the warbroke out The early effects of the war were precisely those anticipated There was a demand for sterling resultance winch was niet by the aile of Reverse Councils. 68,707,000 being sold up to the end of Innuary There were withdrawals from the Post Other Savings Banks, and a net sum of Rs 8 crores was taken away. There was some lack of confidence in the Note issue, and a demand for gold, Notes to the extent of Rs 10 crores were presented for encashment and the Govern ment were obliged to suspend the issue of gold But these nore translent features and did not demand a moratorium, confidence was soon revived and Evchange and the Note issue con tinued strong The difficulties which afterwards arose were from eauses completely unanti cinated by all students of the Indian currency They arose from an immense balance of trade in favour of India, caused by the demand for Indian produce for the United Kingdom and the Allies and the decline in the export trade from these countries, a heavy expenditure in India on behalf of the British Government, and a phenomenal rise in the price of silver If we take the three years 1916-17 to 1918-19 the balance of trade in favour of India was £6 millions a year above the corresponding years of the previous quinquennium. The disburscments in India on behalf of the Government of the United Kingdom and the Allies were by December 1919 £240.000,000 This balance of trade and expenditure for Imperial purposes could not be financed of ther by the import of the precious metals, owing to the universal embargo on the movement of gold and silver nor by credits in India It could be financed only by the expansion of the Note issue, against sterling securities in the United Kingdom chiefly Treasury Billis, and the Issue of coincd

rapees Butshmitaneously there was a redaction in the output of the silver mines of the world coinciding with an increased deman for the metal. The price of silver in 1915 was 27½ pence per standard onnce. In Max 1919 it was 58 pence, on the 17th December of that year it was 78 pence. The main difficulties in India were not therefore the prevention of the rapee from falling below the ratio of 15 to one, but to keep it within an Himts and to provide a sufficiency to meet the demand

Rise in Exchange—The measure adopted by the Government of India in these emergen eles were to bring exchange under rigid control confining remittance to the finance of articles on authoral importance. The next step was to raise the rate for the said of Council Bills so that silver might be purchased at a price which would allow rupees to be coined without loss. The following table shows how rates were raised from one shilling fourpence to two shillings fourpence.

Date of Introduction	Minmum Rate for Immediate Telegraphie Transfers
3rd January 1917	1 41
28th August 1917	1 5
12th April 1918	1 6
13th May 1919	1 8
12th August 1919	1 10
15th September 1919	2 0
22nd November 1919	2 2
12th December 1919	2 4

V. THE 1919 COMMITTEE.

the effect of these me sures however was to jettison the currency policy pursued from 1893 to 1915, the main object of which was to stabilise the ripee at one and forrence. The war being over, a Committee was appointed to idvise in regard to the future of Indian exchange and

currency It sat in 1919 and reported toward the end of the year—Its miln recommendation are summarised below—

(i) It is desirable to restore stability to the rupee and to re establish the automatic werking of the Indian currency system

(\$5) Th reduction of the finences or wef, ht of [the rupes the issue of or 3 rupes coins of lower proportion I silver co tent th n the present rupes or th las e of a nickef rupee arce p dients that cannot he recomme ded

(ii) Ti maintena ce of the convertibility of the not issue i e se ti i and p nos i it to not edequately protect the i dian paper c renew from the risk of hecomi zi convertible cannot he entertal

(1c) Il rise in xchange in so fa a it has checked and mitigat d th rise in Ind an prices has been to the ad anta e of the cuty sa whole and it is desirable to secure ti e o tine ance of til benefit

mulject to this condition accepted the Gold Rullion Standard recommended by his end largues. As for the proposed Reserve Bank, Sir Purshotanidas, whilst recognising that the reheme proposed might be the lideal to be attained in process of time, thought that the best immediate course was to develop the Imperial Bank into a central bank for India. The chief point of difference with his collections.

These can be appreciated only if they are examined in close relation to the currence system of India in the summary of the minute of the far-reaching proposals embodied therein. ambject to this condition accepted the Gold was however the ratio

Sir Purshotamdas said that in September 1924 of the path laid out in the introductory section, the rate was approximately one and fourpence but this is annivolable, if the full bearing gold. At that time the Government was pressed of the measures proposed by the Commission to stabilise at the then ratio, and thus legally are to be appreciated. After describing the to restore the long current legal standard of standard in force Sir Stanley Reed asked — money payments. This it declined to do, and by limiting the supply of currency, the was the standard thus established ratio was raised to one and sixpense gold by It is generally described in London as the Gold April 1025. He declined therefore to attach I xchange Standard. That status was never any importance to a ratio reached by such claimed for it by its principal protagonist, the measures Proceeding to analyse the course late Sir Lionel Abrahams, who described it of prices and wages, he combated the conclusions a 'limping standard' The Royal Com sion of his colleagues that prices had adjusted inicelon declaris that 'In truth in so far as it themselves in a prepondernut degree to one innomited to a definite standard at all, it shilling and slypence. For these reasons he was a standard of sterling exchange. Later recommended that the rapee should be stabi listed at the rate which was current for nearly twenty years, namely one and fourpened His conclusions were summarised in the following terms -

this Report as being no less important than the has been, automatic ' question of the standard to be adopted for the Indian Currency System I non convinced that if the absolute necessity of the free inflow of gold, which I have emphysised, is recognised, and steps taken to ensure it, the gold bullion standard proposed will be the correct one, and the likelihood of its breaking down under the strain of any convuisions in the future will be as remote as It can reasonably be But It recommendation of my colleagues to stabilise the rupee at 1s 6d is accepted and neted upon. India will be faced during the next few years with a disturbance in her economic organisation, the magnitude of which is difficult to estimate, but the consequences of which is may not only hamper her economic development but may even prove disastrous Such a disturbance and its consequences my colleagues to the rupee was stable, prices adjusted the third year of the war. The exchange value of the rupee was stable, prices adjusted themselves to the rupee was stable, prices adjusted themselves to the rupee was stable, prices adjusted themselves to the rupee was stable, prices adjusted themselves to the rupee was stable, prices adjusted themselves to the rupee was stable, prices adjusted themselves to the rupee was stable, prices adjusted themselves to the rupee was stable, prices adjusted themselves to the rupee was stable, prices adjusted themselves to the rupee was stable, prices adjusted themselves to the rupee was stable, prices adjusted themselves to the rupee was stable, prices adjusted themselves to the rupee was stable, prices adjusted themselves to the rupee was stable, prices adjusted themselves to the rupee was stable.

Industry developed From the cerebrage value of the var The exchange value of the standard limped along until the third year of the war The exchange value of the standard limped along until the third year of the war The exchange value of the rupee was stable, prices adjusted themselves to the rupee was stable.

Industry developed From the themselves to the rupee was table of the rupee was st question of the standard to be adopted for the -ujusciment is complete, agriculture threatens to become unattractive and less remunerative than it is to day, and industries will have to undergo a painful process of adjustment, unnatural, unwarranted and avoidable—an adjust ment which will be successful. natural, unwarranted and avoidable—an adjust—affect not only their stability and their progress, but in certain cases, their very existence And should Nature have in store for India a couple of lean years after the four good harvests that we have had, during the period of forced adjustment to a rate of 1s 6d, the steps that the Currency Authority will have to take to maintain exchange at this rate may deplete after theirs. I think, an inadequate appreciation of the influence on the Indian currency and exchange of the influence on the Indian currency and exchange of the influence on the Indian currency and exchange of the influence on the Indian currency and exchange of the influence on the Indian currency and exchange of the influence on the Indian currency and exchange of the influence on the Indian currency and exchange of the influence on the Indian currency and exchange of the influence on the Indian currency and exchange of the war, and the action taken there are the force of one shifting and four pence did not occur until 1917, when the full effect of dependence on the dilution is the permanent ratio of one shifting and four pence did not occur until 1917, when the full effect of dependence on the dilution is the permanent ratio of one shifting and four pence did not occur until 1917, when the full effect of dependence on the dilution is the permanent ratio of one shifting and four pence did not occur until 1917, when the full effect of dependence on the dilution is the permanent ratio of one shifting and four pence did not occur until 1917, when the full effect of dependence on the dilution is the permanent ratio of one shifting and four pence did not occur until 1917, when the full effect of dependence on the dilution is the permanent ratio of one shifting and four pence did not occur until 1917, when the full effect of dependence on the dilution is the permanent ratio of one shifting and four pence did not occur until 1917, when the full effect of dependence on the dilution is the permanent ratio of on

"This reasoning is eminently sound, and the seheme in its broad outlines should command the unhesitating support not only of India, but of all interested in Indian trade will have nothing to do with any exchange standard, its experience has been too painful Proposals to that end would be rejected by the legislature and prolong the currency controversies it is desired to close. The gold bullion standard satisfies all the country's real needs True, it will not give it the gold mint and the gold currency which have long been demanded, It involves the demonetization of the sovereign to which a sentimental influence attaches But whilst it does not do these things, it keeps No one contends that a gold one door open standard and a gold currency are immediately practicable. The most rapid progress thereto is embodied in Sir Basil Blackett's scheme, which is full of uncertainties and risks. But when the gold reserves are strengthened to the regulate point, the proposals leave India perfeetly free to deelde, through her legislature, where a gold currency is worth the expense

"We must, however, face the obligation which a gold buillon standard imposes on the currency authority in India; indeed the Commission do not attempt to burke it. The obligation is to convert the currency, not merely into foreign exchauge, but into metallic gold, and it is an obligation that is not, as formerly, conditional and circumseribed, but absolute and unlimited. Nevertheless——it has been undertaken by every other country that has adopted an effective gold standard, and we have satisfied ourselves that the present resources in the form of reserves at the disposal of the Government of India are adequate to enable the currency authority safely to undertake the obligation, with the measures of fortification, and at the time, which we specify. It is import ant, therefore, to examine the reserves and the procedure thereat

"The reserves held for the purpose of muntaining the value of the token currency are two-fold—the Paper Currency Reserve and the Gold Standard Reserve Their constitution on April 30, 1926 (the date taken by the Commission), was as follows—

Paper Currency Reserve

	Rs	Crores
Silver coin		77 O
Sliver bullion		7 7
Gold coin and bullion		22 3
Rupec seenritles		57 1
Sterling securities		21 0
		185 1

(The gold coin and bullion and the sterling scurities are converted at the legal fletion antio of two shillings per rupee)

Reserve is the backing for the Note Issue Gold Standard Reserve, accumulated from th profits on colning, is designed to maintain th external value of the rupee In prictice thel action is closely interlocked, and the first line of defence in the event of a demand for remit tance from India is the gold in the paper currency reserve This invisible line of demarcation will disappear if the Commission's proposal are adopted. The Commission are justified it are adopted recommending that the two shall be amalgamat ed Their further proposals are that the proportions and composition of the combined Reserve should be fixed by statute, that geld and gold securities should form not less than 40 per cent of the whole, with 50 to 60 per cent as the ideal, and that the holding of gold, which now stands at about 12 8 per cent. should be raised to 20 per cent as soon as possible, and to 25 per cent in ten years Generally, they are of opinion that during this period no favour able opportunity of fortifying the gold helding in the Reserve should be allowed to escape

"The proposal to bring the combined Reserve under statutory control is wise, an arguable case could be made out for the thesis that the currency difficulties of Indla have arisen in the main from the decision of Lord Curzon's Government not to invest the official acceptance of the Fowler Report with legislative authority The strengthening of the gold reserves is in entire accord with Indian needs

The Ratio —"The majority of the Commission, Sir Purshotamdas Thakurdas being the only dissentient, recommend that the rupee be stabilised in relation to gold at a rate corresponding to an exchange rate of one shilling and supence to the rupee Round this point controversy in India will be concentrated, it is worth while to refresh our memories of the instory of the ratio. The Fowler Committee recommended that the rupee should be permanently stabilised at one shilling and fourpeace, the Secretary of State for India accepted their recommendations without qualification. The ruper was substantially steady at this point until August 1917.

"One principle advanced in Sir Dadiba Dalal's prophetle minority report in 1919, that the legal standard of money payments should be and usually is, regarded as less open to repeal or modification than any other legislative Act, But when will command general acceptance Sir Dadiba went on to suggest that the Govern ment of India might have avoided this measure by larger borrowings in India and enceur aging investment abroad he was on ground where no one in touch with Indian conditions In the circumstances of the can follow him day the Government had no alternative to rusing the rate of exchange save in declaring the ripee inconvertible, which during the way the belief that the real mischlef was done no when the rate of exchange was raised to meet the rise in silver, but when it vas not lowered as silver fell, the attempt to stabilise the ruper

the conclusion of the Commission that the best |a notification to the following effect way to foster the use of eurrency notes is to establish confidence in their practical converti bility, 'and this confidence has been secured not so much by a legal obligation to encash them at currency offices as by making rupecs readily available to the public at centres where there is a demand for them

"The Commission therefore propose that whilst the legal obligation to convert into rupees all the notes in circulation shall remain obligation should not attach to the new notes to be issued by the Central Bank, and coincidentally the ouc-rupee note, which had acquired great popularity before it was discontinued on the ground of economy, shall be reissued. The legal obligation on the Central Bank will be to give legal tender money, either notes of smaller denominations or silver rupers, at its option, but it will be the duty or the Bank to supply rupces freely in such quantities as may be required for exculation, and of the Government to furnish the Bank with such coin The currency position is such that the change in the legal status of the note will be unfelt India is suffering from a surfeit of rupecs, the total volume of which is estimated at approximately Rs 400 crores There are Rs 85 crores of sliver coin and bullion in i eserve The whole tendency will be in the direction of a return of rupees to the reserve rather than to an appetite therefor Not only will there exist the fullest capacity to supply rupees on demand, but there will be a positive inducement to the eurrency authority to encourage a demand for rupees in order to get rid or its redundant stock. It is clear that the present opportunity of freeing the currency authority from the dependence on the silver market which has hampered India for so many years is exceptionally favourable, and should be seized without heatation"

The reception of the Report followed very closely the lines indicated as probable in the article in The Bankers' Magazine which we have quoted extensively above. There was a considerable protest, strongest in Western India but shared in other parts of the country, against the proposal to stabilise the rupee at one shilling and slypence and a demand for a reversion to one and fourpence There was, particularly in Bombay, a reluctance to agree to the estab lishment of the Reserve Bank, coupled with the desire that the Imperial Bank of India should be re moulded in order to make it the Central Bank, with the functions proposed to be remitted to the Reserve Bank These voices were so ted to the Reserve Bank loud that they overbore the consideration of the basic recommendations of the Report, a true gold standard and the establishment of an organi sation winch would hink currency with credit

In August 1926 the Government published the text of a Bill designed to fix the ratio at one and six and to support it by the sale of bullion on the lines laid down in the Report At the request of a large body of opinion in the Legislative Assembly, which urged that there had not been time to study the Report and that the papers "c" not available, the discussion of this mea-

"After considering the report of the Royal Com mission on Indian Currency and Finance, the Secretary of State for India in Council in agree ment with the Government of India, is prepared to accept as a whole the recommendations of the Commission, subject to such further consideration of details as may prove to be necessary The nc cessary legislation to give effect to these recom mendations will be introduced in the Indian Legislature during the forthcoming session "

The New Ratio -So far from closing the discussion, this notification intensified Feeling ran high on the subject of the ratio, considerable interests in the country being convinced that one shilling and sixpence was a higher rate than the manufacturing and agricultural industries could bear without prolonged and disastrous readjustment These found strong expression when the Bill to give effect to the new rate was brought before the Legislative Assembly in February-March 1927 The Indian Currency Bill was, however, accepted by the Assembly by a small majority, and adopted by the Council of State It established the ratio of one shilling and sixpence by enacting that the Government would purchase gold at a price of twenty-one rupees three annas ten pies per tola of fine gold in the form of bars con taining not less than forty tolas and would sell gold or, at the option of Government, sterling for immediate delivery in London at the same price after allowing for the normal cost or transport from Bombay to London A rate force of the selling five percentages. of one shilling five pence forty-nine sixty-fourths was notified as Government's selling rate for sterling to meet these obligations

Exchange has since remained stable at the one and supenny rate World trade depression in the slump of 1930 made it increasingly difficult for the Government of India to maintain the statutory ratio, but their difficulties were solved when Great Britain went off the Gold standard in September 1931, and the rupee was linked to sterling Since then, large exports of commer cial and hoarded gold from India have served to keep the exchange ratio stable, despite much agitation for a reversion to the Is 4d ratio by Generally speaking, the ten interested parties dency in the last ten years has been for the rupee to be worth more than 1s 6d, and thus Govern ment have found no difficulty in maintaining a stable cychange Since the outbreak of the war in September 1939 official restrictions on ex change operations have perforce increased and caused some inconvenience to businessmen the rupce continues to maintain its strength and there is little doubt that, left to itself, it would approrlate in terms of foreign currencies rather than depreciate

Developments During 1943 44 -The year under review witnessed a further large expansion in note circulation, although at a more moderate rate than in 1942 43 The annual rate of increase during the year 1943 44 declined to 37 per cent as compared with 60 per cent in 1912 43, which wis the highest recorded figure either in this war or the list, and 59 per cent in 1941-42. The total amount of notes legal tender in India stood at Rs 894 84

I cluded in the above is the sum of Ma 6 13 63 0-0 bein the book value of Dead stock now in enemy occupied territor I cludes Lash and Short-term Securities.

TOTAL LIABILITIES

THE RESERVE BANK

The following Act of the Indian Legislature or a scheduled bank, or a corporation received the assent of the Governor-General on pany incorporated by or under an Act of March 6, 1934, and is known as the Reserve ment or any law for the time being in any part of His Majesty's Domini

Whereas it is expedient to constitute a Reserve Bank for India to regulate the issue of bank notes and the keeping of reserves with a view to securing monetary stability in British India and generally to operate the currency and credit system of the country to its advantage,

And whereas in the present disorganisation of the monetary systems of the world It is not possible to determine what will be suitable as a permanent basis for the Indian monetary system.

But whereas it is expedient to make temporary provision on the basis of the existing monetary system, and to leave the question of the monetary standard best suited to India to be considered when the international monetary position has become sufficiently clear and stable to make it possible to frame permanent measures,

It is hereby enacted as follows -

- (1) A Bank to be called the Reserve Bank of India shall be constituted for the purposes of taking over the management of the currency from the Governor-General in Council and of carrying on the business of banking in accordance with the provisions of this Act
- (2) The Bank shall be a body corporate by the name of the Reserve Bank of India, having perpetual succession and a common seal, and shall by the said name sue and be sued

Share Capital -(1) The original share capital of the Bank shall be five crores of rupees divided Into shares of one hundred rupees each, which shali be fully paids up

- (2) Separate registers of shareholders shall be maintained at Bombay, Calcutta, Delhi, Madras and Rangoon, and a separate issue of shares shall be made in each of the areas served by those registers, as defined in the First Schedule, and shares shall be transferable from one register to another
- (3) A shareholder shall be qualified to be regis tered as such in any area in which he is ordinarily resident or has his principal place of business in India, but no person shall be registered as a
- domiciled in India and either an Indian subject of His Majesty, or a subject of a State in India, or
- (b) a British subject ordinarily resident in India and domiciled in the United Kingdom or in any part of His Majesty's Dominions the government of which does not discriminate in any way against Indian subjects of His Majesty,
- (c) a company registered under the Indian Companies Act, 1913, or a society registered under the Co operative Societies Act, 1912, than one-fifth of the number of shares ass or any other law for the time being in force in to the register, the Central Board shall alio

government of which does not discrimi any way against Indian subjects of His I and liaving a branch in British shall be registered as a shareholder entitled to payment of any dividend share, and no person, who, having bee registered as a shareholder, ceases to be fled to be so registered, shall be able to e any of the rights of a shareholder ot than for the purpose of the sale of his sh

- The Governor-General in Council si notification in the Gazette of India, spec parts of His Majesty's Dominions whie be deemed for the purposes of clauses (b) of sub section (3) to be the Parts of His Me Dominions in which no discrimination Indian subjects of His Majesty crists
- The nominal value of the shares ori assigned to the various registers shall follows, namely -
- (a) to the Bombay register—one ht and forty lakhs of rupees.
- (b) to the Calcutta register—one hu and forty-five lakhs of rupees,

In the Indian Colnage Act, 1906, for section 11 the following section shall be substituted,

namely —

"11 Gold coins, coined at His Majesty's Royal Mint in England or at any mint established in pursuance of a proclamation of His Majesty as a branch of His Majesty's Royal Mint, shall not be legal tender in British India in payment or on account, but such coins shall be received by the Reserve Bank of India at its offices, branches and agencies in India at the builton value of such coins calculated at the rate of 8 47512 grains troy of fine gold per rupee"

The Indian Paper Curreney Act, 1923, the Indian Paper Currency (Amendment) Act, 1923, the Indian Paper Curreney (Amendment) Act, 1925, and the Currency Act, 1927 are hereby repealed

In sub section (3) of section 11 of the Indian Companies Act, 1913, after the word "Royal" the words "Reserve Bank' shall be inserted

The Reserve Bank began work with the opening of the fin includy ear 1935 36. The Bank made a net profit of Rs. 53,42,100 for the year ended December 31, 1936.

# REPORT FOR THE YEAR ENDED JUNE 30th, 1944

The report of the Central Board of Directors of the Reserve Bank of India for the year ended June 30, 1944 states that after payment of expense of administration and provision for sundry habilities and contingencies, the net profit amounts to Rs 10,26 57 810 7 11 Of this amount, a sum of Rs 20,00,000 will be utilised for payment to shareholders of a dividend at the rate of four per cent, the maximum dividend permissible under the Ordinance issued by the Government of India on June 30, 1943, leaving a surplus of Rs 10,06,57,810 7 11 for payment to the Central Government The net profit is higher than in the previous year by Rs 2 57 crores owing to a marked increase in the interest-bearing assets of the Bank, and constitutes a fresh record

The total number of shareholders declined further during the year from 49,402 to 48,292. The number of shares on the register of the Calcutta area remained practically unchanged while those on that of the Bombay area continued to increase.

### Notes and Coins

It was announced on November 22, 1943 that Bank Notes bearing the signature of Mr (now Sir) Chintaman D Deshmukh would be issued shortly, and the notes actually issued during the year were of the denomination of Rs 2, Rs 5, Rs 10 and Rs 100 No alterations were made in respect of the pattern, size or colour of the notes issued during the accounting year As a measure of additional protection against counterfeiting, the Central Government directed that the design of the quaternary four anna coin struck at the Mints with effect from August 1943, shall have the same security edge as the new quaternary rupee and half rupee coms

graphle transfers for merchant business remained unaffected at 1sh 5 31-32d. The net purchase of sterling by the Bank, during the year endernine 30, amounted to £101,193,921 4-10 a compared with £97,739,331-80 in the preceding year. Repayments inade by the Secretary of State on account of recoverable war expenditure and purchases made on behalf of Hi Majesty s and Allied Governments, after deducting the sterling requirements of the Centra Government and the Government of Burma, left a new credit in favour of India of £162,685,000 at the end of the year as against £235,975,000 at the end of the previous year.

# Exchange Control

Remittances of foreign exchange continued to be restricted. With the easing of the U.S. dollar position, American firms were allowed to remit their profits in full and amounts blocked on account of the infringements of the import trade control regulations were released. Restrictions on remittances in certain other currencies were also relayed to a limited extent. To prevent unauthorised travelling, the Government of India on July 17, 1943 issued a notification prohibiting any person from proceeding outside India without a written permit issued by the Reserve Bank, but the restriction did not apply to persons proceeding to countries adjoining. India or to Iraq, Arabia, British East Africa and the United Kingdom.

### Government Loans

A number of new loans, in addition to ruper counterparts of 31 per cent undated paper and special issues of some of the existing loans, were floated during the year under review. The Post Office Ten year Defence Savings Certificates were replaced from October 1 1943 by the more attractive Twelve Year National Savings Certificates, particularly to appeal to the small investor.

A further issue of the three per cent Loui 1963 65 for Rs 15 erores was made on July 3 1943 From the same date the Fourth Defence Loan, 3 per cent 1953-55, was issued This loan was eventually closed on March 31, 1944 Ludy in August, Government unquinced that to assist in the funding of the habilities connected with the requisition of the 21 per cent and 3 per cent undated sterling stocks, rupee counterparts of the 31 per cent undated paper would be created upto the aggregate value of these two loans and would be sold through the Reserve Bank In October, Government floated the 3 per cent Loan 1966-68 for Rs 25 crores and in January 1944 they erented a special issue of Rs 50 erores of this long Later in the year, the 3 per cent Victory Loan repayable at par on September 1 1957 was issued from April 1 In June Government announced the creation of a special issue of Rs 50 crores of the existing 27 per cent 1948 52 In addition, Five-Year Interest-Free in the previous 12 months, and Rs 932 49 erores since the beginning of the war Tho total holdings as on June 30, 1944 amounted to Rs 1,002 07 erores

fact that 6,000,000 acres of additional lands have come under irrigation in the last 20 years Twenty-five years ago in this countrythe second largest producer of raw eotton in the world-long staple varieties of cotton were ilmost unknown The position at the ontbreak of the present war was that the Indian textile industry was meeting a considerable portion of its long staple requirements from indigenous production The improvement in the quality of the erop was accompanied by an increase in the average yield per acie of the order of The record 30 per cent during the same period of jute has not, however, been one of uninterrup ted progress The steeper fall in the prices of raw jute during the world depression, accompanied by a cut in acreage, was estimated to have reduced the meome of the average jute grower by about two thirds. The plight of the

cultivator no doubt improved later but the difficulties of the jute manufacturing industry resulted in a fall in the consumption of raw jute and this nocessitated a large measure of

State control in regard to the area under this erop The progress of sugarcane cultivation was limited solely by the capacity of the internal

consumption of sugar to increase The estimated production of cane in 1924-25 was less than 30 million tons, but by 1936 37 it had exceeded

67 million tons This turned out to be far in excess of the effective demand and the manu facturing industry was in a state of over-production. As a icsult, the production of cane came down to the low level of 36 million

tons in 1938 39, but it improved to 48 million tons in the next year. A large proportion

India is pre eminently an agricultural country

If we look back on the course of agriculture

though a silent and steady progress towards industrialisation has been going on during the

over a long period of years, we shall note a striking development towards stability. In the

days that are past, the outturn of the soil was

subjected to periodic shocks from famines

arising from the failure of the rains, when the

export trade in these staples dwindled to small

produced a great change, and though no doubt

in future heavy losses may be lneurred from

the weakness of the monsoons, they are never

likely to be as catestrophic as in such years as 1896 97 and 1899 1900 It is a well known

But the spread of irrigation has

last quarter of a century

proportions

of the total area under sugarcane in Indla is now devoted to the improved Combatore varieties with a yield per aere higher than that of other varieties by more than 30 per eent one agricultural commodity whose fortunes were not appreciably affected by the world depression was groundnut. A quadrup ling of the area and a proportionate increase in output in the course of two decades is a record which is not shired by any other crop This phenomenal increase in acreage is explained as due to the highly remunerative nature of the The greater part of the increased production was exported, in the result groundnut had steadily displaced the other offseeds from the

India had become first among the groundnut exporting countries of the world

This story of continued progress has to be spring up to utilize the products of the blat varied somewhat in relation to the production furnaces and mills. The real growth of the

export trade of India and moreover by 1939

to substitute other crops for rice was greatly accentified by the availability of an abund in supply of cheaper varieties of imported rice The results of research have been applied with much greater success in the ease of wheat About a third of the total area under whea has been brought under improved erop and u the course of 20 years the total output of whea has increased from 6,000,000 tons in 1920 2 to 8,000,000 tons in 1940 41. The cost o production in India, however, remained very high in comparison with the other wheat producing countries of the world and the India wheat grower was hit so hard by the full in the world prices of wheat during the depression that in his interest a protective duty had to be imposed on imports of wheat The experience of the other cereals, parti cularly millets, was more or less similar to that of rice The millet crops he concentrated in areas of very poor rainfall and it is in sucl areas that any improvement in cultivation r of peculial difficulty Thus while India's economy is essentially agricultural, she ranks as one of the eight greatest industrial countries of the world pace of industrial development since the early twenties of this century has been greatly accele rated by the policy of active assistance pursued by the State both by way of granting tariff protection and of giving preference to the products of Indian industry in purchasing Government requirements. The prospect of continued Government help and the antierpation of handsome profits encouraged a rapid flow of private capital into industry New capital invested in joint stock enterprise alone in the inter wal period was something like Rs 150 eiores Among the inport industries, the largest is the eotton textile industry which has its home in Bombay City, with important subsidiary centres at Ahmedabad, Sholapun and Nagpur The period intervening between the two wars san

The output of rice has obst

nately refused to improve in spite of the besefforts of the Agricultural Department Abou

41 million acres of rice land were brought unde

improved varieties but this has no perceptible

effect on the total production, actually, the output declined by something like 10 per cent

as between 1920 21 and 1940 41 The tendence

of foodgrains

from 227 to 355, the number of spindles from 6 2 millions to 8 4 millions and the number of looms from 109,000 to 168,000 The output of varn more than doubled in weight and the output of piecegoods nearly trebled in length Raw jute is a virtual monopoly of Bengal and the jute mills are concentrated in and near Calcutta The industry had to face numerous difficulties during the past 25 years, but in the period taken as a whole the industry did show a fair degree of improvement The metallurgical industry is of more recent growth and is greatly fostered by State encoura gement

such a good progress that the share of imports in the cloth requirements of the country decreased

from about four-fifths to much less than a fifth In the same period, the number of inlis inercased

operations of the Alhed forces against Japan, particularly following the establishment of the South East Asia Command in 1943, has led to this country being called upon increasingly to draw on her resources of manpower and materials The progressively mounting for war purposes defence expenditure and the steady merease in disbursements on behalf of the Allied countries on account of supplies and services are indications of the magnitude of India's war effort and the strain on her financial and physical These disbuisements include both resources war expenditure recoverable from His Majesty's Government and the cost of supplies to the forces of the United States under reverse Government outlay both on revenue and cipital accounts in the four years 1940 41 to 1913-44 amounted to Rs 1,712 crores of which the amount recoverable from His Majesty's

Government totalled Rs 966 crores Under the stimulus of the war, employment and wages, both industrial and agricultural, continued to increase The year under review witnessed a further large expansion in note circulation, although at a The annual moderate rate than in 1942 43 rate of increase during the 1943 44 declined to 37 per cent as compared with 60 per cent in 1942 43, which was the highest recorded figure either in this war or the last. The total amount of notes legal tender in India stood at 804 84 crores at the end of 1943 44 as compaled with Rs 655 11 crores at the end of the previous year, and the average circulation for the year was Rs 777 17 crores as against 513 44 crores in 1942 43 The active circulation increased from Rs 643 58 crores it the end of 1942 43 to Rs 882 49 crores at Of the total absorption the close of 1943-44 of Rs 710 13 crores of notes since September 1, 1939, when the active circulation of notes in India stood at Rs 172 36 eroies, the year under leview accounted for Rs 238 91 erores of 34 per cent Cheque clearings recorded in unprecedented mercase of 56 8 per cent compared with a use of 49 1 per cent in demand deposits and as a result the ratio of cheque clenings to demand deposits, which had been progressively deelin

was threatened by impaway prices was countered by resolute measures of physical and financial controls with the object of restoring the price Jevel to a wirtine norm The Leonomic Adviser's index number of wholesale prices lose to the record level of 241 7 in June 1943 and tended to move downward and fluctuated narrowly between 210 8 and 235 7 during the lest of the very Bombit's working class cost of living index number advanced from 208 to 247 it the end of December 1943 and stood

showed a slight rise to 9 5 in 1943 44

and reached Rs 141 8 on March 29, 1944 follow ing the news of the Japanese movements on the borders of Assam

The most serious problem affecting the country during the year was that of foed Series of measures including the institution of statutory price control over the major foed grains and the introduction of rationing in all towns with a population of over 75,000 were taken to counteract the food situation which was particularly acute in Bengal, Bihar, Travau core, Cochin and Malabar In Bengal familie conditions prevailed for some months

Simulteneously, measures were taken to regulate the distribution and prices of essential goods, to increase production and check speculation. The two notable measures taken in this connection were the Cotton Cloth and Yarn (Control) and the Hoarding and Profiteering Prevention Ordinance It is claimed that the former order has been successful in reducing cloth prices by 30 to 40 per cent and in increasing supplies to consumers, while the latter has helped to cheek the rise in the general price level which has remained stabilised since June 1943 With a view to reducing the purchasing power

the year to attract idlo money into Government Further measures were taken to speed up the assessment and collection of taxes, and in 1944 45 budget, measures were introduced for the payment of income and excess profits ta\ at quarterly, instead of yearly, intervals In addition, from August 1943 onwards, the Reserve Bank commenced selling gold in order to absorb surplus funds Trade —The direction Balance of composition of foreign trade on private account

continued to be determined mainly by the

of the masses, sustained efforts were made during

exigencies of the war, but the quantum has declined from pre war levels owing to handicaps in the form of shortage of trinsport, and of unstituted counter-blockades blockades nnd by the belligerents The favourable develop ments in the progress of the wir during the year under review led to a marked improvement in the trading opportunities of the Allied nations, ing from 16 7 in 1939 40 to 9 1 in 1942 43, but the increasing demands on shipping to supply the invasion armies limited the expan The disruption of national economy, which sion of trade on private account

This review marks another waitime year of statistical black out which renders the task of undertaking an chiborate neview impossible The review is bised on the provisional figures published in Accounts relating to the sea borne trade and unvigation of British Indla which is being issued in an abridged form The table below carries forward by another

verr the comparison of the trade in merchandisc of Indla (excluding Burma, on a post separation basis) during the war years and the pre-war year with the figures for the corresponding years of the last war, though the significance of such comparison diminishes as the pre-war the record level of Rs 65 4 in July and closed the very at Rs 73 12 on March 31, 1944 as the very at Rs 73 12 on March 31, 1944 as the very at Rs 73 16 at the end of the previous base recedes in view of the vastly different put (In erores of rupees)

In the year under review, the value of imports ! of raw materials continued to increase while manufactured articles decreased Exports of both raw materials and manufactured articles registered increases The category 'Food registered increases The category 'Food includes 'drink and tobacco', and both imports and exports under this head remained at sated for the reduction in grains and pulses

practically the same level as in the previous The large imports of wheat made to meet the food shortage in the country were on Government account and are not shown regard to exports under 'Food' the increase in the value of tea shipments more than compen

# II—IMPORTS OF MERCHANDISE

A further cut in quantity, but a slight improve ment in value was the feature of the import trade of British India in 1943-44 The course of trade was influenced by the need for conserving the shipping space and using the dollar balances for buving the absolutely necessary goods and by the ability of the overseas suppliers to meet the demands The import trade control was consequently tightened further in the year cent of the value of total imports

Out of Rs 119 crores of imported under review material in 1943 44, imports of olls amounted to Rs 36 erores, cotton and cotton goods Rs 19 crores, machinery Rs 11 crores, dyes Rs 8 crores, chemicals Rs 5 crores, wool, raw and manufactured, Rs 4 crores and metals and ores Rs 4 crores These seven items accounted for imports of Rs 87 crores representing 73 per The following table shows the comparative in portance of the principal rate es imported

THE PURPOSE IN SUCCESSION vards valued at Rs 9 laking The decline in imports of cotton plecegoods; was share I by all the three principal categories of pices, only imports of preveloth were reduced to a nominal figure of Rs. 4,071 in 1913 14 as against Rs. 1,27,014 in 1912 13 and Re 1.05 lakhs in 1941 42 Arrivals of white goods amounted to a little over Rs 7 lalins as compared with Rs 2 lalie in 1912 13 and Rs 1,12 lakhs ln 1941 42 Coloured, printed or dyed goods declined from Re 16 lallis in 1912 13 to Re 17 lal he in the following verr, while their value for 1941-42 amounted to Rs 2 28 14klis Among greys, dhoties, sarles, ind serves, jaconets and mulis, and long cloth shirting and sheetings practically ceased to come from abroad following the stoppinge of In the case of white goods trade with Japan dhotles, sarles, nainsooks and checks could not be had from abroad. The declines were wide sprend, but there was unite searcity of dhoties The willable supply of cloth for and sarles home consumption declined substantially during the year and had its idverse effect on the per capita consumption of cloth which was estimated it 13 75 yards for 1942 43 as compared with 17 47 yards ln 1938 39

Imports of hosiers, including knitted fabrics were reduced to Rs 19,253 as against Rs 84 596 in 1942 43 and Rs 10 laklis in 1941 42. The United Kingdom was the main supplier

Raw Cotton (Rs 17,53 lakks)—Imports of foreign cotton in 1943 41 totalied 420,100 bales valued at Rs 17,53 lakks as compared with 490,600 bales valued at Rs 15,42 lakks in 1942 43 and 770,100 bales valued at Rs 15,34 lakks in 1941-42 The decime in quantity was more than counterbalanced by the rise in the prices

With a view to avoiding scramble between buyers for foreign cotton and to ensure a steady flow of supply, the Government of India introduced, in consultation with the Egyptian Government, a system of controlled buying The scheme regulated not only the purchases, but also provided for illocations to the various mills on the basis of their actual requirements and quantities available in Egypt Purchases of high quality types were made by the Co ordinating Committee in a pool from which allocations were made to India from time to Though no quantitative figures were available about imports owing to black out for security reasons, the trade estimates for the cotton year ended August 31, 1944 placed imports of Egyptian cotton at 235,000 bales representing a cut of 27 per cent over the preceding year, while those of Soudanese and East African varieties were estimated at 80,000 bales and 120,000 bales being 120 per cent and 10 per cent higher than the previous season

Wool, Raw and Manufactured (Rs 4,47 Lakhs)—The combined imports of raw and manufactured wool were vilued at Rs 4,47 lakhs in 1943 44 is compared with Rs 3,78 lakhs in the preceding year and Rs 4,70 lakhs in 1941-42. The recovery was entirely attributible to the sharp increase in imports of raw wool which were valued at Rs 4,02 lakhs as agunst Rs 2,96 lakhs in the previous year and Rs 2,77 lakhs in 1941 42. On the other hand,

lates in 1911 44. Fire were valued at Pa 62 lakes in 1931 42. Woollen shaws and looks which used to occupy an important place in the trade disappared from the first with the extroit Tapan from the field. As usual, Australia us the main supplier of ray wool and was able to maintain the quantity almost at the previous trasslated of 19.4 million is, while the import trade in woollen precessed was shared between New Zealand and the United Kingdom.

Silk, Raw and Manufactured (Rs 62.041) -The trade in the line, like the artificial silk, was virtually paraly and by the extension of the war to the lar last, the main source of supply of these goods. The total value of silk, raw and manufactured, amounted to Rs 62 041 as compared with Rs. 3 lakha in 1942 43 and Rs 140 lakhs in 104142 Imports of raw sill which had declined sharply from 16 million lbs to 20 000 lb in quantity and from Rs 81 likhs to Rs 2 likhs in vilne in 1942 43, were reduced further to Rs 25 127 in the year under review. The whole supply was received from China Import of sill viru were practically nil as compared with 1's 59,000 in 1912-43 and Rs 17 likhs in 1911-12. On the other hand, imports of sill piecegoods were able to register a small recovery in value from Rs 13,540 in 1942 43 to Rs 29,420 in 1943 44 after the last vear s fall from Re 33,34,430 in 1941-42

The outbreak of the wir ignist Japan brought to the forefront the importance of the Indigenous silk industry for the Allied war effort with the result that the output of India silk lose from 15 lakhs lbs to 25 lakhs lbs

Iron and Steel (Rs 2.03 lakks)—Imports of iron and steel dropped further during the very under review. Their value in 1941 was Rs 6,30 lakks. Imports shrank to Rs 2,81 lakks in the following very and were reduced still further to Rs 2,03 lakks in 1943 44. In terms of quantity, the imports were 128,600 tons in 1941 42, 48 600 tons in 1942 43 and 46,800 tons in 1943 44. Of these, protected iron and steel accounted for 58,100 tons, 22,900 tons and 8,600 tons respectively. The highest imports for the past 25 years were recorded in 1928 29 when they amounted to 1,170 000 tons valued at Rs 20,21 lakks.

Imports of bars and beams, channels, pillars, girders and bridgework steel were the worst to be affected Steel bars were valued at Rs 3,13,211 in 1943 44 as against Rs 7,85,555 in 1942 43 and Rs 22,88,594 in 1941 42 Beams and allied steel imported in the year under review were valued at only Rs 3,259 as compared with Rs 1,33,118 in the preceding year and Rs 2,21,526 in 1941 42 Pipes and fittings, however, behaved better Their imports were valued at Rs 5,75,644 as against Rs 5,75,613 in 1942 43 and Rs 7,31,981 in 1941-42 The value of imported sheets and plates was sharply reduced by 94 per cent from Rs 64 lakhs in 1942-43 to Rs 4 lakhs in 1943 44 compared with as much as Rs 1,04 lakhs in 1941-42

The continuous decline could be traced to the stricter control over imports instituted towards the end of December 1940 in order to ensure that unreasonable demand for steel on

b ports of jute m n f ctur in J ding t ist. The 1943 44 jute sou ended Jun 30 w s and 3 m moi ted t 634 49 tons valued at not his for the e Import at jucid nts n mely R 49 46 lakhs in the year under r si w as comm [1] the large American order for 0 c ores of

vards withing 918 000 tons representing an approximate cut of 34 per cent. In the previous season's production level. The decline was mainly in respect of hissians and the manufacturing activity was lift all round by coal shortage which forced the Indian Intermilist Association to enforce measures for reducing the output.

Exports of jute manufactures were smaller than last year but considering the output, the clearances were satisfactory. Shipments of hessians declined from 1.528 million yards to 1,095 million yards while those of sackings shrank from 3.88 million yards to 102 million yards. India's big overseas enstoners during the year were the I.S.Y. Argentine and the

United Kingdom

The output of raw jute during the year was 69 5 laklis bales being about 20 5 laklis bales less than the preceding season. The decline was attributable to the better return from food A notable feather of the sesson was that the flow of raw inte from the mofusell centres to Calcutta dld not show the bulge that normally appears in the last quarter of the eilender year The owing to transport difficulties supply as illable for the season was 113.8 lakhs bales including the above figures for the current ontput and 44 3 labbs bales being the carry over from the preceding season Out of this, into mills consumed 51 I likhs bales though their purchases totalled 58 likhs biles or 83 per cent of the new erop. Exports totalled 9.7 likhs bales, while the nu-cellaneous consumption was placed at 10 lakhs biles so as to bring the total absorption for the season to 71 1 laklis Thus the serson crine to an end with an estimated earry over of 42 7 laklis bales

Prices of both raw jute and jute manufactures were influenced by the fixation of collings first by the Indian Jute Mills Association and later on by Government On the whole, they were higher than in the previous year Manufactured jute prices had small variations than the raw inte prices with the result that the average ratio between the two was higher in the season under review The average index number for raw jute prices rose from 122 m March 1943 to 129 in July and then declined to 108 by October, and closed at 129, the highest level for the year, in March 1944 The index number for jute manufactures moved within a narrow range registering an advance of 10 points during the vear

which was wound up at 200

Cotton, Raw, (Rs 6,36 lakhs)—A further deeline in the export trade in raw cotton was registered during the veir 1943 44 for which the shipments totalled only 281,500 biles as compared with 301,000 bales in the preceding year and as much as 1,437,500 biles in 1941-42. The value, however, showed substantial improvement, for it amounted to Rs.636 lakhs in the year under review compared with Rs 3,64 lakhs in 1942-43 and Rs 15,94 lakhs in 1941-42 62 per cent of the output was of staple length of 7/8 inch and above as against 60 per cent in 1942 43 and only 36 per cent in 1940 41

The net under cotton crop in 1943 44 season was officially estimated at 20,398,000 acres compared with 19,203,000 acres in the preceding

Hydraibad State brought substantially area under cotton cultivation but the was partially mullified by the heart curta of area under cotton in the rest of the growing areas owing to the grow more employed.

The genson's supply of Judian cotton I lux the carry over from the preceding sea 3 708,000 bales, amounted to 8,802,000 Ont of this, the Indian cotton textile in consumed 4 125 000 bales, exports to f countries totalled 300,000 bales, and the cellineous consumption in the country placed at the now proverbial figure of 3 bales, leaving an estimated earry of 4,027,000 bales at the end of the season cording to the Judian Central Cotton Counhowever, the figure of carry over should been 4,711,000 bales

Lorward trading in Indian cotton came standstill on May 17, 1943. On that dr July contract touched Rs 673 per cand brisk speculative buying and as inflation with the result that the decision of the Ia Member to give a few days for squaring the transactions brought down the contra Rs 568 Triding was resumed on Octob with several safeguards including the rig Government to buy it the floor prices in of Rs 400 for the Indian cotton contract to regulation cotton at the eeding prices Rs 550 as the ceiling for the same coul The January contract opened at Rs 471, aded to Rs 480, sigged to Rs 436 In the week of November and then made a succe bid for Rs 485 in January - The March and contract started downward journey there and the end of the serson saw the market s gling around the floor prices following the int erop movement

Cotton Manufactures (Rs 42,48 lakh Exports of cotton varu and manufactures which had Improved from Rs 35,96 lakh 1941-42 to Rs 46,19 lakhs in the followear, shrank in 1943 44 to Rs 42,48 lakhs terms of quantity, exports in the year in review totalled 461 9 million vards as aga 819 1 million yards in 1942 43 and 772 5 mil vards in 1941-42 Shipments of cotton, twith yarn, were valued at Rs 3,15, lakhs in the under review compared with Rs 3,82 lakh the preceding year and Rs 7,30 lakhs in 1941 Shipments of cotton piecegoods, which advanced from Rs 26,48 lakhs to Rs 38 lakhs, settled down to Rs 36,49 lakhs in year under review

The Indian eotton textile indistry wor during the year under Government coat. The year was one of the downward trend prices and was notable for record produced in spite of the occasional interruption of activation of the coal shortage. Since the introduct of the control on June 17, 1943, the control prices were reduced by neith 40 per count the consumer did not get much benefit of reduction and the good portion of the indistroutput was passed on to the black market.

## Motor Vehicles in British India and The Indian States.

The number of motor velucles on Indian roads, which had increased steadily until on January 1 1939, there were 177,188 vehicles in buted evenly throughout the provinces British India and the Indian States, has since The actual figure of motor vehicles in operation throughout the country on March 31, 29,760 1940, was 174,077

This decline is undoubtedly the result of wir time conditions. Since the outbreak of war the motor import trade has been seriously affected shipmonts from the United Kingdom being held up, while deliveries of vehicles from the United States of America are affected by dollar exchange difficulties Furthermore, the price of petrol has risen appreciably since the outbreak of war and this has doubtless driven a number of older vehicles off the roads

The total number of vehicles in British India on March 31, 1940 was 141,577 out of which 89,253 were private cars, 5 535 taxis, 23,851 buses 14,336 lorries and 8,602 motor eyeles

The general decline in the number of me vehicles in operation was not, however, dis while in Boinbly the number declined from 31,736 to 27,880, in Bengal it rose from 28,375 This province had the largest numi of vehicles in operation Madris, which had third largest number, remulaed practical stationary with a total of 21,585 The Unit Provinces fell sharply from 17,119 to 14,6 while the Punjab rose from 12,950 to 13,372

### Motor Vehicles in Indian States

Complete figures showing the number of m vehicles in Indian States ire not available. I States vary in size from 19 sq miles, to Sta like Hyderabad with an area of 82,698 sq m (as large as Italy) Hyderabad State still her the list of motor vehicles but its total dropp sharply from 8,232 to 5,739 Travancore, the other hand rose from 3,000 to 5,307 must be emphasised that these figures are official and not necessarily complete

The following tables show the number of motor vehicles of all classes in operation in the different novi ces of British India and in the Indian States as on March 31 1940 ---

## The Press.

at the end of the same derapaper was started in Cal-llshman in January 1780 and a third has elapsed ing period certainly, a period y the life of a single newswhich came into existence ter in 1785, but then the premacy is not much longer, i at Plassey, only twenty
r Bombay followed CalMadras did not lag much
he first Bombay newspaper nbay Herald, followed next bay Courier, a paper now the Times of India with amated in 1861 In Bomhay press may be said to have sh occupation of the Island as the case in Calcutta In sh were on sufferance hefore lombay they were absolute, and it is somewhat strange an should have thought of er during all those hundred ars before the actual advent

aper was called The Bengal ctter known from the name Hicky's Gazette or Journal ioneers bad to suffer for his though the fault was entirely ade his paper a medium of andal, and he and his journal public view in 1782 Several liowed Hicky's, though they The copy its had example id a career of over half a 1833 It was merged into the which came into existence and hoth are now represented aily News with which they I ln 1866 No fewer than No fewer tban ed in as many years, the 1780, and one of these, The arted in February 1784, under age of Government, flourishes al gazette of the Bengal

cate of European merchants imenced the publication of last, a daily paper which was tory opinion in India and the Press generally in the ration and restraint. The

Press in India is an essentiation and was introduced and pursued a policy of discouragement and pursy taken in land by the In 1773 was passed the ating the Governor-General-reme Court in Bengal and at the end of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the same decrease of the sam rigorous control Government objected to news of apparently the most trivial character affecting its servants From 1791 to 1799 several editors were deported to Europe with out trial and on short notice, whilst several more were consured and had to apologise! At the commencement of the rule of Wellesley Government promulgated stringent rules for the public press and instituted an official censor to whom everything was to be submitted before publication, the penalty for offending against these rules to be immediate deportation These regulations continued in force till the time of the Marquis of Hastings who in 1818 aholisbed the censorship and substituted mider rules.

> This change proved beneficial to the status of the press, for henceforward self-respecting and able men began slowly but steadily to join the ranks of journalism, which had till then been considered a low profession Buckingham, one of the ahiest and best known of Anglo-Indian journalists of those days availed himself of this comparative freedom to criticise the authorities, and under the short administration of Adam, a civilian who temporarily occupied Hastings' place, he was deported under rules specially passed But Lord Amherst and stil more Lord William Bentiuck were persons of broad and liberal views, and under them the press was left practically free, though there existed certain reguiations which were not enforced, though Lord Clare, who was Governor of Bombay from 1831 to 1835, once strongly but In vain urged the latter to enforce them Metcalfe, who succeeded for a brief period Bentinck, removed even these regulations, and brought about what is called the emaneipation of the press in India 1835, which was the beginning of a new era in the history of the Indian press Among papers that came into heing, was the Bombay Times which was started towards the close of 1838 by the leading merchants of Bomhay, and which in 1861 changed its name to the Times of India The Bombay Gazette founded in 1791, ceased publication in 1914 iations which were not enforced, though Lord founded in 1791, ceased publication in 1914

The liberal spirit in which Lord Hastings had begun to deal with the press led not only to the improvement in the tone and status of the Angio Indian press, but also to the risc of the Native or Indian Press The first newspaper in any Indian language was the Samachar Durban started by the famous Serampore Missionaries Ward, Carey and Marshman in 1818 in Bengali, and it received encourage ment from Hastings who allowed it to circulate through the post office at one-fourth the usual rates. This was followed in 1822 by a nearly partial paper in Bombay called the o the Press generally in the ration and restraint The al was altered to The Englishs Stocqueler in 1836.

mencement the press was by the authorities who was laid the foundation of the Native Indian Press which at the present day is by far the largest part of the press in India, numbering over 650 papers

of a very I w papers and owing still m re to paper the first issue h ing lated June " nd the fears of its circulating lot digence with h 18 Prior to and in the lays of the Muliny might be prejudicial to public interests The the most famous paper in "orticer in Indi Act was p sed only for a year at the end of was the Mejurelite originally published at which the press was once more free

From 1835 to the Mailiny the press spread The number of the form r did not show a great to other cities like Delth Agra. Gwellor and ri on the n at generation but the rise in over Labore whereas formerly it was shift if no on and also circulation was salisfactory confined to the Presidency towns. During Passons journal its like Robert had it J m is the Mining life freedom hed to be temporarily Macless and Hurris Mook rif if will hed in controlled by the G gring Act which Canoling this geration. The Ci d and Midda y Gerit Passon less on a second of the liets e was offeningly published in Sein as a weekly On Indi passing to its Crown in 1835 and initial and interest and and other at a for present year of present of the press in Simil the Cred of Milliams for it will be country in which the press participated. There were 10 Anticl-Indian pagers at the and in 18 of the officer of Milliams (and it and its and its officer) and its press of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure of the pressure

#### INDIAN PRESS LAW

in Council and the lirences were issued or other specified classes of publi hed matter retu ed at the discretion of Government. Act including any words or signs tending to seduce XI of 1835 repealed the old Regulations and soldiers or sallors from their all giance or duty Begistration of Books Act and except for an intimidate public ser ants or private individual Act which was in force for one year during the Mutlny there was no further legislation directly fleeting the Press until 18 8 when the Verus cular Press Act was passed That Act was repealed during the Viceroyalty of Lord Ripon Fram th t date until 1907 Government made no attempt to int riere lirectly with the liberty of the Press the growth of sedition being dealt with in other ways by the passing to 1898 of section 1 4A of the Penel Code in fts present form which had been origi ally enacted in 18 0 and by the introduction into the Penal Code of section 153A and into the Criminal Procedure Code of section 108 Thers were a certain number of prosecutions under those sections up to 1907 but the dissemin tion of sedition through the Pre s conti ued In 1996 th hemspaper (Incitement to Offences) Act w a passed which dealt with papers inciting to murder or to acts of viole ee This A t falled to have the desir deffect

be kept within the limits of legitimate discus ion Habilities as the printer and publisher

Before 1835 all printing of books and p per | The Act deals not only with incitements was onliced to licence by the Governor General to marder and acts of violence but also with mersly required registration of the printer and to bring luto I atred or contempt the British made a f w minor requirements. That Act Government any Native Prince or any sec was replaced in 1807 by the present Press and tion of His M jesty a subject in Indi or to

> Repeal of Press Legislation -By ti autnmn of 1917 the Government of India had begun to consider the desimbility of modifying at feast one section of the Press Act to which great exception had been taken on account of the wide powers that it gave Finally after more than once consulting Local Governments a Committee was appointed in February 19 1 after a debate in the Legi latire 'ssembly to e amine the Press and Registration f Books Act 1867 and the Indian Press Act 1910 and r port wh t modifications were required in the existing law That Committee mede an un animous report in July 19 1 recommending -

(1) The Press Act should be repeal d

(2) The Newspapers Incitements to Offences Act should be repealed

(3) The Press and Registrati n of Books Act nd the Post Office Act should be amended where necessary to meet the conclusion noted The Indian Press Act 1910 was measur below () The n me of the editor should of wider scope the mein object of wilch was be inscribed on every issue of a newspaper and to ens r th t the indian pres generally sh uid the editor sh uid be subject to the s me

and views. ment of the aforesald objects Editors' Conference - During 1940 a Con ference of Lilitors was ealled by Mr K Srink vasan of The Handu to consider the Government of India's restrictions on the Press under the Defence of India Act in connection with the Con', gress satyagraha movement The Conference was held at Delhi and formed itself into a body representing the I ditors of Indian newspapers As a result of its representations the Government of India decided to withdraw the restrictions on the Press under the Defence of India Act and to set up in each province a Press Advisory Com

The All India Newspaper Editors' Conference subsequently adopted a constitution with the following aims and objects -(a) To preserve the high traditions and standards of journalism (b) To serve and safeguard the interests of the press in regard to the publication of news and fair comment (c) To seeure all faellitles and privileges to the press for the due discharge of its res ponsibilities (d) To represent the press in India in its relations with the public and public Institutions and particularly in its relations to Government to set up Committees who would aet as liaison between the Government and the press as a whole (e) To establish and develop contacts with Association with similar objects in other countries

Early in July, 1943, Sir Sultan Ahmed announced his plans for the reorganisation of the Infor mation and Broadcasting Department general idea behind the reorganisation was to make the Information Bureau, the National War Front, the Counter-Propaganda Directorate, the Broadcasting Office and the Press Advisory Branch an integral part of the Information and Broadersting Department, instead of attached offices as they formerly were Public men and publicists were to be associated in an advisory eapacity

The Newspaper Editors' Conference had its annual sessions in Madras and Calcutta, rests of members and should presided over by Mr S A Brelvi, in 1944

igress was presented with an turn to parliamentary work in scheme drifted by the British brought to India by Sir Stafford was not availed of The Coned to mother period of harren fference that during tids period lge in any anti-government or , rather did it protest that its reation of a National Govern t and thereby it was prevented the defence of India vigorously

uspended hostilities did not, The failure of the Cripp-In its wake a wave of dis-stration and bitterness which r or later to burst out into And it did Mr Gambil of "Quit India," explaining should transfer all political e power to Indians, reserving n to take measures for the ee of this demand the All Committee authorised Mr t the Vicerov and, falling unch a mass civii disobedience oree the demand

of the session of the AICC ill prominent Congress leaders ustody and detained under the a Rules Their arrest was itrywide disturbances marked ge, arson and looting Govern measures to put down the assumed the dimensions of an ly the end of the year comparaen restored

Ir Gandhi undertook a 21 day against Government's refusai the members of the Congress ee or enable him to examine ges of violence levelled at the ilived the fast in detention, jughout remaining firm in ns release and of facilities to meet him In less thin a opment brought Mr Gandhi Mrs Gandhi, he world again t in the same place is her retim to heart attacks and ebruary 1944 Friends and ebruary 1944 Friends and owed to be present by her ittend her funeral

· Gandhi had a severe attack sed unconditionally "solely ds" As a free man ds" As a free man he did o recover his normal health iths of his release he made Committee m British authority and to the developments veither responded favourably, "The Com once again shrank into his ongressmen outside juls constructive work In to the

r 1941 the satyagrahi prisoners the Congress to consider a new proposal framed. Government whereupon the by Lord Wavell, the Vicerov, in consultation spended. Early in the summer with file Majesty's Government.

The Wavell Pinn sought to set up an interin Government at the centre composed of the people's representatives on the basis of parity between caste Hindus and Muslims but providing for representation to minorities such as the Sikhs and the scheduled custes. The projected central machinery was to function within the framework of the present constitution for the duration of the war without prejudicing the duration of the war without prejudicing the claims of any party in regard to the shape of the future Indian constitution. A conference called by the Vicercy to consider the scheme ended in failure

Meanwhile Britain went to the poics and the war time national coalition Cabinet was replaced by a full fiedged labour Government with an overwheiming majority in Parliament The new Libour Government lifted the ban on the provinces, Congress in the various Indian ordered general elections in India and sum moned I ord Wayeli to I ondon for fresh Waveii to Iondon consuitations

#### CONGRESS DURING WAR

Shortly after the declaration of war Mr. Gandhi made a public statement, in his individual capaelty, immediately after an luterview with the Vicerov Therein he reveried that he had told His Excellence that his sympathies were with England and France from the purely humanity rian standpoint and that he could not could not on "I am contemplate the destruction of London not just now thinking of India's deliverance," it will come, but what will it be worth if Engiand and France fall or if they come out victorious over Germany ruined and humbied?"

This statement created quite a favourable impression in India as well as in Britain, but the Congress Working Committee which met about a week later chose to make India's support to Britain in war conditional on a declaration by Britain that the latter's policy towards tills eountry involved the recognition of Indian Independence The resolution said inter alia

"As a first step to dissociate themselves from the policy of the British Government, the Committee called upon the Congress members of the Central Legislative Assembly to refrain Since then from attending the next session. Since then the British Government have declared India as a beligerent country, promulgated ordinances, passed the Government of India Act Amending Bill and taken other far reaching measures which affect the Indian people vitally and circumseribe and limit the powers and activities of the Provincial Governments

"This has been done without the consent of the Indian people, whose declared wishes m such matters have been deliberately ignored by the British Government The Working by the British Government The Committee must take the gravest view of these

"The Congress has repeatedly deciared its entire disapproval of the ideology and practice of Faseism and Nazism and their glorification of constructive work in the war and violence and the suppression of the ill members of the Congress human spirit. It has condemned the aggression covere set free to enable in which they have repeatedly indulged and

their sweeping away of well established principles; till those conflicts and contradictions are removed and recognised standards of cly lised h haviour It has cen in Fascism and hazism the i tensifi ati n of the principle of Imperiali m ag l et which the Indian people have struggled for m my The Working Committ e must therefore unhesitatingly condemn the I test aggression of the hazi Go ernment in Germ ny against Poland and sympathise with the who resist it

To non and sympathes wild in a wale reaset it.

The Congress has further ! id down that the issue of war a d peace fo India must be decided by the I di n people. No outside authority can impose this decision upon them nor can the Indian peopl p mit their resources to be exploited for Imperi II t ends. Any imposed decision or attempt to use Indian people decision or attempt to use Indian people decision or attempt to use Indian people decision or attempt to use Indian people decision or attempt to use Indian people decision or attempt to use Indian people decision or attempt to use Indian people decision or attempt to use Indian people decision or attempt to use Indian people decision or attempt to use Indian people decision or attempt to use Indian people decision or attempt to use Indian people decision or attempt to use Indian people decision or attempt to use Indian people decision or attempt to use Indian people decision or attempt to use Indian people decision or attempt to use Indian people decision or attempt to use Indian people decision or attempt to use Indian people decision or attempt to use Indian people decision or attempt to use Indian people decision or attempt to use Indian people decision or attempt to use Indian people decision or attempt to use Indian people decision or attempt to use Indian people decision or attempt to use Indian people decision or attempt to use Indian people decision or attempt to use Indian people decision or attempt to use Indian people decision or attempt to use Indian people decision or attempt to use Indian people decision or attempt to use Indian people decision or attempt to use Indian people decision or attempt to use Indian people decision or attempt to use Indian people decision or attempt to use Indian people decision or attempt to use Indian people decision or attempt to use Indian people decision or attempt to use Indian people decision or attempt to use Indian people decision or attempt to use Indian people decision or attempt to use Indian people decision resour es for purposes t pproved by them will necessarily have to hopposed by them

If co op r tion is desired in a worthy cause this cann t be obtained by compulsion and imposition and the Committ e ca ot agree to the carrying out by the Indian people of orders issued hy an external authority Co operation must be between equal by mutu i con ent for a caus which both consider to be worthy

for a case which notes consider to ne worthy the people of Indil I have in the recent people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the people of the such limited freedom as she possesses is taken w y from he
